SUPPLEMENT TO
The Gazette of India.

No. 27.} CALCUTTA, SATURDAY, JULY 7, 1877. {Register No. 33.

OFFICIAL PAPERS.

A SUPPLEMENT *to the* GAZETTE OF INDIA *will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known.*

Non-Subscribers to the GAZETTE *may receive the* SUPPLEMENT *separately on a payment of six Rupees per annum if delivered in Calcutta, or nine Rupees if sent by Post.*

No Official Orders or Notifications, the publication of which in the GAZETTE OF INDIA *is required by Law, or which it has been customary to publish in the* CALCUTTA GAZETTE, *will be included in the* SUPPLEMENT. *For such Orders and Notifications the body of the* GAZETTE *must be looked to.*

* Such as digging and repairing wells, prickly-pear, clearances, &c.
‡ Corrected figures given.

† All the labourers upon the Dhond-Manmad Railway have been included under Ahmednagar.
§ For details see table appended.

Rain has fallen during the week in every Collectorate, and it has been heavy in many Talukas of every District, except Kaladgi. Sowing is now in progress in every Collectorate, though not in every Taluka, and the young crops in Satara, Belgaum, and Dharwar are looking well.

2. The price of grain has slightly risen in Satara, Kaladgi, and Dharwar, and fallen in Khandesh. Jowari now averages 18¼ lbs. per rupee.

3. The number of people upon relief works in the nine affected districts is 322,927 against 356,678 last week, and there are also 1,564 hill-men and immigrants employed in Ratnagiri and Kanara. The decrease is general in every District, except Nasik, and is due to the same cause as that of last week, *viz.*, the gradual resumption of agricultural occupations in all Talukas where the rainfall has been general.

4. A table is appended contrasting the rainfall of the past season with the fall which has been reported in each Taluka of the famine area during the current season.

5. The Sanitary Commissioner has again visited the Sholapur Collectorate, and reports favourably upon the condition of the relief labourers, whether upon Public Works or Civil Agency rates of wages.

6. With a view to counteracting any tendency on the part of the people to cling to Relief Works instead of following their ordinary occupation of agriculture, Government have recently issued orders that, as soon as the monsoon shall have been favourably established in any locality, the local officers shall make a careful inspection of all the relief gangs, and discharge as many agricultural labourers and holders and sub-holders of land as may be possible, informing them at the same time that the revival of their credit due to the favourable nature of the season renders it unnecessary for Government to support them any longer, and that it is essential to the agricultural interests of the country that they should resume their field operations. In carrying these orders into practical effect, the local officers have been instructed to combine firmness with the greatest caution, and a very careful consideration of the agricultural prospects of the season and the condition of the people.

7. The following table gives the expenditure by Government, during the week ending 9th June, upon charity in the relief of the aged and infirm poor; and in payments made to the young children of labourers employed upon relief works; this latter allowance, which has been paid since December, is debited to the works upon which the parents are employed, it being regarded as an increment to their wages to enable them to support their young children. Comparing the results shown in the table below with those shown in the last summary, it will be seen that the number of persons in receipt of Government charitable relief has increased from 44,710 to 52,505, while the number of children under 7 years of age has increased from 120,731 to 120,867. The number of children varies with the number of labourers, and during the week ending 9th of June (the latest for which complete returns are available) the number of labourers was the greatest yet reached. The number of people charitably relieved was 13·12 per cent. of the number of labourers upon Relief Works :—

Districts.	Collector's discretionary grant.			Expenditure incurred under the authority of Government Resolution No. 312 C. W.—1116 of 26th December 1876, on account of children under 7 years of age whose parents are upon relief works.		
	Average number of persons relieved during the week.	Expenditure during the week.	Total expenditure up to date.	Average number of children, and of women taking care of them.	Expenditure during the week.	Total expenditure up to date.

	Grand Total ...	...	2,96,647	

9. Tables (A) and (B) are appended as usual. It will be seen that, during the week ending 16th June, the number of people upon Civil Works in the nine affected districts was 39,220, the number upon works under Public Works Department agency being 321,265. The proportion of people upon the former continues, therefore, about 10 per cent. of the total. It is to be noted that the figures given in these tables are taken from the progress returns of the works, and are brought up to the week ending 16th June, while the figures in the table prefixed to this summary are taken from the Collector's telegrams, and refer to the week ending 23rd June.

10. Maps are not sent with this summary, as they would merely repeat the information already given.

11. A table is appended, showing the condition of the affected Native States. The Political Agent, Kolhapur, and Southern Mahratta Country reports by telegram that monsoon rain has fallen abundantlv in the districts in his charge, and as will be seen from the table the number of labourers has fallen from 41,095 to 25,710.

12. With regard to the movements of food-grains, 351 tons were exported from Bombay to the Southern Mahratta Ports during the week ending 23rd June, and during the fortnight ending 23rd June, 8,163 tons were carried by the Great Indian Peninsula Railway to stations upon the Poona-Sholapur and Nasik-Bhusawal lines. The table below shows the quantities of grain sent by sea and rail from October till the 23rd June to the Southern Mahratta Ports and the Railway stations in the distressed districts. It will be seen that the total amount delivered up to the 23rd June was 319,988 tons :—

Food-grains sent to	In October, November and December 1876.	In January 1877.	In February 1877.	In March 1877.	In April 1877.	In May 1877.	In June (up to 23rd).	Total.
	Tons.	Tons.	Tons.	Tons.	Tons.	Tons.	Tons.	Tons.
Southern Mahratta Ports ...	44,215	13,459	16,075	16,798	21,399	28,657	2,999	143,602
South-Eastern line, from Poona to Sholapur ...	67,195	15,471	12,477	13,760	12,856	12,594	16,472	150,825
North-Eastern line, from Nasik to Bhusawal ...	12,829	1,615	2,622	3,234	2,346	1,221	1,694	25,561
TOTAL ...	124,239	30,545	31,174	33,792	36,601	42,472	21,165	319,988

13. On the whole, the improvement noticed in the last summary is fully maintained; the monsoon rainfall has been very favourable so far as it has yet extended over the famine area. Favourable reports have been received of the condition of the young crops where they have been sown, and sowing is now in progress in every Collectorate.

The food supplies continue fairly sufficient, but prices have slightly risen in Sattara, Kaladgi and Dharwar. It is expected that prices will fall when grass springs more abundantly, and when the sowing of the crops has been completed.

The amount of grain carried by the Great Indian Peninsula Railway to the Deccan districts continues large. Considerable consignments are also passing over the Great Indian Peninsula Railway for the Madras districts. There has been a slight importation on the Coast.

The condition of the cattle continues to improve, and they are gradually returning to the villages as grazing springs up.

There is a net decrease of 34,996 in the number of labourers on relief works, making a total net decrease of 70,815 during the last fortnight. There has been a considerable increase on charitable relief, but the percentage of persons so relieved to labourers upon relief works is only 13·12, and the expenditure on this account to latest known date has been only Rs. 208,941, or about 3 per cent. of the total famine outlay.

The general condition of the people has very decidedly improved. Cause for anxiety is passing away, and will shortly cease if the monsoon extends to the districts it has not yet fully reached, and continues to be as favourable as it promises.

Cholera is not on the increase.

M. K. KENNEDY, Major-General, R. E.,
Secretary to Government.

* The monsoon set in on the 19th June above Ghauts.
† Complete returns from Khandesh for the current season not received.
‡ This is chiefly eastern rain.
Telegraphic returns of more recent rain have been received, but cannot yet be properly collated.
The figures for Sholapur and Kaladgi are the same as last week, later written reports not being available.

Relief Report for the Kurnool District for the week ending 26th May 1877.

Proceedings of the Board of Revenue, dated 7th June 1877, No. 2662.

Read Relief Report from Kurnool, dated 2nd June 1877.

The detailed Relief Report for the Kurnool district for the week ending 26th May is submitted for the information of Government in continuation of Board's Proceedings, 1st June 1877, No. 2535.

2. *Prices.*—In Ramalkota rice and cholum are alone quoted and are rising. Rice has fallen in Cumbum and Nandial but risen in Koilkuntla and Sirwell. In Markapur all dry grains are cheaper. The price of cholum was unsteady, but ragi is quoted at two stations more than last week and shows tendency to fall. No rain in the week is reported except $\frac{3}{10}$ of an inch in Nandial.

3. The numbers on relief works in the several taluks compare as follows with those of the previous week :—

	19th May.	26th May.	
Ramalkota ...	32,281	31,230	− 1,051
Nandikotkur ...	19,518	23,493	+ 3,975
Nandial ...	26,693	27,006	+ 313
Sirwell ...	17,433	23,019	+ 5,585
Koilkuntla ...	28,266	26,797	− 1,469
Pattikonda ...	23,573	22,487	− 1,085
Cumbum ...	46,447	46,337	− 110
Markapur ...	9,531	7,467	− 2,064
Total ...	203,742	207,836	+ 4,094

The increase in Sirwell is said to be due to defective return on the 19th, and in Nandikotkur to recommencement of works which had been closed for a time. The decrease in Ramalkota, Markapur, Koilkuntla and Pattikonda is ascribed to the coolies having returned to their homes for agriculture, but in Koilkuntla to emigration also.

4. In the statement given at paragraph 10 of the Board's Proceedings quoted above, the number of coolies under the Public Works Department for the 19th May was entered. The correct figures for the 26th are as follows. There seem to be no works under the Department in Cumbum, Koilkuntla or Markapur :—

Taluk.	Number of works.	In the week.	Up to the week.	Number of coolies.
Ramalkota ..	5	7,580	93,338	13,069
Nandikotkur ..	4	8,490	36,307	14,729
Nandial ..	2	13,875	91,038	22,447
Sirwell ..	1	12,352	66,335	21,226
Pattikonda ..	16	340	10,808	1,457
Total ..	28	42,637	2,97,826	72,928

5. *Rates of wages.*—Scale 1 does not seem to be paid in Nandikotkur, Sirwell or Pattikonda, though these taluks have works under the Department Public Works.

6. Details of gratuitous relief as compared with the previous week are as follows :—

	19th May.	26th May.	
Ramalkota ..	12,369	10,970	− 1,399
Nandikotkur ..	6,307	7,204	+ 897
Nandial ..	6,454	8,588	+ 2,134
Sirwell ..	4,711	5,209	+ 498
Koilkuntla ..	6,915	7,474	+ 559
Pattikonda ..	6,539	6,858	+ 319
Cumbum ..	15,079	13,787	− 1,292
Markapur ..	3,385	2,396	− 989
In Camps, &c. ..	6,400	6,606	+ 206
Villages ..	7,433	5,681	− 1,752
3 pie Children ..	47,926	50,199	+ 2,273
Total ..	61,759	62,486	+ 727

The increase in the number of 3 pie children which was already excessive is not satisfactory.

7. The reports of mortality are apparently erroneous. 115 deaths in the week in Ramalkota and 5 in Sirwell are reported, but none elsewhere. Of the deaths in Ramalkota 85 are amongst 3 pie children. The Collector will be called upon by telegraph to report on this subject.

H. E. STOKES,
Secretary.

Talukwar Abstract of relief in Kurnool District of the Madras Presidency for the week ending Saturday, the 26th May 1877.

REVENUE BOARD OFFICE,
MADRAS;
7th June 1877.

H. E. STOKES,
Secretary.

Weekly condition report of the distressed districts of the Mysore Province.

Extract from the Proceedings of the Government of Madras, Revenue Department.

Read the following:—

Proceedings of the Board of Revenue, Madras, No. 2817, dated 15th June 1877.

The reports of relief for the week ending 9th June will be submitted for the information of Government with the usual abstract statements and maps.

Maps for—

Nellore.	South Arcot.
Bellary.	Madura.
Cuddapah.	Coimbatore.
Chingleput.	Salem.
North Arcot.	

Statements.

No. 1. Prices.
„ 2. Relief Report.
„ 3. Talukwar Abstract of relief.
„ 4. Statistics of gratuitous relief.
„ 5. Talukwar ditto.
„ 6. Number and description of works.
„ 7. Memorandum of sums sanctioned.
„ 8. Works under supervision of Public Works Department.
„ 9. Special establishment.

2. *Prices.*—No fall of prices has yet set in, but a slight tendency to rise is apparent. The district averages for rice have risen in eight districts and fallen in five; for cholum, risen in eight, fallen in two, and are stationary in three; for ragi the corresponding figures are 8, 3 and 2; cumbu has risen in eight districts, fallen in three and is stationary in one. The fluctuations, however, are in all cases very minute. The cause of this tendency to rise, notwithstanding the rain that has fallen in all districts, is doubtless that transport has been impeded and imports checked for a time, while prospects of the coming crops, though favourable, are not yet sufficiently assured to bring out stocks if such exist. In the *Kistna* district dry grains have all risen but rice has fallen slightly. In *Nellore* the general condition of prices is stationary, but a slight fall having occurred at one or two stations, the district average rates are lower than on the 2nd June. In Cuddapah rice has risen sharply at head-quarters, and at Proddatur where all grains are dearer. In the Madanapully and Voilpaud taluks prices and especially that of rice have risen; in other parts of the district there are changes but none of importance. The Kurnool district averages are almost stationary. In Bellary there is no very heavy increase of price, but the tendency to rise is clear. Rice has gone up in six taluks, and fallen in four; cholum risen in eight and fallen in five; ragi risen in seven; cumbu risen in three and fallen in two. In *Chingleput,* rice and ragi, the chief staples, have each risen in four taluks out of six. In North Arcot prices have not fallen anywhere, but nearly all rates in the north-west of the district have risen. In Palamanair and Poonganur rice, which is the grain in respect of which importation is most active, has risen heavily. The rise of price in the district is attributed to decreased import. In *South Arcot* prices are fluctuating and tend to rise, chiefly in Cuddalore, Trickalore, and Villapuram. There is little change in *Trichinopoly* except that ragi shows tendency to fall. In *Madura* rice is cheaper, but cholum and ragi have risen in Melur and Palni. In *Tinnevelly* prices are little altered and in *Coimbatore* also they are almost stationary. In *Salem* rice has risen heavily in Kistnagheri, but dry grains are cheaper in the taluk; rice, ragi, and cumbu have risen in Ahthur, but fallen in Salem, and there is no other change of importance.

District.	Rice.		Dry grain.	
	Highest.	Lowest.	Highest.	Lowest.
Nellore	7·00	9·18	+8·75	*a* 14·00
Cuddapah	5 81	8·30	+7·12	*a* 9·37
Bellary	5·40	7·56	*6·44	* 8·76
Chingleput...	7·52	9·62	+9·40	*a* 11·52
North Arcot	6·10	8·70	+8·00	*a* 12·70
South Arcot	7·44	9·66	+9·18	*a* 13·12
Trichinopoly	6·53	7·98	+9·17	*a* 13·10
Madura	7·60	8·87	+9·30	*a* 10·85
Tinnevelly...	7·50	8·80	†10·10	†12·60
Coimbatore	5·36	8·15	+6·90	*a* 9·84
Salem	6·56	8 46	+7·50	*a* 10·26

* Cholum. † Ragi. *a* stands for plus.

The marginal table shows the highest and lowest prices for rice and of the dry grain most commonly quoted in each district, for which taluk prices have been reported.

3. *Rainfall.*—All districts received rain during the week. The fall was considerable only in *Salem, Coimbatore, Madura,* and *Kurnool*; in all other districts the average was less than one inch. In *Nellore* the fall of rain was in the centre and north of the district under the hills. Heavy rain fell at Cuddapah, and in the Madanapalli and Pulivendala taluks, but though general it was light elsewhere in the district. There was good rain in the west and north of *Bellary* and at Gooty, but none is reported from the southern and south-eastern taluks. There was rain in the south of Chingleput and in parts of South Arcot. In *North Arcot* rain appears to have been general except in the north-east zemindaries. In *Salem* there was a good fall throughout the district, especially heavy in the sub-division. In *Trichinopoly* showers were general but light; all taluks of *Madura* except Ramnad, and those of the distressed taluks in Tinnevelly received rain. In *Coimbatore* none fell in Caroor, but in the other southern and in the central taluks there was good rain, as much as 3·86 inches having been registered at Dharapuram. On the whole, the cultivation season is opening favourably.

4. *Grants, outlay, &c.*—The grants made by the Board for district relief up to the 9th June amounted to Rs. 1,61,85,283, and the outlay against these grants was as follows:—

	In the week.	Up to the week.
	Rs.	Rs.
Relief works	5,16,659	1,40,92,830
Gratuitous relief	1,50,798	13,24,641
Total ...	6,67,457	1,54,17,471

The following abstract shows the number and description of works according to the latest information:—

	In progress.		Completed.	
	Number.	Length in miles.	Number.	Length in miles.
Roads—				
New works	484	3,289	129	518
Repairs	368	3,547	97	511
Total ...	852	6,836	226	1,029
Irrigation				
New Works	70	...	23	...
Repairs	1,057	...	347	...
Miscellaneous	3,867	...	2,807	...
Total ...	5,846	...	3,403	...

5. *Numbers on relief works.*—The numbers in each district are compared as usual below with those for last week:—

	2nd June.	9th June.	
Kistna	1,854	1,601	— 253
Nellore	28,002	25,725	— 2,277
Cuddapah	94,961	108,160	+ 13,199
Bellary	268,030	291,181	+ 23,151
Kurnool	205,208	212,223	+ 7,015
Chingleput	18,819	27,870	+ 9,051
North Arcot	55,807	54,139	— 1,668
South Arcot	622	198	— 424
Madura	13,445	13,503	+ 58
Tinnevelly	23	...	— 23
Coimbatore	25,439	23,699	— 1,740
Salem	53,387	52,202	— 1,185
	765,597	810,501	+ 44,904
East Coast Canal	42,481	45,154	2,713
	808,078	855,655	47,617

6. In the *Nellore* district the decrease on the district works is balanced by increase on the canals; the former is accounted for by decrease in the Venkatageri zemindari and in Udayagiri, and by the want of some returns. A number of famine works in the district have been transferred to the Public Works Department. In *Cuddapah* there is again a large increase, of which details are given in the margin. Increase occurs in all taluks, except Madanapalli, and is variously ascribed to cessation of emigration to Nellore and return of coolies thence, to increased wages, and to imperfect returns on the 2nd June. For *Bellary* the taluk details are also noted marginally as compared with last report. There is increase in all except 3 taluks, and the apparent decrease in one of these, Hadgalli, is due to defective return. In Adoni, Alur, Gooty, Tadpatri, Bellary and Kudlighi no cause is assigned except increased pressure of the famine; but as regards Adoni it is added that able-bodied persons have been admitted on some works instead of being sent to the railway; and in Kudlighi, increase of wages is also named as a cause of increased numbers. The increase of wages is also the cause of increase in Hospett and Raidroog; and in Hindupur, coolies driven away by heavy rain have returned to the works. The Bellary Hubli Railway now employs 3,634 persons in the Bellary taluk, and 723 in Hospett. No explanation is given as regards other fluctuations.

	2nd June.	9th June.	
Jamalamadugu	13,551	15,850	+2,299
Pulivendla	14,514	15,685	+1,171
Prodattur	2,112	3,892	+1,780
Cuddapah	3,163	4,052	+889
Budwail	10,605	13,227	+2,622
Sidhout	1,217	1,315	+98
Pullumpett	10,186	11,198	+1,012
Kadri	3.209	4,651	+1,442
Royachoty	8,196	10,321	+2,125
Madanapulli	16,137	15,575	—562
Voilpaud	12,071	12,394	+323
Total ...	94,961	108,160	+13,199

	2nd June.	9th June.	
Adoni	62,894	70,836	+ 7,942
Alur	31,910	34,736	+ 2,826
Gooty	12,716	13,446	+ 730
Tadpatri	13,112	14,501	+ 1,389
Anantapur	14,709	15,493	+ 784
Dhurmaveram	8,165	9,000	+ 835
Pennakonda	7,767	8,961	+ 1,194
Hindupur	826	4,638	+ 3,812
Madaksira	7,438	7,296	— 142
Raidroog	12,898	17,157	+ 4,259
Bellary	21,009	24,155	+ 3,146
Hospett	27,634	27,447	— 187
Sundoor	2,852	2,876	+ 24
Kudlighi	17,075	19,091	+ 2,016
Hurpanhalli	10,986	9,988	— 998
Hadgalli	16,039	11,560	— 4,479
Total ..	268,030	291,181	+23,151

7. The *Kurnool* increase occurs in five taluks, particulars have not yet been received. The large increase in Chingleput is due to the Chingleput-Conjeveram Railway, which employs 19,539 persons in the Conjeveram taluk. Other works in the taluk and in Chingleput show largely decreased numbers, but in Madurantakam there is increase ascribed to enhancement of wages. In the *North Arcot* district, numbers in Chendragiri have fallen from 5,881 to 1,702, and there is large decrease in the southern taluks and in those in the Palar valley, while in the eastern zemindari numbers have increased from 15,893 to 18,454. No explanation is given. The returns for *South Arcot* and *Madura* call for no remark, and in *Tinnevelly* relief works have been stopped as being no longer necessary. In Coimbatore there are no very important fluctuations, and the decrease on the whole results from commencement of ploughing, from transfer of weavers from the works to special relief and (in Udumalpetta) it is said to coolies leaving the works and seeking admission to the relief houses. The Collector will enquire into this and report. The *Salem* returns show large increase in Salem and Utangarai and decrease in Kistnagiri, Darampuri and Trichengode.

8. The statement of the numbers employed under the Public Works Department shows a total of 162,509, including the railway works and the East Coast Canal.

9. *Rates of wages.*—The enhanced scale of wages has been introduced in all taluks of Cuddapah except Kadiri and Royachoti. There are a multiplicity of rates in several of the taluks which ought to be got rid of. The new scale is also in force in *Bellary* except Alur, Gooty, Tadpatri, Dharmaveram and part of Kudlighi; in Pennakonda, Hindupur and Madaksira equivalent wages in kind are paid. Wages have been raised in Chingleput except Ponneri. In the Saidapet taluk, rates from 2 to 3 annas are paid to men coolies. The Collector will explain. In *Coimbatore, Madura* and *Salem* wages are not affected by the recent changes. In North Arcot wages have been revised over about half of the district, and the same seem the case in Nellore so far as wages are reported.

10. *Gratuitous relief.*—The numbers on the gratuitous relief are compared as usual below:

	2nd June.	9th June.	
Kistna	382	383	+1
Nellore	20,322	16,978	—3,344
Cuddapah	33,629	36,314	+2,685
Bellary	139,886	155,044	+15,158
Kurnool	60,611	59,842	—769
Chingleput	19,662	18,621	—1,041
North Arcot	20,622	22,011	+1,389
South Arcot	4,530	6,198	+1,668
Trichinopoly	394	463	+69
Madura	11,448	13,941	+2,493
Tinnevelly	755	835	+80
Coimbatore	24,713	28,202	+3,489
Salem	74,238	78,878	+4,640
Malabar	12	27	+15
In camps, &c.	136,274	136,363	+89
In villages	123,741	140,658	+16,917
3 pie children	150,807	160,333	+9,526
Kistna district*	382	383	+1
TOTAL ...	411,204	437,737	+26,533

* Particulars not known.

11. There is again a large increase in the total numbers, of which nearly two-thirds is in village relief and more than a third under 3 pie children. Almost the whole of the increase under this last class occurs in the Bellary district which now has 76,808 children against 67,822 on the 2nd June. The increase is ascribed to the greater number of coolies on the works. The numbers in the relief camps remain nearly stationary, but there have been changes in the district totals, the most important being decrease of numbers in *Nellore* and *Salem* camps and increase in *Cuddapah* and *Coimbatore*. The village relief is steadily increasing, but owing to the irregularity with which returns are received from the village officers, the probablity is that numbers are greater than the returns show; and comparison from week to week, especially as regards details of taluks, is misleading. Excluding *Kurnool* and *Kistna* whence detailed report has not come, 14 additional inspection circles have been formed in the week, the number being now 664, besides 26 in Kurnool according to the report for 2nd June. Relief was given in 5,562 villages against 5,270 in the same district in the previous week. The number of such villages bears a high proportion to the total number in *Bellary*, *Cuddapah* and *Salem*, but is very low in other districts. The average number relieved in each village in which relief is given is 24·4 persons. The average cost per head per diem in camps and relief houses seems to be 13·45 pies, and in villages 12·4 pies. The difference is however greater, as charges for establishment, hutting, medical attendance, &c., are not completely included in the outlay under the former head. The cost of camp, &c., relief in the week is reported (Kurnool and Kistna excluded) to be Rs. 64,187; of village relief Rs. 61,511; and of 3 pie children Rs. 11,314.

12. The following statement shows the rates of mortality in camps and relief houses and under village relief. The latter is undoubtedly understated. It is the direct interest of the village headmen not to report deaths amongst those who have been admitted to relief in the village, and on whose account rations can be drawn.

	CAMPS AND RELIEF-HOUSES.			VILLAGE RELIEF.		
	Approximate strength.	Deaths in the week.	Ratio per mille per annum.	Approximate strength.	Deaths in the week.	Ratio per mille per annum.

The mortality in camps is considerably higher than in the previous week, and the increase is chiefly in the *Salem* and *Cuddapah* districts. Of the 239 deaths in the *Salem* camps, 84 occurred in Dhurampuree, and of 300 in *Cuddapah* 68 were in Madanapalli and 65 in Voilpaud. There were 14 deaths amongst 3 pie children in *Salem* and *Coimbatore*. The total number of deaths of persons in receipt of gratuitous relief in the week was (excluding Kurnool and Kistna) 1,537 and the number reported since 14th April 5,970.

13. The following statement shows transactions under the Land Improvement Act :—

	In the week.	Up to the week.
	Rs.	Rs.
Nellore	6,020	81,962
Cuddapah	4,339	1,22,965
Bellary	...	* 97,119
Kurnool	...	1,350
Chingleput	70	67,126
North Arcot	1,000	5,940
Madura	3,875	53,681
Tinnevelly	...	32,900
Coimbatore	2,949	10,984
Salem	6,251	49,543
TOTAL ...	24,504	5,23,570

* Return obviously erroneous, amount to 2nd June here entered.

Rupees 1,08,306 have been spent on special relief to weavers in 5 districts; of which *Salem* weavers received Rs. 88,704.

14. A statement of special establishment is enclosed. The following is an abstract of it :—

	Number.	Monthly pay, &c.
		Rs.
1. Superior officers	88	37,600
2. Other relief establishment	3,378	54,375
3. Relief camps	231	1,992
4. Village relief	464	8,521
5. Payment of wages	520	5,964
6. Accounts	582	9,005
Total ...	5,263	1,17,457

The establishments for relief camps and village relief are not completely separated in all districts; and some establishments employed for these purposes are included under "other relief establishment" above.

15. The following are the usual particulars extracted from the report of the Commissioner of Police, Madras, average daily residents 13,187; non-residents 13,668; fresh admissions 927, strength in hospital on 9th June, 506; deaths in hospital 105; total deaths 113 or 447 per mille; strength resident on 9th June 12,773, of whom were from Chingleput 4,479, North Arcot 4,152, Nellore 4,015, other districts 127; outlay during the week Rs. 36,275, and up to the week Rs. 5,91,589. The President of the Municipal Commission, Madras, had 2,310 persons in the Sattankad relief camp on 9th June, and 1,702 persons employed on works there. He expended Rs. 1,202 in the week and Rs. 48,254 up to the week.

H. E. STOKES,
Secretary.

* Returned for 2nd June.

REVENUE BOARD OFFICE,
MADRAS;
The 15th June 1877.

H. E. STOKES,
Secretary.

No. 2085, dated 23rd June 1877.

Order thereon by the Madras Government.

Communicated to the Government of India.

The state of the grain market reported is serious.

Weekly relief report of the distressed districts of the Madras Presidency.

Proceedings of the Board of Revenue, Madras, No. 2667, dated 13th June 1877.

Read Relief Reports for the week ending 2nd June 1877—from the Collector of Kistna, dated 5th June 1877—from Malabar 6th and from Kurnool 9th June 1877.

The Relief Reports from the Kistna, Kurnool and Malabar districts for the week ending 2nd June 1877 will be submitted to Government in continuation of Board's Proceedings, 8th June 1877, No. 2681.

2. *Prices and Rainfall.*—In *Kistna* prices are nearly stationary. Rice rose in one and fell in one taluk; cholam fell in three; ragi in one and cumbu rose in one and fell in two. In all other cases rates are stationary. In *Kurnool* rice rose in Ramalkota, Koilkuntla and Sirwell, but fell at Cumbum; cholam fell in four taluks; ragi and cumbu rose at Cumbum but ragi fell at Koilkuntla. There are no other changes.

Districts.	Stations from which prices are reported.	Stations at which there are no quotations for.			
		Rice.	Cholam.	Ragi.	Cumbu.
Kistna	13	...	2	3	6
Kurnool	8	...	0	1	5

The figures in the margin complete the statement given in para. 3 of the Board's Proceedings above, shewing the extent to which the several grains are not quoted in the district markets.

3. In the *Kistna* district 3·47 inches of rain fell at Vinukonda, 1 inch in Repalli and 0·2 inch in Gudivada; and in *Kurnool* there were trifling showers in Ramalkota, Nadikotkur and Koilkuntla.

4. The only relief work in progress in *Kistna* is the Commamoor Channel on which there were 1,854 coolies on 2nd June. No works have been opened in *Malabar*; the outlay of Rupees 166 charged to relief works was incurred for the carriage of tools to the Wynaad.

The taluk details of numbers in *Kurnool* are as follows:—

Taluks.	26th May	2nd June.	
Ramalkota	31,280	30,345	— 935
Nandikotkur	23,493	23,358	— 135
Nandial	27,006	26,994	— 12
Sirwell	23,019	23,289	+ 270
Koilkuntla	26,797	27,466	+ 669
Pattikonda	22,487	22,753	+ 266
Cumbum	46,337	42,804	—3,533
Markapur	7,467	8,199	+ 732
Total ...	207,886	205,208	—2,678

The fluctuations are unimportant except in the Cumbum taluk, where the decrease is attributed to defective return, and in Ramalkota where it is due to the commencement of agricultural operations; the number &c., of works under the P. W. D. are as follows:—

Taluk.	Number of Works.	Outlay.		Number of coolies.
		In the week.	Up to the week.	
Ramalkota	19	7,782	105,337	14,010
Nandikotkur	4	8,969	45,276	14,799
Pattikonda	15	335	10,680	642
Nandial	2	...	103,840	...
Sirwell	1	12,192	78,527	21,447
	41	29,278	343,660	50,893
On 26th May	28	42,637	297,826	72,928

The decrease is considerable notwithstanding that the number of works shewn as under the Department Public Works has increased. The Collector will be called upon to explain the cause.

5. *Rates of wages.*—In Kistna piece-work rates are paid. The G. O., 22nd May 1877, No. 1788 R.D., increasing wages on Civil Relief works, appears to have been introduced in *Kurnool* only in these taluks, *viz.*, Koilkuntla, and partially in Patticonda and Ramalcota. The order seems not to have yet reached the other taluks.

6. *Gratuitous Relief.*—In *Kistna* 309 persons were relieved in camps, &c., and of them 187 were in the Guntoor relief camp. Relief was given in 31 villages to 73 persons. In Malabar 12 persons were being fed in the Wynaad. There were no deaths amongst persons on gratuitous relief in either of these districts. The following are the taluk details for Kurnool :—

TALUKS.	26th May.	2nd June.	Difference.
Ramalkota	10,970	10,789	– 181
Nandikotkur	7,204	5,546	– 1,658
Nandial	8,588	8,860	+ 272
Sirwell	5 209	5,423	+ 214
Koilkuntla	6,858	7,408	+ 550
Pattikonda	7,474	6,668	– 806
Cumbum	13,787	13,344	– 443
Markapur	2,396	2,573	+ 177
In Camps, &c.	6,606	6,716	+ 110
Village relief	5,681	4,614	– 1,067
3 pie children	50,199	49,281	918
Total ...	62,486	60,611	– 1,875

The decrease under 3 pie children is satisfactory, but the greater part of the decrease on the whole is under village relief. The following table shows the rates of mortality in camps, &c., and in villages :—

TALUKS.	IN CAMPS.			IN VILLAGES.		
	Mean strength.	Deaths.	Ratio per mille.	Mean strength.	Deaths.	Ratio per mille.
Ramalkota	1,422	26	953	1,365	35	1,343
Nandikotkur	568	1	92	1,338	24	935
Nandial	1,480	1	52	364	...	...
Sirwell	937	17	946	50	...	...
Koilkuntla	389	2	268	585	...	...
Pattikonda	250	1	208	789	11	726
Cumbum	1,380	2	76	118	...	...
Markapur	236	...	...	537	...	...
Total ...	6,662	50	391	5,146	70	709

The deaths are evidently not fully reported, but it is remarkable that the deaths under village relief give a higher ratio than those in the camps. This would indicate that village relief, which has been largely reduced in consequence of frauds detected, has been too much repressed. Relief was given in 516 villages against 536 on the 26th May. The number of inspection circles is 26 as before, and the proportion of villages to the total, viz , 753, is high. The organization is sufficiently extended. Besides the deaths above shown, there were 62 amongst 3 pie children in Ramalkota. A high mortality among the class in the same taluk was noticed last week, and is ascribed, in a telegram from the Collector, to fever and virulent outbreak of small-pox.

H. E. STOKES,
Secretary.

Revenue Board Office, Madras,
13*th June* 1877.

(Signed) H. E. STOKES,
Secretary.

Weekly condition report of the distressed districts of the Mysore Province.

PROVINCE OF MYSORE.

(*No.* 19.)

Condition report for the week ending 16th June 1877.

Bangalore District.—Markets continue fairly supplied. Prices pretty steady. There has been good rain in all the taluks of the district except Kankanhalli, the quantity gauged varied from 8 cents to 2·40 inches. Some tanks received from one to four months' supply of water. The standing crops are in fair condition, and agricultural prospects are described as being "favorable."

Kolar District.—Markets well supplied. Prices have risen in some taluks. Rain fell generally throughout the district, and from 30 cents to 2·30 inches were registered at the head-quarters of taluks. Agricultural operations are progressing. The standing crops of sugarcane, javari, ragi, sesamum and sajje (millet) are in good condition. Cholera, fever and diarrhœa are still prevalent.

Tumkur District.—Markets continue fairly supplied except in the Kunigal and Maddagiri taluks, where importation was slack owing to the withdrawal of cart bullocks for ploughing operations. Prices have risen in consequence. Rain fell in all the taluks of the district, the quantity registered at the head-quarters thereof varying from 75 cents to 2·10 inches. Three tanks in the Koratagere and nine in the Sira Taluk filled, and a few others received from one to three months' supply of water. The young crops look promising. The prospects of the season are improving, but the public health still suffers from the prevalence of cholera and fever.

Mysore District.—Markets fairly supplied and prices steady on the whole. Rain fell during the week in all the taluks except Heggaddevankote, Nanjangúd and Malvalli, the quantity registered at head-quarters varying from 10 cents to 1·46 inches. The standing crops are in good condition, and paddy and other crops were sown in the Ashtagram, Yedatore and Talkad taluks. The javari and gingelly crops are in ear and will be harvested in about a month hence. Prospects remain unchanged since last week. The public health is still indifferent, owing to the prevalence of cholera, dysentery, &c.

Hassan District.—Markets continue sufficiently supplied, except in the Nagamangala and Harnhalli taluks, where importation was not brisk, as many hitherto engaged in the rice trade have betaken themselves to their fields. Prices unsteady. There was a general fall of rain throughout the district, the maximum quantity registered being 3·60 inches at Attikuppa. The standing crops are thriving and the prospects of the season hopeful. Cholera is on the decline, and prevalent only in three taluks.

Shimoga District.—Markets fairly supplied except in the Channagiri, Honnali and Nagar taluks. Prices pretty steady. Heavy rain has fallen in all the taluks, the quantity registered at Nagar having amounted to as much as 10·21 inches. Some of the tanks received a full supply of water, and five of these in the Honnali taluk breached. Sowing operations are being actively pushed on and the prospects are more hopeful. Cholera, fever and small-pox are still prevalent.

Kadur District.—Markets continue fairly supplied. Prices steady. There has been good rain in all the taluks of the district, the quantity registered at the head-quarters of which has varied from 80 cents to 5·09 inches. Some tanks received a fresh supply of water, and

fresh sowings of paddy, javari, &c., were carried on in the Tarikere and Banavar taluks. The standing crops are doing well. The prospects still remain unaltered. Cholera prevails in the Chikmagalur, Banavar and Múdgere taluks, and fever and small-pox throughout the district.

Chitaldroog District.—Markets fairly supplied except in some places in the Budihal taluk, where the prevalence of cholera checked importation on a large scale. Prices have risen. There was a general heavy fall of rain throughout the district, the quantity gauged at the head-quarters of taluks ranging from 1·35 to 3·60 inches. Some tanks received a fair supply of water. The ryots have commenced to plough and sow their lands; but in one taluk, Kankuppa, there is reported to be much distress from the loss of cattle during the drought and the want of seed grain. The standing crops are in good condition and the prospects of the season are improving. The public health, however, continues to be bad; cholera, fever, &c., being still prevalent.

GENERAL REMARKS.

The reports from all the districts for the week ending 16th June 1877 are very encouraging. The rainfall in the Nagar division which in the previous weeks was very scanty, was this week abundant, the quantity gauged at the head-quarters of Shimoga district being as much as 5·35 inches. The Commissioner writes that all the taluks in the Chitaldroog district and in the division generally have received good rain and the tanks are fuller than they have been since 1874. The prospects of the standing crops throughout the province have greatly improved under the rains which continued to fall during the past fortnight, and more land is being ploughed and sown in the hope that the monsoon, which had thus far commenced pretty favourably, would continue so as to bring the crops forward.

2. Public health is steadily improving, and cholera is gradually abating. The number of deaths caused by the epidemic, during the week, was 486 as against 832 of the previous week, as shewn under:—

Bangalore district (including town and cantonment) ...	36	Shimoga district ...	55
Kolar district ...	80	Kadur ,, ...	23
Túmkúr ,, ...	57	Chitaldroog ,, ...	56
Mysore ,, ...	91		
Hassan ,, ...	88	Total ...	486

It is apprehended that, in the Nagar division, the setting in of the heavy rains and cold winds is likely to increase the mortality, especially among the aged and enfeebled and the children.

3. The number of works under Revenue officers was 2,576, as against 2,524 of the preceding week. The daily average number of persons employed on them was 30,517, or 1,228 more than in last week. While there was a small increase in the number of labourers on relief works under Civil officers, the returns of the P. W. D. shew that there was a decrease in the number employed on works carried on by the professional department. The average daily number, this week, was 26,264, or 1,972 less than that of the previous week. It is evident that, while many of the able-bodied have deserted the works for their fields, many of the poorer classes, and others who have been drafted, perhaps in some instances prematurely, from relief kitchens have either returned or still cling to them in the hope of earning some thing before returning to their villages. The takavi advances to cultivators which are being made under the recent orders of the Chief Commissioner, will, it is expected, have the effect, to some extent, of reducing the number of labourers on relief and other works.

4. The amount appropriated for works under Revenue officers up to 16th June was Rs. 14,59,796, of which Rs. 9,82,911 were expended. The accounts do not, however, it is

apprehended, strictly represent, in all cases, the actual expenditure incurred up to date, as some of the Amildars include, in the returns, only the expenditure incurred on works completed. The attention of district officers has already been drawn to this subject.

5. The daily average number of persons gratuitously relieved was 110,805, being 3,871 less than in the previous week. There has been a considerable decrease in the numbers fed in the following districts :—

Bangalore district	3,987
Kolar "	906
Túmkúr "	2,323
Mysore "	132
Shimoga "	145
Total decrease ...	7,493

On the other hand, the returns of the Bangalore and Mysore Municipalities and the Hassan, Kadur and Chitaldroog districts shew an increase as noted below :—

Bangalore Municipality	1,922
Mysore "	217
Hassan district	486
Chitaldroog district	971
Kadur district	26
Total increase ...	3,622

The increase in the Bangalore Municipality is owing to the large influx from the outlying districts and Her Majesty's territory, and orders have been already issued for the gradual deportation, under stringent safeguards and sanitary arrangements, of these immigrants to their homes. The increase in the Hassan and Chitaldroog districts is apparently owing to the long continued severity of distress in those localities. Both the Commissioners of Ashtagram and Nagar have been carefully inspecting almost every kitchen in their respective divisions, and it is reported that all possible check and supervision have been exercised in the matter of affording gratuitous relief, and that only those who are really too poor and weak to provide for themselves gain admission into the kitchens. Very little, it is said, remains to be effected in the shape of village inspection. The number of kitchens at present maintained is considered quite sufficient, and Lieutenant-Colonel Campbell deprecates the establishment of village kitchens. Excellent arrangements have been made in the Ashtagram division to prevent the migration of weak and emaciated persons to the Wynaad, Coorg and Manjarabad. The resident poor of each hobli (sub-division of a taluk) are relieved within that hobli, and paupers are discouraged and, where necessary, hindered from wandering elsewhere. Travellers who require relief are fed separately from the local resident paupers, and relief-houses have been opened at certain principal centres on all the main lines to prevent migration to the coffee districts.

6. Of those gratuitously relieved more than 75 per cent. are women and chilren, as shewn under :—

Men	23,721
Women	39,517
Children	47,567
Total ...	110,805

7. The amount expended up to 16th June on kitchens and camps was Rs. 5,69,492.

8. Prices of food-grains, with slight local fluctuations, have been stationary except in the Shimoga and Chitaldroog districts, where they had risen slightly. The Nagar Commissioner reports that cattle for the plough are at present more in request than cattle for cart traffic. This has, to some extent, affected the supply of rice from Bangalore and Bellary which for the last fortnight has, it is said, arrived in comparatively smaller quantities than previously.

9. The weight of grain imported by rail was—

	Tons.
at the Bangalore station	2,788
„ Kolar road „	565
Total ...	3,353

being 297 tons less than in the previous week. The imports were drawn from the following places :—

	Tons.		Tons.
From Madras	2,698	From Sholapur	24
„ Beypore	391	„ the neighbouring districts of the Madras Presidency ...	24
„ Negapatam, Trichinopoly and Tanjore districts ...	216		
		Total ...	3,353

10. About 1,711 tons of grain (being 54 tons less than in the previous week) were exported by road from Bangalore to the interior of the province and the frontier taluks of the Madras Presidency, as particularized below :—

	Tons.
Towards the Túmkúr district	591
„ Bellary and Chitaldroog districts ...	136
„ Mysore district	292
„ Oossoor in the Salem district ...	193
To the taluks adjoining Bangalore	499
Total ...	1,711

11. Sometime ago fears were entertained as regards the insufficiency of the food supply of the Chitaldroog district, but it is now reported that no apprehension appears to be felt that the supply of grain for the district generally will run short before harvest, the merchants of the place having assured the Commissioner that they could, at their option, obtain as much rice as they could sell, either from Bellary or Bangalore.

"By Order,"

T. R. A. THUMBOO CHETTY,
Assistant Secretary.

T. R. A. T.

No. 313, dated Simla, the 4th June 1877.

From—Surgeon-Major S. C. TOWNSEND, *Offg. Sanitary Commissioner with the Govt. of India,*
To—The Hon'ble T. C. HOPE, *Additional Secretary to the Government of India, Dept. of Revenue, Agriculture and Commerce.*

I HAVE the honor to forward, for the information of the Government, a copy of Dr. Leiws' Report on his preliminary investigations into the nature of the fever lately prevalent in Bombay.

Dated Calcutta, the 16th May 1877.

From—Dr. T. R. LEWIS, *Special Assistant to the Sanitary Commissioner with the Government of India,*
To—The Officiating Sanitary Commissioner with the Government of India.

I HAVE the honour to report, for the information of the Government, that in accordance with instructions received, I visited Bombay and made careful enquiries regarding the nature of the fever which has for some time been prevalent in that city. In carrying out these enquiries I received every possible assistance from Dr. W. G. Hunter, Acting Surgeon-General, from Dr. Vandyke Carter, Acting Principal of the Grant Medical College and 1st Physician to the Jamsetjee Jejeebhoy Hospital, and from Dr. Joynt, the Physician in charge of the Goculdass Hospital.

2. Opinions have been expressed that the fever is of an infectious nature; that it was originally produced by want; and that the disease presents the characters ascribed to the relapsing or famine fever of systematic writers.

3. In arriving at these conclusions it is probable that the very interesting fact of the detection by Dr. Vandyke Carter of peculiar organisms in the blood of several fever patients exercised considerable influence. These organisms, described as *spirilla*, were discovered by Obermeier about nine years ago in the blood of persons suffering from relapsing fever, and their presence has been, pretty generally, considered as pathognomic of the malady.

4. I examined repeatedly the blood of about 25 fever patients during my stay in Bombay, and was able to detect these spirilla in the blood of five; but with regard to the character of the fever from which these five persons suffered I could see no well-marked feature which would be sufficient to distinguish it from the class of fevers usually referred to as "Remittent" in this country. In none of these five cases could it be said that their temperature-charts clearly presented the characters ordinarily given as typical of relapsing fever.

5. It will be more convenient to consider the question of the relation which the spirilla in the blood may bear to the fever under consideration when similar examinations of the blood of fever patients will have been made in Calcutta and elsewhere, and after comparison with the results of my colleague's (Dr. D. D. Cunningham) enquiries in Madras.

6. With regard to the supposed infectious character of the fever, as it at present exists in Bombay, I can only say that I failed to convince myself that anything like sufficiently satisfactory evidence existed for any such inference; nor could I satisfy myself, so far as the patients at present in hospital were concerned, that any direct causative relation existed between the fever and the famine. The fever patients seen by me had, nearly all of them, been resident in Bombay for more than six months—certainly in not one of the five cases in which I observed the spirillum could the origin of the fever be directly attributed to want.

7. As I understand that Surgeon-General Hunter will shortly submit a full report regarding the clinical and other features of this fever, it is not deemed necessary that any attempt should be made here to give more than a general outline of the salient points in connection with it.

8. On a future occasion Dr. Cunningham and myself hope to be in a position to submit a detailed account of the more technical features of the enquiry—more especially as regards the diagnostic value of the presence of spirilla in the blood.

Dated Bombay, the 21st June 1877.

Demi-official from—J. B. LYON,

To—General KENNEDY.

THINKING the enclosed may interest you, I have cut it out of the *Bombay Gazette* of the 19th, where it appeared.

The corresponding value in grains of nitrogen 12·5 grammes is 193 grains and of carbon 263 grammes=4,060 grains, this for men weighing 140 lbs. is about my scale, No. 3 (bare sustenance). As the experience detailed in the letter cut from the *Bombay Gazette* shows that men can do a considerable amount of work on a diet of the value quoted above, the indication is that my scales are on the side of liberality rather than in the other way.

Dated Bombay, the 1st June 1877.

To—The Editor of the Bombay Gazette.

As there has been a good deal of discussion lately upon the amount of aliment required for a bare subsistence diet, perhaps some of your readers may be interested by a short account of the experiences of the French during the siege of Paris. The observations made at that time concerning the effect of a reduced dietary upon the Mobiles serving in the trenches are particularly valuable, as the men were all under complete control both as regards their official rations and the extras they were allowed to purchase. The following particulars are gathered from Armand Gautres's valuable work on chemistry as applied to physiology, pathology and hygiene. After mentioning that for people leading a sedentary life 0·2 grammes of nitrogen and 4·202 of carbon per kilogram of body weight daily have generally been accepted as a sufficient allowance for the maintenance of a perfect state of health, he says that the average weight of the Mobiles was 63 kilos (138 lbs. 12¾ oz.), and that these men being employed upon severe duties in the trenches during winter months, and receiving only 12·5 grammes of nitrogen and 263 of carbon per diem preserved generally a good state of health. Upon this he remarks, that the generally accepted bare subsistence ration would appear to be a little too liberal.

As the nature of the aliments used is a matter of importance, the diet table of the Mobiles is particularly valuable as a standard of a liberal bare subsistence ration in a temperate climate.

Diet Table.

They received daily.	Weight of food.	Dry protein matters.	Hydrates of carbon.	Fatty matters.
Fresh meat (if preserved, 100 grammes) ...	175	33·25	...	3·15
Rice or beans	80	5·14	62·04	0·34
Bread	250	18·75	132·70	0·75
Biscuits	250	22·49	159·20	2·09
Coffee ration	30 }	3·30	12·50	...
" purchased	25 }			
Sugar ration	20 }	...	40·	...
" purchased	20 }			
Wine	125	...	...	1·25
Brandy	75	...	...	0·30
Grammes ...		82·93	406·44	49·83

From this table we may draw the following conclusions:—

Proportion of nitrogenous substances to hydrates of carbon and fatty matters.

:: 1 : 4·9 : 0·6

Quantity of nitrogen supplied in 24 hours 12·5 grammes

Quantity of carbon { Protein matters 44 grammes; Hydrates of carbon 181 " ; Fat... ... 38 " } Total 263 grammes.

In order to adapt this dietary to natives of India, we should omit all or part of the meat, insert dâl for rice or beans, increase the bread, omit coffee, wine and brandy, and insert oil and condiments.

I am, &c.,

W. DYMOCK.

Extract from the Proceedings of the Madras Government, No. 1835, *dated* 28*th May* 1877.

Read the following papers :—

No. 431, dated 8th May 1877.

From—SURGEON-MAJOR W. R. CORNISH, F.R.C.S., Sanitary Commr. for Madras,

To—J. H. GARSTIN, Esq., Additional Secy. to the Govt. of Madras, Revenue Dept.

I HAVE the honour to acknowledge receipt of G. O. No. 1630 of 3rd instant, and, with reference to the question therein raised, to submit the following remarks.

2. In my report dated 29th April, I mentioned that the Hon'ble Sir Richard Temple had, at Goondacul on the 24th April, picked out 41 men from a gang of 180, who from weakness and emaciation were obviously unfit for work, and whom he considered should be fed at a relief-house without work. Of these persons, so far as could be ascertained, only 12 had recently come on the works, the remainder having been present for two or more months. In addition to these 41, I noted 18 others who, in my opinion, were in very feeble condition. As, at a previous inspection on 23rd February 1877, Dr. Harvey, Sir Richard Temple's medical attendant, specially comments on the fine physique of the Goondacul gangs, the only inference I can draw from the fact is that, to quote Sir Richard Temple's own words, the men had been getting "thinner and thinner" and "weaker and weaker, till at last they have had to be drafted off to gratuitous relief-camps as unfit to work."

3. I have, in former reports, commented on the great fluctuations which occur in the units of gangs on relief works. From a variety of causes the people met with at one inspection are not to be found at a subsequent inspection. For instance, Dr. vanSomeren, about two months ago, weighed 25 men, 25 women, 25 boys, and 25 girls (total 100) of the relief labourers at Palaveram, and at an inspection made conjointly with myself on Thursday, the 3rd instant, there were present of the 100 persons—

Men	12
Women	3
Boys	5
Girls	4
Total ...	24

that is, more than three-fourths of the individuals whose heights, ages, and weights were specially registered, were not at the works two months subsequently.

4. Now the experience of the Palaveram works is the experience more or less of every relief work in the country. Of the people who come to work, some few remain permanently, but the great majority are constantly shifting from week to week, and month to month. The weakly ones I imagine, from Mr. Howe's experience in the Bellary district, are turned out of the gangs by the maistries, or else give up in despair and wait quietly at home to die.

5. I am quite aware of the fact that in the several labour gangs are to be met many persons who have not been perceptibly reduced in flesh or strength, and their presence amongst the labourers, no doubt, tends to the support of the view that relief wage is, in itself, sufficient to keep a man in health and strength. According to my experience, these well-to-do looking people are mainly composed of two classes :—

(1.) Of small land-holders and servants of ryots who have obviously other means of livelihood besides what they get from the Government relief.

(2.) Of the flesh-eating castes to whom the famine has brought an enormous supply of cheap and nourishing food, and who have been

exceptionally well off during the period when cattle were dying or being sold for a mere trifle to the lower castes who used animal food.

6. A very close and minute inspection of relief labourers in various parts of the country has satisfied me that it is chiefly the above classes who are in good physical condition; and I think it has been the presence of so many of the flesh-eating classes amongst the gangs that has tended to give wrong impressions regarding the actual condition of the people as a whole.

7. From the constant changes going on in the individuals of the several gangs on relief labour, it is clear that there is the greatest difficulty in tracing out the effects of wages on their health and strength; but the impressions of famine officers like Messrs. Price, Gribble, Oldham, Murray, Ferricks, and others, who have had daily opportunities of observations, cannot be lightly set aside, and I think there can be no reasonable doubt that of the vast number who go for a short time on relief works and then leave them, many do so from a conviction that the wage is insufficient for the maintenance of their health and strength, and that many of these gradually drift into a low condition and die in their homes, or ultimately come in great numbers on our gratuitous feeding camps.

In my report on Bellary I alluded to the case of a man who had been on relief works, but whose wife died of starvation, and afterwards two children died in the same way, the third child being in an hopeless state when I saw it, and the father himself so stricken that I doubt if he can survive.

8. Government are well aware of the rapid and enormous increase of gratuitous relief,—not for young children or old people only, but to those in the prime of life,—in all the distressed districts. This is a sure indication of increasing weakness and diminishing vitality amongst the labouring classes.

9. The death registration in the famine districts, as compared with that in districts which have not hitherto required special means of relief, tells the same tale. In the returns before me for the month of February 1877, the registered deaths in the eight famine districts as per margin were in the annual ratio of 81·3 *per thousand of the population*, while in the remaining districts of the Presidency (with the exception of Tinnevelly and South Canara, the figures of which have not come to hand), the registered mortality was only 23·2 per thousand. The people, in fact, of the famine districts in the month of February were dying nearly four times as fast as in other parts of the Presidency. Cholera and small-pox have been general throughout the Presidency, *but it is only in the famine tracts that this excessive mortality has been going on* (the figures for the months of December and January are given in my letter and memorandum, No. 243 of the 6th April).

Nellore.	Kurnool.
North Arcot.	Salem.

10. It would seem, therefore, to be idle to dispute or question the fact of the connection between the famine and mortality of the population. The connection between the experimental famine wage and the mortality of the labourers is not so easy to trace, for the reason that the labour gangs fluctuate so violently as regards their *personnel* that we cannot trace out the history of the individual workers with the precision that is so desirable in an experiment like that of Sir Richard Temple's; and secondly, the destruction of life by chronic insufficency of food is a very slow, though very certain, process. It is easy enough to make assertions on either view of the case when proof is impracticable. The difficulty lies in following out the history of a sufficient number of individuals. As regards those weakened by insufficient food, it seems quite obvious that the tendency would be to their elimination from the working gangs and to their joining the ranks of the sick and the diseased, which swells so largely the mortality bills of the famine districts.

11. But however this may be, I must again take my stand on the insufficiency of the famine wage to supply the food necessary for the physiological requirements of the body. The practical results show that the wages have

NOTE.—Bullocks, carrying from 70 to 100 lbs. of flesh, have been sold for 8 annas each during the famine.

been inadequate to keep the people steadily at work, and the increasing numbers of persons unfitted for work show that the famine relief has not met fully the necessities of the people in the way of keeping up their health and strength. That there are many able-bodied persons still remaining on relief-works I very gladly admit; but I do not think that they have had to thank the famine wage for their present condition, while I am quite certain that in the case of those who have had no other means of support, or in those unable or unwilling to use the abnormal supply of cheap animal food, the effects have been, and will be, disastrous.

12. I infer from the present Minute by Sir Richard Temple, as well as from some of his earlier reports, that he supposes the rescue of persons who have fallen into a weak and emaciated state from prolonged ill-feeding to be a very simple matter, necessitating only care and the judicious use of nourishing food. But my own warnings to the Government have all along been distinct on this point, that chronic starvation is a disease practically beyond remedy, and that more good will result from keeping the population from falling into a low state than from any subsequent efforts to save life in the case of those whose vitality has been imperilled by insufficient food for a long period of time. If the famine has taught us anything at all, it has certainly shown us what a very dangerous condition chronic ill-feeding will bring the people to, and the extreme difficulty of remedying this condition by the most careful and humane system of treatment.

13. The great facts to be borne in mind in connection with the system of relief works is the constant shifting of the units of the gangs, the general preponderance of women in the gangs, thereby showing that some of the able-bodied male population have other sources of employment and most probably of income also. The next two months will prove a very critical time for those who have still strength to work, and it seems to me that, on grounds of public policy, it is highly important that work should be everywhere found for those who really need it for their maintenance, and that it would be safer to err on the side of liberality in this respect up to the time when the normal agricultural employments of the people are resumed.

14. I suppose no one has yet been able to frame anything like an estimate of the effects of the famine on the population, but, making due allowances for defective registration of mortality and for the inevitable mortality that must outlast the dearth of food, I have grounds for supposing that the population of the affected districts will be reduced in eighteen months' time by one-fifth or one-sixth of the number living before the scarcity commenced. This of course is an estimate only based on the current birth and death-rates, and the present generally enfeebled condition of the working classes in the affected districts.

No. 484, dated 11th May 1877.

From—SURGEON-MAJOR R. W. CORNISH, F.R.C.S., Sanitary Commissioner for Madras,

To—J. H. GARSTIN, Esq., Additional Secretary to Government fo Madras.

WITH reference to Minute No. 191 by the Honourable Sir Richard Temple, published in the *Gazette of India* of the 5th instant, page—, I have the honour to state, for the information of His Grace in Council, that my letter No. 431 of 8th May was not intended as a complete reply to that Minute, but merely to answer the question put to me by Government in G. O. No. 1630 of 3rd May, as to the 8th paragraph of that Minute.

2. I am reluctant to prolong a controversy on questions which the Government can practically decide from its every-day experience of the course of the famine as well as I can; but I do not wish it to be inferred that because I am silent the statements contained in Sir Richard Temple's Minute are unanswerable. With the permission of Government, I might, if considered advisable, reply to the Minute as a whole; but I do not think any further observations are needed from me on public grounds, and I have no *personal* wish to enter further into the questions at issue.

Order thereon by the Government of Madras.

RECORDED with reference to G. O. of 22nd May 1877, No. 1788, by which the rate of wages has been raised.

Dated Madras, 30th May 1877.

From—Surgeon-Major W. R. CORNISH, F.R.C.S., *Sanitary Commr. for Madras*,

To—*The Additional Secretary to the Govt. of Madras, Revenue Department.*

IN the *Gazette of India* of the 19th instant, I observe a further communication from the Hon'ble Sir R. Temple, *Bart.*, K. C. S. I., in regard to the sufficiency or otherwise of one pound of grain as the basis of wages for adults on famine relief works. The letter to which I refer (No. 340E of the 10th May 1877) is accompanied by a "Memorandum" drawn up by Surgeon-Major J. B. Lyon, F.C.S., Chemical Analyser to the Government of Bombay, and to which memorandum is appended numerous tables for the construction of dietaries for natives of India, according to the weights of individuals.

2. I would crave the permission of His Grace in Council briefly to state that, in my opinion, the data of Surgeon-Major Lyon's paper do not justify the conclusion which Sir Richard Temple has founded on it, *viz.*, that "a ration based on a pound of grain is sufficient for the sustenance of persons not performing severe labour." I cannot find any statement in Mr. Lyon's paper in which he expresses such an opinion in words, although a casual reader may perhaps draw some such conclusion from his figures.

3. In all the scales of diet drawn up by Surgeon-Major Lyon, he has proceeded on the assumption that "there is no theoretical objection to the proposition that the quantity of food required by adults is proportionable to their weight, provided, of course always that the quantity of work expected from them is likewise proportioned to their weight." This method of procedure is in my opinion extremely fallacious, and I shall briefly show why any scale of diet drawn up in furtherance of this view must be received with the greatest caution.

4. Surgeon-Major Lyon argues that a human being requires food in exact proportion to his weight, and he has furnished tables showing, according to this theory, the quantities of nitrogenous and carboniferous food necessary for the sustenance of persons weighing from 80 to 150 lbs., under the different conditions of hard labour, light labour, and complete rest.

5. If there was any relation between the weight of an individual and his capacity for assimilating food, and effecting work requiring expenditure of force, there might be some show of reason for laying down a principle that men require food in proportion to their weight. But we know, as a fact, that there is no such correspondence—that in a very considerable number of persons, the power to work diminishes as the body increases in weight, notably in those who, with increasing years, tend to develope fat instead of muscle.

6. The every-day experience of the most superficial observer must afford instances of persons of large appetite who never get fat, and of persons, who are not large eaters, who lay on an amount of flesh that becomes a serious burden and inconvenience to them, and with regard to these persons, it is apparently seriously proposed by the Chemical Analyser to the Government of Bombay, that they should be fed, the thin and the stout alike, in proportion to their weight. The mere statement of the proposition in this form is sufficient to show that, without being hedged in by important qualifications, the theory cannot be applied in practical dietetics.*

* NOTE.—The physiological needs of men whose tendency it is to clothe themselves with flesh, and of those who remain thin and spare in spite of all the food they consume, are essentially different. The two types and their personal characteristics have been well defined by Shakespeare who makes Julius Cæsar say to Mark Antony—

Cæs.—"Let me have men about me that are fat;
"Sleek-headed men, and such as sleep o'nights.
"Yond' Cassius has a lean and hungry look,
He thinks too much; such men are dangerous."
Ant.—Fear him not Cæsar, he's not dangerous!
* * * * *
Cæs.—"Would he were fatter! * *
I do not know the man I should avoid
So soon as that spare Cassius. He reads much;
He is a great observer, and he looks
Quite through the deeds of men: he loves no plays
As thou dost, Antony! he hears no music!
Seldom he smiles, and smiles in such a sort,
As if he mocked himself, and scorned his spirit
That could be moved to smile at any thing.
Such men as he be never at heart's ease,
Whiles they behold a greater than themselves,
And therefore are they very dangerous."

7. The theory that work can be performed in proportion to weight is still more wide of the field of practical observation. According to this theory "The claimant," who weighed 22 stones on going to jail, was then more fit to endure hard labour than he was six months after, when he hadl ost one-fourth of his weight, and athletes instead of striving to keep their weight down, ought, according to this theory, to take means to lay on extra flesh. There is, in fact, no relation between the ability and capacity for labour and mere weight of body, as Mr. Lyon would seem to suggest.

8. There are so many things more important than weight of body, bearing on the necessity for food, that it is surprising to find a chemist in these days laying so much stress on *weight* as the principal factor in determining the quantities of food necessary for health and strength. One might think that questions connected with the idiosyncrasies of the individual, his age, race, temperament, habit of body, slowness or rapidity of vital changes, were to be set aside as of no value in comparison with a theory that the body needs sustenance in proportion to its bulk. I suppose Mr. Lyon would admit that a very different amount of nutriment is needed for a spare man of large frame, and without fat, and another of equal weight, but whose size depended on an abnormal deposition of fat in his tissues, yet this weight theory makes no distinction between the requirements of the two.

9. Mr. Lyon has taken 150 lbs. as the average weight of male Europeans, and 105 lbs. as the average weight of natives of India. According to Sir R. Christison's experiments in Perthshire the average weight of Scotchmen was 140 lbs., and from some experimental measurements and weighings made of various castes, by Dr. John Shortt in Madras, some years ago, he found that the average weight of male adults of the fishermen, Boyas, and other labouring castes, was about 120 lbs., and of certain other castes from 114 to 118 lbs. It would seem, therefore, that as regards the classes of persons suffering from famine in this part of India, there is not that great difference in weight and bulk, of the people as a whole, which would justify a very marked reduction of food in comparison with European diets.

10. The argument in regard to food, and average weight and bulk of the body, must not be pushed too far. With certain limitations it must be admitted as useful in the construction of dietaries, but after all, the facts of most importance, are (1) the habits of the people themselves in the choice of food, its nature and amount; and (2) the daily waste which the body suffers from vital changes. Observations on the former head are sufficiently accurate, but in India we have never had any scientific determination of the daily waste of the body, under strictly defined conditions of diet and labour. The subject is so important that I hope some of our scientific officers who have leisure and means of observation, will take it up, and let us know if there be any truth in Sir Richard Temple's surmise, that natives of India excrete less nitrogen in proportion to weight, food, and exercise, than the European races do.

11. There can be no question as to the capacity of the labouring classes of India for hard work, provided they get food in amount and quality to satisfy their necessities. While our streets are lined with miserable scare-crows of humanity, who have scarcely vitality enough to drag themselves along, there may be seen on the Madras beach magnificent specimens of working men, whose strength and powers of endurance are not to be surpassed by the like qualities of any other class of people in the world.

12. A common task of four men is to take from the beach and load on a hand-cart 22 bags of rice, each bag weighing 164 lbs. This load they push or drag to the railway station distant more than 2 miles, unload, returning empty to the beach. Four or five trips of this kind go to an average day's work.

In carrying rice bags from the beach to merchants' warehouses, I find that an average cooly will take up a bag weighing 164 lbs., carry it from 60 to 100 yards over loose, heavy sand, and a further distance of 30 or 40 yards on good road, and up a flight of steps to a loft, and that he will manage 100 of these trips in a day.

13. Work of this nature, I need not observe, is not performed on famine wages even of the highest scale. A cooly engaged in carrying rice from the beach to warehouses, or from the beach to the railway station, can earn one

rupee, or even 1¼ rupee a day, and his diet includes a plentiful supply of meat or fish, and ghee, in addition to his rice and curry. Those interested in the study of Dynamics might work out the number of "foot tons" lifted or moved in the course of a day by the Madras beach coolies, and from this data estimate the amount of food necessary for the production of the requisite force, but practically we know that labour of this class can only be followed by those in full strength and health, and that it could not be accomplished without a liberal diet, such as men earning a rupee a day can well afford themselves.

14. I observe that Surgeon-Major Lyon bases his tables of diets on the experience of the Bombay House of Correction, where it is stated that the prisoners on hard labour gained in weight on the average 1 lb. 10¼ oz. each, while existing on the scale of food for labouring prisoners. I admit that the increase or decrease in weight of the people subjected to a dietary, with certain reservations and limitations, affords indications of value, regarding the sufficiency of the food, but the weight record alone is only a portion of the evidence necessary. Surgeon-Major Lyon says nothing about the sickness and mortality of the prisoners in the Bombay House of Correction. It would be essential to know to what extent they suffered from bowel disorders, anœmia, scurvy and other diseases of innutrition, as well as the general rate of mortality, before coming to the conclusion, that the hard labour scale of diet was actually sufficient to keep the people in ordinary health. As regards the proposed diets, for those on light labour and those doing nothing at all, there appears to be no practical evidence whatever to prove their sufficiency or insufficiency, and all that can be said of such scales is that they are based on a theory, which in some respects has been shown to be fallacious.

15. As a matter of fact and excluding all theory whatever, we have ascertained in certain Madras Jails, that where punishment by restrictions in food, so as to reduce the daily amount of nitrogen to much less than 200 grains, has been persevered in for any length of time, there has been loss of strength, loss of health, and sacrifice of life, and this knowledge would make me very sceptical as to the sufficiency of a "bare subsistence" diet, containing only 136·7 grains of nitrogen, such as Mr. Lyon now proposes. In his table of "*Food Equivalents*," published a few years ago, I observe that Mr. Lyon was more liberal in his views, for he there speaks of 200 grains of nitrogen, and 3,070 grains of carbon, as "almost a starvation diet." Certainly without the most cautious experimental tests, a dietary, like the No. 3 scale of Mr. Lyon, would never commend itself to those practically acquainted with the subject of the connection of food with vital force, and based as it is on mere theory, I think it is to be regretted that a subsistence ration, ranging in nitrogen from 104·2 to 195·3 grains according to the weight of the individual, was ever seriously put forward as a practical guide for those dealing with famine relief.

16. There is one other point requiring a cursory notice. Mr. Lyon proposes to eke out the deficient nitrogen of various cereal grains by the addition of pulse, so as to make the total nitrogen of the food equivalent to the needs of the body, as reckoned by the weight theory.

To take, for instance, the case of an obese native merchant accustomed to feed on rice, and sentenced to hard labour. His daily diet would be made up of 21 ounces of rice, and 9·55 oz. of gram or dhall. In all probability he would be unused to the latter food, and certainly, under no circumstances, could he digest and assimilate the nutriment contained in 9·55 ounces of that grain in the course of 24 hours. If he failed to digest the dhall the nitrogenous principles of it could in no way assist in the nutrition of the body. In these proposed dietaries Mr. Lyon has, in fact, omitted the very necessary caution enjoined in his former paper on "*Food Equivalents*." "Regard should always be paid to the relative proportions in which, by custom or habit, articles of food are consumed by a population. This often indicates a limit of digestibility which ought not to be greatly exceeded."

17. The present period of famine is presenting many opportunities for the study of those conditions of the body induced by privation of food. And the more this subject is considered, the more important does it become that we should follow only sound and true principles, in dealing with questions connected with the food of a community.

18. A careful study of the condition of the people who have been subjected to slow starvation, shows that there is a point in the downward progress of such cases, from which there is no possible return to health and strength. Food of the most nutritious character, and in the greatest profusion, is then powerless to save life. Chemical theories as to the composition of food do not in the least help us to explain why people should die, with an abundance of nutritious food within reach, but if we carefully examine the bodies of those who have died of this form of starvation, we shall find that the delicate structures engaged in the assimilation of nutriment from food, have wasted (owing probably to insufficient use) and undergone degenerative changes, so as to unfit them for their peculiar office. It has been my painful duty to observe, not one or two but many thousands of such cases, within the last few months, and I need not say that the contemplation of the causes leading to these slow, but almost certainly fatal, changes in the assimilative structures of the human body, lead me to look with very grave suspicion upon all proposals for "bare subsistence" dietaries; and especially when such proposals are known to be out of harmony with the natural habits and customs of the people to whom they are proposed to be applied.

19. This is not the time, nor the occasion, to review the practical effects of Sir Richard Temple's experiment in reducing the famine-wages of the people to the basis of one pound of grain, but this much may be stated, that the recent experience of nearly every famine officer who has observed the practical effects of the reduced wages, has led him to believe, and publicly record his opinion, that the subsistence scale of wages was perilously low. While as regards our destitute poor in relief camps we have had too abundant evidence of the fact, that a more liberal scale of food than that purchasable for a famine relief wage, is inadequate to restore health, or to arrest decay.

APPENDIX.

Memorandum by Surgeon-Major I. B. LYON, F. C. S., *Chemical Analyser to Government, Bombay, dated 7th May* 1877.

DURING the year 1876, 534 Native prisoners (all on hard labour) were discharged from the Bombay House of Correction. Their average weight on admission was 105 lbs.=7 stone 7 lbs. On discharge they were found to have gained in weight on an average 1 lb. 10¼ oz. each. Their daily diet, while in Jail, is shown at (*á*) Table I., its value in nitrogen and carbon, calculated by the factors given in Table II., is, as shown (Table III., (*á*),) nitrogen 201·6 grains, carbon 4,011 grains daily.

These quantities of nitrogen and carbon are very much less than the quantities laid down by authorities as requisite for a European of average weight in moderate work. Thus many authorities estimate the quantities required by a European of average weight in moderate work at about nitrogen 300 grains, carbon 4,850 grains daily (see Table IV., 1 and 2). Letheby, taking a mean calculated from the researches of various physiologists, estimates the quantities required by a European male adult of average weight on ordinary labour as nitrogen 307 grains, carbon 5,688 grains (Table IV., 3.) The hard labour diet of English convicts contains nitrogen 281 grains, carbon 5,140 grains per diem (see Table IV., 10.)

The experience of the Bombay House of Correction that Native prisoners at hard labour gain weight on a diet containing less nitrogen and carbon than the quantities laid down by authorities as requisite for European adults of average weight in moderate work, is confirmed by the experience of the Jails of the Hyderabad Assigned Districts. The hard labour diet of these Jails is shown in Table I. (*b'*), and its value, nitrogen 230·5 grains, carbon 4,600 at Table III. (*b'*). On this diet the lowest, except the Bombay House of Correction diet, of the hard labour "diets of the Indian Jails, the prisoners are found to be very healthy." Again the new scale for all Indian Jails proposed by*

---

* Surgeon-Major Lyon is under some misapprehension here. The Jail Conference did not lay down anything beyond a maximum of grain, leaving the quantity of pluse or animal food to be adjusted according to local usages

W. R. C.

the Jail Conference recently assembled at Calcutta (Table I. (c')), values (see Table III. (c')) nitrogen 213·2 grains, carbon 4,454 grains.

Considering together the experience of the Bombay House of Correction and the experience of the Hyderabad Assigned District Jails, and considering also this proposal of the Jail Conference which, it may be presumed, is founded on the experience of officers well qualified to judge of the requirements of Native prisoners, there seems to be no doubt but that hard labour prisoners in Indian Jails require a diet containing less carbon and nitrogen than the amounts laid down by authorities as required by Europeans of average weight in moderate work. There thus appears to be a difference between Indian experience and European authorities.

If, however, the weight of Natives of India as compared with Europeans is taken into account, this apparent difference practically disappears, for taking the Bombay House of Correction diet, shown by experience to suffice for labouring prisoners averaging 105 lbs. in weight and raising its value in the proportion of 105 to 150, the quantities become nitrogen 288 grains, carbon 5,730 grains, quantities not greatly different from—1, Letheby's estimate for ordinary labour (Table IV., 3), *viz.*, nitrogen 307 grains, carbon 5,688 grains, and 2, the value of the hard labour diet of English convicts (Table IV., 10), *viz.*, nitrogen 281 grains, carbon 5,140 grains. The proportion, 105 to 150, is employed, because, while the average weight of the prisoners discharged from the Bombay House of Correction in 1876 was on admission 105 lbs., the average weight of a European male adult is given by most authorities as 150 lbs.

There certainly appears to be no theoretical objection to the proposition that the quantity of food required by adults is proportionate to their weight; provided, of course, always that the quantity of work expected from them is likewise proportioned to their weight. In order, however, to place the three diet scales I now propose (see Tables V. to IX.) as much as possible on the basis of experiences, I take as the foundation of the scales the experience of the Bombay House of Correction, *viz.*, that Native prisoners averaging 105 lbs. in weight, did well at jail labour on a daily diet containing nitrogen 201 6 grains, carbon 4,011 grains. From this I derive the three proposed scales as follows:—

1. *Scale No.* 1.—The labour scale;—is simply the Bombay House of Correction scale, raised and lowered proportionally to the weight of the individuals to be fed.
2. *Scale No.* 2.—The light labour scale;—is Scale No. 1, reduced in the same proportion that the light labour diet of English convicts (Table IV., 12), is lower than English convict hard labour diet (Table IV., 10.)
3. *Scale No.* 3.—The bare sustenance scale;—is Scale No. 1, reduced in the same proportion that a mean between Edwin Smith's and Letheby's estimates for bare sustenance (Table IV., 16 and 17), is lower than English convict hard labour diet (Table IV., 10).

On these three scales the quantities of nitrogen and carbon required daily by men averaging 105 lbs. in weight is in grains (Table V.):—

	Nitrogen.	Carbon.
On Scale No. 1, labour	201·6	4,011
On Scale No. 2, light labour	173·6	3,528
On Scale No. 3, bare sustenance	136·7	3,195

These quantities are represented respectively by the following weights in ounces (a) of jowari and pulse—(b) of bajri and pulse, *plus* in each case, half an ounce of fat:—

				Jowari.	Pulse.	Total.
(a)—Scale 1,	Table VII.,	Columns 3 and 6	...	16·98	5·62	22·60
" 2,	" VIII.,	" 3 and 6	...	15·08	4·68	19·76
" 3,	" IX.,	" 3 and 6	...	15·23	2·56	17·79
				Bajri.	**Pulse.**	**Total.**
(b)—Scale 1,	" VII.,	" 3 and 9	...	18·60	4·00	22·60
" 2,	" VIII.,	" 3 and 9	...	16·50	3·26	19·76
" 3,	" IX.,	" 3 and 9	...	16·67	1·12	17·79

The Tables alluded to are published in *Gazette of India*, 19th instant.

Additional Secy. to the Govt. of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE, AGRICULTURE AND COMMERCE.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING THE 5TH JULY 1877.

GENERAL REMARKS.—In Madras the rainfall during the week has been light except on the Malabar Coast: fair rain has fallen in parts of Tinnevelly, Coimbatore, Kistna and Bellary: elsewhere it has been very scanty, and from Trichinopoly, Madura and Salem none is reported: prospects are said to be less hopeful. The numbers on relief works are 850,258, and on gratuitous relief 537,062, being 13,929 and 29,529 more than last week. There has been a good fall of rain in Coorg, but none is reported from Mysore; the standing crops are beginning to suffer, and prices have risen; the numbers on relief works are 51,790 and on gratuitous relief 116,259: the former are less by 4,991 and the latter more by 5,451 than last week. In Bombay the monsoon still holds off in Guzerat and Kattywar; prospects are fair in the Southern Mahratta Country and the Deccan; in Khandesh more rain is wanted; in Sind the river is rising. The monsoon has set in throughout the Central Provinces, and the fall has been generally good except in Nimár and the Upper Godávari. In Berar the fall has been scanty; sowings are going on. In Central India rain has also fallen generally, but in Rajputana, Marwar and Bikanir have not yet been reached by the monsoon: elsewhere the fall has been good. In Bengal good showers have fallen throughout Bengal proper, Orissa and Chota Nagpore, and prospects are very good; in Behar (except in Patna, Durbhunga and Shahabad) the fall has been insufficient. In Assam rain is reported both from the valley districts and Sylhet. In Burma the rain continues copious and steady. In the North-Western Provinces and Oudh good falls are reported from Benares, Bareilly, Sitapur, Fyzabad and Almora; elsewhere showers have fallen, but it is doubtful if the rains have regularly set in. In the Punjab there has been good rain in Delhi, Umballa, Jullundur, Hissar and Ráwalpindi, and lighter falls at Peshávar, Dera Ismail Khan and Lahore: prospects are good.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Madras—		
Kistna (July 3rd)	·16 in Masulipatam; ·58 in Gudivada; ·23 in Bezwada; ·15 in Sattanapalli; 3·5 in Tiruvur; *nil* elsewhere.	7·30 feet water over anicut; navigation canals opened; rains very much wanted to save the crops planted after the rain of May; prices risen in Bander, Repalli and Vinukonda, steady elsewhere; seers of Rs. 80 weight, rice 8·58, *cholum* 11·10, *raggi* 12·81, *cumboo* 10·70; number on relief works 3,461, number fed gratis by Government 55, Vinukonda numbers wanting, in camps 376, in villages 87, by people 325; cholera nearly broken out in two, and continues in four taluks; small-pox and fever here and there; mild cattle disease reported; grass withering again; markets fairly supplied.
Nellore („ „)	·15 in Udayagiri; ·25 in Kandukur.	Average prices per rupee second sort rice 7·66, *cholum* 9·54, *raggi* 11·45, *cumboo* 9·85; imports by sea none; rice ·86 tons, *raggi* 2 tons, *cholum* 8 tons were brought by road into the town of Nellore; number on district relief works 18,757, number on canal 46,966; number fed gratuitously in camps 23,959, village relief 577, children of coolies employed on works 3,444; reports from Rapur and Kandukur not received; 14 deaths from cholera; water sufficient; standing crops in the Darsi and Addanki divisions drying; cattle have sufficient food in most parts.
Cuddapah („ „)	·03 (average of 3 taluks.)	Average prices seers per rupee second sort rice 6·99, *cholum* 8·49, *raggi* 9·43, *cumboo* 8·69; people on relief works 120,889, increase 6,159, ascribed to pressure of distress; fed gratuitously in camps 11,180, increase 305 due to removal to relief camps of weakly persons on relief works, otherwise fed 44,884, increase 10,451 due to transfer of camp inmates to villages and pressure of distress; cholera deaths 290.
Bellary („ „)	Moderate rain in Havinhadgally; ·45 in Kudlighi; ·55 in Hospett; ·1 in Pennakonda.	Average price second sort rice 6·34, boiled rice at Bellary 7·56, *cholum* 6·72, Jubbulpore *cholum* at Bellary 8·24, *raggi* 7·35, *cumboo* 6·94 seers of 80 tolas; import 3,978 tons, accounts from 2 railway stations only; 293,619 on relief works, increase on revised return for previous week 15,810, chiefly due to the pressure of famine; 149,445 gratuitously fed, of whom 14,646 in relief houses and 4,395 in relief camps; decrease on revised return for previous week 4,417, chiefly due to sending away able-bodied people to relief works; 1,254 gratuitously fed by private charity aided by Government grant; cholera decreasing but still in 10 taluks; small-pox and fever exist; cattle still perishing in a few places from want of fodder; supply of drinking water generally sufficient.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Madras—*continued.*		
Kurnool (July 3rd)	·25 in 3 taluks.	Tumbudra still in fresh; water in Kurnool town abundant; prices second sort rice 6·53 imperial seers per rupee, *cholum* 7·55, *raggi* 8·83, *cumboo* 9·24; cholera, small-pox and fever continue; condition of cattle poor; coolies on relief works 200,024; gratuitously fed 58,731; 101 tons of private grain imported in 3 taluks; physique of coolies fair.
North Arcot („ „)	·15 (average of 2 stations.)	Average prices in Government seers per rupee second sort rice 7·4, *cholum* 8·4, *raggi* 8·9, *cumboo* 7·7; relief works coolies 52,694; persons gratuitously fed in camps 10,826, persons otherwise gratuitously fed 18,338; cholera still prevalent; fever and small-pox in some places; pasture insufficient; cattle still dying of starvation and disease in some parts.
Chingleput („ „)	*Nil*, except a slight fall in Conjeveram.	Prices, rice second sort 8·26, *raggi* 9·77, *cholum* 9·05; imports, rice 143·50 tons, *raggi* 96; condition of cattle amending; pasturage improving; water abundant; on relief works 29,891, gratuitously relieved in camps 13,604, in other places 20,770.
South Arcot („ „)	·9 in Verdachellam; *nil* elsewhere.	Rice second sort 8 seers, *cholum* 10¼, *raggi* 10¾, *cumboo* 11¼; imports by sea none; by rail not known; fed in 90 villages, men 1,547, women 2,328, children 5,997; people healthy; cattle healthy though weak; pasture improved; if no rain falls within the next few days there is fear that the growing *cumboo* crops will fail.
Tanjore („ „)	Slight rain in some parts of Negapatam and Puttukottai taluks on 28th ultimo.	Prices seers rice 8⅞, *raggi* 10½, *cumboo* 11, *cholum* 10¼; imports by sea, rice 2,163 tons, dry grains 225 tons; relief works none; rivers nearly full; cattle disease in Negapatam and Tritrapundi taluks with some loss of life; fodder available.
Trichinopoly („ „)	*Nil*	Third sort rice 7⅖ seers, *cholum* 13, *raggi* 10⅗, *cumboo* 9⅔; import of grain during the week 484 tons; no relief works; number fed in hospital camp on 30th June 634, by private subscription 1,575; cattle disease in some parts; pasture improved; full flood in the Cauvery and Coleroon.
Madura* („ „)	*Nil*	Rice second sort 8⅕, *cholum* 10⅕, *raggi* 9 9/10, *cumboo* 10 1/10; import, rice 865 tons by sea; number on relief works 986, decrease in Palney; number fed gratuitously in camps 53,027, otherwise fed 2,849; cholera continues, deaths 493; cattle doing poorly in Madura and Melur; cattle disease reported to prevail in parts of Madura.
Tinnevelly („ „)	Good rain fell on hills and in two taluks.	Ten feet fresh in Tambraparni on 25th and moderate in Chattar; many tanks received full supplies; *kar* cultivation in active progress, and standing crops healthy; cattle disease in mild form; pasture sufficient; average prices per rupee second sort rice 8 seers of 80 tolas, *cholum* 11½, *cumboo* 11⅓, and *raggi* 10¼; import of grain, rice 803 tons; number on relief works *nil*; number gratuitously fed in camps 1,020; number otherwise fed 21.
Coimbatore („ „)	1·51 in Pollachy in five days; ·24 in Coimbatore in two days; ·10 in Collegal.	Prices rising at some places, falling at few, stationary at most, average prices, rice second sort 6·51, *cholum* 8·22, *raggi* 8·63, *cumboo* 9·07; imports eastward, rice 876 tons, other grains 144; cholera in all taluks; freshes in rivers; irrigation channels well supplied; cultivation extending; cattle in Collegal good, elsewhere poor, losses in Sattiamangalum and Pollachy; pasture available in some parts; fodder scarce; water-supply improving; on relief works 28,713; gratuitously relieved in centres 37,992, in villages 1,806, total 39,798; increase due to extension of distress from continued high prices.
Salem („ „)	*Nil*	Prices of grains, seers of 80 tolas, rice 6¾, *raggi* 8⅛, *cumboo* 7 9/16, *cholum* 8 5/16; import of all grains about 800 tons; number on relief works 41,400; number gratuitously fed in camps 13,500, ditto otherwise 76,500, ditto by private charity 200.
South Canara („ „)	4·60 (average.)	
Malabar („ 2nd)	6·07 (average of all taluks.)	Rainfall sufficient everywhere for cultivation; in certain taluks transplanting of first crops in progress; weather favourable for crops; prospects good; imports by sea, rice 69, *cholum* 3 tons; exports by land, rice 654, *raggi* 58 tons; prices of rice stationary in Cherakal, Palghaut and Cochin, slightly fallen in Kurumbranad and Walluvanad and risen elsewhere, highest 6⅕ Indian seers in Wynaad, lowest 9¾ in Ponani, average 8½ Indian seers per rupee; *raggi* 9 Indian seers per rupee in Wynaad, average elsewhere 11½; cattle healthy; pasture good.
		General Remarks.—General prospects less hopeful; number fed gratuitously 537,062; number on relief works 850,258; exports of grain from Madras by rail during week ending 30th June 1877 9,377 tons.
Bombay— (July 5th)		
Sind— („ 4th)		
Kurrachee ...	...	Monsoon winds; river at Kotri on 2nd 10½ feet, last year 13¼ feet; small-pox in Manjhand, Kotri and Sakro; low state of river has injured crops in 3 talukas.
Shikárpur ...	...	River ·2 feet higher than on same date last year; *kharif* operations going on.
Hyderabad ...	...	River rising slowly.
Upper Sind Frontier ...	...	Water in canals rising.

* On page 1782 of the Supplement to the *Gazette of India* dated the 30th June 1877, in the remarks opposite Madura, for "gratuitously fed in camps 1,962" read "gratuitously fed in camps 8,962."

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bombay—*continued.*		
Guzerat— (July 4th)		
Ahmedabad ...	·37	Total rainfall 2·50, more required in every taluka; weather very warm.
Kaira ...	Drizzling rain.	No signs yet of monsoon.
Surat ...	·35	Seventeen cholera cases in Balsar taluka, 10 fatal.
Broach ...	1·32	Total rainfall 4·52, rain needed Amod and Jambusar; sowing operations commenced.
Khandesh and Násik— (July 4th)		
Khandesh ...	In Dhulia ·33.	Total rainfall 3·68; rising crops suffering for want of more rain; public health good.
Násik ...	·50 generally; 1·29 in Yeola.	Sowings progressing, prospects fair; 17 deaths from cholera, cases also occurred in Násik town.
Konkan—(July 4th)		
Tanna ...	4·47	Total rainfall 17·49, more required; sowing operations generally completed; cholera in 6 and small-pox in 3 talukas.
Deccan—(July 4th)		
Poona ...	Average ·65.	Average rainfall from 5th June 7·41; crops well.
Ahmednagar ...	...	Sowing operations continue; cholera in 8 talukas, cases 353, deaths 186.
Sholapur ...	...	Sixty-seven deaths from cholera; sowing of *kharif* continues; strong south-west wind.
Satara ...	1·32	Total rainfall 6·54; sowing progressing rapidly; 434 deaths from cholera.
Southern Mahratta Country—(July 4th)		
Belgaum ...	Very little rain in Athni and Gokak, good fall in all villages of Parasgad, less in Chikori, much in Bidi, enough in Belgaum and Sampgaon.	Sowing still progressing; state of crops good, but in Bidi rice in some places injured by excessive moisture.
Dharwar ...	*Nil* in Gadag and Kalghatgi talukas and in Narnud Peta, aggregate of other talukas 10·61.	Young crops good; sowing of early crops progressing; cholera exists, deaths 54.
Kanara ...	3·23 in Karwar.	Total rainfall 26·33; sowing operations almost finished; plants thriving; cholera continues, deaths 53.
Kaládgi ...	·08	Total rainfall 5·31, more wanted; sowing retarded in 4 talukas for its want; *kharif* shoots drying up in Bagewadi and Bijapur; cholera decreasing, cases 64, deaths 52 in 7 talukas.
Kattywar and Gaekwar's Territory.		
Rájkot ...	...	Weather cloudy; rain much wanted; sowing operations not commenced.
Wadhwán ...	·05	Total rainfall ·5; sowing commenced in Limri and Wánkáner talukas.
Baroda ...	1·32	Total rainfall 4·47.
		General Remarks.—River and canals rising in Sind; monsoon still holds off in Guzerat; prospects fair in the Southern Mahratta Country and the Deccan, except Khandesh where more rain is wanted; cholera decreasing in the Southern Mahratta Country, but continues in the Deccan and Tanna to a considerable extent.
Bengal— (July 5th)		
Chittagong ...	1·22	Fever very prevalent throughout; one case of small-pox reported from Cox's Bazar.
Noakholly ...	21·85	Fever prevalent.
Chittagong Hill Tracts	6·84	
Hill Tipperah ...	1·62	
Backergunge ...	8·06	Sporadic cases of fever and cholera still continue; disease among cattle has appeared in four thanas; elsewhere they are healthy.
Furreedpore ...	·55; 12·77 in Madareepore; 4·55 in Goalundo.	

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bengal—*continued.*		
Dacca ...	·13	Raining on morning of 5th July.
Tipperah ...	·68	
Mymensingh ...	3·75	
24-Pergunnahs ...	1·83	Public health generally good.
Jessore ...	1·38	
Nuddea ...	2·54	
Moorshedabad ...	1·58	
Pubna ...	1·87	Cholera has entirely disappeared; fever somewhat prevalent.
Rajshahye ...	1·04	
Bogra ...	2·02	
Maldah ...	·42	
Dinagepore ...	·07	Still some cases of cholera.
Rungpore ...	1·23	Fever somewhat prevalent; number of cases of small-pox has decreased; public health on the whole good.
Cooch Behar ...	2·33; 3·74 in Dinháta; 3·22 in Mekhaliganj.	Public health very good.

G. H. M. BATTEN,
Offg. Secy. to the Govt. of India.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

Abstract of the Proceedings of the Council of the Governor General of India, assembled for the purpose of making Laws and Regulations under the provisions of the Act of Parliament 24 & 25 Vic., Cap. 67.

The Council met at Simla on Thursday, the 28th June 1877.

PRESENT:

His Excellency the Viceroy and Governor General of India, G. M. S. I., *presiding*.
His Honour the Lieutenant-Governor of the Panjáb.
His Excellency the Commander-in-Chief, K. C. B.
The Hon'ble Sir E. C. Bayley, K. C. S. I.
The Hon'ble Sir A. J. Arbuthnot, K. C. S. I.
Colonel the Hon'ble Sir Andrew Clarke, R. E., K. C. M. G., C. B.
The Hon'ble Sir J. Strachey, K. C. S. I.
Major-General the Hon'ble Sir E. B. Johnson, K. C. B.
The Hon'ble Whitley Stokes, C. S. I.
The Hon'ble T. C. Hope, C. S. I.
The Hon'ble F. R. Cockerell.
The Hon'ble B. W. Colvin.

CHUTIA NÁGPUR ENCUMBERED ESTATES ACT AMENDMENT BILL.

The Hon'ble SIR ALEXANDER ARBUTHNOT moved that the Bill to amend the Chutia Nágpur Encumbered Estates Act, 1876, be taken into consideration.

The Motion was put and agreed to.

The Hon'ble SIR ALEXANDER ARBUTHNOT also moved that the Bill be passed.

The Motion was put and agreed to.

BRITISH BURMA EMBANKMENTS BILL.

Colonel the Hon'ble SIR ANDREW CLARKE presented the further Report of the Select Committee on the Bill to provide for the execution of works urgently required in connection with embankments in British Burma, and moved that the Reports be taken into consideration. He said that he had only to call the attention of the Council to two slight, but still important, alterations, which had been made upon the suggestion of the Lieutenant-Governor of the Panjáb. The Bill as brought before the Council at a former meeting attempted to describe the class of people to be brought under the operation of the Act, who were referred to simply as "male labourers," and who might, or might not, be interested in the district where the work was to be done and in the protection which was to be afforded. It also indirectly omitted to bring under its influence those who were the most benefited by these embankments, and who would suffer most from any injury done to them by flood and storm; for the lands in Burma were held by small landholders or cultivators, as they were locally called, occupying small farms of from eight to ten acres. As the clause originally stood these people were practically exempted; now they were brought under the provisions of the Bill.

The Lieutenant-Governor had further pointed out the inconsistencies, difficulties and possible abuses which would arise under the Act as then framed, and suggested a modification based upon the working of the Act in the Panjáb, in which the local officers had to prepare and be responsible for certain lists

of, and to give proper notice to, the persons to be employed on those works. The character of the workers in British Burma was also to be taken into consideration; for the great majority of them were, as he had already stated, men possessed of small farms of eight or ten acres, and the alteration in the Act would allow the local officers to put these people's names on the list subject to regulations which must be approved by His Excellency in Council.

There was also another rather important suggestion which came from the same source, relating to the penalties attaching to the employment of immigrants under contract; and in the last section of the Bill we had now added a proviso to the effect that section 71 of the British Burma Labour Law, 1876, which rendered penal the employment of immigrants under contract, should not apply to the embankment-officer or those authorized by him to act under section 3 of the Bill.

The Motion was put and agreed to.

Colonel the Hon'ble SIR ANDREW CLARKE then moved that the Bill as amended be passed, remarking that in asking His Lordship and the Council to give to what was now a lifeless paper the quickening force of an executive law, he (SIR ANDREW CLARKE), unlike other authors, had no aspiration as to the success of his offspring; his hopes rather were that the landowners and cultivators in British Burma, confiding in the honesty and justice of English administration, would ever permit the Act to rest an inanimate power.

The Motion was put and agreed to.

BROACH AND KAIRA THÁKURS INCUMBRANCES BILL.

The Hon'ble MR. HOPE moved that the Report of the Select Committee on the Bill to relieve from incumbrances the estates of Thákurs in Broach and Kaira be taken into consideration. He said that, when introducing the Bill to the Council, he took the opportunity of explaining that its object was to extend to the Thákurs of Kaira provisions similar to those which existed in other districts and had lately been applied to the zamíndárs of Sindh; and also to get rid of an Act on the Statute-book, XV of 1871, and to subject the Thákurs to whom it applied to the present Bill with certain reservations. The Bill, as introduced, received, in somewhat vague terms, the approval of the then Government of Bombay; but since the accession of Sir Richard Temple it had been thought proper to make a second reference to that Government, in consequence of which a number of useful suggestions had been received and had been carefully attended to by the Select Committee. The Committee had made a number of changes which were mentioned in the Report; but none of them were sufficiently material to need a definite explanation to the Council.

The Motion was put and agreed to.

The Hon'ble MR. HOPE also moved that the Bill as amended be passed.

The Motion was put and agreed to.

PANJÁB COURTS BILL.

The Hon'ble MR. STOKES moved for leave to introduce a Bill to consolidate and amend the laws relating to the Courts in the Panjáb. He said—"As this is one of the measures of which the primary object is to condense and clarify the existing Acts and Regulations of British India, I propose, with Your Excellency's permission, to make a short statement as to the work in this direction which still remains to be performed.

"Some respectable authorities are still unconvinced of the advantages of codification, by which I mean the reduction to a statutory form of laws previously unwritten, save in the reported decisions of judges and in the treatises of legal text-writers. But, so far as I am aware, no one, except the proprietors of

unsold editions of lawbooks, objects to the consolidation of separate enactments relating to the same subject. For, in the first place, it diminishes the size and consequent costliness of the statute-book, and thus renders it more accessible to the bulk of the population, who are supposed to know the law and are bound under heavy penalties to obey its provisions. In the second place, judges, lawyers and the public are greatly helped by having all the enactments relating to the same subject-matter within the four corners of a single Act. Qualifications and exceptions thus run less risk of being overlooked, and the law becomes capable of being easily comprehended and accurately remembered.

"But the improvement in the form of different parts of the law, which almost always results from bringing its *disjecta membra* together, is to some minds still more satisfactory. Diffuseness, repetitions, ambiguities, inconsistencies and obscurities are noticed and removed by the draftsman: defects in arrangement are corrected: incidental matters common to most laws, and provided for in India by the General Clauses Act, the Limitation Act, and the Oaths Act, are omitted; and in style and structure the consolidated law is made to correspond with the other Acts of the Legislature.

"The measures of consolidation now before this Council are six in number. First, we have the Bill dealing with Arms, Ammunition and Military Stores, which has been pending for the last six and a half years, but which we shall soon proceed with under the guidance and auspices of my honourable friend Sir Edward Bayley. This Bill will consolidate three Acts and part of a fourth. We then have the Sea Customs Bill, which Mr. Hope, I believe, intends to proceed with as soon as we return to Calcutta, and which consolidates six Acts. We then have the Railway Bill, of which my friend Sir Andrew Clarke hopes to publish a revised edition in the course of the summer, and which consolidates four Acts. Then we have the Shipping Bill, which was introduced nearly eleven years ago, and which has been standing over, and must, for obvious reasons, continue to stand over, until Parliament has consolidated and amended the Imperial Statutes relating to Merchant Shipping. This Bill consolidates no less than ten Acts. Then we have the Bill to consolidate and amend the law relating to Stamps and Court-fees, a difficult and repulsive piece of drafting, which will soon, thanks to the untiring exertions of my friend Mr. Cockerell, be ready for introduction to the Council. This Bill will consolidate three whole Acts and parts of eight other Acts and Regulations. Lastly, we have the Bill relating to the Presidency Small Cause Courts, which will consolidate five Acts, and will be proceeded with as soon as the Home Department, to which its subject-matter pertains, shall have settled some questions as to the jurisdiction which should be conferred on those tribunals.

"Besides these six Bills actually before the Council, we have the Bill relating to the Panjáb Courts, which I now ask leave to introduce, and which will consolidate no less than seven Acts.

"We also propose to consolidate the laws relating to copyright, patterns and designs, which are now scattered through three Acts.

"But the most important and difficult of all our projects of consolidation has still to be mentioned. This is the Bill to consolidate the laws relating to Criminal Procedure, which has been undertaken at the suggestion of the Secretary of State. The Council is aware that no less than three Codes of Criminal Procedure are now in force in British India. The Code of 1872, amended by Act XI of 1874, which is in force throughout the Mufassal; the High Courts Act (X of 1875), which is in force in the Presidency Towns, Allahabad and Lahore; and the Presidency Magistrates Act (IV of 1877), also in force in the Presidency Towns. The proposed Bill will recast the Code of 1872, combine with it the substance of the High Courts Act and of the Presidency Magistrates Act, embody ten other laws dealing respectively with enquiries into the behaviour of public servants, sentences of penal servitude, forfeitures and State prisoners, and thus at last give to India a complete Code of Criminal Procedure.

"The result of passing these measures will be to substitute nine Acts for sixty-two Acts and Regulations. If the local Legislatures of Bengal and Bombay

would consolidate their numerous laws relating to land-revenue and to ábkárí, and if Parliament would only proceed with the great measure of consolidation framed originally by the late Mr. Merivale, twice recast by Sir James Stephen, and twice revised by Sir Arthur Hobhouse and myself, which will replace by a compact and clearly-arranged statute of 172 sections the forty-three statutes in which the law relating to the Government of India, the High Courts, the Civil Service and the Ecclesiastical Establishment is now contained, the existing written law of this country would be simplified as much as could be reasonably desired.

"To reward the Council for the patience with which they have listened to a number of dry details, I will conclude with a few wise words of Lord Bacon's—the first, so far as I know, of English lawyers to appreciate the advantages of consolidation. That great man said:—'The wisdom of a law-maker consisteth not only in a platform of justice, but in the application thereof, taking into consideration by what means laws may be made certain, and what are the causes and remedies of the doubtfulness and uncertainty of law; by what means laws may be made apt and easy to be executed, ..., how they are to be pruned and reformed from time to time, and what is the best means to keep them from being too vast in volumes, or too full of multiplicity and crossness'."

The Motion was put and agreed to.

LIMITATION OF SUITS BILL.

The Hon'ble Mr. Stokes also presented the final Report of the Select Committee on the Bill for the limitation of suits and for other purposes.

The Council adjourned to Thursday, the 12th July 1877.

GOVERNMENT OF INDIA.

FINANCIAL DEPARTMENT.

EFFECT OF THE DEPRECIATION IN THE VALUE OF SILVER ON TRADE, ON REMITTANCES, AND ON PRICES IN INDIA.

Dated Calcutta, the 10th March 1877.

From—H. W. I. WOOD, Esq., Secretary to the Bengal Chamber of Commerce,

To—The Secretary to the Government of India, FINANCIAL DEPARTMENT.

I AM directed by the Committee of the Chamber of Commerce to acknowledge the receipt, with its enclosures, of your letter No. 162 of the 16th January, requesting the opinion of the Chamber on the effect which the fall in the price of silver may have had on trade, on remittances, and on prices in India.

I am further directed to inform you in reply that, in the opinion of the Committee, the effect of the depreciation in the value of silver has been to cause heavy losses to all importers of piece-goods, the values of which, while they remained firm in England, scarcely advanced here at all, and the proceeds when remitted home at the low exchange were insufficient to cover original cost. The evil was aggravated by the uncertainty that attended the course of the exchange market, which prevented importers having any solid basis of calculation for their transactions, and drove them in self-defence to secure their exchange beforehand. The effect on prices of exports was to raise their values in the Calcutta market, as the low rate of exchange enabled the exporter to pay a higher rupee price without increasing the "laying down cost" or sterling value. This additional price was the profit made by the "native middlemen" or the holders of produce in the port of exports; the Committee have grave doubts whether any portion of this extra price ever found its way to the ryot and producer. Had the depreciation lasted longer, or should it again occur, the native merchant would no doubt have to share this profit with the producer, as the depreciation of a currency, if continued sufficiently long, must raise the value of all articles, even those of daily and necessary use, and the ryot would reap the benefit of such universal rise in enhanced rates for his produce. But they would neither of them gain much in the long run, as, though they would both get higher prices for the produce of the land or of their labor, they would have to pay equivalently higher rates for all the necessaries or luxuries that they would have to buy from others. The native dealer is quick to take advantage of every circumstance that would warrant higher prices from the exporter, but slow in recognising the necessity of dropping prices, though he is sharp enough in demanding lower rates when he himself is the purchaser from the ryot or producer. It will be seen from this that prices may rise materially, and even continuously, on the European exporter at the large marts, and no benefit accrue to the cultivator, producer, or manufacturer in the interior of the country till prices of all necessaries of life, or a general rise throughout the country, enable him to demand an enhanced rate. All articles of purely or mainly of European production are, in some measure, exceptions to this rule. Tea, for

example, is grown only by Europeans; and as it is sold direct to the exporter at public auction, no middleman is employed, and the tea planter reaps all the benefit of such extra price as the lower rate of exchange enables the exporter to pay. The coolies on the gardens are, however, under agreement, and do not participate in this. In indigo and silk, which are almost entirely of European production or manufacture, no middlemen are, as a rule, employed, as those articles are sold here by public auction, or shipped to European markets on owners' account. The proprietor of the factory or filature gains the advantage of the rise of price, but this does not filter down to the native cultivator, except after some time, when prices have generally risen for other articles as well. On the whole, therefore, it may be assumed, as a general rule, that the depreciated value of silver and the consequent fall in the rate of sterling exchange made itself at once felt wherever the holder of produce came into close contact with the exporter, but its effect was not so apparent in the mofussil, nor did it last sufficiently long to admit of the lower laboring or working classes reaping any benefit.

To that large class of Europeans, with fixed incomes, who are forced to supply many of their daily necessary wants from stores of European shopkeepers, and who are under necessity of making remittances home for their families, the hardship has been very great. They found not only that the increased cost of their remittances seriously impaired the balance of income retained for their own support, but that even this reduced balance was still further cut into by the higher prices the European shopkeeper put on his goods. Though exchange has since risen, these higher prices are still retained, owing to the uncertainty as to the future. The hardship therefore to all those requiring to make remittances to England, and are compelled to use goods of English manufacture, continues with little abatement.

Dated Bombay, 15th May 1877.

From—J. Gordon, Esq., Secretary to the Bombay Chamber of Commerce,

To—The Secretary to the Government of India, Financial Department.

I am directed by the Committee of the Bombay Chamber of Commerce, to acknowledge the receipt of your letter No. 162, of the 16th January last (Financial Department), requesting that the Governor General in Council may be favoured with the opinion of the Chamber on the effect which the fall in the price of silver may have had on trade, on remittances, and on prices in India; and intimating that any facts which throw any light on the subject should be given to the latest date possible.

The Chamber has now the honor to enclose the following Statements:—

Statement A, showing the total value of the imports into, and the exports from, British India, together with the total allotments of Council Bills on India, and the balance of enfacements and re-transfers to India, of Indian Government Paper, in each month in the years 1874 1875 and 1876, and in January and February 1877.

Statement B, showing the exports of the principal articles from Bombay Presidency to foreign ports from January 1874 to March 1877, with the average prices of the articles in Bombay, the value of Bar Silver in London, and the rates of exchange and freight current each month in Bombay.

Statement C, showing the values of the principal articles imported into the Bombay Presidency for the same period.

Statement D, Nos. 1 and 2, showing the average price each month of linseed and rapeseed in Bombay and in London, during the years 1870-76, and the first quarter of 1877, with the current rate of exchange; and No. 3, showing the average price, each month, of Fair Dhollera Cotton in Bombay and in Liverpool, during the years 1858-60, and 1874-76, and in the first quarter of 1877, with the current rate of exchange.

Note.—The years taken in Statement D, No. 3, are selected as giving average values of cotton in the years immediately preceding the American Civil War, and in the last three years:—the years of the War and subsequently, when high abnormal prices ruled, being passed over, as affording no just bases of comparison;—and

Statement E, Nos. 1 to 19, showing the prices current of food grains from January 1874 to March 1877, at Bombay, Ahmedabad, Kaira, Surat, Broach, Tanna, Kolaba (Alibagh), Khandeish, Nasik, Ahmednuggar, Poona, Sholapore, Kaladgee, Sattara, Belgaum, Dharwar, Rutnagirri, Kanara, (Carwar) and Punch Mahals (Godhra).

The Chamber considers it essential to the enquiry that the monthly fluctuations of the balance of trade of British India, during the last three years, should be shown, not only as being interesting in themselves, but as bearing out the views of the Chamber on the other statements appended, which relate to trade and prices in the Bombay Presidency only. These fluctuations are, with other particulars, shown in Statement A.

From Statement B, it will be seen that one effect of the fall in the price of silver relatively to gold was to develope the export of many articles of produce which had not been of large export before; the only important exceptions, indeed, being cotton, the export of which fell off, because of the deficiency of the crop, combined with the increased consumption of the local mills, and gingelly seed, which is chiefly grown in Khandeish; and being an early crop, the injurious effects of the drought upon it are manifest in the diminished exports during the latter months of 1876. The great increase which took place in the exports of the other principal articles, during the year 1876, will be found in the following table of the exports in the last three years :—

	Cotton.	Wool.	Wheat.	Linseed.	Rapeseed.	Gingelly Seed.	Myrabollams.	Gold.	Silver.
	Cwt.	Cwt.	Cwt.	Cwt.	Cwt.	Cwt.	Cwt.	Rs.	Rs.
1874........................	4,374,991	144,473	790,609	827,437	5,619	235,362	144,701	21,78,000	39,81,491
1875........................	4,358,432	136,471	733,458	1,594,958	213,214	451,632	135,669	3,65,896	77,56,640
1876........................	3,410,951	149,264	1,235,577	2,671,689	408,187	340,266	150,480	1,40,56,960	2,07,03,608

The attention of His Excellency the Governor General in Council will doubtless be drawn to the extraordinay increase in the export of gold, which this Statement shows, as having occurred in 1876, and particularly during those months when exchange was so depressed. This is a feature in the trade quite unknown before, the flow of gold having always hitherto been *to* India, and never *from* it. The imports exceeded the exports until the end of May last, when the average rate of exchange for the month had not fallen below 1*s.* 8 $\frac{5}{16}$*d.* But as exchange declined, the exports of gold increased, amounting in July to £211,000, in August to £334,000, and in September to £232,000. The rate of exchange, taking the average of each month, did not exceed 1*s.* 8*d.* again until towards the end of October, when a decided improvement set in; and the consequences became apparent in the sudden falling off in the exports of gold from 33 lakhs in August to little over 2 lakhs in November and December, and to Rs. 3,900 altogether in the 3 months ending 31st March 1876. Turning now to Statement C, it will be seen that the imports of gold in January 1877, when the average rate of exchange stood at 1*s.* 10*d.*, rose to £69,810, in February, when exchange stood at 1*s.* 9$\frac{13}{16}$*d.* to £305,680, and in March, when exchange stood at 1*s.* 9$\frac{1}{8}$*d.* to £210,530. The imports during March were all ordered when exchange stood much higher than the average rate here given, and when it fell to near that point, all orders ceased for English gold, none of which has since been imported. It has now been pretty well ascertained that the demand for gold from Europe for actual consumption practically ceases, when the price rises to about Rs. 18 per tola or 1*s.* 9$\frac{5}{8}$*d.*, and it begins to be offered again for export at very little over Rs. 18, when it lays down in London at 1*s.* 9*d.* It is, however, a remarkable feature that these large imports of gold were made at prices higher than used to be paid for gold, or, in other words, gold has generally only been imported in quantity when exchange was considerably above the rates ruling from January to March; and this we find is owing to the very high and unprecedented prices which were paid for gold for export during the extreme depression in exchange, enabling the country to re-buy what it had sent away, and to give high prices although not nearly so high as the prices at which it had sold. The country in fact sold its gold when prices were high, and re-bought when they were low, though they were still higher than in former days it could afford to buy at.

It is obvious that this operation could not have been completed satisfactorily if it had been felt that the purchasing power of the rupee with respect to articles of general consumption, such as the ordinary food of the people, had become impaired, and the figures contained in the Statements E prove that the prices of food-grains did not rise till the latter months of 1876. The rise which then took place, and which still continues, is entirely accounted for by the famine prevailing in the Southern Mahratta Country and in Madras. The fall in the price of silver relatively to gold did not weaken the belief of the people of India in the one standard of value with which they are familiar, namely, the rupee; on the contrary, it only stimulated them to sell all the gold they could lay hands upon in order to avail themselves of the opportunity of acquiring a greater number of rupees than usual in exchange for it. And it will doubtless occur to His Excellency in Council, that these proofs of the keenness with which the natives of India detect, and profit, by any movements in the relative value of gold and silver, show that the difficulties which other countries have experienced in adopting a double standard would be no less formidable in India: and His Excellency will further no doubt feel, as the Chamber does, that this fact alone, apart from considerations of sound policy, affords a sufficient answer to the many proposals (some of them emanating from quarters sufficiently influential to be entitled to a hearing) to raise the rate of exchange by attempting in various ways to give the rupee a value different from its metallic value.

While the effect of the depreciation of silver relatively to gold was to stimulate exports, its natural tendency on the other hand was to curtail the import trade relatively to the

increased exports. The following comparative table—extracted from Statement A—of the exports and imports of British India, during the six months ending with October 1876—the period of greatest depression in exchange—with the exports and imports in the same period of 1875 and 1874, brings this point out more clearly :—

Statement A. From 1st May to 31st October.

	Export of Merchandize.	Imports of Merchandize.
	Rs.	Rs.
1874	24,67,62,716	17,65,22,328
1875	25,38,14,029	17,19,09,779
1876	27,97,39,099	17,33,31,525

Statements B and C, which show from month to month the effect of the varying exchange on the exports and imports of this Presidency, also illustrate it. It will be observed that although the imports relatively to exports were smaller than those in the years of comparison, they were actually in some instances larger, as will be seen from the following table showing the values of the main articles imported into Bombay in the years 1874, 1875 and 1876 :—

	Cotton Piece-Goods.	Cotton Yarns.	Metals.	Sugar and Sugarcandy.	Raw Silk.	Silver.	Gold.
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
1874 ...	4,53,62,404	78,45,475	81,17,637	48,95,230	73,27,947	4,00,72,724	1,22,46,639
1875 ...	4,02,29,944	55,89,182	1,17,91,294	64,87,786	58,72,511	3,08,46,713	1,11,41,630
1876 ...	5,28,56,285	68,88,362	1,49,39,768	74,15,770	48,37,340	5,67,06,139	68,27,964

Of these articles, cotton piece-goods and yarns and metals, come principally from countries having a gold standard only ; and, as these are the great articles of consumption in India, when the country is in a prosperous state, the increased imports in 1876, which was generally a year of low exchanges, would appear to show how largely the consuming power of the country may be augmented by the stimulus given to its export trade. But although the total values of piece-goods and metals, for the whole of the year 1876, exceed those of the year 1875, and those of 1874, it will be observed that the imports were greatly curtailed during those months when exchange was much depressed.

Remittances, depending on the balances of payments to be made, are affected as the increase in imports falls short of, or exceeds, the increase relatively in exports. Under a temporary fall in silver, they are curtailed as much as possible, for anything tending to restrict the import trade necessarily abridges remittances. The Chamber, however, has no exact information as to the actual remittances made in 1876, and in previous years.

With regard to the effect of the depreciation of silver upon prices, the Chamber desires to observe that the famine, which would doubtless have had the effect of raising the prices of food generally in the Presidency, whether silver was depreciated or not, impairs in its effects the utility of the Statements marked E in respect of the prices given in the last 6 months of each, inasmuch as it is impossible to say from these statements if any portion of the rise in prices of most of the food-grains which took place in October —when the distress began—was due to the depreciation in silver. The rise in the price of wheat, which, however, besides being a food-grain, is now one of the main articles of export, and the price of which is therefore liable to be affected by the fluctuations in exchange, was in part distinctly due to the depreciation of silver, and to the tendency to higher prices in Europe. It is, however, generally believed that—excluding the effects of the famine on prices—the purchasing power of the rupee in respect of ordinary articles of consumption, such as the food of the people, remains undiminished. But the prices of articles of export, such as wheat, linseed and rapeseed, are governed to a great extent by exchange. Statements D, Nos. 1 and 2, show that the rise in the prices of linseed and of rapeseed began about July 1876; but other causes, besides the decline in exchange, were at work to aid the advance, namely, the scarcity of seeds in Bombay, in consequence of the block of traffic on the G. I. P. Railway, which had the effect of retarding the arrival of crops from Nagpore and similar distant centres of the trade,—the deficient crops in the districts affected by the drought adjacent to Bombay, and an advance in the prices of seeds in Europe. Statements D shew how this country received a much larger sum in silver for its produce, though the value in gold may not have increased, or whilst it may even have fallen. A few instances are selected from these Statements to illustrate this point, though the rise in the prices of seeds

in Europe, which began when exchange was very low, prevents us from exhibiting it generally with greater clearness:—

Statement D, No. 1, Linseed.

	Price per Cwt. in Bombay.	Exchange.	Price in London.
1874.	Rs. A. P.	*s.* *d.*	Rs. A. P.
March	5 10 0	1 $11\frac{1}{4}$	9 0 0
1875.			
August	5 10 0	1 $9\frac{11}{16}$	7 11 5
1876.			
August	5 11 6	1 $7\frac{15}{16}$	8 1 7

Statement D, No. 3, Cotton.

	Price per Cwt. in Bombay.	Exchange.	Price per Cwt. in Liverpool.
1875.	Rs. A. P.	*s.* *d.*	Rs. A. P.
June	25 5 0	1 $9\frac{7}{16}$	26 12 5
August	23 6 6	1 $9\frac{11}{16}$	25 2 10
1876.			
August	23 7 6	1 $7\frac{15}{16}$	24 14 10
November	25 0 0	1 $8\frac{9}{16}$	26 3 5

The Chamber is of opinion that as the depreciation in silver did not continue long enough to affect the prices of articles of general consumption, such as the ordinary food of the people, the result has been a clear gain to the producer, and of great benefit to the country, greatly increasing the export trade, and giving a great impetus to the internal one, as may be seen from the increased railway traffic. Another advantage has been that of securing a large quantity of silver at cheap prices: in other words, an enormous quantity of produce has been sold and value received in return which otherwise would never have been received. The facts show that a heavy fall in exchange, so far from being an unmitigated evil, as it is too often considered by those who do not look below the surface, really confers great benefits on the country, as tending to develope enormously its agricultural resources, and to stimulate its industries. And it must not be forgotten that this effect does not altogether disappear with the cause which gave it birth, for trade, once induced to run in certain channels, often continues to flow in them long after the original cause has ceased to operate.

On the other hand, trade is injuriously affected by the fluctuations in the silver market, and by the uncertainty which hangs over the future. The silver market may be said from various causes introduced of late years, to have become dependent on an entirely new set of influences, the force of which cannot yet be accurately measured, and until the market adjusts itself to these influences, and finds a new and comparatively stable basis (as it will in time, though, it is to be feared, not for some years to come), fluctuations will continue to be frequent, and to embarrass the trade of all countries working in a silver standard of value; and the Chamber would take this opportunity most respectfully to press on His Excellency's attention the enormous influence which is exercised by His Excellency's Government on the silver market, and on the rate of exchange. As a seller of bills, sufficient to finance for about one-fourth of the whole exports of British India, the Secretary of State for India's operations cannot but have a most important effect, and according as his sales are regular and for amounts declared sufficiently beforehand, or irregular and for changing amounts, so will the fluctuation and embarrassment consequent thereon be enormously influenced. The Chamber trusts therefore that His Excellency's Government will give the weight it deserves to this important fact, and that their endeavours in devising and carrying out their loan and bill operations will be specially directed to causing as little agitation as possible to a market, which whilst the silver market is in its present transition state, can scarcely fail to have always within it the elements of excitement.

In conclusion, I am directed to say that all enquiries, with a view to eliciting further information on the various new conditions affecting silver, cannot but be very useful. The Chamber observes with much satisfaction the enquiries set on foot through the Foreign Office, and it hopes that all information obtained will be made public as soon as possible.

Dated Madras, the 11th June 1877.

From—J. Jones, Esq., Chairman, Chamber of Commerce,

To—The Assistant Secretary to the Government of India, Financial Department.

I have the honor to acknowledge receipt of your letter of the 16th January, and of the copy which accompanies it, of the Secretary of State's despatch of the 31st October, on the subject of the effect which the fall in the price of silver may have had on trade, on remittances and on prices in India, and requesting an expression of the Chamber's opinion thereon.

In reply, I am desired to inform you that this Chamber are disposed to think that sufficient time has not elapsed since the serious depreciation referred to commenced, to admit of confident opinions being safely offered relative to its effects upon Indian commerce. The question is a vast one, and its solution will deeply interest this Chamber: but it is considered advisable not to hazard the expression of possibly crude theories based on an imperfect knowledge of cause and effect.

Telegraph.

ADMINISTRATION REPORT OF THE INDO-EUROPEAN TELEGRAPH DEPARTMENT FOR THE YEAR 1875-76.

Nos. 204—11 T, dated Simla, 22nd June 1877.

Read—

Letter No. 254, dated 28th July 1876, forwarding the above, and the Report.

OBSERVATIONS.—

LINES.

These consist of—

			Miles.
A cable (gutta-percha) from Kurrachee to Fâo	...	...	1,235½
A cable (Hooper's core) Jashk to Bushire	...	...	503
A land line of 2 wires, Kurrachee to Jaskh	...	...	715
Total Persian Gulf Section		...	2,453½
A land line of 3 wires, Bushire to Teheran	...	...	792
GRAND TOTAL	...	...	3,245½

2. The length of the [Kurrachee to Jashk land line has by improved re-alignments been reduced by 24 miles.

3. The Bushire to Teheran land line has now for the first time three wires along its entire length; one of these is devoted to the Persian local, and the other two to the international traffic.

4. The table given in para. 5 shows that the insulation of the cables has on the whole improved since last year. The Kurrachee to Fâo cable was broken by the anchor of the mail steamer *Arcot* near Bushire on the 15th February, and was subsequently successfully repaired.

5. The insulation of the Mekran coast land line, Kurrachee to Jashk, is not satisfactory, but improvements are being effected.

6. The insulation of the Persian land line is on the contrary good. On this line 749 iron posts have been erected during the year, and only about 1,000 wooden posts remain.

INTERRUPTIONS.

7. These have not been brought out at all clearly. It is a point to which attention was drawn when the last report was submitted, and the Director-in-Chief was then instructed that the tables should contain the interruptions to the *lines*, and not be limited to the interruptions to the *traffic*, and His Excellency the Governor General in Council regrets to find that this order has not been carried out. The table of interruptions, Appendix I, gives only those to the traffic. For next year the table should show all the interruptions to the *lines*; this should be followed by an abstract showing which of them caused interruptions to *traffic*, and briefly why. The interruptions on Government lines should be shown separately from those on the Company's lines.

8. There are several apparent discrepancies in the tables showing the interruptions—these will form the subject of a separate letter.

9. The interruptions on the Government lines have been fewer and less important than in previous years, but unfortunately the other lines in connection with them have suffered seriously. Thus heavy falls of snow paralyzed the lines of the Indo-European Company for long periods. The Indian lines were seriously injured by floods from the Indus. And the Madras to Penang cable was broken and remained unserviceable for many months. There has in consequence been much diminution of traffic with countries beyond India.

10. His Excellency in Council is glad to observe that the damage by bullet-shots to the iron standards in the Persian Section is on the decrease, only 88 poles having been so damaged against 213 in the year previous.

TARIFFS AND TRAFFIC.

11. The year under review is memorable for the introduction under the St. Petersburgh Convention of the new single-word tariff, with a minimum of 10 words, which came into force on the 1st January 1876. Also for the limitation by the Convention of the length of the word to ten characters, the excess being charged as another word.

12. Notwithstanding the serious accidents before alluded to, and the consequent decrease in the China and Far East messages, the year has been a most favorable one as regards the total traffic carried by the Indo-European lines, for the total interruption of the cable of the alternative Red Sea line threw the whole of the traffic with India and places beyond on the Indo-European lines for no less than 78 days.

13. The year was also remarkable for the visit of His Royal Highness the Prince of Wales which occasioned a considerable increase in the length and number of messages, and which led to a special contract being entered into with the *Times* newspaper.

14. The following table shows the financial progress of the Indo-European Department for the past four years:—

Years.	Persian Gulf messages.	Persian Gulf earnings.	Persian earnings.	Total earnings.
	No.	Rs.	Rs.	Rs.
1872-73 ...	20,199	4,09,920	23,879	4,33,799
1873-74 ...	29,527	5,56,225	53,413	6,09,638
1874 75 ...	36,931	5,89,035	66,471	6,55,506
1875-76 ...	50,831	7,70,042	79,000	8,49,042

The increase in both number of messages and revenue is very marked and is very satisfactory, being equivalent to 37·6 per cent. for the former and 29·3 per cent. for the latter.

15. The traffic tables do not distinguish between official and private messages as they should do: it is only from the body of the Report, para. 23, that it is known that the official messages numbered 1,670, and that that number represents an increase of 86 per cent. over the number for the previous year.

16. Appendix E shows that, while the total traffic is pretty evenly divided between the Red Sea and Persian routes, the former takes nearly two-thirds of the Far East traffic, while the latter carries about one-sixth more of the Indian traffic.

17. Appendix G shows that the average speed of transmission of messages has improved by 26 minutes on the Indo-European route, and by 36 minutes on the Red Sea route as compared with last year to *Calcutta*, but on the other hand, Appendix H exhibits a falling off in the speed between Kurrachee and Fâo, and between Kurrachee and Bushire of 18 and 23 minutes, respectively.

18. Although Appendix K seems to show a very large percentage of errors in the messages transmitted, yet it is satisfactory to perceive that the percentage of *serious* errors has much decreased.

19. The debt due by the Turkish Government has been liquidated in full during the year under review.

20. The Capital and Revenue Accounts give approximate figures only. The total outlay shown under the former head is £1,150,403, but the latter booked accounts give an increase in the total of £2,519. Similarly under the latter head the booked accounts show a decrease in the receipts of £4,920, and in the expenditure of £2,443.

21. Though the surplus shown for the first time by the Revenue Account is very satisfactory, yet it must be remembered that it has been due in a great measure to the complete failure for a lengthened period of the alternative Red Sea route.

ESTABLISHMENTS.

22. His Excellency the Governor General in Council notes with satisfaction that the general conduct of the employés is reported to have been good, also

that the number of resignations in the signalling staff has decreased from 14 to 1.

ORDER.—Ordered, that a copy of this Resolution be communicated to the Director-in-Chief, Indo-European Telegraph Department, for information and guidance.

Also that copies of the Report and Resolution be forwarded for information to the Director General of Telegraphs, the Government of Bombay in the Public Works Department, and the Foreign, Financial, Military (Marine) and Revenue, Agriculture and Commerce Departments.

Ordered also, that a copy of the Report and Resolution be forwarded to the Secretary of State for information.

Ordered further, that the Report and this Resolution be forwarded to the Home Department for publication in the Supplement to the *Gazette of India.*

W. A. CROMMELIN, *Major-General, R. E.,*
Secy. to the Govt. of India.

No. 254, dated 28th July 1876.

From—MAJOR J. U. BATEMAN-CHAMPAIN, R. E., Director-in-Chief, Indo-European Government Telegraph Department,

To—The Secretary to the Government of India, PUBLIC WORKS DEPARTMENT.

Preliminary.

In submitting, for the information of the Government of India, the Annual Administration Report of the Indo-European Telegraph Department for thetwelve months ending the 31st March 1876, I beg to express my hope that allowance may be made for its not reaching you until some weeks after the 1st August, the day on which it is properly due. The information from which I have to compile my statement has to be prepared at Teheran and Kurrachee from records which are addressed to those places from remote stations, and on the 1st April last Major Smith and I were only beginning, at Bushire, our journey northwards, while Lieutenant Stiffe, the Acting Deputy Director, was also absent from his head-quarters on duty connected with cable repairs. On this occasion, therefore, the executive officers were unable to begin the preparation of the necessary documents till long after the conclusion of the official year, and the data for this report were received by me only on the 16th instant.

Classification of report.

2. I beg to classify my remarks somewhat as heretofore, under the heads—

1.—Lines.
2.—Interruptions.
3.—Tariffs and Traffic.
4.—Establishments.
5.—General.

HEAD 1.

Lines.

3. The lines which are known as those of the Indo-European Government Telegraph are in two divisions—

The Persian Gulf Division, and
The Persian Division,

Outline of the Indo-European Government system.

and they serve to carry, to and from India, the two streams of traffic, one by the Indo-European Company's Line through North Europe and the Caucasus, to and from Teheran, and thence by our wires and cables, to and from Bushire and Kurrachee; the other by Central or Southern Europe, to and from Constantinople, and so by Turkish Arabia to and from Fâo, which is connected by means of our Persian Gulf cable with India. Circumstances, which will be noted under head 3, have so reduced the business *viâ* Constantinople and Fâo, that it is now of very small importance in comparison with that by Teheran.

During the year under report no additions were made to the lines under my charge, but some necessary repairs were undertaken and satisfactorily executed. The original cable between Kurrachee and Fâo is insulated with gutta-percha, and is laid in the following sections:—

Mileage of cables and land lines, Persian Gulf Division.

	Miles.
Kurrachee to Manora ...	18
Manora to Gwadur ...	277·88
Gwadur to Jashk ...	272·07
Jashk to Henjam ...	142·68
Henjam to Bushire ...	369·26
Bushire to Fâo ...	155·58
TOTAL ...	1,235·47

From Kurrachee to Bushire there is a second line which runs along the Mekran Coast between Kurrachee and Jashk, and is usually called the Mekran land line. From Jashk to

Bushire the duplication is effected by means of a second cable, laid in 1869, and called the second Persian Gulf cable. It is insulated with India-rubber material, known as Hooper's core, and from Jashk to Bushire is 503 miles long.

The Mekran land line was shown in last year's report to have 739 miles of posts carrying 1,478 miles of wire, that is to say, two wires from end to end. In consequence, however, of some slight alterations of route, the total extent of the line has been somewhat reduced, and it is now as follows :—

	Milles.
Kurrachee to Ormara ...	... 215
Ormara to Gwadur ...	... 170
Gwadur to Charbar ...	... 115
Charbar to Jashk ...	... 215
	715

The Persian Gulf Division consists therefore of—

	Miles.
1st Cable, gutta-percha, Kurrachee to Fâo ...	... 1,235·47
2nd „ Hooper's core, Jashk to Bushire ...	... 503
Land line, double, Kurrachee to Jashk ...	... 715
TOTAL	... 2,453·47

Mileage of land lines, Persian Division. 4. The Persian line measures—

	Miles.
Bushire to Shiraz ...	... 196
Shiraz to Ispahan ...	... 320
Ispahan to Teheran ...	... 276
TOTAL	... 792

It now carries three wires throughout, one being devoted to the Persian internal traffic. When my last year's report was sent in, a short length of the 3rd wire was still wanting near Shiraz, but during the year on record, this was fortunately supplied, and proved of immense service during the protracted interruption of the Red Sea Telegraph at the end of 1875, and the consequent increase of work over our lines.

5. As regards the state of the different sections on the 31st March, it is gratifying to be able to record that the electrical condition of cables was as satisfactory as at the date of my preceding report. The following statement, extracted from the Electrician's report, shows the insulation per knot in millions which the cables originally possessed, as well as the insulation observed in March 1875 and March 1876 respectively :—

Condition of the cables.

Section.	Length.	Originally tested.	Insulation, March 1875.	Insulation March 1876.	REMARKS.
Fâo-Bushire	155·58	622	780	640	* $\frac{1050}{2035}$ means of tests taken during February. Cable totally interrupted during March through breakage caused by mail steamer. Communication restored 29th March. Repairs of the old faults will be undertaken in April.
Bushire-Henjam	369·26	440	250	222	
Henjam-Jashk	142·68	460	190	186	
Bushire-Jashk	503	2,000	$\frac{940}{2385}$	$\frac{1050}{2035}$*	
Jashk-Gwadur	272·07	400	108	236	
Gwadur-Manora	271·88	275	170	218	
HARBOUR CABLES.					
No. 1	...	24	15	11	
„ 2	...	4	3·5	3	
„ 3	...	75	27	25	

The India-rubber cable tests, opposite the words Bushire to Jashk, indicate the existence of faults, regarding which full information has already been submitted to you. It was our intention to remove these and completely examine the Hooper's cable during November, but as reported, the interruption on the Red Sea Line induced me to defer the operations, and it was not until after the conclusion of the year under consideration that this cable was put in order and satisfactory proof obtained of the non-deterioration of the material. On the 15th February, before the operations were commenced, this cable was broken by the anchor of the mail steamer *Arcot* close to Bushire. The traffic, however, was transmitted without difficulty through the gutta-percha cable, and the break was mended by Lieutenant Stiffe on the 29th March.

6. During the year 1875-76 several small repairs to the cables were effected; the cores, especially in the neighbourhood of Kurrachee Harbour, suffering from the attacks of Teredo, and the shore ends at the various landing places requiring constant care and attention. In this manner 18·93 miles of gutta-percha, and ·46 miles of India-rubber cable, were expended. A part however of the former quantity (*viz.*, 5·9 miles) was deteriorated shore end, which, being of no further use, was stripped, and the iron covering wires sold (see Appendix I).

Expenditure of cable.

7. The condition of the Mekran Land Line, as regards insulation, is not satisfactory. A large number of the insulators were collected from various parts of the line and tested at Kurrachee, for the purpose of ascertaining the insulative properties still possessed by porcelains which had been in use for some years. The result of this testing led to an application being

made for insulators of a new pattern, like those supplied to the Indian Department. The coast traversed by the line is, in many places, exceedingly precipitous and difficult, and the atmosphere injuriously affects the posts and the insulators in a short space of time. But the substitution of perfect for imperfect material over a considerable length of the line has already much improved the working, and some small changes in the direction of the line have also been carried out with advantage. The future treatment of this Mekran Land Line is a question which demands a special report in the present year.

Condition of Mekran Land Line.

8. The Persian Land Line gives no trouble whatever with its insulation, the climate being generally as favorable as that of Mekran; near the sea is the reverse. The old original wooden posts have now been almost entirely replaced by iron standards, and the appearance of the line as well as its working is very satisfactory. Seven hundred and forty-nine iron posts were put up during the year, and between Bushire and Teheran only about 1,000 wooden poles remained. These are for the most part on the mountainous passes, and they are gradually being removed as the iron standards arrive up-country. The work has been seriously hindered by the wilful damage inflicted on our line near Bushire, which has necessitated our using up, in that district, posts which were intended for other parts.

Condition of Persian Land Line.

9. Mr. Ffinch, the Deputy Director of the Persian Gulf Division, visited Gwadur and Jashk in May 1875. Lieutenant Stiffe inspected the Mekran Land Line in January, and accompanied me (Mr. Ffinch being on leave) in my tour of the Gulf in March 1876. Major Smith met me at Bushire, and he and I marched together in April over the Persian Line. I have submitted a separate report of my journey of inspection to the Right Hon'ble the Secretary of State. The condition of the different offices was satisfactory, and I am glad to learn from Mr. Ffinch that Gwadur is now healthy. I submitted to you some observations on the sanitary state of this place when I was there last March, and it seems probable that the measures taken with reference to the drinking water, &c., have done good.

Inspections of lines during 1875-76.

HEAD 2.

Interruptions.

10. The total interruptions of the Indo-European Government Lines were fewer than in any previous year, and amounted in the aggregate to only 59 hours 15 minutes. One break in May 1875, which lasted $31\frac{1}{2}$ hours, was caused in a rather curious way. The line crossed a village not very far from Bushire, and this village having been attacked and burnt to the ground by robbers, the wires were severed by heat and could not be immediately restored. The remaining $27\frac{3}{4}$ hours of interruption were caused by excessive cold on the high ground in the interior of the country. Wilful damage has, I am happy to say, somewhat decreased during the past year, although the south of Persia is probably in a more lawless condition than ever, and robberies and outrages of the worst kind continue. In fact, the road from Bushire to Ispahan and some parts between Ispahan and the capital are so infested with robber tribes that travelling is out of the question, except for strong and well-armed parties. The marauders, however, display no special hostility to the telegraph, and rarely touch it except between Bushire and Kazeroon. In that district every man and boy carries a gun, and the temptation to try the effect of their bullets on the iron poles seems to be irresistible. Only 88 sockets were however bulleted during the past year as compared with 213 in the preceding 12 months. This diminution may be attributed in a great measure to Major Smith having built cairns of stones, some 4 or 5 feet high, round each post wherever stones were procurable. The pole-shooting districts are therefore now limited to the low sandy country near Bushire and Borazjoon. For repair in that neighbourhood the 300 *wrought-iron* poles, lately sent out from England, will be entirely set aside.

Interruptions, Persian Division.

Lawless state of the country.

Pole shooting near Bushire.

11. The money due to us by the Persian Government on account of wilful damage has not yet been paid. At the end of the official year we were owed under this head 7,390 tomans, for which duly authenticated bills were submitted to Her Majesty's legation. It is right, however, to say that very urgent orders have been issued to the different Governors in the south to do all in their power to prevent mischief and to punish offenders. On the whole, I am of opinion that the marked decrease of interruptions on this very hazardous Persian line gives satisfactory proofs of the solidity of construction and of the efficiency of the conservancy branch of the Establishment.

Payment for repairing wilful damage.

12. On the Fâo-Bushire-Kurrachee gutta-percha cable there were no interruptions at all during 1875-76. The India-rubber Bushire to Jashk cable was, as before stated, broken on the 15th February, and continued disabled for 43 days. It might have been repaired in a week had it been worth while to incur expense in rapidly restoring a cable which was not at the time absolutely wanted. The interruptions on the Mekran Land Lines were decidedly heavy, and reached a total of no less than 307 hours. Several breaks were caused by landslips on the Malan headland, and others by heavy storms and floods which are peculiary detrimental to the stability of a sandy soil every where intersected by deep ravines. As the Jashk to Kurrachee cable was always in working order, these breaks on the Land Line never led to cessation of the traffic, so that the actual interruptions on the lines under my charge were, during 1875-76, as stated above, only $59\frac{1}{4}$ hours.

Interruptions in Persian Gulf Division.

Breaks on other lines with which the Government Indo-European system is connected.

13. Disasters, however, of a very much more serious character befell the lines on which we depend. During the severe weather which prevailed over the greater part of Europe in November and December 1875, some terribly protracted interruptions happened on the Indo-European Company's wires in the Caucasus and vicinity of Kertch. The snowfall was so excessive that all attempts to reach the broken parts of the line were for many days unsuccessful, and the accidents were the more to be regretted, becaues they occurred precisely when the Eastern Company's line was out of order, and when, therefore, ours was most wanted. The Indo-European Company's wires were thus paralyzed for no less than 663 hours 26 minutes, and as the alternative Russian Crown lines were likewise carried away for almost as long, communication with the East, *viâ* Teheran, was for a time entirely suspended. The Crown lines were restored sooner than the Company's, and were lent for 84 hours, 10 minutes, for Eastern work, so that the 663 hours' break was reduced practically to one of 579. The Turkish lines were working as usual in a somewhat spasmodic fashion, and messages were passed over them, while the Indo-European and the Red Sea were *hors de combat*. Further reference is made to this part of the subject under the head "Tariffs and Traffic," para. 27. The Turkish lines were, as will be seen on reference to Appendix II, disabled every month in the year for periods varying from 3 hours 58 minutes, to 3 days 20½ hours, and reaching a total of 25 days 9 hours 58 minutes.

14. But accidents of an unusually serious nature were not confined to the systems which feed our lines from the west. The Indian Government wires which connect Kurrachee with the interior and the Far East were broken down on three occasions, *viz.*, in May, July and September, altogether for 200 hours. The last of those breaks continued for 5 days 8 hours, and was caused by excessive floods between Umarkote and Deesa. The utmost efforts were made by the officers of the Indian Department, even at the risk of life, to restore communication, but their endeavours were unavailing until the floods had somewhat subsided. I believe that the line from Hyderabad to Deesa offers at present the only means of telegraphic communication between Sind and the other Presidencies, and if so, it may be a matter worthy of consideration whether so important a link of the chain of telegraph by the Persian Gulf to Europe ought not to have the support of an alternative line.

15. The year 1875-76 was an excessively unlucky one also for the Madras to Penang cable and for the Far East system of telegraph, and our department suffered considerably in consequence, more particularly when ours was the only working line to Europe, and when therefore we might naturally have worked for an unusual number of messages to and from Australia and China *viâ* Teheran.

16. On the whole the year 1875-76 was a bad one as regards interruptions, although the lines of the Indo-European Government Department happened to be exceptionally fortunate.

HEAD 3.

Tariffs and Traffic.

Tariff between India and Europe in 1874-75.

17. From 1st April to 30th September 1875, the tariff between London and India *viâ* Teheran or the Red Sea was the same as in 1874-75, *viz.*, francs 50 for the first 10 words, and francs 5 for each subsequent word, a slight additional charge being levied on messages from the provincial towns of the United Kingdom. Between the other countries of Europe and India the charge was arranged for messages of 20 words, with a subsequent 10-word increment, and the tariff varied for each country. The same system was in operation on the Turkish route, with this difference that the charges *viâ* Turkey were in general six per cent. less than those *viâ* Teheran or the Red Sea.

Word Tariff from 1st January 1876.

18. From the 1st January 1876, the date on which the rules of the St. Petersburg Convention came into force, the single-word system was introduced between Europe on one side and India on the other, at a fixed mean tariff for all Europe of francs 5·50 per word* *viâ* Teheran or the Red Sea, and francs 5 *viâ* Turkey. From the same date the length of the single word was limited to ten characters on the Morse instrument, any excess being chargeable as an extra word.

* Except Russia and Turkey.

19. The net traffic earnings of the Department, during 1875-76, subject to final adjustment, were as follows:—

	In the Persian Gulf. Rs.	A.	P.	In Persia (estimated). Rs.
On International messages...	7,03,632	11	6	73,500
On Local messages	57,595	9	6	4,000
On Press messages at reduced rates on Sundays	8,514	0	0	1,500
	7,70,042	5	0	79,000
TOTAL ...	Rs. 8,49,042-5			

The above shows an increase of Rs. 1,87,120 over the total net earnings of 1874-75, due chiefly to the interruption of the Red Sea cable from the 16th November 1875 until the 2nd February 1876, during which period of 78 days all the Indian traffic was necessarily sent over one line.

Causes of increase of revenue.

20. Another event which contributed to raise our receipts was the visit to India of His Royal Highness the Prince of Wales, which naturally led to the transmission of long and detailed messages for the use of the Press. Nor must I omit mention of the rental of one of the Teheran wires on Sundays by the *Times* newspaper, at a total charge

of £25 per working hour. This arrangement was introduced under the provisions of the St. Petersburg Convention, and is certainly of benefit to the Indo-European lines.

Effect of Single word-unit.

21. It is difficult to state as yet the effect of the word-unit in force during the last quarter of the official year. Firstly because of our limited experience, and secondly, because of the extraordinary traffic thrown on the Gulf lines from the failure of the Red Sea route during January and part of February, but so far as I can ascertain, the effect appears to have been good, and the number of social messages has increased.

22. It will be noticed that the earnings of the Department last year were greater than they have been at any time since the establishment of the competitive route by the Red Sea, and they would have been considerably increased but for the unfortunate interruption of the Madras to Penang cable from 15th November to 24th December, which deprived us of the Far East traffic while the Red Sea cable was broken.

Number of messages transmitted.

23. The total number of messages transmitted during 1875-76 was 50,831, showing an increase of 37·64 per cent. over those of the preceding year. Forty-nine thousand one hundred and sixty-one of the messages were of a commercial or private nature, and 1,670 were of Government service. The increase of Government despatches, as compared with those of the previous year, was 86 per cent.

Free Government news messages.

24. Four hundred and twenty-four Government news messages, containing 308,111 words, were also transmitted from Kurrachee to Bushire free of charge. Had they been subjected to the ordinary tariff, they would have added Rs. 20,910 to the earnings of the cables.

25. The progress of the traffic revenue during the past four years is shown below—

YEAR.	No. of messages transmitted by Persian Gulf Line.	Persian Gulf Section net earnings.	Persian Section net earning.	Total.
		Rs.	Rs.	Rs.
1872-73	20,199	4,09,920	23,879	4,33,799
1873-74	29,527	5,56,225	53,413	6,09,638
1874-75	36,931	5,89,035	66,471	6,55,506
1875-76	50,831	7,70,042	79,000	8,49,042

The figures in column 3 are are taken from the report of the Traffic Manager at Kurrachee, as are also the following extracts:—

"Of the total traffic passing between India and Europe by the Indo-European route, the Persian Line carried 91·56 per cent., and the Turkish 8·44 per cent.", and

"Of the total traffic which passed between India and the Far East on one side, and Europe on the other, the division was as follows:—

	ROUTE. Indo-European. per cent.	Red Sea. per cent.
Messages between India and Europe	42·67	30·31
" " China, Japan and Australia and Europe	9·30	17·72
Total percentage by each route	51·97	48·03"

In the Appendices will be found further tables prepared by Mr. Herbage, containing in detail the monthly earnings of the Persian Gulf Lines, the rate of transmission of messages and other useful information.

Speed of transmission.

26. The transmission between England and Calcutta *viâ* Teheran was maintained at a high rate of speed, the average time occupied ranging from 1 hour 33 minutes to 2 hours 35 minutes per message when the lines were in their normal state, to about 10 or 12 hours per message during the months the Red Sea Line was broken. The speed *viâ* Turkey was not so satisfactory, the average being, as a rule, seven times greater than *viâ* Teheran, and the natural consequence is, that senders decline to use the Turkish line even though the charge is lower than that by the other two routes.

27. During the unfortunate interruptions on the Company's lines in December, I did all in my power to cause the Turkish route to be more freely employed. I addressed the Director General at Constantinople by telegraph and letter, pointing out that his lines were for the time the only ones available, and urging him to do his utmost to ensure their being worked with speed and accuracy, and in a letter to the *Times* I drew attention to this means of communication with the East. I also endeavored to cause the Indo-European Company to link the working portion of its lines in Europe with the Asiatic lines of Turkey by means of the Odessa-Constantinople cable; but in this latter effort, I regret to state that I was unsuccessful owing to the strong objections entertained by the Company, mainly on the ground of tariff complications.

Capital Account.

28. The total capital expenditure of the Department, on 1st April 1875, amounted to £1,157,058. To this the sum of £8,542 was added during the year chiefly for iron posts for Persia. On the other hand, the sum of £15,198 was received during the year

in reduction of the Capital account. This sum was made up principally of the recovery of £ 11,372 from Turkey for telegraph materials supplied prior to 1863, and an instalment of £1,986 from the Indo-European Company on account of the Persian Debt. The Capital account at the end of the year stood therefore at £1,150,402-17-8, or less than at the beginning.

Turkish and Persian Debts.

29. The debt against Turkey for Telegraph material supplied for the erection of the Fâo to Bagdad Line is now closed, and the debt against Persia is, under Article XIV of the new Anglo-Persian Treaty, being liquidated by the Indo-European Telegraph Company. The amounts of the two debts and the sums received in payment are shown in Appendices III and IV.

Revenue Account.

30. The Capital and Revenue accounts of the Department, prepared by Mr. Brasher, are attached. The Revenue account shows the Traffic earning of the year to have amounted to £ 84,904 and the Miscellaneous Receipts to ... „ 1,993

Total ... £ 86,897

On the other hand the total expenditure in India, Persia and Europe, debitable against the Department amounted to £76,431, thus exhibiting, for the first time, since the establishment of competition by the Red Sea, a profit on the year's working.

31. But however gratifying it is to me to record this profit of £10,500, it is, as I have before noted, due to exceptional causes which cannot be expected to recur. International Telegraphy is no doubt on the increase, and I presume that traffic with the Far East will prove no exception to the general rule ; but more accurate information on this head than that at my command can be given by the Indian Department which gathers together all the threads of which the Persian Gulf system holds but one. The competition between the Indo-European and the Red Sea routes is severe, and the latter had certain advantages in connection with the Far East traffic of which we are deprived. I cannot, therefore, on examining the circumstances, anticipate that the earnings of 1876-77 will be so high as those of the year under report. The general depression of trade is serious, and promises to continue, and the disturbed condition of Eastern Europe, and the re-appearance of the plague in Turkish Arabia, will, I fear, almost obliterate the small business still brought to us by the Ottoman Lines.

Head 4.

Establishments.

32. Towards the close of the official year sanction was received from the Government of India to a slight permanent increase of the establishment of the Persian Gulf Division. The necessity of adding to the number of our clerks was pointed out by me in my letter No. 362 of the 7th October 1874, and in other communications to which I need not here particularly refer, and this necessity was severely felt during the great pressure of work at the close of 1875. The clerks present at that time were kept on duty during more than customary hours, and afterwards the Government of India was good enough to award them a gratuity of one month's extra pay in consideration of their meritorious exertions.

33. The establishment of the offices in the Persian Gulf Division is now as follows :—

	Superintendents.	Assistant Superintendents	Clerks.
Kurrachee	1	...	6
Ormara	...	...	2
Gwadur	...	1	5
Charbar	...	...	2
Jashk	1	...	12
Henjam	...	1	2
Bushire	1	...	14
Fao	1	...	3
Spare for leave, sick, &c.	...	...	12
TOTAL ...	4	2	58

34. The behaviour of the staff has been, with very few exceptions, most creditable, and if the percentage of errors in signalling appears rather large, it must not be forgotten that the vast majority of messages transmitted are made up of difficult code words which are peculiarly liable to be misspelt. Mr. Ffinch observes that "in 1874-75, 14 clerks left the Department; last year only one left, and one was dismissed. This would apparently show that the service is becoming more popular, and if so, and we retain our experienced clerks, the errors and complaints must decrease." Mr. Ffinch adds that "the general management throughout the year appears to have been satisfactory. During the break of the Red Sea cable, one and all worked willingly and well, more especially the signalling clerks who had frequently to keep 12-hour watches at a stretch."

35. The establishment in Persia was also slightly revised during the year, and its cost somewhat reduced. In the personnel but few changes have taken place. The vacant Inspectorships have been filled up as reported, and a check clerk has been added to the Central Office at Teheran. Major Smith, in alluding to his inspection of the line, observes, that he had every reason to be satisfied with the condition of the offices and with the general efficiency and discipline of the staff.

36. The establishment of the Offices in Persia is as follows :—

	Superintendents.	Assistant Superintendents.	Clerks.
Teheran	1	1	6
Ispahan	...	1	3
Shiraz	1	1	4
Minor Offices	...	...	...
Koom-Kashan	...	...	...
Soh-Koomeyshah	...	...	...
Abadeh-Dehbeed	...	...	...
Sivand-Dasht Argin	...	...	11
Kazeroon-Konar Takhteh ...	...	...	...
Borazjoon, 1 Signaller each ...	...	...	...
TOTAL ...	2	3	24

It should be noted, however, that the Superintendents are in charge, not only of the principal stations opposite which they are entered above, but also of the lines and smaller stations in their divisions, and they are constantly away from their head-quarters. At the small testing stations also a Signalling Clerk is not always available, in which case one of the Inspectors not shown above, is usually at hand.

HEAD 5.

General.

37. The St. Petersburg Conference of International Telegraphy was held in the summer of 1875, and the new rules there approved were, as stated in para. 18, brought into operation from the 1st January 1876. Colonel Robinson and I were the delegates of the Indian Government, and as our full and separate reports on the doings of the Conference were submitted shortly after our return to England, I need not enlarge on the subject in this paper. The changes introduced which most affect, and I hope beneficially, this Department, were the reduction of the unit to the single word, the limit of length of each word to ten characters, and the adoption of a fixed common charge for all Europe on extra European messages.

38. My subsequent movements during the year were as follows : I left England on the 15th January. On reaching Bombay I received orders to visit Calcutta where I remained as you are aware from the 17th to the 26th February. I then proceeded to Kurrachee and began my tour of inspection, and was, as before stated, at Bushire, after completing my visit to the Gulf stations on 31st March last.

39. The *Amberwitch*, the Department vessel in which I made my journey up the Gulf, was in excellent condition, and her appearance and the good order preserved on board reflected credit on her commander and his officers.

40. The repairs necessary to the Fâo Office have been referred to in another report; generally speaking the Gulf buildings were in a satisfactory state.

41. The cable in stock at Kurrachee, on the 1st April 1875, was 110·61 knots of gutta-percha, and 13·39 of Hooper's. The lengths received or transferred during 1875-76 were gutta-percha 9·10, India-rubber 20; and lengths expended respectively 18·93 and ·46, so that, on the 31st March 1876, we had in hand a total of 100·78 knots of gutta-percha cable, and 32·93 of Hooper's, for future maintenance; see Appendix I.

42. The total value of stores received at Kurrachee during the year was Rs. 78,407 against Rs. 36,077 in the previous twelve months; *vide* Appendix V. It will be seen that the cause of the increase was due to the receipt of the 20 miles of India-rubber cable referred to above, which is valued at Rs. 48,234.

43. The value of the issues from stock was Rs. 50,940 against Rs. 47,732 in 1874-75, the increase being on account of a large number of insulators sent out to replace defective ones.

44. The value of stores in hand at Kurrachee on the last day of the year was—

	Rs.
General Stores	3,90,901
Stationery, &c.	5,504
TOTAL ...	3,96,405

45. At Manora some new quarters were completed by the Public Works Department for the gutta-percha jointer and for the 2nd foreman, and are most comfortable and satisfactory. I think some small stone buildings should be built at the same place for the native workmen who are at present lodged in unsightly mat huts which continually require repair.

46. The Deputy Director has recently introduced a system of printed Circulars which he issues with the Departmental orders to the officers under his control, and which ensure the adoption of uniformity in the methods of testing the batteries, earth and land line, in accordance with instructions carefully drawn up by the Electrician.

47. In conclusion, I beg to express to the Government my sense of the good service rendered, as heretofore, by Major Smith and his staff in Persia—by Mr. Ffinch and by Lieutenant Stiffe who acted for him for four months, and by the staff on the Persian Gulf, and by Mr. Brasher, the responsible head of the Departmental Account Branch.

APPENDIX A.

INDO-EUROPEAN TELEGRAPH DEPARTMENT.

PERSIAN GULF SECTION.

Showing the total traffic receipts and net revenue messages transmitted by the Persian Gulf Section during the year 1875-76, compared with that of the previous year.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE, AGRICULTURE AND COMMERCE.

Weekly condition report of the distressed districts of the Mysore Province.

PROVINCE OF MYSORE.

(No. 20.)

Condition Report for the week ending 23*rd June* 1877.

Bangalore District.—Markets continue fairly supplied. Prices steady. There was no rain in any of the taluks except at Bangalore, where the quantity registered was only 26 cents. The young crops are doing well except in the Hoskote, Closepet and Anekal Taluks, where they are reported to be withering owing to the prevailing high winds and want of rain. Cholera and fever are still prevalent in some parts of the district.

Kolar District.—Markets continue fairly supplied except at Gumnayakanpalya and Goribidnur, where the importation was moderate, as sufficient carriage was not available. Prices are pretty steady. Light showers of rain fell only in the taluks of Gudibanda, Mulbagal and Chikballapur. Agricultural operations are in progress. The standing crops, such as sugarcane, javari, sajje and superior sesamum, are in good condition. Fever and small-pox are prevalent.

Túmkúr District.—Markets continue fairly supplied except in the Maddagiri and Kunigal Taluks, where the importation was slack owing to the want of cart-bullocks. Prices fluctuating. There was a light fall of rain in all the taluks excepting Sira and Kunigal. The quantity registered varied from 5 to 80 cents. The young crops are in need of rain. Fresh sowings were going on in some places. Cholera and fever are prevalent.

Mysore District.—Markets are sufficiently supplied, and prices are slightly rising. There were light showers of rain throughout the district except in the Ashtagram, Chamrajnagar and Mandya Taluks. The quantity gauged was from 12 cents to 1·80 inches. The young crops are promising and the prospects of the season are improving. Public health is reported to be indifferent and cholera on the decline.

Hassan District.—Markets fairly supplied except in the Harnhalli and Nagamangala Taluks, where importation was checked for want of carriage, the ryots being engaged in agricultural operations. Prices stationary. There was a general fall of rain in all the taluks. The quantity registered was from 17 cents to 9·64 inches. The tanks in the Manjarabad Taluk filled, and those in Hassan received from five to six months' supply. The standing crops are generally doing well. The prospects of the season continue hopeful. Cholera is prevalent.

Shimoga District.—Markets fairly supplied except at Chanagiri, where the imports fell owing to prevalence of cholera. Prices are pretty steady. Heavy rain had fallen in all the taluks, and the maximum quantity registered was 25·87 inches at the head-quarters of the Nagar Taluk. Many tanks have received good supply of water. The standing crops are thriving and prospects of the season are improving. Cholera still prevails.

Kadur District.—Markets continue fairly supplied. Prices stationary. Rain fell in all the taluks except Banavar, and the quantity registered at the head-quarters of taluks varied from 77 cents to 11·20 inches. Paddy, sugarcane and other crops are doing well. Cholera and fever prevalent in parts.

Chitaldroog District.—Markets fairly supplied except in the taluks of Budihal, Hiriyur and Pavagada, where importation was slack owing to the prevalence of cholera and difficulty of procuring carriage. Prices have risen in some taluks. Rain fell generally throughout the district, and the quantity gauged at the head-quarters of taluks ranged from 5 to 62 cents. The standing crops are promising. Ploughing and sowing operations are in progress. Prospects of the season are improving. Public health indifferent, as cholera and fever are still prevalent.

General Remarks.

During the week ending 23rd June there was little or no rain in the Nundydroog division. The high winds which prevailed have dispersed the clouds and kept off the rain. In the Ashtagram division there were slight showers in many of the taluks and prospects continue hopeful. In the Nagar division there has been heavy rain in two of the districts (Kadur and Shimoga), and many of the tanks have received a good supply of water. All the crops that have been recently sown are reported to be doing well. The prospects of the season in the Chitaldroog district are also, it is said, improving.

2. The number of deaths from cholera reported during the week was 342, or 144 less than in the previous week.

3. Notwithstanding the increase in the number of works in progress under Revenue Officers, which during the week under review was 2,619 as against 2,576 of the previous week, the daily average number of persons employed on them was only 26,158 or 4,359 less than in last week. There was a large decrease in the numbers in Kolar, Túmkúr, Mysore, Kadur and Chitaldroog districts. It is reported that almost all the ryots are employed on their own lands, and many others find labour of some kind on lands belonging to the larger landholders.

4. The number employed on works carried on under the Public Works Department agency shews a decrease, being 25,632 as against 26,264 of the previous week. The Commissioner of the Nagar division having represented that the system obtaining in the Public Works Department, of paying the coolies once in 15 days and deducting a portion of their wages for short work, has deterred many from resorting to these works for employment, the Chief Engineer has been desired to modify the existing system temporarily whenever the mode of payment prescribed has proved an obstacle to the employment of distressed people on works of that Department.

5. The amount appropriated for works under Revenue Officers up to 23rd June was Rs. 14,95,605, of which Rs. 10,00,426 were expended.

6. The daily average number of persons gratuitously relieved was 116,259,* or 5,454 more than in the previous week. The largest increase was in the Bangalore district (including the town and cantonment) and in the Túmkúr and Chitaldroog districts. The low state of health to which a large proportion of the population has been reduced by the continued drought and the stringent measures which are being taken to prevent professional mendicants and paupers from wandering about the country, have tended to swell the daily attendance on our kitchens and camps, but as light work is exacted even from those who are thus relieved, if they are able to work, the kitchens and camps may be regarded as *semi*-relief work houses. The expenditure on account of gratuitous relief amounted to Rs. 6,29,843 up to the 23rd of June.

* Men	...	25,374
Women	...	41,722
Children	...	49,163
		116,259

7. The prices of food grains have somewhat risen. The imports by rail were less than in the previous week, and it is apprehended that, till the next harvest, the prices would maintain their high level, more especially as, under the present railway arrangements, a limited number of merchants have got the monopoly of importing the grain from Madras, and others are retarded from carrying on their trade for want of the facilities of carriage. The system adopted on the South Indian Railway is, it is reported, the same as that obtaining in Madras. The bulk of the grain traffic from Negapatam is diverted towards Trichinopoly and Madura; and, out of a weekly consignment of about 3,000 tons, only about 200 or 250 tons are forwarded to Bangalore.

8. The weight of grain imported by rail during the week was 3,089† tons, or 264 tons less than in the previous week, as shewn below :—

† Including 434 tons received at the Kolar road station.

	Present week. Tons.	Past week. Tons.

To the taluks adjoining Bangalore	681
Total ...	1,940

10. The Deputy Commissioner of Mysore District reports that emigration of sick and weakly persons to the coffee estates is strictly prohibited; that a small number of coolies are returning from the Neilgherries, being sent back by the Madras Government, and as they are mostly sick persons they will be kept and cared for in the Gundlupet Taluk until they gain sufficient strength to return to their own taluks.

11. The services of Captain R. M. Clerk, 1st Assistant Superintendent, Coorg Survey, have been placed temporarily at the disposal of the Commissioner of Ashtagram Division, to aid in carrying out the instructions which have been issued for deporting from Coorg all persons of the classes for whom no employment can be found on the coffee estates there, and for providing for their removal to the Government relief camps established along the frontier and ultimate dispersion to their villages.

"By Order,"

T. R. A. THUMBOO CHETTY,
Assistant Secretary.

* Such as digging and repairing wells, prickly-pear clearances, &c.

‡ Numbers not received; last week's figures entered.

† All the labourers upon the Dhond-Manmad Railway have been included under Ahmednagar.

§ For details and dates see table appended.

There has been no rain during the week in Ahmednagar and Sholapur, and in Kaladgi the showers have been generally slight. There has been a fair fall in the remaining districts, except in some of the eastern talukas where more rain is now required.

The sowing of kharif is progressing, and good accounts are received of the young crops wherever they have been sown, except in Kaladgi where more rain is anxiously awaited.

2. Grain has again risen in price, though the rise is not very serious, except in Kaladgi, where jowari now averages only 10 lbs. for the rupee; the average price throughout the nine affected districts being 18 lbs. for the rupee. Prices are, however, high in Satara, and in Belgaum and Dharwar they are only a little lower than in Kaladgi.

It is not apprehended that there will anywhere be an insufficiency of supply for all persons having the means of purchasing.

3. The number of people upon relief works in the nine affected districts is 295,270 against 322,927 last week, and there are also 1,354 hill-men and immigrants employed in Ratnagiri and Kanara; the decrease is most marked in Dharwar.

4. A table is appended contrasting the rainfall of the past season with the fall which has been reported in each taluka of the famine area during the current season.

5. The following table gives the expenditure by Government, during the week ending 16th June, upon charity in the relief of the aged and infirm poor; and in payments made to the young children of labourers employed upon relief works. Comparing the results shown in the table below with those shown in the last summary, it will be seen that the number of persons in receipt of Government charitable relief has increased from 52,505 to 56,692, while the number of children under 7 years of age has decreased from 120,867 to 116,731. The number of children varies with the number of labourers, and during the week ending 16th of June (the latest for which complete returns are available) the number of labourers first commenced to decrease from the maximum muster of the week ending 9th June. The number of people charitably relieved was 15·68 per cent. of the number of labourers upon relief works during the corresponding week:—

Districts.	Collector's discretionary grant.			Expenditure incurred under the authority of Government Resolution No. 312 C. W.—1116 of 26th December 1876, on account of children under 7 years of age whose parents are upon relief works.		
	Average number of persons relieved during the week.	Expenditure during the week.	Total expenditure up to date.	Average number of children, and of women taking care of them.	Expenditure during the week.	Total expenditure up to date.

	GRAND TOTAL ...	...	263,931	

7. Tables (A) and (B) are appended as usual. It will be seen that, during the week ending 23rd June, the number of people upon Civil Works in the nine affected districts was 32,508, the number upon works under Public Works Department agency being 291,743.

The proportion of people upon the former continues, therefore, about 10 per cent. of the total. It is to be noted that the figures given in these tables are taken from the progress returns of the works, and are brought up to the week ending 23rd June, while the figures in the table prefixed to this summary are taken from the Collectors' telegrams, and refer to the week ending 30th June.

8. Maps are not sent with this summary, as they would merely repeat the information already given.

9. A table is appended, showing the condition of the affected Native States.

10. With regard to the movements of food-grains, 1,492 tons were exported, chiefly by steamer, from Bombay to the Southern Mahratta ports during the week ending 30th June, and during the same period 4,196 tons were carried by the Great Indian Peninsula Railway to stations upon the Poona-Sholapur and Nasik-Bhusawal lines. The table below shows the quantities of grain sent by sea and rail from October till the 30th June to the Southern Mahratta ports and the Railway stations in the distressed districts. It will be seen that the total amount delivered up to the 30th June was 325,676 tons:—

Food-grains sent to	In October, November and December 1876.	In January 1877.	In February 1877.	In March 1877.	In April 1877.	In May 1877.	In June 1877.	Total.

11. On the whole, the rainfall during the week, although it has been sufficient in the western, has been too scanty in the more easterly, districts; and a break in the monsoon has occurred, which is more protracted than is desirable.

In the southern and western parts of the affected area the state of the young crops is good, but to the eastward, particularly in Kaladgi, they are reported to be withering for want of moisture, and more rain is much needed. Sowing still continues where the state of the soil permits it.

The food supplies continue fairly sufficient, but prices have again risen, though not seriously, except in Kaladgi. The rise is partly due to increased difficulties in transport, owing to the closing of most of the ports on the Southern Mahratta coast, the state of the roads rendered heavy by rain, and the withdrawal of bullocks from cart work to the plough, and partly to apprehensions entertained by the holders of stocks that the present season may prove unfavourable. Unless there should soon be good rain in Kaladgi, some increase of distress is anticipated in that district.

Prices of food-grains are also high in Belgaum and Dharwar, but it is probable that a second favourable burst of monsoon weather extending over the whole of the affected area such as may be looked for, and is now expected, would occasion a marked fall.

The grain trade continues active; a considerable consignment has been sent by steamer to Karwar, one of the few ports open during the monsoon; while the amount of grain carried by the Great Indian Peninsula Railway into the famine districts during June is the largest conveyed during any one month of the present year.

Cattle are gradually returning to their villages, and their condition continues to improve.

People continue to leave the relief works, and to return to their ordinary avocations, and in the week there is a net decrease of 27,867 in the number of labourers, making a total net decrease of 98,682 during the last three weeks. The increase upon charitable relief is moderate, and is balanced by a corresponding decrease in the number of young children. The number of persons charitably relieved was 15·68 per cent. of the number employed upon relief works.

The general situation continues to improve, and would have done so to a greater extent had the monsoon been more steady, and extended better to the extreme easterly districts. Those who have left the works up to the present date have done so voluntarily, and that such large numbers should have resumed their ordinary occupations at this comparatively early period is a very encouraging fact. The movement is likely to gather force on the occurrence of more rain and a fall in the price of food.

Cholera is not on the increase.

M. K. KENNEDY, Major-General, R. E.,
Secretary to Government.

NOTE.—The totals are not invariably the sum of the men, women and children, as in a few returns these particulars have not been given, the total number of labourers alone having been entered.
These figures are for the nine distressed districts only. The people upon relief works in Ratnagiri and Kanara are shown in Table A.

Table contrasting the Rainfall as yet reported during the current season with the Rainfall of the past season.

* The monsoon set in on the 19th June above Ghauts.

† This is chiefly eastern rain.

Telegraphic returns of more recent rain have been received, but cannot yet be properly collated.

No. 21 (Revenue), dated India Office, London, 7th June 1877.

From—Her Majesty's Secretary of State for India,
To—The Government of Bombay.

THE despatch of Your Excellency's predecessor in Council dated 30th April, No. 32 of 1877, transmitting a note in which is described the progress of the measures adopted to relieve the distress caused by the famine in the Deccan and Southern Mahratta Country, has been considered by me in Council.

2. The note is a document of great interest which shows clearly that the calamity which confronted the Government of Bombay has been met with forethought, vigour and discrimination. As this is the last despatch in connection with the famine which I shall receive under the signature of Sir Philip Wodehouse, I avail myself of the opportunity of placing on record my conviction that the conduct of relief operations during this perilous crisis has entitled him to the thanks of Her Majesty's Government and to the gratitude of the people of the Bombay Presidency.

No. 48 (Revenue), dated India Office, London, 14th June 1877.

From—Her Majesty's Secretary of State for India,
To—The Government of India.

THE despatch of Your Excellency in Council, dated 12th April, No. 20 of 1877, relative to the famine in the Presidencies of Madras and Bombay, has been considered by me in Council.

2. The intelligence contained in this despatch has been in some degree anticipated by telegrams, and I have also by the same mail received another despatch, of the 19th April, from Your Lordship's Government, containing information of a later date. It will not therefore be necessary for me to notice at any length the topics to which allusion is made in the present communication.

3. I concur with Your Excellency's Government in considering that the Government of Bombay is entitled to great credit for the firmness and care with which it has dealt generally with the famine, and especially with the organized combinations to oppose its orders as to the grant of relief.

4. The statement of Sir Richard Temple that in the Deccan districts of Bombay no abuse of State charity is allowed, no appreciable amount of Government money is wasted, and no demoralization of the rural classes is going on, is very satisfactory.

Dated Calcutta, 29th June 1877.

From—H. W. I. WOOD, Esq., *Secretary, Bengal Chamber of Commerce,*
To—G. H. M. BATTEN, Esq., *Offg. Secretary to the Govt. of India.*

THE Committee of the Chamber of Commerce have observed in to-day's papers with considerable concern and interest the essential portions of a reported correspondence between the Supreme Government and the Government of Madras relative to the famine districts of that Presidency, the prices of food-grains, and supplies necessary to maintain adequate stocks for the requirements of the people dependent on Government aid.

But there are some points which do not appear to have been touched upon, and the Committee bring them to notice in the hope that Government will furnish such information as may place private trade in a position to judge how far it may proceed in helping the State in its measures of relief: and with the view that merchants may have full confidence in operating to that purpose it is submitted that the details of stock and of consumption at the various inland markets in the famine districts should be given with all possible publicity both in Calcutta and Madras.

Another material point, in the judgment of the Committee, is that a careful inquiry regarding the probable outturn of growing crops of food-grains will enable the Government to arrive at an approximate estimate of the extent to which existing stocks should be supplemented by importations from Bengal, Burma, &c., and it would be expedient to fix, if possible, after such enquiry a date at which it may be reasonably assumed that such importations might cease.

It appears to the Committee of the Chamber that unless some authoritative declaration in these respects be promptly made, the course of trade may be arrested by merchants discontinuing their shipments, and that the existing scarcity will be aggravated by diminished supplies from this and other rice ports.

Telegram dated 7th July 1877.

From—Simla, | *To—Calcutta.*
From—Revenue Additional Secretary, | *To—Secretary, Chamber of Commerce.*

GOVERNOR GENERAL in Council thanks Chamber for valuable letter of 29th ultimo, and will gladly afford all information procurable, but it must be remembered that ascertainment of existing stocks and estimate of outturn of growing crops on vast areas is most difficult. Government of Madras have been requested to ascertain and publish in *Madras Government Gazette*, as regards each distressed district, first, anything known about quantity of local stocks, secondly, the imports and exports of grain, thirdly, the estimated daily consumption of food grain by the population dependent on each principal market, fourthly, the condition of the growing crops of food grains. Madras Government have also been told that similar information should be published fortnightly in future, and as crops reach maturity their probable outturn should be given as far as it can be roughly estimated. Chief Commissioner, Mysore, has been similarly requested. Government India consider that importations on a large scale into the Madras Presidency may be expected to last until the reaping of the new harvest, that is, September and October, and that if the harvest be good they will then probably return by December to their normal average.

No. 585, dated Simla, 7th July 1877.

From—The Honourable T. C. HOPE, C.S.I., *Additional Secy. to the Govt. of India,*
*To—*H. W. I. WOOD, Esq., *Secretary to the Bengal Chamber of Commerce.*

IN reply to your letter of the 29th ultimo, I have the honor to enclose post copy of a telegram addressed to you yesterday, which His Excellency the Governor General in Council trusts will meet the wishes and suggestions of the Chamber of Commerce.

I am directed to add that His Excellency in Council feels considerable doubts whether District Officers generally have as good means of ascertaining the extent of stocks and of estimating probable outturn of crops as are possessed by the up-country agents of mercantile firms deeply interested in the issue and having access to many private sources of communication. In the case of District Officers in the distressed districts of Madras the difficulty will be enhanced by the multifarious and onerous duties now falling upon them.

No. 2119, dated Madras, 26th June 1877.

*From—*J. H. GARSTIN, Esq., *Addl. Secretary to Government of Madras,*
To—The Honourable T. C. HOPE, C.S.I., *Addl. Secretary to the Government of India.*

IN reply to your telegram of the 21st instant, regarding the despatch of the Revenue Board's review of the weekly relief reports from the distressed districts for the week ending June 9th, I am directed to state that His Grace the Governor in Council finds it necessary, in view to the avoidance or correction of possible errors, that these reviews should be perused by the Madras Government before they are transmitted to the Government of India. This will cause them to be perhaps two or three days longer in reaching you.

No. 594, dated Simla, 11th July 1877.

From—The Honourable T. C. HOPE, C.S.I., *Addl. Secretary to the Government of India,*
*To—*J. H. GARSTIN, Esq., *Addl. Secretary to the Government of Madras.*

IN reply to your letter No. 2119 of the 26th ultimo, I am directed to request that the weekly reports of the Board of Revenue may be forwarded to the Government of India with as little delay as possible after they have been amended and revised by His Grace the Governor in Council.

2. I am to observe that the report for the week ending June 9th, which is the first treated under the new system, though submitted by the Board of Revenue on the 15th idem, was not forwarded by you till the 23rd. It consequently arrived too late for the *Gazette of India* of the 30th and did not appear till the 7th, or 29 days in arrears.

3. His Excellency the Governor General in Council would suggest that, in view of the importance of affording to the public, and especially to the grain trade, the earliest information on the condition of the distressed districts, the weekly reports may, as soon as approved by His Grace the Governor in Council, be published in the *Fort St. George Gazette.*

Weekly condition report of the distressed districts of the Madras Presidency.

No. 2975, dated 23rd June 1877.

Proceedings of the Board of Revenue, Madras.

The Board submit to Government the relief reports for the week ending 16th June, with the usual statements and maps as per margin.

Maps for—

Nellore.	South Arcot.
Bellary.	Coimbatore.
Cuddapah.	Salem.
Chingleput.	Madura.

Statements.

No. 1. Prices.
" 2. Relief Report.
" 3. Talukwar Statement of relief.
" 4. Statistics of gratuitous relief.
" 5. Talukwar ditto.
" 6. Works under supervision of Public Works Department.
" 7. List of establishment.
" 8. Memorandum of sums sanctioned.
" 9. Number and description of works.

2. *Prices.*—The rise in prices noticed in last week's report continues. The district average price of rice has risen in all districts except in Chingleput and Trichinopoly where there is a slight fall. Cholum has risen in nine districts, has fallen in two, and is stationary in two. Ragi has risen in nine districts, fallen in three, and is stationary in two. Cumboo is dearer in six districts, cheaper in five, and stationary in one. In Bellary, Coimbatore, North and South Arcot, the prices of all food-grains in commonl use have risen. In Nellore there is very little change, rice having risen and cumboo fallen at one station and the apparent fall in cholum being due to the quotation from Udayagiri being wanting this week and not to change in other places. In *Cuddapah* prices are somewhat easier in the north-west of the district and in Budwail, but there is a strong rise in the sub-division, especially in Voilpaud where all food-grains are quoted higher and rice is now at 4·98. In *Bellary* the price of cholum has risen everywhere except Madaksira owing probably to the demand for seed. The rates for rice, ragi and cumboo are fluctuating with a tendency to rise. In *Chingleput* ragi is stationary and rice tends to fall. In *North Arcot* there is a general rise in Gudiattum and rice has risen also in the southern taluks. The changes in *South Arcot* and *Trichinopoly* are not important. In *Madura*, prices are nearly stationary except in the sub-division where rice has risen, but dry grains are cheaper. In *Coimbatore* there is a general fall at Erode, but prices of rice and cholum in the southern taluks tend to rise. Prices are stationary in Collegal. In Salem the rise in prices is chiefly in the sub-division.

3. *Rainfall.*—All districts received rain during the week, except Tinnevelly. The fall was especially heavy in Cuddapah, Kurnool, Chingleput and North Arcot. In *Nellore* the rain was pretty general. In *Cuddapah* the fall was very favourable, all taluks having received rain and Royachoti and Pullampet upwards of six inches. Good rain is reported from seven taluks in *Bellary*, as much as 3 3 inches having fallen at Kudlighi and 2·8 at Raidrug. In *Kurnool* the average of the district was 1·7 inches, the fall being greatest in Cumbum, and amounting to 4·1 inches. In North Arcot, Chingleput and South Arcot rain fell in nearly all taluks, and as much as 4 inches was received in Narayanavanam in North Arcot. In the districts of Trichinopoly and Madura, and in the greater part of Coimbatore, the fall was light; but in Coimbatore and Pollachy more than an inch was received. In *Tinnevelly* there was no rain and in Salem a light fall in only two taluks.

4. *Grants and Outlay.*—The grants made by the Board up to the 16th June amounted to Rs. 1,69,25,283 and the reported outlay from these grants is as follows:—

	In the week.	Up to the week.
	Rs.	Rs.
Relief works	5,78,624	1,46,90,897
Gratuitous relief	1,59,523	14,85,405
Total ...	7,38,147	1,61,76,302

5. *Numbers on relief works.*—The total numbers in each district are compared, as usual, below:—

Districts.	9th June.	16th June.	
Kistna	1,601	1,754	+ 153
Nellore	25,725	40,159	+ 14,434
Cuddapah	108,160	103,710	— 4,450
Bellary	291,181	296,054	+ 4,873
Kurnool	212,223	204,986	— 7,237
Chingleput	27,870	29,723	+ 1,853
North Arcot	54,139	53,975	— 164
South Arcot	198	9	— 189
Madura	13,503	12,007	— 1,496
Coimbatore	23,699	23,699	...
Salem	52,202	47,664	— 4,538
Total ...	810,501	813,740	+ 3,239
East Coast Canal	45,154	46,126	972
	855,655	859,866	+ 4,211

6. The aggregate numbers are thus nearly the same. In *Nellore* there is a considerable increase due to the inclusion in this week of 14,555 coolies employed under the Public Works Department under the arrangement whereby the execution of all works in a portion of the district has been made over to that department, but whether the works specified are carried on from ordinary or famine grants is not clear. On the East Coast Canal there is a small increase and the numbers now employed are analysed as shown in the margin.* In *Cuddapah* the decrease is accounted for by a considerable reduction of numbers in Madanapally and Voilpaud due, doubtless, to the resumption of agricultural operations. The taluk details for the Bellary district are compared as usual in the margin, with those for last week. Most of the taluks shew an increase, which is generally ascribed to the greater pressure of the famine and enhanced prices of food. The large decrease in Kudlighi is due to defective return, and that in Hadgally to the same cause and to the Dharwar coolies having been sent back. There were 3,899 coolies employed on the Bellary-Hubli Railway. The decrease in Kurnool is due partly to defective return and partly to agricultural operations in progress.

* Nellore district	36,625
Cuddapah "	4,234
Kurnool "	2,580
Bellary "	2,042
Kistna "	645
Total ...	46,126

	9th June.	16th June.	Difference.

Total ..	291,131	296,054	+ 4,873

7. There is a decrease in numbers almost throughout Chingleput, except in the Conjeveram taluk, where the railway works are in progress, and employ 24,601 coolies against 19,539 last week. The decreases in *South Arcot* and Madura do not call for remark. An increase in Arcot taluk is counterbalanced by a decrease in the eastern zemindaries. In Salem the decrease is general.

8. *Rates of wages.*—Wages are now paid almost universally on scale No. I, the exceptions being a few cases in Nellore, North Arcot, Chingleput and Coimbatore.

9. The statement showing the works under D. P. W. is enclosed. Including those on the East Coast Canal and the railway works in Bellary and Chingleput, and those under the department on special works in Nellore, the total number of coolies is 212,501.

10. *Gratuitous relief.*—The total numbers on gratuitous relief in each district and those in camps, villages, &c., as compared with last week's returns, are as shown below:—

	9th June.	16th June.	Difference.
Kistna	383	356	— 27
Nellore	16,978	27,225	+ 10,247
Cuddapah	36,314	45,955	+ 9,641
Bellary	155,044	154,583	— 461
Kurnool	59,842	57,060	— 2,782
Chingleput	18,621	27,770	+ 91,491
North Arcot	22,011	22,281	+ 270
South Arcot	6,198	8,296	+ 2,098
Trichinopoly	463	1,131	+ 668
Madura	13,941	11,247	— 2,694
Tinnevelly	835	866	+ 31
Coimbatore	28,202	31,719	+ 3,517
Salem	78,878	74,949	— 3,929
Malabar	27	85	+ 58
TOTAL ...	437,737	463,523	+ 25,786
In camps, &c.	136,363	152,720	+ 16,357
In villages	140,658	144,876	+ 4,218
3 pie children	160,333	165,571	+ 5,238
Kistna district*	383	356	— 27

* Particulars not given.

11. Increase is thus apparent under all classes of gratuitous relief especially in camps and relief houses. In Nellore, the large increase of 10,247 is almost entirely accounted for by increase under camps. The numbers in villages are comparatively small, as the village relief is made auxiliary to the camp relief. In Cuddapah the increase is under village relief and of 3 pie children. In Bellary the numbers under the several classes are scarcely changed. The increase in Chingleput is due to the extension of village relief which was hitherto given but to a small extent. In South Arcot also the village relief has increased. The decrease in Madura occurs chiefly in the camps in the Madura, Pulni and Dindigul taluks. In Coimbatore there is an increase in the camps and a decrease in village relief. In Salem the decrease occurs under village relief, and results from a decrease of nearly ten thousand in Darampuri and Kistnagherry, where numbers hitherto have been thought to be excessive, and from small increases in the other taluks. The number of relief camps and relief houses is now 285 against 256 on the 9th June (Kistna and Kurnool excluded); the number of inspection circles is now 688, being an increase of 24 in the week; and relief was given during the week in 5,485 villages against 5,562 in the week ending 9th June.

12. The mean strength of persons gratuitously relieved during the week, number of deaths in camps and villages, and the resulting rates of mortality are shewn below:—

	CAMPS AND RELIEF-HOUSES.			VILLAGE RELIEF.		
	Approximate strength.	Deaths in the week.	Ratio per mille per annum.	Approximate strength.	Deaths in the week.	Ratio per mille per annum.
Nellore	17,894	133	388	578	3	271
Cuddapah	10,015	334	1,743	12,118	68	293
Bellary	36,334	273	391	40,836	119	152
Chingleput... ...	17,981	81	235	5,173	1	10
North Arcot ...	8,947	244	1,425	3,043	5	85
South Arcot ...	923	4	226	6,323	1	8
Trichinopoly ...	440	9	1,069	356	1	146
Madura	10,617	69	339	1,111	7	329
Tinnevelly	850	3	184	...	...	...
Coimbatore ...	24,090	78	168	4,127	4	50
Salem	9,780	272	1,454	64,425	190	154
Malabar	176	...	...	...	...	...
TOTAL ...	138,047	1,500	567	1,38,084	399	151

The rates in camps in every district and those in villages in most districts show heavy increase as compared with last week. In no district included in the above statement does the rate in villages approach that in camps. It will be noticed that the rates of mortality in Bellary, as compared with those in other districts, are low.

13. The following statement shews transactions under the Land Improvement Act :—

	In the week.	To the end of the week.
	Rs.	Rs.
Nellore	3,570	85,532
Cuddapah	3,781	1,26,746
Bellary	...	97,119
Kurnool	...	3,405
Chingleput	4,115	71,241
North Arcot	100	6,640
Madura	4,270	57,951
Tinnevelly	...	32,900
Coimbatore	1,880	12,864
Salem	4,190	53,733
TOTAL ...	21,906	5,47,537

Rs. 134,167 have been expended on the special relief to weavers.

14. The establishment list appended shews the total number of persons, 5,230, drawing monthly pay of Rs. 118,700.

15. The amount of grants sanctioned by the Board up to date is Rs. 1,81,39,493.

16. The average strength of the resident paupers in the Madras camps during the week was 11,753, and of non-resident 12,691; the number of fresh admissions during the week was 512; strength in hospitals on the 16th June was 598; number of deaths during the week was 133, of which 121 were in hospital; and of 9,110 resident on the 16th June, 4,629 came from North Arcot, 2,345 from Chingleput, 2,007 from Nellore and 129 from other districts. The outlay during the week was Rs. 29,739 and up to the week Rs. 6,21,328. The President of the Municipal Commission had 2,007 persons in the Sattangad relief camp on the 16th June and 1,939 on relief works. He expended in the week Rs. 1,250 and up to the week Rs. 49,504.

(True Extract.)

C. A. GALTON.

for Secretary.

Weekly relief report of the Kistna and Kurnool districts for the week ending 9th June 1877.

Proceedings of the Board of Revenue, Madras, No. 2930, *dated* 21*st June* 1877.

Read Relief Reports for the week ending 9th June 1877—from the Collector of Kistna, district, dated 12th June 1877—and from the Collector of Kurnool, dated 13th June 1877.

The Relief Reports from the Kistna and Kurnool districts for the week ending 9th June are therewith submitted for the information of Government in continuation of Board's Proceedings, 15th June 1877, No. 2817.

2. *Prices and Rainfall.—In Kistna,* of 13 stations rice fell at four, and rose at one; cholum rose and fell at three; ragi rose at three and fell at one; and cumboo rose and fell at two. At Guntoor the prices of all grains, and in the Palnad of all grains except ragi, which was stationary, have fallen. There was rain at ten stations during the week, ranging from ·25 inch at Nuzvid to 7·97 inches at Bandar. In *Kurnool,* prices may be said to be stationary; the only changes being in regard to rice; a fall at Ramalkota and a rise in Nandikotkur; and a slight rise in the price of cholum at Pattikonda and Nandial. Rain is reported from all taluks except Cumbum. The fall varied from ·4 inch in Sirwell to 3 inches in Nandial, and the average for the district is 1·18 inches.

3. The numbers on the Commamur canal in *Kistna* decreased from 1854 to 1601. The numbers in the several taluks of the *Kurnool* district are compared below with those for 2nd June—

	2nd June.	9th June.	
Ramalkota	30,345	32,818	+ 2,473
Nandikotkur	23,358	22,404	— 954
Nandial	26,994	29,375	+ 2,381
Sirwell	23,289	23,820	+ 531
Koilkuntla	27,466	26,391	— 1,075
Pattikonda	22,753	25,895	+ 3,142
Cumbum	42,804	42,801	— 3
Markapur	8,199	8,719	+ 520
Total ...	205,208	212,223	+ 7,015

The increase in Ramalkota, Markapur and Pattikonda is ascribed to more intense distress, and that in Nandial to return of coolies who had deserted on an outbreak of cholera. The decrease in Nandikotkur and Koilkuntla is due to resumption of agricultural operations. The Cumbum return appears to be still defective.

4. The following shows numbers, &c., on works under the P. W. D.—

Taluks.	Number of Works.	Outlay.		Number of coolies.
		In the week.	Up to the week.	
		Rs.	Rs.	
Ramalkota	20	8,878	1,14,215	15,325
Nandikotkur	4	9,674	54,950	14,589
Pattikonda	18	711	12,475	1,219
Nandial	2	15,886	1,19,726	24,990
Sirwell	1	13,622	92,149	22,543
Markapur	1	...	1,316	...
Total ...	46	48,771	3,94,831	78,666

5. The enhanced scale of wages is now in force throughout the district except in parts of Nandial and part of Markapur.

6. *Gratuitous Relief.*—In Kistna there are relief houses only at Guntoor and Bapatla, where 318 persons received relief, 65 persons, of whom 35 were in the Guntoor taluk, received relief in the villages. The following are the taluk details for the Kurnool district—

	2nd June.	9th June.	
Ramalkota	10,789	11,275	+ 486
Nandikotkur	5,546	4,400	– 1,146
Nandial	8,860	9,369	+ 509
Sirwell	5 423	6,010	+ 587
Koilkuntla	7,408	6,432	– 976
Pattikonda	6,668	6,522	– 146
Cumbum	13,344	13,149	– 195
Markapur	2,573	2,685	+ 112
In Camps, &c.	6,716	6,275	– 441
In villages	4,614	4,617	+ 3
3 pie children	49,281	48,950	– 331
Total ...	60,611	59,842	– 769

Thus it will be seen that there is no change of importance to notice. The deaths number 144 of which 30 and 2 were among 3 pie children in Ramalkota and Cumbum respectively. This mortality is questioned and enquiry is being made. Of the remaining deaths 60 occurred in camps and relief houses and 52 in village relief. The rates per mille per annum are in camps 481 and in villages 587. The excess of mortality amongst those under village relief, which was noticed by the Board last week, still continues.

REVENUE BOARD OFFICE, MADRAS,
21st June 1877.

(Signed) C. A. GALTON,
For *Secretary*.

Relief Report for the Kistna and Kurnool Districts for the week ending 16th June 1877.

Proceedings of the Board of Revenue, Madras dated 27th June 1877, No. 3047.

Read Relief Reports for the week ending 16th June 1877, from the Collector of Kistna District, dated 19th June 1877, and from the Collector of Kurnool, dated 22nd June 1877.

The relief reports from the Kistna and Kurnool districts for the week ending 16th June will be submitted for the information of Government in continuation of Board's Proceedings, dated 23rd June 1877, No. 2975.

2. *Prices and Rainfall.*—In the *Kistna* district out of 13 stations rice and cholum rose at two and fell at one. Ragi fell at one and cumbu rose at one. In the Repalli taluk there was a material rise in the price of cholum accompanied by a corresponding decrease in that of ragi. Rain fell at seven stations, the range being from ·05 of an inch at Bepatla to 1·01 inches at Nuzvid. In *Kurnool* the price of rice was nearly stationary, a slight rise at Ramalkota only being reported; cholum was dearer at 3 stations and cheaper at one, and ragi rose at two stations and fell at one. Rain fell in all the taluks, the maximum fall being 4·10 inches in Cumbum and minimum ·10 inch in Nandikotkur; average 1·71 inches.

3. The numbers on the Commamur Canal in the *Kistna* district rose from 1,601 to 1,754; the numbers in the several taluks of *Kurnool* are compared below with those of the previous week.

	9th June.	16th June.	
Ramalkota	32,818	32,465	— 353
Nandikotkur	22,404	22,510	a 106
Nandial	29,375	30,164	a 789
Sirwell	23,820	21,606	— 2,214
Koilkuntla	26,391	26,434	a 43
Pattikonda	25,895	24,920	— 975
Cumbum	42,801	36,888	— 5,913
Markapur	8,719	9,999	a 1,280
Total	212,223	204,986	—7,237

There is a net decrease of 7,237, most of which is apparent rather than real, the large decrease in Cumbum being explained to be due to the erroneous inclusion of 3 pie children in last report. The increase in Nandial and Markapur is attributed to more intense distress, and the falling off in Sirwell and Pattikonda to the resumption of agricultural operatians.

4. The following statement shows the number, &c., on works under the D. P. W.

Taluks.	Number of works.	Outlay. In the week.	Outlay. Up to the week.	Number of coolies.
		Rs.	Rs.	
Ramalkota	20	9,483	1,23,698	14,537
Nandikotkur	5	11,381	66,468	14,069
Pattikonda	18	893	13,368	1,599
Nandial	4	20,358	2,19,311	28,985
Sirwell	7	13,561	3,38,579	21,606
Markapur	1	..	1,316	..
Total	55	55,676	7,62,740	80,796

The higher scale of wages is now in force throughout the district, except in parts of Nandikotkur, Nandial and Sirwell.

5. *Gratuitous Relief.*—The number of persons relieved at the Bapatla and Guntoor relief houses was 300; the number relieved in the villages was 56. The following are the details for the Kurnool district:

	9th June.	16th June.	
Ramalkota	11,275	11,711	a 436
Nandikotkur	4,400	4,706	a 306
Nandial	9,369	8,676	— 693
Sirwell	6,010	4,707	— 1,303
Koilkuntla	6,432	6,340	— 92
Pattikonda	6,522	5,935	— 587
Cumbum	13,149	12,434	— 715
Markapur	2,685	2,551	— 134
In Camps	6,275	6,945	a 670
In villages	4,617	4,740	a 123
3 pie Children	48,950	45,375	— 3,575
Total	59,842	57,060	— 2,782

The only point calling for notice is the large decrease under 3 pie children explained to be due to the imposition of greater check in the administration of this form of relief. The decrease occurs chiefly in Sirwell and Cumbum. The deaths numbered 126. The mortality in Ramalkota was two-thirds of the whole, and 20 of the 80 deaths in that taluk were among 3 pie children. The high percentage of deaths in this taluk is attributed to the emaciated condition of the paupers prior to admission. The number of deaths in camps was 57, and in villages 44, or in the proportion of 450 and 490 per mille per annum. The total outlay on gratuitous relief wus Rs. 14,441 in the week and Rs. 1,95,126 up to the week.

(Sd.) C. A. GALTON,
Sub-Secretary.

C. A. GALTON,
Sub-Secretary.

T. C. HOPE,
Additional Secretary.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE, AGRICULTURE AND COMMERCE.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING THE 12TH JULY 1877.

General Remarks.—The week has been marked by a sudden and general failure of the monsoon rains, retarding the sowings for the autumn and winter harvest and endangering the safety of the growing crops. In Madras, except on the Malabar Coast, there has been little rain; in Nellore, Cuddapah, Chingleput, Trichinopoly and Salem none has fallen, and in no district is the quantity reported so much as an inch; general prospects are gloomy. The number of persons on relief works is 865,752, and on gratuitous relief 581,633, which are more by 15,494 and 54,571 than last week; the increases on works are chiefly in Bellary 7,700, Cuddapah 6,700, Madura 6,200, Kurnool 4,700, and Nellore 3,300; there are decreases of 10,500 in North Arcot, 1,300 in Chingleput and 970 in Coimbatore. In Mysore ·35 inch of rain is reported from Bangalore, but in the districts it is said that there are no signs of it; unless rain falls immediately the cultivating season will be lost; distress is reported to be greatly on the increase. The numbers on works are 49,794 and on gratuitous relief 120,251; the former are less by 1,996 and the latter more by 3,992 than last week. In Bombay good rain is reported only from Kanara; it is generally wanted throughout Guzerat, the Deccan, Khandesh, and the Southern Mahratta Country, and much anxiety is caused by its absence; in Sind the river has risen and sowings are progressing. In the Central Provinces five districts out of 18 report no rain; of the remaining 13, the fall has exceeded an inch only in four: sowings are in progress, but are retarded in many places by want of rain, which is much required. From Berar no rain is reported; the sowings are nearly completed; the want of rain is causing injury to the growing crops and scarcity of fodder. In Central India rain is reported (in small quantity) only from Sutna and Gwalior; it is much needed. In Rajputana there has been a good fall in Marwar and Bikanir: elsewhere there has been little or no rain, and injury to the young crops is feared. In Bengal the fall has been generally good in the Eastern, Northern and Delta districts; in parts of Behar it has been insufficient, and also in some of the districts of Chota Nagpore and parts of Orissa; the general condition of the crops is however good. In Assam and Sylhet want of rain is also complained of. In Burma the monsoon appears to be going on favourably. In the North-Western Provinces and Oudh the only districts which report a fall are Agra, Benares and Fyzabad; the weather is extremely hot and rain is much wanted. In the Punjab there has been no rain except slight showers at Peshâwar and Jullundur; prospects are generally favourable, but rain is required.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Madras—		
Kistna (July 9th)	·20 in Nandigama; *nil* elsewhere.	4·30 feet water over anicut; sowings stopped; *sajja* and *jonna* staple crops sown after March rains, in some places about to ear, are withering from excessive heat and want of rain; prices rising still; seers of Rs. 80 weight, rice 8·42, *cholum* 10·45, *raggi* 11·83, *cumboo* 10·05; imports at Guntur from Godavery, rice 78·12 tons, *cholum*, *raggi* and *cumboo*, each 15·62 tons; number on relief works 3,358; number on gratuitous relief, in camps 701, in villages 252, by people 343; cholera prevails; mild small-pox, fever and cattle disease reported; markets fairly supplied.
Nellore (" 10th)	*Nil*	Average prices second sort rice 7·28 seers per rupee, *cholum* 9·28, *raggi* 10·79, *cumboo* 9·54; imports by sea 37 tons; rice 86 tons, *cholum* 6½ tons, *raggi* 1½ tons, were brought into the town of Nellore; number on district relief works 20,094, number on canal 48,960; number fed gratuitously in camps 22,957, village relief 698, children of coolies employed on relief works 3,379; returns from Kundukur not received; 22 deaths from cholera; cholera, small-pox, guinea-worm, ague and dysentery prevalent in some taluks; water sufficient but irrigation will cease in many places unless rain falls soon; standing crops beginning to wither in most places; pasturage getting scanty; slight cattle disease in Kanigiri and Nellore.
Cuddapah (" ")	...	Average prices seers per rupee, second sort rice 6·30, *cholum* 7·92, *raggi* 8·72, *cumboo* 7·72; people on relief works 127,599, fed gratuitously in camps 12,143, increase 963, due to transfer to relief camps of weakly persons on relief works, otherwise fed 52,509, increase 7,625, due to pressure of distress and transfer of weakly persons on relief works and in camps; 332 deaths from cholera; number of cattle died from want of fodder and disease 192.
Bellary (" ")	·8 in Hospett; ·15 in Kudlighi.	Average price second sort rice 5·86, boiled rice at Bellary 6·21, *cholum* or great millet 6·35, Jubbulpore *cholum* at Bellary 6·95, *raggi* or lesser millet 7·13, *cumboo* 6·25 seers of 80 tolas; import 5,217 tons; accounts received from two railway stations only; 301,463 persons on relief works, increase on revised return for previous week 7,780, this is chiefly due to the pressure of famine; 150,093 gratuitously fed, of whom 25,657 in relief houses, and 5,912 in relief camps, increase on revised return for previous week 5,660, this is chiefly due to the increase of number of children of coolies receiving 3 pies; gratuitous feeding by private charity aided by Government grant has been discontinued by substituting money dole; cholera decreasing but still in 10 taluks; small-pox and fever exist; cattle still perishing in a few places from want of fodder; supply of drinking water generally sufficient.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Madras—*continued.*		
Kurnool* (July 10th)	·05 in Ramalkota taluk; *nil* elsewhere.	Season unfavourable; Tumbudra continues in fresh; water in Kurnool town abundant; average price second sort rice 6·05 imperial seers per rupee, *cholum* 7·19, *raggi* 8·23, *cumboo* 8·28; markets on the whole fairly supplied; cholera and small-pox abating, fever continues; cholera seizures 11, deaths 10; condition of cattle indifferent; coolies on relief works 210,719, the increase of 4,695 is owing to fresh admissions of distressed people; gratuitously fed 56,084, of whom 5,331 are in relief camps and 4,987 in relief houses, 40,200 were children under 7 years, 5,566 under village relief; 203 tons of private grain imported in 3 taluks; physique of coolies fair.
North Arcot („ „)	·20 (average of 2 stations.)	Average prices in Government seers second sort rice per rupee 6·8, *cholum* 8·0, *raggi* 8·2, *cumboo* 7·5; relief works' coolies 42,179, decrease owing to non-receipt of relief report from Punganoor, persons gratuitously fed in camps 13,736; persons otherwise gratuitously fed 20,047; cholera still prevalent; fever and small-pox in some places; pasture insufficient; cattle still dying of starvation and disease in some parts.
Chingleput („ „)	*Nil*	Prices rice second sort 6·91, *raggi* 8·31, *cholum* 8·59; imports, rice 140 tons, *raggi* 31·16, *cholum* ·50; cholera in all the taluks except Trivellore; fever, small-pox and dysentery in Conjeveram, Sydapet and Ponneri; condition of cattle good except in Trivellore where pasturage is failing; there is a sufficiency in all the other taluks; water drying up but sufficient for the present; 30 head of cattle in Conjeveram and 172 in Trivellore reported to have perished from weakness and disease; on relief works 28,506; gratuitously relieved in camps 16,638, in other places 22,453.
South Arcot („ „)	·4 in Chillambram; slight rain in Hoozoor, Punrooty and Kallacoorchy.	Rice second sort $7\frac{3}{8}$ seers, *cholum* $9\frac{1}{2}$, *raggi* $10\frac{1}{8}$, *cumboo* $10\frac{1}{4}$, dearer than last week; imports by sea none, by rail not known; number employed last day, men 40, women 45, children 6; fed in relief houses at Chengam, men 78, women 252, children 474; deaths from dysentery 7; fed in 107 villages men 1,821, women 2,767, children 7,271, deaths 4; people healthy; cholera deaths reported 136 against 174 attacks; cattle disease in some villages; pasture inadequate; *cumboo* crops drooping, if no rain falls during the next few days they will perish.
Tanjore („ „)	Slight rain in some places of Mayaveram, Sheally, Negapatam and Puttikotta taluks on the 5th and 7th instant.	Prices rice $7\frac{9}{16}$ seers, *raggi* $10\frac{7}{16}$, *cumboo* 11, *cholum* $9\frac{7}{16}$; imports by sea rice 1,071 tons, dry grains 58; relief works none; rivers nearly half; deaths from cholera 470; small-pox almost throughout the district, a few deaths reported therefrom; cattle disease in Tanjore, Combaconum, Nannilam, Negapatam and Tittrapundi taluks, with some loss of life; fodder available.
Trichinopoly („ „)	*Nil*	Third sort rice $6\frac{3}{8}$ seers, *cholum* $16\frac{4}{5}$, *raggi* $9\frac{3}{5}$, *cumboo* $8\frac{9}{16}$; import of grain during the week 454 tons; no relief works; number fed in relief camps on 7th instant 750, otherwise gratuitously fed by Government 535, by private subscription 1,362; deaths from cholera 293, from small-pox 5; cattle disease in some parts; pasture deficient.
Madura† („ „)	Slight rain fell in parts of Dindigul, Polany, Madura, Shevagunga and Melur.	Rice second sort $7\frac{1}{2}$ seers, *cholum* $10\frac{3}{16}$, *raggi* $9\frac{1}{8}$, *cumboo* $9\frac{1}{2}$; import, rice 1,901 tons; number on relief works 13,228, increase in Polany and Melur; number fed gratuitously in camps 12,259, otherwise fed 5,842; cholera everywhere, deaths 359; small-pox and dysentery in some places.
Tinnevelly („ „)	Slight rain in Tenkasi and Sattur.	Freshes in Sattur river; *kar* cultivation almost over; 159 deaths from cholera against 220 attacks; cattle disease continues in two taluks with slight loss; pasture in some places insufficient; prices almost stationary; average prices per rupee, second sort rice 8 seers of 80 tolas, *cholum* 11, *cumboo* $11\frac{1}{2}$, *raggi* $9\frac{3}{4}$; imports of grain, rice 2,884 tons; number on relief works *nil*; number gratuitously fed in camps 1,274, number otherwise fed 21.
Coimbatore („ „)	·40 in Pollachy on 1st; ·35 in Bhowany on 7th.	Prices rising in most places, rice second sort 6·82, *cholum* 7·75, *raggi* 8·79, *cumboo* 9·09; imports estimated rice 1,000 tons, other grains 99; cholera in 9 taluks, attacks 513, deaths 366; small-pox and fever in some parts; *nunjah* cultivation going on, *punjah* not freely; cattle in Collegal good, in Dhurumpuram fair, elsewhere poor; losses in Sattiamangalum and Pollachy; pasture available in some parts; fodder generally scarce; water-supply in vicinity of rivers and in deepened wells, scarce elsewhere; on relief works 27,734, gratuitously relieved in centres 50,013, in villages 1,695; increase due to extension of distress.
Salem („ „)	*Nil*	Prices of grains seers of 80 tolas, rice $6\frac{1}{8}$ seers, *raggi* $7\frac{1}{4}$, *cumboo* $6\frac{7}{8}$, *cholum* $7\frac{1}{2}$; import of all grains 550 tons; number on relief works 41,000; number gratuitously fed in camps 15,500, ditto in villages 85,700, ditto by private charity 120; sporadic cholera and small-pox in all taluks; number in camps rising 15 per cent. due to revised scale of diet and consequent popularity of camps; village gratuitous relief rising 12 per cent., due to extensive relief in Kistnagherry.

* On page 1858 of the Supplement to the *Gazette of India* of the 7th July 1877 in the remarks opposite Kurnool for "coolies on relief works 200,024" read "coolies on relief works 206,024."

† On the same page in the remarks opposite Madura for "number on relief works 986" read "number on relief works 6,986," and for "number fed gratuitously in camps 53,027" read "number fed gratuitously in camps 13,027."

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Madras—*concluded.*		
South Canara (July 10th)	4·33 (average.)	
Malabar („ 9th)	3·11 (average.)	Rainfall sufficient for existing cultivation; transplanting of first crop nearly over; weather favourable; prospects good; imports by sea, rice 58 tons; exports by land, rice 98 tons; railway return not received; prices of rice stationary except in Palghaut where they have slightly risen, highest 6⅛ Indian seers in Wynaad, lowest 9⅞ in Ponany, average 8½ Indian seers per rupee; *raggi* 9 Indian seers per rupee in Wynaad, average elsewhere 11⅝; small-pox in six taluks, cholera in eight, deaths from latter 395; cattle healthy; pasturage good; 821 coolies on Kolathur roads. *General Remarks.*—General prospects gloomy; number fed gratuitously 581,633; number on relief works 865,752; exports of grain from Madras by rail during week ending the 7th instant 9,411 tons.
Bombay— (July 12th) *Sind*— („ 11th)		
Kurrachee ...	On 30th 1· in Sakro, ·16 in Keti.	River on 8th 14 feet 1 inch, last year 12¼ feet; raining in floods on 30th, filling all tanks and hollows; locusts about Dadu, no damage.
Shikárpur ...	...	River 1 foot 7 inches higher than on same date last year; transplantation of rice crops commenced; cattle disease in 3 talukas; river floods not yet out.
Hyderabad ...	...	River high, rising splendidly; sowings progressing.
Upper Sind Frontier ...	...	Minimum temperature 81·9, maximum 110·7; water high in canals *kharif* sowings in progress.
Guzerat— (July 11th)		
Ahmedabad ...	·20	Total rainfall 2·70.
Kaira ...	1·89	More rain greatly wanted; sowing operations recommenced; public health good.
Surat ...	·34	Rain wanted in 4 talukas; cholera prevails in 2 talukas, deaths 28.
Broach ...	*Nil*	Seeds sown dried up for want of rain; in Jambusar time for sowing rice and *kodra* passed away, if it does not rain during this week time for sowing *bajri* will also pass away; great scarcity of grass in Jambusar.
Khandesh and Násik— (July 11th)		
Khandesh ...	·05 in Dhulia.	Total rainfall 3·73, more anxiously awaited; sowing operations suspended except in 3 talukas; no fodder except on hills, cattle being driven to Satpura again; prospects at present unsatisfactory; 4 fatal cholera cases in Chálisgaon taluka.
Násik ...	...	Rain in some talukas, sowing stopped for its want elsewhere, fears that crops sown will wither; cholera prevalent, 55 deaths.
Konkan—(July 11th) Tanna ...	1·95	Total rainfall 19·44; sowing operations completed; transplantation of crops delayed for want of sufficient rain; cholera more or less throughout collectorate except in taluka Panwel; small-pox in Bassein and Panwel talukas.
Deccan—(July 11th) Poona ...	Average ·66.	Average rainfall from 5th June 8·01, wanted everywhere except in Máwal.
Ahmednagar ...	*Nil* in Nagar; 1·12 in Shagondra.	Rain generally wanted; sowing of *bajri* continued where there is moisture; cholera in 9 talukas, cases 370, deaths 189.
Sholapur ...	·03	Total rainfall 10·73, more wanted; 34 deaths from cholera.
Satara ...	·50 in Satara.	Total rainfall 7·04, more required; crops in some places likely to suffer from want of rain; 334 deaths from cholera.
Southern Mahratta Country—(July 11th)		
Belgaum ...	·23 in Belgaum; ·42 in Bidi; ·08 in Athni.	Total rainfall at Belgaum 21·97; state of crops good hitherto, but break in monsoon causes much anxiety; cholera continues, deaths 19.
Dharwar ...	...	No rain in 7 talukas, total of other talukas 1·55; growth of young crops and sowing retarded in Nawalgund and Ron talukas; in other talukas crops in good condition and sowing still progressing; cholera continues, deaths 30.
Kanara ...	11·2 in Karwar.	Total rainfall 27·75, more wanted; cholera continues, deaths 58.
Kaládgi ...	*Nil*	Sowing generally retarded for want of rain; cholera decreasing, 11 deaths in 3 talukas.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bombay—*continued.*		
Kattywar and Gaekwar's Territory—(July 11th)		
Rájkot ...	...	Weather cloudy; water scarce; health good; rain much wanted.
Wadhwán ...	*Nil*	Want of rain felt throughout Jhalawad; weather cloudy; health good.
Baroda ...	·10	Total rainfall 4·57; its want much felt.
		General Remarks.—Much anxiety felt everywhere for want of rain; cholera decidedly decreasing in Southern Mahratta Country, but continues to spread in Deccan Collectorate.
Bengal— (July 12th)		
Chittagong ...	4·42	Cholera reported in south of the district.
Noakholly ...	2·31	Fever still prevalent.
Chittagong Hill Tracts	·68	
Hill Tipperah ...	1·44	
Backergunge ...	2·83	
Furreedpore ...	17·05	Fever prevalent in part of Madareepore sub-division.
Dacca ...	3·47	Prices rising owing to exportation.
Tipperah ...	6·38	
Mymensingh ...	1·66	
24-Pergunnahs ...	3·65	Fever prevails at Barripore.
Jessore ...	5·92	
Nuddea ...	12·57	
Moorshedabad ...	5·61	
Pubna ...	13·42	
Rajshahye ...	8·45	
Bogra ...	8·08	
Maldah ...	5·55	
Dinagepore ...	Return not received.	Cholera nearly disappeared.
Rungpore ...	12·13	Fever and bowel complaints prevalent, but not serious; disease among cattle very prevalent in Kurigram sub-division; large number stated to have died in thana Ulipur.
Cooch Behar ...	3·48	Public health good.
Jalpáiguri ...	1·57	
Darjeeling ...	2·69	
Midnapore ...	1·48	
Howrah ...	1·46	
Hooghly ...	Return not received.	Public health normal; cattle disease still prevails in one village in thana Balágarh
Burdwan ...	1·26	Fever prevalent.
Bankoora ...	·69	
Beerbhoom ...	1·57	
Sonthal Pergunnahs ...	3·91	
Bhágalpur ...	1·38	
Monghyr ...	*Nil*; 2·21 in previous week.	Health good.
Purneah* ...	1·36	
Durbhunga ...	2·83	Cholera diminished in interior, but still prevalent in Durbhunga town.
Mozufferpore ...	·69	
Sarun ...	2·57	
Chumparun ...	1·15	
Patna ...	·24	Cholera continues prevalent.
Gya ...	2·45	Health generally good.
Shahabad ...	·18	
Hazáribágh ...	1·20	
Lohardugga ...	1·17	Several deaths from small-pox in Palamow sub-division; otherwise public health good.
Manbhoom ...	·03	
Singhbhoom ...	2·84	District healthy.
Balasore ...	2·71	
Cuttack ...	·16	Public health good.
Pooree ...	2·11	Cholera very prevalent.
		General Remarks.—There has been rain in all parts of Bengal during the week, and the general condition of the crops is good; but the rainfall has been insufficient in most of the Behar districts where the transplantation of the winter rice has been retarded; rain is also wanted in Western Bengal, in Jalpáiguri, and in Cooch Behar.

* In the Supplement to the *Gazette* of the 7th July 1877, page 1860, opposite Purneah in the rainfall column for "1·50" read "2·63."

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
N.-W. P. and Oudh—		
Benares (July 11th)	Slight rain.	
Allahabad („ „)	...	Rain still keeping off.
Jhansi („ 12th)	*Nil*	High westerly wind.
Agra („ 11th)	From ·1 to 1·4	
Meerut („ „)	*Nil*	No rain since 3rd; often cloudy.
Bareilly („ „)	...	Hot winds prevail; rain wanted badly.
Almora („ 9th)	...	Weather dry and hot during the week; good for young crops and farming operations.
Lucknow („ 11th)	...	Rain much wanted.
Sitapur („ „)	*Nil* at head-quarters.	No signs of the monsoons.
Fyzabad („ „)	·4 on morning of 11th.	Ploughing going on.
		General Remarks.—Rain much wanted and has as yet been very slight and partial; weather hot and oppressive.
Punjab— (July 11th)		
Delhi ...	*Nil*	Sowings in progress; health good.
Umballa ...	*Nil*	Health good; ploughing commenced.
Jullundur ...	·1	Heat intense and *kharif* sowings in danger; health good.
Lahore ...	*Nil*	Locusts appeared on 8th and 9th, but no damage done to crops; health good.
Ráwalpindi ...	*Nil*	Agricultural prospects and health good; cattle disease in a few villages.
Mooltan ...	*Nil*	Crops and health good.
Dera Ismail Khan ...	*Nil*	Crops suffering; health good.
Peshâwar ...	·4	*Kharif* crop favourable, but more rain wanted; health good.
		General Remarks.—Agricultural prospects are generally favourable thus far; but rain is wanted.
Central Provinces—		
Upper Godávari (July 7th)	·07	More rain wanted; sowings continue; health good; prices rising.
Biláspur ...	2·55	Rice sowings continue; health good; prices steady.
Raipur ...	·20	Sowings continue; slight cholera prevalent; prices stationary.
Bálaghát ...	1·74	Sowings progressing; health good; cattle disease prevalent; prices stationary.
Chhindwára ...	·13	Sowings continue; rain wanted; health good; prices stationary.
Chánda (July 8th)	·10	Transplanting of rice retarded for want of rain; small-pox continues; prices rising.
Betúl („ 9th)	...	Rain much wanted; sowings continue; health good; prices stationary.
Bhandára („ 10th)	·46	Cloudy and close; sowings nearly completed; rain much wanted for transplanting rice; cholera disappearing; fever continues; prices stationary.
Nágpur („ 11th)	·63	Sowings continue; health good; prices rising.
Wardha ...	...	Warm; rain much wanted; slight small-pox; prices rising.
Nimár ...	...	Sowings suspended for want of rain; small-pox continues; prices rising.
Hoshangabad ...	...	Rain much wanted; small-pox decreasing; prices unchanged.
Narsinghpur ...	...	Cloudy; health good; prices rising.
Jubbulpore ...	·46	Sowings commenced; measles continue.
Saugor ...	1·6	Sowings progressing; health good; prices unchanged.
Seoni ...	1·5	Sowings progressing; health good.
Mandla ...	·58	Close; sowings continue; fever decreasing; prices stationary.
Damoh ...	·79	Sowings progressing; prices stationary.
		General Remarks.—In most districts rain is much wanted; *kharif* sowings are everywhere in progress; prices show some tendency to rise, owing to apprehension of a scarcity of rainfall; general health good.
British Burma— (July 12th)		
Arrakan Division ...	12·0 in Akyab.	Public health good; 6 deaths from cholera including 4 in Akyab jail.
Pegu Division.		
Rangoon ...	4·88	Public health normal; ploughing progressing favourably; total rainfall up to date 34·08 inches.
Bassein ...	5·30	Public health good; ploughing progressing.
Henzada ...	2·0 in week ending 7th instant; 3·0 in Myanoung in week ending 30th ultimo; 6·0 in Yeagheen in week ending 25th ultimo.	Two deaths from cholera reported from Sarrawah; otherwise public health fair; total rainfall in Henzada 23·0 inches, in Myanoung 15 inches, in Yeagheen 17 inches.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
British Burma—*contd.*		
Prome ...	2·71	Two cases of cholera in Prome, 1 death; health of district good; total rainfall 18 23 inches.
Thayetmyo ...	...	Public health generally good; ploughing commenced; total rainfall 17·53 inches.
Thonkwa ...	...	Report not received.
Tenasserim Division ...	...	No report received (line being interrupted). *General Remarks.*—Cattle disease in 2 townships of Akyab district, also in Monio township in Henzada district; price of rice rising, and stocks getting exhausted in the districts.
Assam—		
Gauháti (July 12th)	1·51 fell during the week.	Weather variable; hot and sultry with occasional showers at night; *asu* crop being reaped; outturn rather short; *sali* cultivation is much retarded and tea prospects unfavourable for want of rain.
Sylhet („ „)	2·17	Weather sultry and stormy; more rain is much wanted.
Mysore and Coorg— (July 12th)	·35 in Bangalore; 1·78 in Coorg.	Ordinary rice selling at Bangalore at 11½ pounds per rupee; prices unprecedentedly high in the districts, and distress greatly on the increase; standing crops have already suffered and unless rain falls of which there are no signs the cultivating season will be lost; the daily average number of persons on relief works and charitably relieved as per statement last tabulated is in the— Bangalore district including the town ... 6,622 and 54,607 Kolar ... ... 4,440 „ 11,803 Túmkúr ... ... 4,586 „ 19,517 Mysore ... ... 1,574 „ 5,319 Hassan ... ... 1,629 „ 6,560 Shimoga ... ... 1,219 „ 886 Kadur ... ... 446 „ 1,384 Chitaldroog ... ... 5,003 „ 20,175 Total ... 25,519 „ 120,251 excluding those employed by the Professional Department, daily average of which is 24,275.
Hyderabad Assigned Districts— (July 12th)	*Nil*	Sowings nearly completed; rain urgently needed; in the Wun district cattle dying for want of fodder; early crops withering; small-pox and cholera nearly abated.
Central India—(July 11th)		
Indore ...	*Nil*	Health good.
Gwalior ...	·25	Total rainfall 4·85; health good.
Neemuch ...	*Nil*	Health good.
Rutlam ...	...	Rain needed; health good.
Sutna ...	1·96	Total rainfall 4·74; rain much needed; great heat.
Rajputana—		
Abu (July 12th)	*Nil*	Cloudy and windy.
Sirohi („ 8th)	·70	Total rainfall 3·70; health good; weather seasonable.
Marwar („ 7th)	2·55	Tillage general; health good.
Meywar („ 6th)	·1	Water-supply and health good; sowings for *kharif* crops continue; strong south-west winds.
Bikanir („ 5th)	2·21	Tanks partially filled; *bajri* sowings commenced; hot winds; good deal of rain reported to have fallen in districts.
Harowtee („ 7th)	1·40 in Deoli; ·50 in Kota; ·20 in Tonk; ·45 in Shahpura.	Health good.
Jhallawar ...	...	
Ajmere (July 12th)	*Nil* during week at Beawar; on 1st July fall of 6·0 in one day.	Ploughing and sowing continue; weather fine. Prices falling; high winds; young crops require rain; health good.
Jeypore ...	*Nil* since 2nd	Agricultural operations suspended; cloudy; health good.
Bhurtpore (July 11th)	·84	Weather close and cloudy.
Ulwur ...	·07	Seeds sown dried up; considerable anxiety at rain keeping off; hot wind day and night.

SEPARATE REVENUE—STAMPS.

The 6th July 1877.

No. 1715.—In exercise of the powers conferred by Section 16 of the General Stamp Act 18 of 1869, the Governor General in Council is pleased to reduce to 4 annas the stamp duty on instruments, whereby the owner or occupier of land in a village in the Presidency of Bombay relinquishes his rights therein to the Local Government upon the site of the village being changed by the order or with the consent of the said Local Government and accepts in exchange therefor, the right to occupy land in a new village site upon such terms as the said Local Government may prescribe.

R. B. CHAPMAN,
Secy. to the Govt. of India.

MILITARY DEPARTMENT.

Simla, the 30th June 1877.

ORGANIZATION.

No. 593.—ROYAL ARTILLERY—

Under instructions from Her Majesty's Government, the Right Hon'ble the Governor General in Council is pleased to direct that on and after the 1st July 1877, the organization of the Royal Artillery, as detailed in Horse Guards G. O. No. 22, dated the 1st April 1877, shall be introduced into India, and the system hitherto existing shall cease.

2. Officers now commanding Royal Artillery in the various divisional and district army commands, will exercise command of the Royal Artillery within the limits of their respective commands assisted by their present Brigade, Divisional or District staff, the command and staff allowances at present drawn being continued until further orders.

3. Officers of the Artillery Brigade staff who may under this order become supernumerary to the future establishment, will continue to receive the same staff and command allowance they drew under the Brigade system, until the detail of the future distribution and number of superior commands, &c., has received the sanction of Her Majesty's Government.

4. The Brigade non-commissioned staff, now rendered supernumerary by the abolition of the Brigade system, will remain as at present for duty under the orders of the Commander-in-Chief, and continue to hold their military rank and receive pay and allowances as when Brigade staff, pending the publication of final orders or until absorbed.

5. All Native establishments now attached to the head-quarters of Royal Artillery Brigades, will likewise be maintained and paid as heretofore.

The 2nd July 1877.

RETIREMENTS.

No. 594.—In continuation of G. G. O. No. 551, dated the 15th June 1877, the undermentioned officer is permitted to retire from the service from the date specified, under the provisions of G. G. O. No. 8 of the 1st January 1877 :—

No.	Rank and Name.	Corps.	Ordinary pension.	Annuity.	Capitalized value of annuity.	Date of retirement.	Where to be paid.
			£ s. d.	£ s. d.	£ s. d.		
16	Lieutenant-Colonel (Brevet Colonel) John Craufurd Millar.	Staff Corps	456 5 0	...	4,137 0 0	1st July 1877	England.

APPOINTMENTS AND PROMOTIONS.

No. 595.—LONDON GAZETTE—

The following extract is published for general information :—

"Supplement to London Gazette," 2nd *June* 1877, *pages* 3497 *and* 3498.

CULTURE, AND COMMERCE.

Weekly condition report of the distressed districts of the Mysore Province.

PROVINCE OF MYSORE.

(*No.* 21.)

Condition report for the week ending 30th June 1877.

Bangalore District.—Markets continue fairly supplied. Prices have risen. There was no rain in any of the taluks during the week, in consequence of which the crops are reported to be languishing. Ragi, javari, and ballar were sown afresh in the taluks of Bangalore and Devanhalli. Public health bad. Cholera, fever and dysentery are still prevalent.

Kolar District.—Markets fairly supplied. Prices are rising. No rain during the week. The standing crops are reported to be withering for want of rain. Cholera and fever are prevalent.

Túmkúr District.—Markets are sufficiently supplied, except in the Sira and Kunigal Taluks where the importation was slack for want of carriage. In any parts of the district ragi was not procurable and rice only in limited quantities. Prices have risen in all but three taluks. There was no rain except at Túmkúr kasba, where the quantity gauged was only 54 cents. Public health was indifferent owing to the prevalence of dysentery, fever and cholera.

Mysore District.—Markets fairly supplied. Prices steadily rising. Rain fell in six out of eleven taluks of the district, the quantity registered at the head-quarters thereof ranging from 12 cents to 2·50 inches. The crops are in tolerably good condition, but in need of more rain. Public health remains unimproved. Cholera in some parts and murrain in one taluk.

Hassan District.—Markets continue fairly supplied. Prices fluctuating. Rain fell generally throughout the district, the quantity registered at the head-quarters of taluks varying from 10 cents to 11·75 inches in the Manjarabad (manlad) Taluk. The state of the crops is good, excepting the ragi crops in Belur where they are reported to have been injured by the excessive rain which has fallen in the malnad portions of the taluk, while the crops in the maidan hoblis have suffered somewhat from the attacks of insects. The javari crops in some parts of the Attikuppa and Channaraypatna Taluks have also been spoilt by heavy rains. Cholera and fever are prevalent.

Shimoga District.—Markets fairly supplied. Prices are fluctuating. The crops are reported to be doing well. The sowing of seed has not yet been completed in parts of Sorab, Shimoga, Honnali and Channagiri Taluks. There has been heavy rain in the malnad taluks and also good rain in the other taluks. The public health is improving, and cholera on the decline.

Kadur District.—Markets moderately supplied. Prices pretty steady. Rain fell throughout the district the quantity gauged at the head-quarters of taluks varied from 15 cents to 16·40 inches. The standing crops are reported to be in good condition. Ragi, javari and gram were sown in some parts. Fever, cholera and small-pox still prevail.

Chitaldroog District.—Markets fairly supplied except at Chitaldroog, Davangere and Budihal, where the supply was moderate. Prices have risen in the taluks of Chitaldroog, Davangere and Hosdurga. There was no rain in the district except at Chitaldroog where the quantity gauged was only 10 cents. The young crops, in some places, are withering owing to the high winds and want of rain. Ragi, javari, ballar, and dál were sown during the week in some parts. Cholera and fever are still prevalent in parts of the district.

GENERAL REMARKS.

The reports for the week ending 30th June do not, on the whole, give a very hopeful account of the general prospects of the Province. The continued absence of rain for the past fortnight has excited great apprehension as to the effect on the young crops which are beginning to suffer. In the Ashtagram Division, there was a scanty rain-fall in some taluks of the Mysore District, while, in the malnad portion of the Hassan District, there was excessive rain which is stated to have done more harm than good to the ragi and javari crops in some parts. In the Nagar Division, prospects are good in the Shimoga and Kadur Districts; but, in the Chitaldroog District, owing to the rain holding off and the stocks in the markets becoming very low, much anxiety is felt. Great difficulty is experienced in obtaining the supply of grain required for the kitchens at Chitaldroog, Budihal and Hiriyur, and the Commissioner had applied for the assistance of the Central Famine Relief Committee in the matter of transporting grain from Bangalore. Up to 15th of June, it is said, the import trade was active, but it has since declined in consequence of the difficulty of procuring carriage from Bellary, Bangalore and the western ports. Although the average price of 2nd sort of rice, for the whole district, was 9lbs. per rupee, yet, at the three places above mentioned, rice was selling at 3 or 3½ seers, being 6 or 7lbs. for the rupee. It is proposed to invite tenders for the supply of grain required for consumption at the kitchens, and the Chief Commissioner feels confident that the energy and enterprise of private trade will not be wanting on this occasion, and that supplies sufficient to meet the demand will be available at all the principal marts of the affected districts.

2. Public health has not improved, as cholera and fever are still prevalent. The number of deaths from cholera reported during the week was 400, as against 342 of the previous week. The increase was chiefly in the Chitaldroog District.

3. The number of works in progress under Revenue officers was 2,610, or almost the same as in the previous week, and the daily average number of persons employed on them was 25,519, or 639 less than in the preceding week.

4. The amount sanctioned up to date on account of the above works was Rs. 15,30,201, of which Rs. 10,20,371 have been expended.

5. The labour return of the Public Works Department shows that the average daily number employed on works carried on under the supervision of the officers of that department was 24,275, or 1,357 less than that of the previous week.

6. Labour is now obtained with considerable difficulty, as almost all the revenue-paying ryots are fully occupied on their fields. The grant of takavi advances for the purchase of seed and cattle will, it is believed, induce many, who would otherwise not be able to do so, to resume their agricultural operations. Patels or heads of villages are exerting their utmost to bring back to their villages, ryots who have deserted them in the hope of finding employment elsewhere; and, as reported by the Commissioner of Nagar Division, those who remain on our works are the regular road and tank coolies, consisting chiefly of Waddars and Lambanis and the miscellaneous poor population of villages and towns. The latter, as a body, have, it is said, been reduced to a dangerous state of physical weakness, and those who can be kept out of the kitchens are not in a condition to do more than half the ordinary daily task of a strong man or woman accustomed to manual labour. It is really difficult to find work suitable to this class of people. As the season for the repair of roads has begun, arrangements have been made to employ them on the same, exacting only as much work as can be reasonably expected from them in their present famished condition, paying them full wages. The able-bodied coolies would be kept in separate gangs, and to them will be gradually transferred such men from the relief gangs as may be found able to do a full day's work.

7. The daily average number of persons gratuitously relieved was 1,20,251, or 3,992, more than that of the previous week. The increase was chiefly in the Túmkúr and Chitaldroog Districts. The expenditure up to date on kitchens and camps amounted to Rs. 6,84,883. The rise of prices of grain has greatly enhanced the expenditure under this head.

8. Major Cole, who has inspected almost all the kitchens in the Kolar District, reports that, notwithstanding the establishment of numerous kitchens, many who are actually destitute are deterred, by caste prejudices and a feeling of pride which the risk of starvation cannot overcome, from resorting to the kitchens.

9. The weight of grain imported by rail during the week was 3,958 tons, as shown below:—

	Tons.		Tons.
From Madras	3,310	From Negapatam, Trichinopoly and Tanjore districts ...	317
" Beypore	137	" the neighbouring districts of the Madras Presidency ...	181
" Sholapur	13		
		Total ...	3,958

being 869 tons more than in the previous week. The imports have been larger than in any week since March last.

10. About 1,744 tons, or 196 less than in the previous week, were exported by road from Bangalore to the interior of the Province and the frontier taluks of the Madras Presidency, as shown below:—

	Tons.
Towards the Túmkúr district	449
" Bellary and Chitaldroog districts ...	340
" Mysore district	360
" Oossoor in the Salem district ...	236
To the taluks adjoining Bangalore	359
Total ...	1,744

11. It is evident that since the prices have risen there has been an increasing activity of the trade; but the only difficulty which has to be surmounted is want of cart bullocks.

"By Order,"

T. R. A. THUMBOO CHETTY,

Assistant Secretary.

INTERIM REPORT.

The high winds have, within the last two or three days, subsided, and yesterday evening a good shower of rain fell at Bangalore and elsewhere in the neighbourhood. It is believed that the change of weather has already proved beneficial, and reasonable prospects are entertained that more rain will fall generally and have the effect of saving the crops, which have been recently sown and which had begun to wither in many parts.

Bangalore, 7th July 1877.

* Such as digging and repairing wells, prickly-pear clearances, &c.

† All the labourers upon the Dhond-Manmad Railway have been included under Ahmednagar.

‡ Corrected figures given.

§ Numbers not received; last week's figures given.

‖ For details and dates see table appended.

The rainfall during the week has been very scanty and partial, and the young crops in Kaladgi and in the more eastern talukas of the remaining districts are suffering from want of it. In the country lying between the Ghauts and this eastern belt the crops are at present in good condition, but now require rain.

Khandesh has never been a very severely affected district, and the anxiety there is rather regarding the future than the present.

2. Grain has again risen in price, and is very dear in Kaladgi, Belgaum and Dharwar; it is dear too in Poona, Sholapur and Satara, but comparatively cheap in Khandesh, Nasik and Ahmednagar. The average price of jowari throughout the nine affected districts is now 17 lbs. for the rupee.

3. The number of people upon relief works in the nine affected districts is 273,428 against 298,547 last week, and there are also 1,093 hill-men and immigrants employed in Ratnagiri and Kanara; the decrease is most marked in Dharwar, while in Khandesh and Belgaum there is an increase.

The average number of labourers upon relief works during June was 349,000, which number corresponds very closely with the estimate for that month—350,000—framed in February last.

4. Cholera appears to be dying out of the Southern Mahratta Country, but it is prevalent in Satara and Ahmednagar, and a few fatal cases occurred in each of the remaining four districts.

5. A table is appended contrasting the rainfall of the past season with the fall which has been reported in each taluka of the famine area during the current season.

6. The following table gives the expenditure by Government, during the week ending 23rd June, upon charity in the relief of the aged and infirm poor; and in payments made to the young children of labourers employed upon relief works. Comparing the results shown in the table below with those shown in the last summary, it will be seen that the number of persons in receipt of Government charitable relief has increased from 56,692 to 66,599, while the number of children under 7 years of age has decreased from 1,16,731 to 1,02,883.

The number of children varies with the number of labourers, and during the week ending 23rd of June (the latest for which complete returns are available) the number of labourers had decreased to 3,25,747. The number of people charitably relieved was 20·44 per cent. of the number of labourers upon relief works during the corresponding week. Since the commencement of the famine up to date the daily average number of persons upon charitable relief has been 1,651, and the cost per head has averaged a little over one anna per diem :—

Districts.	Collector's discretionary grant.			Expenditure incurred under the authority of Government Resolution No. 312 C. W.—1116 of 26th December 1876, on account of children under 7 years of age whose parents are upon relief works.		
	Average number of persons relieved during the week.	Expenditure during the week.	Total expenditure up to date.	Average number of children, and of women taking care of them.	Expenditure during the week.	Total expenditure up to date.

	GRAND TOTAL ...	...	244,226	

8. Tables (A) and (B) are appended as usual. It will be seen that, during the week ending 30th June, the number of people upon Civil Works in the nine affected districts was 26,825, the number upon works under Public Works Department agency being 267,596.

The proportion of people upon the former continues, therefore, about 10 per cent. of the total. It is to be noted that the figures given in these tables are taken from the progress returns of the works, and are brought up to the week ending 30th June, while the figures in the table prefixed to this summary are taken from the Collectors' telegrams, and refer to the week ending 7th July.

9. Maps are not sent with this summary, as they would merely repeat the information already given.

10. A table is appended, showing the condition of the affected Native States.

11. With regard to the movements of food-grains, 267 tons were exported, chiefly by steamer, from Bombay to the Southern Mahratta ports during the week ending 7th July, and during the same period 4,219 tons were carried by the Great Indian Peninsula Railway to stations upon the Poona-Sholapur and Nasik-Bhusawal lines. The table below shows the quantities of grain sent by sea and rail from October till the 7th July to the Southern Mahratta ports and the Railway stations in the distressed districts. It will be seen that the total amount delivered up to the 7th July was 330,162 tons:—

Food-grains sent to	In October, November and December 1876.	In January and February 1877.	In March 1877.	In April 1877.	In May 1877.	In June 1877.	(In July up to 7th.)	Total.
	Tons.	Tons.	Tons.	Tons.	Tons.	Tons.	Tons.	Tons.

TOTAL ...	124,239	61,719	33,792	36,601	42,472	26,853	4,486	330,162

12. The rainfall during the week has been scanty and partial.

The break in the monsoon, referred to in the last Summary, continues general over the whole Presidency. This circumstance has not as yet done any harm to the districts which, previous to the break, had received a sufficient supply of rain, but in those districts which had not, it is doing much harm, and is causing prices to rise fast. Such tracts are to be found chiefly in the Kaladgi Collectorate, and in those parts preparations are being made for such additional measures as may become necessary. Until the break shall cease there will be cause for anxiety.

In all the districts, except those in the extreme east, the young crops are doing well, and sowing and agricultural work is in progress. In some of the southern districts quick-growing crops sown with the first rainfall are coming into the markets, and various descriptions of vegetables are now, day by day, becoming available; they have added greatly to the resources of the people.

The food-supply continues to be sufficient, but prices are rising everywhere, and will probably continue to do so until there has been a heavy and general rainfall, when a decline may be expected. In Kaladgi and in other eastern districts, where grain imports have been checked by the employment of the available cattle on ploughing and agriculture, a movement has commenced of importation by human labour; men and women in considerable numbers have begun to attend the nearest large grain markets, and to carry grain away by head loads of about half a hundredweight. This movement is very healthy; it not only increases imports, and tends to check combination on the part of dealers, but it provides profitable labour for numerous people, who would otherwise need support from the State.

The grain trade on the coast has been limited; by rail it is active, and has amounted to about the same quantity as it did last week, *i. e.*, 4,000 tons.

Cattle continue to return, and their condition to improve; most of those fit for work have been withdrawn from transport for employment on the fields.

People still continue to leave the works without pressure, and during the week there has been a net decrease of 25,380 labourers, bringing up the whole decrease in the last four weeks to 124,062.

The increase on charitable relief of 9,907 is considerable, but the movement is likely soon to cease, and to become reversed, in all districts, except perhaps in Kaladgi. There has been a decrease of 13,848 in the number of young children on the works.

Although in the eastern districts, especially in Kaladgi, the general position is not so good as it was on the date of the last report, yet, taking the affected area as a whole, there has been a perceptible improvement, which will be greatly accelerated as soon as good rain, which is probably not far distant, has fallen.

Cholera is decreasing.

M. K. KENNEDY, Major-General, R. E.,
Secretary to Government.

NOTE.—The totals are not invariably the sum of the men, women and children, as in a few returns these particulars have not been given, the total number of labourers alone having been entered.
These figures are for the nine distressed districts only. The people upon relief works in Ratnagiri and Kanara are shown in Table A.

Table contrasting the rainfall as yet reported during the current season with the rainfall of the past season.

(According to the Collectors' Weekly written Reports).

* The monsoon set in on the 19th June above Ghauts.

† The figures for Nasik are the same as last week, later written reports not being available. Telegraphic returns of more recent rain have been received, but cannot yet be properly collated.

‡ This is chiefly eastern rain.

Imports of grain into the Presidency of Madras and its transport by the Madras Railway.

Extract from the Proceedings of the Government of Madras, Revenue Department,—No. 1999, *dated* 15*th June* 1877.

Read the following papers:—

Proceedings of the Board of Revenue, dated 1st June 1877.

G.O. 12th May 1877, No. 1709-B, Revenue Department.

ABSTRACT.—Communicating for report letter from Private Secretary to Sir R. Temple forwarding papers on the subject of the imports of grain into the Presidency of Madras and its transport by the Madras Railway.

THE additions to the food-stocks of the Presidency by importations by sea from places beyond the Presidency between 1st May 1876 and 30th April 1877, were as shown below:—

Months.	Exports.	Imports.	Net additions to the food-stocks.
	Tons.	Tons.	Tons.
May 1876	16,967	9,045	+ 7,922
June „	12,283	13,695	— 1,412
July „	3,908	11,134	— 7,226
August „	3,795	11,118	— 7,323
September „	6,109	7,920	— 1,811
October „	10,830	9,740	+ 1,090
November „	34,746	5,879	+ 28,867
December „	52,311	1,872	+ 50,439
January 1877	99,923	2,992	+ 96,931
February „	86,818	4,739	+ 82,079
March „	87,422	5,728	+ 81,694
April „	93,379	3,438	+ 89,941
Total ...	508,491	87,300	+ 421,191
1875-76 ...	73,394	142,063	— 68,669

2. The imports are chiefly from Bengal and the exports to Ceylon. The following statement shows the places whence the imports were received:—

	Tons.
Bengal	354,823
Bombay	68,712
British Burma	63,170
Scinde	7,022
Foreign ports in other Presidency	6,363
Ditto beyond India	8,401
	508,491

3. The information available in regard to the imports by land is not complete. There is no record of the cart-traffic, and the records available do not show the imports by rail prior to August 1876. The grain-trade by land, however, from and to places beyond the Presidency is, the Board believe, ordinarily so very small that the railway exports and imports from August,

which are shown below, may be regarded as the trade for the entire period from April 1876 :—

Months.		Imports.		Exports to the Mysore Country.	Net additions.
		From G. I. P. Railway.	From the Mysore Country.		
		Tons.	Tons.	Tons.	Tons.
August	1876.	4,039	157	3,049	+ 1,147
September	,, ...	5,163	79	6,173	— 931
October	,, ...	4,921	101	14,485	— 9,463
November	,, ...	7,951	282	10,194	— 1,961
December	,, ...	12,281	248	11,515	+ 1,014
January	1877.	7,872	79	12,072	— 4,121
February	,, ...	10,665	118	9,220	+ 1,563
March	,, ...	8,226	...	15,484	— 7,258
April	,, ...	9,583	...	14,909	— 5,326
	Total ...	70,701	1,064	97,101	— 25,336

4. Thus the total *net* imports from places beyond this Presidency from 1st May 1876 to 30th April 1877 is 395,855* tons.

		Tons.
* By sea	... ...	+ 421,191
By land	... ...	— 25,336
	Difference...	395,855

5. As regards the additions to the food-stocks in the distressed districts, the only information available relates to the imports by sea and the traffic on the Madras Railway. The returns for the South Indian Railway are not complete, being for quarters and extending to December 1876 only; and even for the Madras Railway the Board have been able to obtain returns only from August 1876. The Consulting Engineer has been requested to furnish the necessary information for earlier months of 1876, and it will be submitted when received. Meanwhile, the Board think it will be useful to submit the information available, though it is incomplete.

6. The accompanying statements show (1) the imports and exports by sea into and from each district and for each month from 1st April 1876 to 30th April 1877, and the net result for each district. (2) Ditto by the Madras rail from 1st August 1876 to 30th April 1877, and the net result for each district. The total of the figures now given to 31st March do not agree with Captain Bisset's Statements Nos. II and III, partly, it is believed, because his statements do not include traffic from Malabar (except Beypore), Mysore, Cuddapah, Bellary, and Kurnool, which is of small amount; and partly because either from misprints or arithmetical error, the cross and vertical totals in the statements do not agree. The Board have followed his No. I Statement for the March traffic. The Madras Railway returns are also imperfect; in that they do not show traffic from that line to the South Indian Railway. (3) Ditto by the South Indian rail for the quarters ending June, September, and December 1876, and for April 1877 and the net result for each district.

7. From these statements it will be seen that the net additions to the food-stocks in the distressed districts, by sea and by the Madras rail from 1st August 1876 to 30th April 1877, were in tons as shown below :—

The traffic by the South Indian Railway up to December was not, in its net result, of very great importance, and the figures are entirely omitted above.

It will be noticed that the Kistna has been a supplying district, and the extent to which this has been the case is far greater than is represented by the figures above given, as very large quantities passed from the district by land into Nellore and Kurnool. In August and September Nellore was still exporting by sea, but this ceased, and after the two months of October and November, when native vessels could not ply, imports by sea set in. Large quantities have also been sent from Madras to Nellore by road and canal. The North and South Arcot, Madura and Coimbatore districts were also in the earlier months exporting districts. The imports by rail into Cuddapah, Bellary and Kurnool were highest in December. In the first-named district they have been falling since March, perhaps owing to harvesting of spring crops under wells; while in Bellary and Kurnool they fell in January and February, and have been since rising. The high prices in December may have, to some extent, brought out local stocks. It is probable that much of the South Arcot imports have passed on into Salem.

8. The food-stocks received in the distressed districts were supplied chiefly from Madras from the imports from Bengal and the northern parts of this Presidency. The imports and exports into and from Madras in each of the months from August 1876 are detailed below :—

——	Imports.	Exports.	Difference or quantity retained for consumption.
	Tons.	Tons.	Tons.
August 1876	14,606	3,299	+ 11,307
September „	10,315	6,712	+ 3,603
October „	19,048	11,073	+ 7,975
November „	40,052	13,208	+ 26,844
December „	56,251	30,754	+ 25,497
January 1877	76,168	27,620	+ 48,548
February „	69,200	20,305	+ 48,895
March „	48,469	36,676	+ 11,793
April „	41,824	34,137	+ 7,687
TOTAL ...	375,933	183,784	+ 192,149
Particulars—			
By sea	374,002	5,494	+ 368,508
By rail	1,931	178,290	— 176,359
	375,933	183,784	+ 192,149

This quantity, 192,149 tons, is retained for consumption in Madras and tracts easily accessible thence by cart, *viz*., Chingleput, Nellore and part of North Arcot. Large quantity has been sent to Nellore.

9. The additions to the food-stocks distributed on the population of the districts concerned show the following results :—

Districts.	Net Imports.	Population.	Rate per 1,000 for 11 months.
	Tons.		Tons.
Kistna	— 13,871	1,452,374	...
Nellore	+ 24,816	1,376,811	2
Cuddapah	+ 47,996	1,351,194	3·9
Bellary ... ... } Kurnool ... ... }	+ 109,237	{ 1,668,006 { 959,640	} 4·6

District.	Net Imports.	Population.	Rate per 1,000 for 11 months.
	Tons.	No.	Tons.
Madras and Chingleput	+192,149	1,254,879	17
North Arcot	+19,437	2,015,278	1
South Arcot	+10,575	1,755,817	·7
Madura	+11,920	2,266,615	·6
Tinnevelly	+30,569	1,693.959	2
Coimbatore	+18,511	1,763,274	1·2
Salem	+22,877	1,966,995	1·2
Total ...	+474,543	19,524,842	2·7

These results are largely tainted with error, as the land traffic is not included, but are nevertheless, to some extent, instructive, especially those for Bellary, Kurnool, and Cuddapah. At $1\frac{1}{2}$ lbs. per head per diem, which taking rich and poor together, considering that some of the sea-imported grain is paddy, is a low estimate, 1,000 persons will eat 20·1 tons in a month of 30 days. For Bellary, Cuddapah, and Kurnool, therefore, it may be stated that from one-fifth to one-fourth of the population are fed on imported grain. As a good deal of the rail-borne grain has gone from these districts into Mysore and Hyderabad, the lower proportion is perhaps more likely to be correct.

10. With reference to the remark in paragraph 2 of Sir Richard Temple's Minute, that the imports prior to November 1876 into the Town of Madras were at first erroneously assumed by him to be inconsiderable on data published by the *Madras Board of Revenue*, the Board beg to observe that they are not aware of having published any returns showing the trade of the Madras Port. Sir Richard Temple has probably taken his figures from the returns published by the Chamber of Commerce, which do not come under the review of the Board; but it is not apparent how the mistake was made, as the places whence the imports come are recorded in the statements, and ports within the Presidency are not included.

H. E. STOKES,

Secretary.

MADRAS;
1st *June* 1877.

H. E. STOKES,
Secretary.

ORDER thereon, dated 15th June 1877, No. 1999.

RECORDED.

(True Extract.)

J. H. GARSTIN,
Additional Secretary to Government.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE, AGRICULTURE AND COMMERCE.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING THE 19TH JULY 1877.

GENERAL REMARKS.—The break in the rains reported last week has come to an end in the northern portions of Bombay, in the Central Provinces, Berar, Central India, and parts of Rajputana: in Bengal and Burma there was no intermission in the fall; it still however continues in Madras, Mysore, the North-Western Provinces, Oudh and the Punjab. In Madras very light falls are reported only from Malabar, Tanjore, Trichinopoly, South Arcot, Bellary, Madura and Tinnevelly; the crops are everywhere suffering greatly from want of rain, and pasture is again failing; if good rain does not fall within a few days extensive failure of dry crops is said to be inevitable. The numbers on relief works are 893,678, an increase of 27,926 (chiefly in Cuddapah, Bellary and North Arcot), and on gratuitous relief 623,086, an increase of 41,453 (largest in Salem, Cuddapah, Coimbatore and Bellary). In Mysore no rain appears to have fallen: prices have greatly risen and the crops are fast fading; the numbers on works are 47,291, and on gratuitous relief 126,011; the first is less by 2,503 and the latter more by 5,760 than last week. In Bombay good rain has fallen throughout Guzerat, the Konkan, Khandesh and Násik, and prospects there are good; in the Deccan and Southern Mahratta Country the fall has been light, and more is urgently required to save the crops; in Sind the river is unusually low. In the Central Provinces good falls are reported from all districts except the Upper Godávari and Chánda; anxiety in regard to the *kharif* is removed, and prospects are favourable. In Berar there has been an opportune fall, and prospects are improving. The rain has been good throughout Central India, except at Gwalior. In Rajputana abundant rain is reported from Ajmere and Abu, and moderate falls from Jeypore and Bhurtpore; from other places (except Jhallawar and Ulwur) the reports are blank, but of earlier date than the recent rain mentioned above. In Bengal there has been good rain in most districts, but it has been generally insufficient in Behar; prospects are favourable. From Assam good rain is reported in Sylhet, but in the Valley Districts its want is much felt, and the crops are suffering. In Burma the monsoon continues good. In the North-Western Provinces and Oudh moderate falls are reported from Benares, Agra and Lucknow, and light showers from Allahabad, Jhánsi and Bareilly; rain is much wanted. In the Punjab rain has fallen only at Lahore and Ráwulpindi, and in very small quantity; the crops are at present in fair condition, but rain is generally wanted.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Madras—		
Kistna (July 16th)	*Nil* except ·10 in Repalli.	3·30 feet water over anicut; standing crops withering from intense heat and want of rain; prices still rising; seers of Rs. 80 weight, rice 7·88, *cholum* 9·30, *raggi* 10·13, *cumboo* 8·75; imports at Guntur, rice 117·18 tons, *cholum* 156·25; number on relief works 3,159, gratuitously relieved in camps 1,012, in villages 1,061, by people 357; no pasture; dry fodder scarce; market not well supplied in some taluks.
Nellore („ 17th)	*Nil*	Average prices second sort rice 7·05, *cholum* 9·01, *raggi* 10·40, *cumboo* 9·09; imports by sea, rice 42 tons, by land into Nellore town rice 37½ tons, *cholum* 16½ tons and *raggi* 5 tons; number on district relief works 15,387, number on canal 48,237; number fed gratuitously in camps 22,668, village relief 1,041, children of coolies employed on works 3,016; returns from Darsi not received; rain urgently needed all over the district and especially in Kanigiri and Podile; standing crops withering, especially in the north; pasture getting scanty.
Cuddapah („ „)	*Nil*	Average prices seers per rupee, second sort rice 6·07, *cholum* 7·45 *raggi* 8·23, *cumboo* 7·83; people on relief works 140,971; fed gratuitously in camps 13,742, otherwise fed 65,388.
Bellary („ „)	·1 in Bellary; ·45 in Hospett; ·2 in Kudlighi; ·16 in Gooty.	Average price second sort rice 5·67, boiled rice at Bellary 6·48, *cholum* or great millet 6·04, Jubbulpore *cholum* at Bellary 7·73, *raggi* or lesser millet 6·58, *cumboo* 5·88 seers of 80 tolas; import tons 5,524; accounts received from two railway stations only; 311,678 persons on relief works; 141,641 gratuitously fed, of whom 25,667 in relief houses and 5,922 in relief camps; gratuitous feeding by private charity aided by Government grant has been discontinued by substituting money dole; cattle still perishing in a few places from want of fodder; supply of drinking water generally sufficient.
Kurnool („ „)	*Nil*	Season unfavourable; water in Kurnool town abundant; average price second sort rice 5·55 imperial seers per rupee, *cholum* 6·91, *raggi* 7·80, *cumboo* 7·96; grain in markets sufficient for present wants; condition of cattle indifferent; coolies on relief works 212,338; gratuitously fed 57,346, of whom 6,280 are in relief camps, and 6,220 in relief houses, 38,793 were children under 7 years, 6,053 under village relief.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Madras—*concluded.*		
North Arcot (July 17th)	*Nil*	Average prices in Government seers, second sort rice per rupee 6·5, *cholum* 7·4, *raggi* 7·4, *cumboo* 6·8, increase in prices owing to decreased importations; relief works' coolies 52,042; persons gratuitously fed in camps 15,302, persons otherwise gratuitously fed 23,084; pasture insufficient; cattle dying of starvation and disease in some parts.
Chingleput („ „)	*Nil*	Prices, rice second sort 7·02, *raggi* 8·46, *cholum* 7·90; imports, rice 127 tons, *raggi* 35; condition of cattle poor; pasturage withering; water drying but sufficient; on relief works 28,289; gratuitously relieved in camps 18,620, in other places 25,943.
South Arcot („ „)	1·0 in Verdachellum; slight drizzle in Vilapuram, Cuddalore and Kallacoorchy.	Rice second sort $6\frac{3}{8}$ seers, *cholum* $7\frac{3}{8}$, *raggi* $7\frac{3}{4}$, *cumboo* 8·0, all much dearer than last week; imports by sea $50\frac{1}{2}$ tons; rice by rail not known; no persons on works; fed in relief house at Chengam, men 125, women 348, children 551; fed in 131 villages including two relief depôts in Cuddalore town, men 1 996, women 3,639, children 8,856; pasture inadequate; *cumboo* crops in critical condition, some perished, others perishing.
Tanjore („ „)	Varying from ·1 to 1·15 in different places of Combaconum, Mayavarum, Shealy and Nannilam taluks on the 8th and 9th instant.	Prices, rice $7\frac{3}{16}$, *raggi* $9\frac{11}{16}$, *cumboo* $10\frac{1}{4}$, *cholum* $9\frac{1}{4}$; imports by sea, rice 2,808 and dry grains 80 tons; relief works none; rivers gone low.
Trichinopoly („ „)	·95 in Udayarpalliam; *Nil* elsewhere.	Third sort rice 6 seers, *cholum* $16\frac{4}{5}$, *raggi* 8, *cumboo* 8; imports of grain during the week 1,203 tons; no relief works; numbers fed in relief camp on 14th July 995, otherwise gratuitously fed by Government 863; by private subscription 1,570; pasture becoming deficient; prices rising.
Madura („ „)	Slight rain fell in Madura.	Rice second sort $6\frac{3}{10}$, *cholum* $8\frac{2}{5}$, *raggi* $9\frac{1}{5}$, *cumboo* $8\frac{7}{10}$ seers; imports, rice 2,679 tons, other grains 17; number on relief works 13,814; fed gratuitously in camps 14,199, otherwise fed 7,206; increase due to the increase in the number of relief houses; children receiving 3 pies 2,175; cholera continues, deaths 520.
Tinnevelly („ „)	Slight rain on hills.	Low freshes in Tambrapurni; standing crops good on the whole; pasture insufficient in some places; prices rising; average prices per rupee, second sort rice $7\frac{1}{2}$ seers of 80 tolas, *cholum* $9\frac{3}{4}$, *cumboo* $10\frac{1}{2}$, *raggi* 10; import of grain, rice 3,333 tons and *cumboo* 4; number on relief works *nil*; number gratuitously fed in camps 1,512; number otherwise fed 54.
Coimbatore („ „)	*Nil*	Prices risen, rice second sort 5·63, *cholum* 6·66, *raggi* 7·87, *cumboo* 8·05; dry grains scarce; import inadequate; estimated import, rice 711 tons, other grains 21; cultivation of dry crops impeded, wet crops progressing; *punjah* crops fading; cattle in Collegal in good condition, in Dharampuram fair, elsewhere poor; water-supply available in rivers and channels, getting low elsewhere; on relief works 28,714; gratuitously relieved at centres 60,622, in villages 364, children receiving 3 pies 1,041.
Salem („ „)	*Nil*	Prices of grains, rice $5\frac{5}{8}$ seers of 80 tolas, *raggi* $6\frac{11}{16}$, *cumboo* $6\frac{1}{2}$, *cholum* $7\frac{1}{4}$; import of all grains 800 tons; number on relief works 38,000; number gratuitously fed in camps 71,300, ditto otherwise 82,500, ditto by private charity 250.
Malabar („ 16th)	1·53 (average of all taluks.)	Rainfall insufficient for existing cultivation; transplanted seedlings being injured thereby in some places; markets well supplied; imports by sea, rice 125, *cholum* 26 tons; exports by land, rice 1,355 tons; prices of rice slightly fallen in Walluvanad, stationary in Cherakal, Palghaut and Wynaad, risen elsewhere; highest $6\frac{1}{5}$ Indian seers in Wynaad, lowest $9\frac{1}{7}$ in Koteyam, average $8\frac{1}{7}$ Indian seers per rupee; *raggi* 9 Indian seers per rupee in Wynaad, average elsewhere $11\frac{3}{5}$; 1,049 coolies on Kolathur roads.
		General Remarks.—General prospects more gloomy than ever; if good rain does not fall within a few days extensive loss of dry crops throughout Presidency almost inevitable; prices are rising and are now higher than they have yet been; number fed gratuitously 623,086; number on relief works 893,678; exports of grain from Madras by rail during the week ending the 14th instant 9,680 tons.
Bombay— (July 19th)		
Sind— („ 18th)		
Kurrachee ...	*Nil*	River at Kotri on 16th 14 feet 2 inches, corresponding date last year 5 inches higher; small-pox at Dadu, Mánjhand, Kohistan and Kotri; fever prevalent in some talukas.
Shikárpur ...	...	River risen 3 inches yesterday, still 2 feet below requisite level; small-pox in one taluka.
Hyderabad ...	...	River falling, 17 inches lower than on same date last year.
Upper Sind Frontier ...	...	Weather hot and sultry.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bombay—*concluded.*		
Guzerat— (July 18th)		
Ahmedabad ...	5·15	Total rainfall 7·85 ; agricultural operations going on.
Kaira ...	4·55 in Kaira ; nearly 7 inches in Nariad, still raining.	Good rainfall throughout collectorate ; transplantation of rice commenced ; *kharif* prospects good.
Surat ...	1·11	Recent fall of rain improving crops ; cholera in Halsar and Pardi, 32 cases, 15 fatal.
Broach ...	1·88	Total rainfall 6·40 ; cholera in Broach and Ankleswar ; Nerbudda flooded.
Khandesh and Násik— (July 18th)		
Khandesh ...	Rain in nearly all talukas ; 1·70 in Dhulia.	Total rainfall 5·43 ; sowing operations resumed ; prospects slightly improved ; 10 deaths from cholera.
Násik ...	1·70 since the morning of the 16th.	Crops healthy ; 85 deaths from cholera.
Konkan—(July 18th)		
Tanna ...	8·61	Total rainfall 28·05 ; transplantation of crops commenced in some talukas ; fall plentiful during past 3 days ; cholera throughout collectorate except Bassein taluka ; small-pox in Bassein taluka.
Deccan—(July 18th)		
Poona ...	·88 (average.)	Average from 5th June 8·60 ; rain wanted everywhere except in Mardal.
Ahmednagar ...	...	Sowing retarded and crops suffering in some places for want of rain ; cholera in 9 talukas, cases 303, deaths 135.
Sholapur ...	·29	Total rainfall 11·05 ; cloudy, high wind ; no rain now ; 9 deaths from cholera.
Satara ...	·92	Total rainfall since 1st June 6·14, more much needed throughout district ; 211 deaths from cholera.
Southern Mahratta Country—(July 18th)		
Belgaum ...	·64 in Belgaum ; 2·30 in Bidi ; ·10 in Chikori ; nil in other talukas.	Total rainfall at Belgaum 22·61 ; state of crops still good, except at Gokak where they are withering for want of rain ; rain wanted everywhere ; 6 deaths from cholera at Belgaum, and 16 at Sampgaon, total deaths 22, cholera nowhere else.
Dharwar ...	*Nil* in 7 talukas ; 1·30 in Ron.	Crops drooping in many places ; sowing operations retarded for want of rain ; 53 deaths from cholera.
Kanara* ...	1·19 in Karwar.	Total rainfall 28·76, 33 inches less than last year, much wanted ; cholera continues, deaths 91.
Kaládgi ...	·20	Total rainfall 5·51 ; more badly wanted ; slight *kharif* already sown nearly withering ; cholera in 5 talukas, 39 deaths.
Kattywar and Gaekwar's Territory—(July 18th)		
Rájkot ...	1·88	Total rainfall 4·40 ; weather cloudy ; sowing commenced in some places ; health good.
Wadhwán ...	·82	Total rainfall 1·32, fallen throughout Jhalawad ; sowing in some talukas progressing, in none completed ; where crops have grown up they are thriving ; health good.
Baroda ...	3·31	Total rainfall 7·88. *General Remarks.*—There has been a fair fall of rain in Guzerat, Tanna, Násik and Khandesh, which has done much to improve prospects there ; in Deccan and Southern Mahratta Country generally more rain is urgently required to save the drooping crops ; cholera continues in Deccan but not to a great extent ; in Sind the canals are lower than last year at this time.
Bengal— (July 19th)		
Chittagong ...	4·68	
Noakholly ...	4·16	Fever still prevalent.
Chittagong Hill Tracts	5·12	
Hill Tipperah ...	2·35	Fever prevalent.
Backergunge ...	9·13	Cattle disease reported from thanas Mirzaganj and Motbari.

* In the Supplement to the *Gazette of India*, July 14, 1877, page 1943, opposite Kanara, in the rainfall column, for "11·2 in Karwar" read "1·5 in Karwar."

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bengal—*concluded.*		
Furreedpore ...	·71; 11·33 in Madareepore.	
Dacca ...	4·36	
Tipperah ...	5·96	
Mymensingh ...	1·93	
24-Pergunnahs ...	2·54	Public health generally good.
Jessore ...	1·80	
Nuddea ...	2·90	
Moorshedabad ...	3·04	
Pubna ...	1·34	Cholera entirely disappeared; fever rather prevalent.
Rajshahye ...	·46	
Bogra ...	1·61	
Maldah ...	2·87	
Dinagepore ...	·48; 6·13 in previous week.	
Rungpore ...	·72	Public health on the whole good.
Cooch Behar ...	2·66	Public health exceptionally good.
Jalpáiguri ...	8·69	
Darjeeling ...	Heavy rain.	
Midnapore ...	1·58	
Howrah ...	2·04	
Hooghly ...	1·07; 2·49 in previous week.	Public health good; cattle disease continues in one village in thana Balágarh.
Burdwan ...	2·12	
Bankoora ...	3·97	
Beerbhoom ...	3·10	
Sonthal Pergunnahs ...	2·29	
Bhágalpur ...	·81	
Monghyr ...	Heavy rain on 19th.	
Purneah ...	1·61	
Durbhunga ...	·44	Cholera less prevalent in Durbhunga town.
Mozufferpore ...	·20	Cholera in Shiuhar, Seetamurhee and Belsund; some cattle disease in Majorganj.
Sarun ...	2·74	
Chumparun ...	·53	Cholera somewhat abated.
Patna ...	·80	Health good.
Gya ...	1·75	Public health good.
Shahabad ...	Return not received.	
Hazáribágh ...	1·38	
Lohardugga ...	2·71	
Manbhoom ...	5·28	
Singhbhoom ...	4·02	District healthy.
Balasore ...	16·10	Public health good.
Cuttack ...	4·78	Ditto.
Pooree ...	2·99	Cholera exists.
		General Remarks.—Good rain in most districts of Bengal Proper during the week; present prospects of crops promising, but in Cooch Behar, Patna, Durbhunga, Mozufferpore, Chumparun, Gya, and in the Palamow sub-division of the Lohardugga district, rainfall still very insufficient.
N.-W. P. and Oudh— (July 19th)		
Benares ...	2·0 on morning of 19th.	No rice yet sown for want of rain; rain much wanted.
Allahabad ...	1 on night of 18th.	Weather cloudy and unsettled, but rain keeps off.
Jhansi ...	·1	Weather stormy and cloudy; rain wanted badly.
Agra ...	·1 to 1·25 in six parganas during week ending 16th.	Partially cloudy; clouds dispersing; rain much wanted.
Meerut ...	*Nil*	
Bareilly ...	Partial showers.	Rain much wanted.
Almora ...	...	Weather stormy and showery; most of the rain coming from north-west; young crops good.
Lucknow ...	1·7 on 18th in Lucknow.	Weather cloudy.
Sitapur ...	*Nil*	Weather very hot and cloudy.
Fyzabad ...	*Nil*	Cloudy and hot; rain much wanted for young paddy.
		General Remarks.—The rainfall during the week has been very slight and partial; weather cloudy and hot, and rain much wanted for the *kharif* crops.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Punjab— (July 18th)		
Delhi ...	*Nil*	Health good.
Hissar ...	*Nil*	Heat excessive; crops progressing, but rain needed; health generally good.
Jullundur ...	*Nil*	*Kharif* sowings ruined; health good.
Lahore ...	·3	Crops and health good.
Ráwalpindi ...	·4	Fall of hail on 17th; agricultural pros pects and health good; cattle disease which had shown itself disappearing.
Mooltan ...	*Nil*	Crops suffering from lowness of inundation canals; health good.
Dera Ismail Khan ...	*Nil*	Crops suffering from drought; health good.
Pesháwar ...	*Nil*	*Kharif* crops favourable, but rain wanted; health good.
		General Remarks.—Health good throughout the Province; want of rain has now become general.
Central Provinces—		
Upper Godávari (July 14th)	·11	Cloudy; sowings almost completed; more rain wanted; cholera prevalent; prices steady.
Sambalpur ...	5·62	Prospects favourable; health good; prices steady.
Biláspur ...	7·35	Sowings progressing; health good; prices steady.
Raipur ...	3·16	Rice sowings completed; prospects favourable; cholera abating; prices easy.
Bálaghát ...	11·9	Stormy and cloudy; sowings completed; transplantimg of rice in hand; health good; prices stationary.
Chhindwára ...	4·52	Sowings progressing; health good; prices stationary.
Chánda (July 15th)	1·89	Rice sowings completed; rain wanted; small-pox continues; prices stationary.
Betúl („ 16th)	4·48	Sowings nearly completed; health good; prices risen.
Bhandára („ 17th)	3·43	Sowings continue; earlier rice being transplanted; fever and small-pox continue; cholera disappeared; prices stationary.
Nágpur („ 18th)	3 34	Sowings almost completed; prospects favourable; health good; prices stationary.
Mandla ...	5·30	Sowings continue; rain favourable; fever prevalent; prices stationary.
Wardha ...	2·64	Cotton sowings completed; other *kharif* sowings progressing.
Nimár ...	3·18	Crops thriving; small-pox continues.
Hoshangabad ...	Heavy rain on 13th and 14th.	Total rainfall up to date 18·46; crops saved for the present.
Narsinghpur ...	12·	Cloudy; health good; prices rising.
Jubbulpore ...	4·76	Sowings progressing; prospects favourable.
Saugor ...	5·88	Prospects favourable; health good; prices rising.
Damoh ...	2·86	Sowings commenced; health good; prices stationary.
Seoni ...	·20	Total rainfall to date 25·20; sowings continue; price risen.
		General Remarks.—There has been rain throughout the province during the past week and present anxiety as to *kharif* is removed; existing crop prospects are favourable; in most districts however more rain would be welcome, but it is urgently needed in the districts of Chánda and Upper Godávari.
British Burma— (July 19th)		
Arrakan Division ...	15·0 in Akyab.	Cholera here and there in a sporadic form; otherwise public health good.
Pegu Division.		
Rangoon ...	4·34	Public health good; slight fever in Pegu township; total rainfall 38·4.
Bassein ...	8·8	Health good; total rainfall 59 inches.
Henzada ...	5·0 in week ending 14th instant; 3·0 in Myanoung in week ending 7th instant; 2·0 in Yeagheen in week ending 9th instant.	Total rainfall in Henzada 28 inches, in Myanoung 18 inches, and in Yeagheen 20 inches; public health good.
Prome ...	1·0	Two deaths from cholera in Prome, and 2 in Shwedoung, otherwise healthy; total rainfall 19·27 inches.
Thayetmyo ...	1·96	Public health generally good; 4 deaths from fever; total rainfall 19·49 inches.
Thonkwa ...	Rainfall abundant.	Health and crops good.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
British Burma—*contd.*		
Tenasserim Division ...	12·0 in Amherst; 11·2 in Shwegyeen; 3·0 in Tounghoo.	Public health good.
		General Remarks.—Cattle disease in 4 townships of Akyab district; ploughing progressing, and sowing commenced; 34 deaths from cattle disease in Pegu township in Rangoon district, slight cattle disease in Bassein district, and also in Monio, Menghee, Tahpoon and Kanoung townships of Henzada district; ploughing progressing in Prome and Henzada districts; sowing commenced in Thayetmyo; agriculture in Tenasserim Division impeded by heavy rains; price of grain still rising everywhere.
Assam—		
Gauháti (July 19th)	·04	Weather very hot, sky often overcast; want of rain is very much felt; outturn of *asu* and *daodhan* reported to be from six to eight anna crops; *sali dhan* nurseries are withering for want of rain.
Sylhet („ „)	7·13	Rain falling daily; crops are reported to promise well if rain continues.
Mysore and Coorg— (July 19th)	*Nil* in Bangalore; ·62 in Coorg.	Ordinary rice selling at 10½ lbs. per rupee at Bangalore; prices greatly risen; crops fading fast from want of rain, and ravages by insects reported from 2 districts; the daily average number of persons on relief works and charitably relieved as per statement last tabulated is in:—

District			
Bangalore district including the town ...	6,525	and	58,221
Kolar	4,605	„	11,472
Túmkúr	4,550	„	20,041
Mysore	1,171	„	5,240
Hassan	1,806	„	6,820
Shimoga	1,154	„	863
Kadur	690	„	1,162
Chitaldroog	4,502	„	22,192
Total ...	25,003	„	126,011

excluding those employed by the Professional Department, daily average of which is 22,288.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Hyderabad Assigned Districts—	2·87	Rain most opportune; in the Wun district prospects improving; *kharif* sowing almost completed.
Central India—(July 18th)		
Indore ...	6·52	Total 12·79.
Gwalior ...	·10	„ 4·95.
Neemuch ...	3·12	„ 4·31.
Rutlam ...	4·56	„ 9·39.
Sutna ...	1·60	„ 6·34.
		General Remarks.—Health and agricultural prospects good.
Rajputana—		
Abu (July 19th)	3·82	Total rainfall 9·46; high winds; cloudy.
Sirohi („ 15th)	*Nil*	Health good; weather seasonable.
Marwar („ 14th)	*Nil*	Tillage general; prospects favourable.
Bikanir („ 11th)	...	Weather very hot; want of rain much felt.
Meywar („ 13th)	...	Water-supply and health good; rain required.
Harowtee („ 14th)	*Nil*	Health good.
Jhallawar („ 20th)	...	Crops sown; cloudy.
Ajmere („ 19th)	About 3·0 in districts; 8·06 in Peesangan.	Agricultural operations progressing satisfactorily; health good.
Jeypore ...	·90	Ploughing recommenced; more rain needed; health good.
Bhurtpore (July 18th)	1·22	Health good; prices high.
Ulwur („ 19th)	*Nil*	Considerable anxiety as to crops sown.

Ganges Canal.—Mean volume of water passing through Soláni Aqueduct		5,774
Volumes discharged :—		
Etáwah Division Tail " " Escapes	33	
Cawnpore Division Tail	205	
Cawnpore Division Escapes	191	
		429
Balance expended ...		5,345

Cawnpore division reports a "steady demand for water throughout the month," and Etáwah division that "Indigo sowings carried on a week later than usual this year."

Eastern Jumna Canal.—Reports "demand chiefly for sugar-cane; moderate in the beginning and strong towards the end of the month."

Traffic.—The downward carriage for wheat for current month amounts to 1,20,035 maunds, showing an increase of 52,407 maunds over last month. During May 1876 only 2,126 maunds were moved.

Cotton, oil-seeds, salt, and metals, &c., show a considerable decrease as compared with last month, while rafting is nearly double what it was in May 1876.

ALLAHABAD,
The 28th June 1877.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE, AGRICULTURE AND COMMERCE.

Weekly condition report of the distressed districts of the Mysore Province.

PROVINCE OF MYSORE.

(No. 22.)

Condition report for the week ending 7th July 1877.

Bangalore District.—Markets continue fairly supplied, but prices are rising. There was no rain except at the head-quarters of Bangalore and Closepet taluks, the quantity registered being 90 and 20 cents respectively. The young crops are suffering generally from want of rain. Cholera, small-pox and dysentery are prevalent.

Kolar District.—Markets fairly supplied, except in the taluks of Mulbagal, Gudibanda, Sidlagatta, Malur and Gumnayakanpalya, where the supply was moderate. Prices steadily rising. There was no rain during the week, and, in consequence, the standing crops are withering. Paddy crops, grown under wells in the Goribidnur taluk, are being harvested. Cholera is prevalent only in two taluks (Shrinivaspur and Malur).

Túmkúr District.—The importation of rice, it is reported, has again set in pretty freely, but not to the extent needed. Ragi, however, was not procurable at Madagiri and only with some difficulty elsewhere. Prices remained stationary in the Maddagiri, Chiknayakanhalli and Sira taluks, and rose in the other taluks excepting Kadaba and Honnavalli, where they fell slightly. There was little or no rain during the week. The ragi crops recently sown are reported to be fast withering. Javari sown in tank beds and under irrigation is in fair condition. Cholera and fever are still prevalent.

Mysore District.—Markets are pretty well supplied, but prices are rising. Light showers of rain fell only in the taluks of Mysore, Periyapatna, Yedatore and Talkad, the quantity gauged at the head-quarters thereof varying from 12 to 39 cents. The standing crops on dry lands are withering, in some parts, for want of rain. Public health was indifferent, as cholera, fever, small-pox and dysentery were prevalent.

Hassan District.—Markets continue fairly supplied. Prices fluctuating. Light showers of rain fell in some of the taluks, the quantity registered at the head-quarters thereof ranging from 3 to 85 cents. The dry crops are generally withering. The paddy crops in the Manjarabad taluk are in a tolerably good condition. Ragi and javari in the taluks of Hassan and Attikuppa were destroyed by insects. Fever, small-pox, dysentery and cholera are still prevalent in parts of the district. Cattle suffer from murrain and foot and mouth disease in the Manajarabad and Belur taluks.

Shimoga District.—Markets moderately supplied. Prices rising. Rain fell generally throughout the district, the quantity registered at the head-quarters of taluks ranged from 60 cents to 7·71 inches at Nagar. The standing crops such as sugarcane, paddy, &c., are thriving. Ragi and paddy were sown afresh in some parts of the Sorab taluk. Cholera and fever still prevail in some parts, as also murrain in the Nagar taluk.

Kadur District.—Markets moderately supplied. Ragi and gram were not procurable in the Lakvalli taluk. Prices pretty steady. Rain fell throughout the district. The quantity registered at the head-quarters of taluks varied from 16 cents to 4·60 inches at Koppa. The paddy, sugarcane and other crops are generally doing well. In the "Maidan" parts of the Chikmagalur taluk they are reported to be withering. Ragi and javari were sown in the Tarikere taluk during the week. Fever, dysentery and small-pox are prevalent.

Chitaldroog District.—Markets continue fairly supplied, except in the Davangere and Budihal taluks, where the importation was slack for want of carriage. Prices fluctuating. There was no rain in the District during the week except at the head-quarters of Kankuppa, where the quantity gauged was only 5 cents. The crops are withering in all the taluks except in some parts of the Chitaldroog, Davangere and Hiriyur taluks. The javari and ragi crops under wells are promising. The public health was indifferent owing to the prevalence of dysentery, fever and cholera.

General Remarks.

The district reports for the week ending 7th July shew no improvement in the position of affairs. There was little or no rain during the week except in the "Malnad" or districts adjoining the western ghats. The standing crops on dry lands, more especially those recently sown, are reported to be withering, and as the rains are still holding off, the situation is such as to excite grave anxiety. The rise in the prices of food-grains has tended to increase the distress among the poorer classes, and the low state of health to which they have been reduced, partly by destitution and partly by fever, dysentery and other diseases, which have prevailed from the commencement of the famine, has induced many, who would otherwise try to help themselves, to seek relief in our kitchens.

2. The number of deaths from cholera reported during the week was 173 as against 400 of the previous week.

3. The number of works in progress under Revenue officers was 2,090, or 520 less than in the previous week. There has been an apparent decrease in almost all the districts excepting Bangalore and Shimoga. The daily average number of persons employed on the works was 25,003, or 516 less than in the previous week. The decrease was chiefly in the Mysore and Chitaldroog districts.

4. The amount appropriated for expenditure on the above works was Rs. 15,68,662, of which Rs. 10,39,943 are reported to have been expended up to 7th July, leaving an unexpended balance of Rs. 5,28,719. The attention of the Commissioners of Divisions will be drawn to the large balances which remain unutilized in each district and to the very small expenditure incurred during the week, as shewn under :—

	Rs.
Bangalore District	4,787
Kolar ,, ...	3,580
Tumkur ,, ...	1,594
Mysore ,, ...	727
Hassan ,, ...	1,876
Shimoga ,, ...	2,007
Kadur ,, ...	910
Chitaldroog ,, ...	3,099
	18,580
Bangalore Municipality	992
Total Expenditure ...	19,572

Taking into consideration the amount shewn as expended and the average daily attendance on the works, it would appear that the average earnings of each cooli,* was about 12½ annas for 6 days, or two annas and one pie per diem exclusive of Sundays.

* Including women and children.

5. On works carried on under the officers of Public Works Department, the daily average number of persons employed was 22,288, or 1,987 less than in the previous week. This decrease has, to a great extent, arisen from the fact of the repairs on the irrigation channels having been concluded and water let into them from the Cauvery for purposes of irrigation. The decrease, as in the case of relief works, is noticeable in Mysore and Chitaldroog and also in the Kadur district.

6. The daily average number of persons gratuitously relieved was 126,011, or 5,760 more than in the previous week. There has been an increase in the numbers in all the Districts excepting Kolar, Mysore, Shimoga and Kadur. This increase must be looked for, the south-west monsoon rains not having so far been favourable, while the distress of the already famine-stricken people has been aggravated by rapidly increasing prices of food-grains. The proportion of men, women and children was as shewn below :—

Men	27,635
Women	46,101
Children	52,275
Total ...	126,011

7. The total expenditure up to date on kitchens and camps was Rs. 7,63,514, and the expenditure of the week under review was Rs. 78,631, as shewn hereunder :—

	Rs.
Bangalore District	25,556
Kolar ,, ...	5,517
Túmkúr ,, ...	10,501
Mysore ,, ...	472
Hassan ,, ...	4,618
Shimoga ,, ...	540
Kadur ,, ...	664
Chitaldroog ,, ...	12,681
Bangalore Municipality	16,691
Mysore ,, ...	1,391
	78,631

The expenditure in the Mysore district is likely to increase owing to the establishment of additional relief kitchens at Seringapatam, Húnsúr and Periyapatna. The returns of Shimoga and Kadur districts include only five taluks of the former and five of the latter which are affected by the existing drought.

8. The weight of grain imported by rail during the week (including the consignments to the Kolar road station) was 5,541 tons, or 1,583 more than in the previous week as shewn below:—

	Tons.
From Madras	4,344
„ Beypore	129
„ Sholapur	49
„ Trichinopoly, Tanjore, and Negapatam	686
„ the neighbouring districts of Madras Presidency ...	333
Total ...	5,541

9. About 1,975 tons or 231 more than in the previous week, were exported by road from Bangalore to the interior of the Province and the frontier taluks of the Madras Presidency, as noted below:—

	Tons.
Towards the Túmkúr District	809
„ Bellary and Chitaldroog Districts	292
„ Mysore District	318
„ Oossoor in the Salem District	197
To the taluks adjoining Bangalore	359
Total ...	1,975

10. The prices of food-grains shewn in columns 29 and 30 of the return which accompanies this narrative are only averages struck upon the rates furnished for each taluk, but the maximum and minimum rates of each district are shewn under:—

	Maximum in lbs. per Rupee.		Minimum in lbs. per Rupee.	
	Rice, 1st sort.	Ragi.	Rice, 2nd sort.	Ragi.
Bangalore District ...	12	15½	10	13

INTERIM REPORT.

No favourable change in the season has to be reported. The rain still holds off, and the condition of the Province, from the threatened failure of crops and the rise in prices to a point never before known, is most critical.

Bangalore, 14th July 1877.

T. R. A. T.

Relief Report for the Kistna and Kurnool Districts for the week ending 23rd June 1877.

Proceedings of the Board of Revenue, Madras, dated 4th July 1877, No. 3134.

Read Relief Reports for the week ending 23rd June 1877, from the Collector of Kistna District, dated 26th June 1877, and from the Collector of Kurnool, dated 29th June 1877.

THE relief reports from the Kistna and Kurnool districts for the week ending 23rd June will be submitted for the information of Government in continuation of Board's Proceedings, dated 30th June 1877, No. 3100.

2. *Prices and Rainfall.*—In the Kistna district rice has risen at 2 stations and fallen at 3, cholum has risen at 3 and fallen at 2, ragi has risen at 3 and cumboo has risen and fallen at 2. The increase is general in the Vinukondah taluk; the quotation for cholum at Repalli in last week's return appears to have been a mistake, as there is a corresponding fall this week. No rain is reported. In Kurnool prices are rising generally except in Pattikonda, Koilkuntla and Sirwell, where they are stationary. There was a rise in the price of rice at 4 stations in that of cholum at 5 and of ragi at 3. Prices are highest at Ramalkota and Nandikotkur. Slight rain fell at Ramalkota and Nandial.

3. *Relief Works.*—The numbers in the Comamur Canal in the Kistna district rose from 1,754 to 2,625. This is the only work under execution in that district. The numbers in the several taluks of Kurnool are shewn below in comparison with those of the week before.

	16th June.	23rd June.	
Ramalkota ...	32,465	32,759	*a* 294
Nandikotkur ...	22,510	23,726	*a* 1,216
Nandial ...	30,164	31,544	*a* 1,380
Sirwell ...	21,606	21,340	— 266
Koilkuntla ...	26,434	24,930	— 1,504
Pattikonda ...	24,920	25,109	*a* 189
Cumbum ...	36,888	37,364	*a* 479
Markapur ...	9,999	8,877	— 1,122
Total ...	204,986	205,649	*a* 663

The net increase is only 663; the rise in numbers in Nandikotkur and Nundial is attributed to fresh admissions owing to greater pressure; the decrease in Koilkuntla is due to resumption of agricultural operations; as regards Markapur, the returns are said to be defective and explanation has been called for, the fluctuations elsewhere do not call for remark, the higher scale of wages has been introduced throughout the district except in parts of Nundial and Sirwell.

4. Particulars connected with works under execution by the Department Public Works are exhibited below:—

Taluks.	Number of works.	Outlay.		Number of coolies.
		In the week.	Up to the week.	
Ramalkota ..	20	9,131	1,32,829	14,688
Nandikotkur ..	5	12,297	78,765	15,321
Pattikonda ..	21	1,498	23,140	1,649
Koilkuntla ..	2	..	1,876	..
Nandial ..	3	20,955	2,33,251	30,384
Sirwell ..	7	13,390	3,51,969	21,340
Markapur ..	1	..	1,316	..
Total ..	59	57,271	8,23,146	83,382

Numbers have increased by 2,586 chiefly in Nandikotkur and Nandial.

5. *Gratuitous Relief.*—The numbers relieved at the Bapatla and Guntur relief houses were 157 and 222 respectively. A relief camp has been opened at Vinukonda since last return, the numbers there being 30, the total of those in receipt of village relief was 71. Six deaths occurred at the *Guntur Relief* house in the ratio of 1,647 per mille per annum. The details for Kurnool are as follows:—

	16th June.	23rd June.	
Ramalkota ..	11,711	12,656	*a* 945
Nandikotkur ..	4,706	4,173	— 533
Nandial ..	8,676	8,289	— 387
Sirwell ..	4,707	4,468	— 239
Koilkuntla ..	6,340	4,781	— 1,559
Pattikonda ..	5,935	6,437	*a* 502
Cumbum ..	12,434	15,556	*a* 3,122
Markapur ..	2,551	3,577	*a* 1,026
In Camps ..	6,945	9,079	*a* 2,134
In villages ..	4,740	5,075	*a* 335
3 pie Children ..	45,375	45,783	*a* 408
Total ..	57,060	59,937	*a* 2,877

There was a net increase of 2,877 in receipt of gratuitous relief. The accession of numbers was chiefly in Cumbum, Markapur and Ramalkota. The deaths numbered 130 of which more than half occurred in the Ramalkota taluk, this result, being attributed to the emaciated condition of the people prior to admission. The mortality amongst 3 pie children was confined to the Ramalkota and Pattikonda taluks, the numbers of deaths being 14 and 17 respectively. The mortality in camps and villages was 67 and 32 or in the proportions of 436 and 340 per mille per annum. The outlay on gratuitous relief has aggregated Rs.20,94,474.

C. A. GALTON,
Acting Secretary.

REVENUE BOARD OFFICE, MADRAS,
4th July 1877.

C. A. GALTON,
Acting Secretary.

Weekly Relief Report of the distressed districts of the Madras Presidency.

Proceedings of the Board of Revenue, Madras, No. 3154, dated 6th July 1877.

Maps for—

Chingleput.	Cuddapah.
North Arcot.	Bellary.
Madura.	Nellore.
Salem.	South Arcot.
Coimbatore.	

Statements.

No. 1. Prices.
" 2. Relief Report.
" 3. Talukwar Abstract of Relief.
" 4. Statistics of gratuitous relief.
" 5. Talukwar ditto.
" 6. Number and description of works.
" 7. Works under supervision of Public Works Department.
" 8. List of special establishment.
" 9. Memo. of sums sanctioned.

THE relief reports for the week ending 30th June will be submitted for the information of Government with the usual Statements and Maps as per margin.

2. *Prices.*—There is an upward tendency, but it is nowhere very marked. The district averages for rice shows a rise in all districts except Kistna, where the price has slightly fallen, and South Arcot where it is stationary. Cholum has risen in Kistna, Nellore, South Arcot, and Madura and fallen in Kurnool and Tinnevelly, elsewhere it is stationary. Ragi has risen in eight districts, fallen in two and is stationary elsewhere and the figures for Cumboo are 6, 3 and 3 respectively. In the *Kistna* district dry grains have risen but rice has fallen slightly. In Nellore prices of all grains have risen, the only marked change is in the quotations for ragi for Polur, Podili and Darsi. In *Cuddapah* rice has fallen considerably at Madanapally and there is a general and marked fall of prices at Proddatur. The quotations for rice in Cuddapah, Pulivendla, Jammalamadugu, Budwail, Sidhout, Royachoti and Kadri are much higher. In *Kurnool* the district average shows a fall in the price of dry grains. In *Bellary* prices have fallen slightly in the Harpanhalli taluk; the quotation for Cumboo in last week's return seems to have been an error for 4·70—there is also a fall in the price of Cholum in the Kudlaghi and Hadgalli taluks, where grain is very dear. Elsewhere than in Hospett and Tadpatri prices are stationary. Elsewhere the tendency is to rise. In *Chingleput* rice has risen in Saidapet and Trivellore and fallen at Conjeveram; ragi is dearer at Conjeveram and Trivellore. In *North Arcot* there was a sharp rise in the prices of rice and ragi in Kalastri and a considerable fall in the price of the former grain at Polur; elsewhere the changes are not important. In *South Arcot* prices are still rising in Trinomalai and Tindivanam and dry grains are much dearer in Kullakurchi. Prices are stationary in Trichinopoly. In *Madura* prices generally have risen in Dindigul; but there is a fall as regards ragi and cumboo in Palni: cholum has risen in Melur and Dindigul owing probably to the failure of the early cholum crop. In *Coimbatore* rice has gone up slightly in Erode, Dharapuram and Uddamalpettah; the quotation for cumboo for Dharapuram must be wrong. Elsewhere there is no change to speak of. In the *Salem* district there has been a sharp rise in the price of ragi and cumboo in the Salem taluk; rice is also dearer. In Tripatore the price of all grains has risen and in Krishnagherry cumboo alone remains stationary. In *Malabar* there is a slight rise in the price of rice in Calicut, Ernad and the Wynaad.

Districts.	Rice.		Dry grain.	
	Highest.	Lowest.	Highest.	Lowest.
Nellore	7·0	8·75	+8·75	14
Cuddapah	5·30	8·40	+6·75	9·75
Bellary	5·13	7·29	*4·89	7·73
Chingleput	7·55	8·75	+8·97	11·13
North Arcot	6·50	8·00	+7·10	10·90
South Arcot	7·00	8·78	+8 75	12·25
Trichinopoly	6·53	7·98	+9·17	13·10

Malabar	6·20	10·17	+9·0	13·17

* Ragi. † Cholum.

The marginal table shows the highest and lowest prices for rice and the dry grain most commonly quoted in each district.

3. *Rainfall.*—Rain has fallen in all districts except Trichnopoly, Madura and Salem, but it was everywhere very light averaging only a few cents. In *Nellore* it was confined to Rapur and Udayagiri; in *Cuddapah* there was a sprinkling in Proddatur, Voilpaud, Sidhout and Kadiri; in *Bellary* the Kudligi and Hospett taluks received about half an inch each, and there was a slight fall in Pennakondah; in the Conjeveram taluk of the *Chingleput* district there was a light shower and in *North Arcot* rain was registered only at Trittam and Chittore. In *South Arcot* nearly an inch fell at Virdachellum and in *Coimbatore* a good fall of an inch and a half was registered at Pollachy and light showers at Collegal and Coimbatore. In *Malabar* the average for the district was 6·03 inches. The rainfall was not so heavy or general as in the preceding week and the monsoon appears to be holding off.

4. *Grants and Outlay.*—The grants up to the 30th June aggregate Rs. 1,82,37,283 and the outlay, as reported was as follows:—

	In the week.	Up to the week.
	Rs.	Rs.
Relief works	5,89,543	1,59,18,257
Gratuitous relief	1,84,938	18,49,572
Total ...	7,74,481	1,77,67,829

The following is an abstract of the statement showing the numbers and description of works.

	In progress.		Completed.	
	Number.	Length in miles.	Number.	Length in miles.
Roads—				
New works	503	3,3?2	144	554.
Repairs	407	3,656	159	582
Total ...	910	7,038	303	1,136

Miscellaneous	3,759	...	2,874	...
Total ...	5,916	...	3,408	...

5. *Numbers on relief works.*—The numbers in each district are compared below with those for last week:—

Districts.	23rd June.	30th June.	
Kistna	2,625	3,768	+ 1,143
Nellore	29.873	18.757	−11,116
Cuddapah	107,770	120,053	+12,283
Bellary	281,899	296,869	+14,970
Kurnool	205,649	206,024	+ 375
Chingleput	31,533	30.570	− 963
North Arcot	52,057	52,008	− 49
South Arcot	160	63	− 97
Madura	6,070	7,086	+ 1,016
Coimbatore	27.828	28,713	+ 885
Salem	47,850	41,400	− 6,450
Total ...	793.314	805,311	+11,997
East Coast Canal	45,555	46.966	+ 1,411
Grand Total ...	838,869	852,277	+13,408

6. In the *Kistna District* there is again a considerable relative increase in numbers amounting to 43 per cent.; particulars have not yet been received.

In Nellore there is a large decrease amounting to 11,116 which is chiefly due to the omission of the labourers on works under the Department Public Works, 6,859 in number according to the last return, and to the non-receipt of returns from Rapur, in which taluk 1,179 coolies were at work in the preceding week. There is a considerable falling off in numbers in Udayagiri, nearly 4,000 and an increase of about 1,100 in the Venkatagiri division; the cause of these fluctuations has not been explained. On the East Coast Canal there was an accession of 1,411 coolies. In Cuddapah the increase is very considerable amounting to 12,283, and occurs especially in the taluks of Jammalamadugu, Budwail, Kadiri and Voilpaud; in the first two it is attributed to increased pressure of distress. No explanation has been afforded as regards the last two, but the cause is presumably the same. The taluk details for Bellary are marginally noted; the increase, 14,970, corresponds very nearly with the decrease reported last week, 14,155. This result is almost entirely due to a very large accession of numbers in Adoni, attributed to increased pressure and absence of rain in consequence of which agricultural operations are suspended and the labourers have come on relief works. The increase in Anantapur and Huvinhadgalli is not explained; in Tadpatri it is ascribed to the opening of a fresh work

	23rd June.	30th June.	
Jamalamadugu	20,293	23,469	+3,176
Pulivendla	14,230	14,109	− 121
Prodattur	4,313	4,733	+ 420
Cuddapah	5,116	4.563	− 553
Budwail	13,291	15,625	+2,334
Sidhout	955	698	− 257
Pullumpett	12,183	12.224	+ 41
Kadiri	4 295	6,552	+2,257
Royachoti	10,773	11,448	+ 675
Madanapulli	14,771	15.521	+ 750
Voilpaud	7,550	11,111	+3,561
Total ...	107,770	120,053	+12,283

	23rd June.	30th June.	
Adoni	69,753	83,521	+13,768
Alur	36,670	36,657	− 13
Gooty	13,951	14,691	+ 740
Tadpatri	18,670	20,211	+ 1,541
Anantapur	15,838	16,972	+ 1,134
Dharmaveram	9,724	10,510	+ 786
Pennakonda	2,518	1,885	− 633
Hindupur	1,620	1,607	− 13
Madaksira	6,606	5.898	− 708
Raidrug	18,657	14,693	− 3,964
Bellary	27,254	27,795	+ 541
Hospett	16,342	16,855	+ 513
Sundur	3,224	3,208	− 16
Kudligi	18,602	18.712	+ 110
Harpanhalli	9,243	8,579	− 664
Huvinhadgalli	13,227	15,075	+ 1,848
Total ...	2,81,899	2,96,869	+14,970

The decrease in Raidrug is due to the incompleteness of the returns; in Pennakonda to weeding and in Harpanhally to cultivation. The numbers on the Bellary Hubli Railway were stationary, *viz.*, 7,110, of which 4,097 belong to the Bellary taluk + 3,013 to Hospett.

7. In *Chingleput* a decrease of nearly 3,000 occurs in the Chingleput taluk, stated to be due to the completion of irrigation works: this is counterbalanced to some extent by increases in Madurantakum and Trivellore, due to a larger number of applicants for work. On the Conjeveram-Chingleput line the numbers rose from 12,601, as last reported a fortnight ago, to 24,966. In *North Arcot* numbers remain the same, the fluctuations in the several taluks are not important. In *Madura* the increase is in the Palny taluk, where a considerable decrease was noticed last week. The cause is not explained. In *Coimbatore* there is an increase in Sattiamungalum, Coimbatore and Dharmaveram, due to the opening of fresh works; the decrease in the other taluks is attributed to the completion of works. The falling-off in *Salem* appears in the Trichengode, Uttengarai, Oossoor, and Kristnagiri taluks. In the 1st, 3rd and 4th cases, the returns are incomplete in Trichengode, the decrease is due to the completion of works, and in Kristnagiri, although there is a decrease in the numbers according to the returns, an increase is accounted for by the return of labourers from agricultural employment.

8. The total number under the Department Public Works is 210,737, as per enclosed statement against 201,101 last week; this does not, however, include figures for Nellore and those for last week are repeated for Kurnool. There was a considerable increase in Bellary and Chingleput. Returns for the junction canal have not yet been furnished, but will, it is hoped, appear in next week's report.

9. The new scale of wages appears to be in force everywhere except in parts of Jammalamadugu and Pulivendla in the Cuddapah district.

10. *Gratuitous relief.*—The following are the district totals:—

	23rd June.	30th June.	Difference.
Kistna	480	1,145	+ 665
Nellore	28,901	27,980	— 921
Cuddapah	51,469	56,362	+ 4,893
Bellary	157,066	148,366	— 8,700
Kurnool	59,937	58,731	— 1,206
Chingleput	43,565	35 256	— 8,309
North Arcot	26,595	29,110	+ 2,515
South Arcot	8,239	10,606	+ 2,367
Trichinopoly	1,013	947	— 66
Madura	14,293	15,976	+ 1,683
Tinnevelly	898	1,041	+ 143
Coimbatore	34,073	39,798	+ 5,725
Salem	83,321	94,418	+ 11,097
Malabar	58	87	+ 29
	509,908	519,823	+ 9,915
In camps	179,162	183,105	+ 3,943
In villages	173,939	186,066	+ 12,127
3 pie children	156,180	149 507	— 6,673
* Kistna	480	1,145	+ 665
* Coimbatore	147	...	— 147

* Particulars not given.

11. The increase in the numbers in receipt of gratuitous relief do not show any considerable increase this week, the enhancement of numbers is chiefly under village relief; under 3 pie children there is a marked falling off, occurring chiefly in Cuddapah, Kurnool, North Arcot and Coimbatore. The decrease in the first named district is due to the omission of Voilpaud from this week's returns; the number in that taluk for the last week was 6.161 and but for the omission the figures for the week under report would show an increase in that district. For Kurnool, details are not yet available. In North Arcot, the returns from Wandewash are eventually incorrect, the figures for last being 4,085, whereas in the week under report only 69 children are entered in the statement; the Collector will explain the matter. Omitting Wandewash, the returns for North Arcot exhibit an increase in Coimbatore, the numbers in Caroor fell from 1,170 to 69 and the returns are probably defective. In *Cuddapah* there is a slight increase in the numbers in camps and a considerable accession to the numbers relieved in villages especially in the Budwail taluk explained as due to the old and feeble being sent back to their villages. In Bellary the large falling off occurs entirely in village relief and is especially marked in the Adoni taluk and to a smaller extent in Dharmaveram, Pennakondah, Hindupur and Hospett. In Raidrug there is a marked increase. The cause of these fluctuations is not explained. In Kurnool there is an increase in camps and a decrease in village relief. In *Chingleput* the large decrease is mainly due to the incorrectness of the Conjeveram returns, the number in camps in that taluk having fallen from 15,685 to 3,461. The Collector will explain the matter and see that trustworthy statistics are furnished hereafter. In *North Arcot* the numbers have risen both in the camps and under village relief, but chiefly under the latter. In *South Arcot*, the increase is under village relief, and in *Madura* in camps, numbers having risen in all taluks, but especially in Madura. In *Coimbatore* the increase is entirely in camps, in which there has been an accession of numbers in every taluk, but principally in Erode, Palladum and Udumalpettah. In Salem there is again a very large increase under the head of village relief, and to a minor degree in camps. The extension of village relief occurs

chiefly in Utengiri and Dharampuri, the numbers having risen by nearly 6,000 in the latter taluk.

12. The following statement shows the rates of reported mortality in camps and villages. The average under both heads has decreased, and there is again an improvement in Cuddapah, North Arcot and Salem. In Madura, however, the ratio has increased. There were 44 deaths among 3 pie children of which 33 occurred in Kurnool and 11 in Salem.

	Camps and relief houses.			Village relief.

Salem	18,229	142,277
Total ...	23,756	184,143

15. The usual statement of establishments is enclosed. The cost is Rs. 1,30,168.

16. The average strength of resident paupers in Madras camps according to the report of the Commissioner of Police was 9,571, and of non-residents 13,185. The fresh admissions was 2,814, the strength in hospital on 30th June was 657, and deaths numbered 141 of which 131 took place in hospital, or 768 per mille per annum, of the 10,270 paupers who were resident on 30th June, 4,124 were from Chingleput, 2,846 from North Arcot, 3,097 from Nellore, and 203 from other districts. The outlay during the week was Rs. 26,538 and up to the end of the week Rs. 6,63,849. The President of the Municipality had 2,719 paupers at the Sattangad relief camp and 2,186 on works on the 30th June. The expenditure for the week was Rs. 1,503 and up to the week Rs. 50,877.

C. A. GALTON,
Acting Secretary.

† All the labourers upon the Dhond-Manmad Railway have been included under Ahmednagar.
‡ Corrected figures given.
§ Numbers not received; last week's figures given.
‖ For details and dates see table appended.

H

Favourable rain has fallen in Khandesh and Nasik, and the prospects there are at present satisfactory. No rain has fallen in Ahmednagar, and in Poona and Satara it has been confined to the western districts. There have been partial showers in Sholapur (very favourable in the Sangola taluka) and Kaladgi, and in Belgaum and Dharwar the rainfall has been partial. In the former Collectorate, however, good rain has fallen in the Athni, and in the latter in the Ron taluka, both eastern districts regarding which anxiety was felt. More rain is generally much required throughout the country west of the ghauts and south of Nasik, particularly in the eastern belt. In this belt, however, three talukas, *viz.*, Sangola, Athni, and Ron have had favourable showers during the week.

2. Grain has again risen in price, and jowari now averages only 16 lbs. for a rupee throughout the famine area. It is very dear in Kaladgi, Belgaum and Dharwar.

3. The number of people upon relief works in the nine affected districts is 272,553 against 280,160 last week, and there are also 785 hill-men and immigrants employed in Ratnagiri and Kanara.

Since the change of mail days, the Kaladgi returns of labourers for the week under review have not been available for the telegraphic portion of the summary, and the correct variations in the numbers cannot, therefore, be exhibited in the table on the first page.

4. Cholera is slightly on the decrease, and it is hoped that the disease is gradually dying out of the famine districts.

5. A table is appended contrasting the rainfall of the past season in each taluka of the famine area with the fall which has been reported during the current season.

The rainfall of the current season has been divided, so far as information is at present available, into that prior to the 19th of June, and that of and after the 19th.

The monsoon commenced above ghauts on the 19th June, and the division will fairly show the monsoon rainfall in each taluka. The monsoon rain is that which is most useful for cultivation.

6. The following table gives the expenditure by Government, during the week ending 30th June, upon charity in the relief of the aged and infirm poor; and in payments made to the young children of labourers employed upon relief works. Comparing the results shown in the table below with those shown in the last summary, it will be seen that the number of persons in receipt of Government charitable relief has decreased from 66,599 to 66,403, while the number of children under 7 years of age has decreased from 1,02,883 to 93,693.

The number of children varies with the number of labourers, and during the week ending 30th of June (the latest for which complete returns are available) the number of labourers had decreased to 2,95,325. The number of people charitably relieved was 22·45 per cent. of the number of labourers upon relief works during the corresponding week. This percentage has a tendency to rise when the number on works decreases as it has done in a much greater ratio than the number receiving charity.

Districts.	Collector's discretionary grant.			Expenditure incurred under the authority of Government Resolution No. 312 C. W.—1116 of 26th December 1876, on account of children under 7 years of age whose parents are upon relief works.		
	Average number of persons relieved during the week.	Expenditure during the week.	Total expenditure up to date.	Average number of children, and of women taking care of them.	Expenditure during the week.	Total expenditure up to date.

* No expenditure has been incurred by the Collector.

† Collectors' returns not received.

7. The following table gives the distribution of the people among the relief works in the nine affected districts employing 1,000 labourers, or more, during the week ending 7th July. It will be seen that 2,29,092, or more than four-fifths, of the labourers were concentrated upon the works enumerated:—

Districts.	Works.	Number of labourers.	Total.	REMARKS.

	GRAND TOTAL ...	...	229,092	

8. Tables (A) and (B) are appended as usual. It will be seen that, during the week ending 7th June, the number of people upon Civil Works in the nine affected districts was 23,651, the number upon works under Public Works Department agency being 253,126.

The proportion of people upon the former continues, therefore, about ten per cent. of the total. It is to be noted that the figures given in these tables are taken from the progress returns of the works, and are brought up to the week ending 7th July, while the figures in the table prefixed to this summary are taken from the Collectors' telegrams, and refer to the week ending 14th July. It will be seen that the decrease in the number of people on relief works during the four weeks subsequent to 9th June has amounted to 1,26,014.

9. Maps are not sent with this summary.

10. A table is appended, showing the condition of the affected Native States.

11. With regard to the movements of food-grains, 509 tons were exported, chiefly by steamer, from Bombay to the Southern Mahratta ports during the week ending 14th July, and during the same period 5,535 tons were carried by the Great Indian Peninsula Railway to stations upon the Poona-Sholapur and Nasik-Bhusawal lines. The table below shows the quantities of grain sent by sea and rail from October till the 14th July to the Southern Mahratta ports and the Railway stations in the distressed districts. It will be seen that the total amount delivered up to the 14th July was 336,206 tons:—

Food-grains sent to	In October, November and December 1876.	In January and February 1877.	In March 1877.	In April 1877.	In May 1877.	In June 1877.	(In July up to 14th.)	Total.
	Tons.	Tons.	Tons.	Tons.	Tons.	Tons.	Tons.	Tons.
Southern Mahratta ports ...	44,215	29,534	16,798	21,399	28,657	4,491	776	145,870

TOTAL ...	124,239	61,719	33,792	36,601	42,472	26,853	10,530	336,206

12. The rainfall has again been irregular and insufficient in the southern and eastern districts, but in the northern Collectorates of Násik and Khandesh it has been good; there has also been a satisfactory fall in Guzerat, in respect to which part of the Presidency some anxiety has recently been felt. It may, therefore be said that, except in the northern Collectorates, the break in the monsoon still continues, and except over limited areas where partial, and in some places heavy, showers have fallen, the young crops are suffering, and will be lost should sufficient and general rain be much longer withheld. Even in the Konkan Districts along the sea board the rain has been abnormally scanty, and the cultivation of rice and hill crops is suffering.

The food supplies are still sufficient, but prices have slightly risen. They would, in all probability, have risen still more, had it not been for the movement noticed in the last summary of extensive importation by human labour. In the eastern and southern districts large numbers of people are now employed in transporting grain by head-loads, and in some parts, particularly in Dharwar and Belgaum, men are employed in dragging cart-loads of grain from the principal markets to the points of distribution. This movement is good as giving employment to considerable numbers of persons who require it, and as tending to keep down the rise in prices of food, which would otherwise be more rapid than it is. It also indicates that the people are unwilling to withdraw from agriculture the cattle that are still available.

There has been an appreciable amount of grain imported on the coast at the Port of Karwar, and the movement of grain by railway to the affected districts has been large; it amounted to 5,535 tons or 1,316 tons more than last week.

Notwithstanding the adverse circumstances which have been brought about by the long continued break in the monsoon in parts of the affected areas, the numbers on relief works have again perceptibly fallen off, the net decrease being 7,915. There has also been a decrease of 196 persons receiving charitable relief, and a decrease of 9,190 in the number of young children.

It is to be expected that, should a good and general rainfall speedily occur, the number on all descriptions of relief will rapidly fall off.

Cholera is less and seems to be disappearing.

M. K. KENNEDY, Major-General, R. E.,
Secretary to Government.

NOTE.—The totals are not invariably the sum of the men, women and children, as in a few returns these particulars have not been given, the total number of labourers alone having been entered. These figures are for the nine distressed districts only. The people upon relief works in Ratnagiri and Kanara are shown in Table A.

Table contrasting the rainfall as yet reported during the current season (i. e., *from 1st January 1877*) *with the rainfall of the past season.*

(According to the Collectors' Weekly written Reports).

Telegraphic returns of more recent rain have been received, but cannot yet be properly collated.

The monsoon set in on the 19th June above Ghauts.

The figures for Sholapur and Belgaum are the same as last week, no later written reports not being available.

. The figures for Khandesh, Sholapur, Kaladgi, Belgaum and Dharwar represent the total rainfall from 1st January 1877, more detailed information not being at present available.

This is chiefly eastern rain.

K

Weekly relief report of the Kistna and Kurnool districts for the week ending 30th June 1877.

Proceedings of the Board of Revenue, Madras, No. 3246, *dated* 11*th July* 1877.

Read relief reports for the week ending 30th June 1877 from the Collector of Kistna district, dated 3rd July 1877, and from the Collector of Kurnool, dated 7th July 1877.

The relief reports from the Kistna and Kurnool districts for the week ending 30th June will be submitted for the information of Government, in continuation of Board's Proceedings, dated 6th July, No. 3154.

2. *Prices and Rainfall.*—In the *Kistna* district there is a fall in the price of rice at two stations and a rise at one—dry grains are dearer, there being a rise as regards cholum and ragi at four stations; and as respects cumbu, at three. All grains have gone up in Sattenapalli, and all dry grains in Guntoor and Narsarowpett. The quotation for cholum at Bunder must be wrong, it is presumed. Rain fell at seven stations, the average, however, being only 0·21 inches. In the *Kurnool* district there is a general fall in prices at Nandikotkur; rice, cholum and cumbu have risen at Pattikonda and rice alone at Koilkuntla and Nandial. The quotation for cumbu at Markapur is apparently erroneous. Rain was registered at three stations, but the fall was very light.

3. *Relief Works.*—Numbers on the Commamur canal have risen considerably, the total for this week being 3,768 against 2,625 in the preceding week, indicating greater pressure. The Collector appears alive to the necessity for watchfulness. Details for the several taluks of Kurnool are given below :—

	23rd June.	30th June.	
Ramalkota	32,759	33,757	+ 998
Nandikotkur	23,726	24,092	+ 366
Nandial	31,544	30,072	−1,472
Sirwell	21,340	21,609	+ 269
Koilkuntla	24,930	25,994	+1,064
Pattikonda	25,109	24,349	− 760
Cumbum	37,364	38,068	+ 704
Markapur	8,877	8,083	− 794
Total ...	205,649	206,024	+ 375

The decrease in Nandial is explained to be due to the omission to enter coolies under transfer from one road to another, that at Pattikonda is not explained and the falling off in Markapur is owing to transfers to gratuitous relief. The increase in Ramalkota is due to greater pressure, and in Koilkuntla to the return of coolies from agricultural employment. The higher scale of wages is in force everywhere in parts of Sirwell, the reason for the existence of two scales there should be explained.

4. Particulars connected with works under the Department Public Works are noted below :—

	Number of works.	Outlay.		Number of coolies.
		In the week.	To the end of the week.	
		Rs.	Rs.	
Ramalkota	18	9,290	1,42,119	16,233
Nandikotkur	4	9,689	88,454	12,664
Pattikonda	21	1,222	24,362	1,730
Koilkuntla	2	...	1,876	...
Nandial	4	21,078	2,61,426	28,878
Sirwell	7	13,431	3,65,400	21,609
Markapur	1	...	1,316	...
Total ...	57	54,710	8,84,953	81,114

Numbers have decreased by 2,268.

5. *Gratuitous Relief.*—There are four relief centres and the number relieved has risen from 409 to 526; there were seven deaths at the Guntur relief house; the village relief system has been extended to Vinukonda and 597 persons have been assisted in that taluk, whereas the statement for the previous week was blank. The total number relieved in this manner was 619 against 71 in the preceding week. The details for Kurnool are as follows:—

	23rd June.	30th June.	
Ramalkota	12,656	12,702	+ 46
Nandikotkur	4,173	4,314	+ 141
Nandial	8,289	8,034	− 255
Sirwell	4,468	3,862	− 606
Koilkuntla	4,781	6,548	+ 1,767
Pattikonda	6,437	6,075	− 362
Cumbum	15,556	13,744	− 1,812
Markapur	3,577	3,452	− 125
Total ...	59,937	58,731	− 1,206
In camps	9,079	10,366	+ 1,287
In villages	5,075	4,421	− 654
3 pie children	45,783	43,944	− 1,839

There is a net decrease of 1,206, the result of an increase of 1,287 in camps and a decrease of 654 and 1,839 in villages and 3 pie children respectively. The increase in camps occurs chiefly in Ramalkota, and the decrease in 3 pie children is general but is especially marked in Cumbum. No explanation is afforded. The excessive mortality in the Ramalkota taluk continues, the deaths in that taluk being nearly two-thirds of the whole, *viz.*, 105 out of 169. The deaths among 3 pie children were 33, of which 20 are set down to Ramalkota. The mortality in camps and villages was 92 and 44 respectively, or in the ratio of 493 and 483 per mille per annum. The outlay on gratuitous relief was Rs. 16,252 in the week, and Rs. 2,25,726 from the commencement.

C. A. GALTON,

Acting Secretary.

Statement showing the statistics of gratuitous relief in certain districts of the Madras Presidency for the week ending 30th June 1877.

Districts.	Taluks.	In camps and relief houses. — Number of relief centres.	In camps — Numbers relieved on the last day of the week. — Men.	Women.	Children.	Total.	In camps — Expenditure in the week. REVENUE BOARD OFFICE,
MADRAS;
The 11*th July* 1877.

C. A. GALTON,
Acting Secretary.

Dated Calcutta, 14th July 1877.

From—H. W. I. Wood, Esq., *Secretary to Bengal Chamber of Commerce,*

To—The Honourable T. C. Hope, C.S.I., *Additional Secretary to the Govt. of India.*

The Committee of the Chamber of Commerce desire me to convey their respectful acknowledgment of the reply which His Excellency the Governor General in Council was pleased to transmit by telegraph on the 6th instant to their representation of 29th of last month, and to state that the full information therein communicated will serve in a very great measure to guide the operations of merchants who may be interested in supplying the wants of the famine districts of Madras.

The Committee also desire me to thank you for your letter No. 585 of 7th instant. They are quite sensible of the difficulties in the way of officers in those districts and would not desire to burden them with superadded laborious service; and probably the enterprise and industry of merchants will enable them to ascertain for themselves the information which the district officers would, no doubt, have cheerfully obtained had their present duties been less pressing.

The Committee further desire me to say that, with the view to the largest publicity being given to the reply with which they have been honoured, they have requested the daily papers to publish the correspondence.

Telegram dated 7th July 1877.

From—Rangoon,
From—Chief Commissioner.

To—Simla,
To—Revenue Additional Secretary.

Your telegram 6th: will make enquiries; present prices in Rangoon one hundred and thirty for hundred baskets; ordinary price at this time about eighty; doubt existence of any more rice available for export.

Telegram dated 21st July 1877.

From—Nagpur,
From—Chief Commr., Central Provinces,

To—Simla,
To—Revenue Additional Secretary.

Seventy thousand tons food-grain stored outside railway stations, Central Provinces, waiting despatch famine districts. Twenty thousand tons more in bazaars near; should the present season be favourable and prices ruling high in the famine districts after rains, one hundred thirty thousand tons more will be available for exports during open season by private trade.

Telegram dated 21st July 1877.

From—Guneshkhind,
From—Governor, Bombay,

To—Simla,
To—Sir A. Arbuthnot.

In order to show what help we can give Madras I have to-day sent following message to the Governor: Message begins.—"Your Grace's two telegrams of eighteenth regarding grain stocks and railway transport. Following quantities ascertained to be awaiting transport by rail to distressed districts, Bombay and Madras Presidencies: Great Indian Peninsula Railway ninety-six thousand tons, in Bombay twenty-five thousand tons, total one hundred twenty-one thousand tons. Besides above there are five hundred tons being received daily Jubbulpore from East Indian Railway, two hundred tons daily from Bombay and Baroda Railway, total seven hundred tons. These our resources are considerable. Every reason to believe that large additional quantities would appear if wanted. Great Indian Peninsula Railway can deliver one thousand two hundred tons daily

at Raichore for Madras Presidency, of which eight hundred tons by through booking to Madras stations and four hundred tons local booking to Raichore, all which would apparently be of help to Madras famine. We will gladly arrange accordingly if Madras Railway can carry this amount away. Our only fear is this: Deccan prices dearer than those of Madras, therefore tendency of merchants to book for Deccan, but if prices rise fully in Madras supplies will certainly be sent in." Message ends.

Telegram dated 26th July 1877.

From—Poona,	*To—Simla,*
From—General Kennedy,	*To—Revenue Additional Secretary.*

GOVERNOR's telegram 21st calculated 80,000 tons waiting despatch outside railway stations, Central Provinces, and 16,000 tons on railway in charge Company; total 96,000 tons; 80,000 includes 70,000 reported by Chief Commissioner.

Telegram dated 26th July 1877.

From—Guneshkhind,	*To—Simla,*
From—Governor Bombay,	*To—Sir A. Arbuthnot.*

REFERRING to my telegram of twenty-first to you reporting our offer to carry twelve hundred tons grains daily to Raichore, Madras Government report they cannot carry more than nine hundred tons daily. We have promised to deliver that quantity barring accidents, and provided that merchants book fully. We have also promised the Resident, Hyderabad, that three hundred tons daily shall be delivered at Shahabad terminus of Hyderabad Railway, subject to same conditions.

Telegram dated 25th July 1877.

From—Calcutta,	*To—Simla,*
From—Bengal Government,	*To—Revenue Additional Secretary.*

ESTIMATED stock of rice in Calcutta just now fifty lakhs of maunds.

Telegram dated 26th July 1877.

From—Naini Tal,	*To—Simla,*
From—N. W. P. Government,	*To—Revenue Additional Secretary.*

ESTIMATED sixty-one lakhs sixty thousand maunds food-grain available for export by private trade from North-West Provinces and Oudh if abundant rain fall soon, and good *kharif* be produced; estimate is only conjectured, stocks are low, prices rising as absence of rain is causing alarm. Details by post.

T. C. HOPE,

Addl. Secy. to the Govt. of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE, AGRICULTURE AND COMMERCE.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING THE 26TH JULY 1877.

GENERAL REMARKS.—The rainfall during the week has been scanty everywhere except in Bengal, Burma, Assam, and parts of the Central Provinces and Rajputana; elsewhere anxiety is generally felt, and in many parts great damage has been already done to the crops. In Madras the fall has been insufficient on the Malabar Coast; in Godavery and parts of Kistna there have been good but partial falls; from Vizagapatam, Cuddapah, Kurnool, North and South Arcot, Tanjore, Trichinopoly, Madura, Tinnevelly, Coimbatore and Chingleput only trifling showers are reported: in Nellore, Bellary and Salem there has been no rain; general prospects are very gloomy, and failure of the dry crop in most districts is anticipated. The numbers on relief works are 913,442, and on gratuitous relief 731,267, being respectively 19,764 and 108,150 more than last week. In Mysore showers have fallen, and there has been good rain in Coorg; but the weather continues uncertain; the numbers on works are 47,609 and on charitable relief 137,560, being respectively 318 and 11,549 more than last week. In Bombay the fall has been scanty and partial throughout the Deccan, Khandesh and Násik, the Southern Mahratta Country, and Guzerat; in the Konkan also it has been insufficient: more is urgently required in all the districts where scarcity prevails and in Guzerat; in Sind the river is comparatively low, but rising. In the Central Provinces good rain has fallen in Betúl, Bhandára and Mandla, and showers in Bálághát, Chánda, Nágpur, Wardha, Nimár and Seoni; rain is generally required, but the condition of the crops is as yet good. In Berar only a little rain has fallen, and more is urgently required. In Central India rain is reported only from Sutna: prospects are good. In Rajputana rain has fallen in Meywar, Jhallawur, Marwar and Bhurtpore; elsewhere none is reported and sowings are retarded. In Bengal the fall has been generally good and copious; more rain is however required in most of the Behar districts and parts of Chota Nagpore, as well as in a few of the Delta districts. The report from the North-Western Provinces and Oudh has not been received; but according to the latest accounts no sufficient rain has fallen, and west winds continue. In the Punjab only trifling showers have fallen at Jullundur and Ráwalpindi, and rain is generally needed. In Assam and Burma there has been copious rain and prospects are good.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Madras—		
Ganjam (July 24th)	*Nil*	Prices risen, rice 11 seers, *raggi* 17, *cholum* 17, *cumboo* 22; imports of Chilka land rice 353 tons.
Vizagapatam(" ")	·4 in 3 taluks.	Average prices in seers of 80 tolas per rupee, rice second sort 9, *cholum* 14, *cumboo* 14, *raggi* 14; imports by land, rice 7 tons; pasture plentiful.
Godavery (" ")	Rain good but partial.	Average prices per rupee for seer of 80 tolas, rice 9, *cholum* 13, *raggi* 13½, *cumboo* 17; pasture scanty; want of water felt in some places of upland taluks.
Kistna (" ")	1·40 in Masulipatam; ·20 in Bezwada; *nil* elsewhere.	Two feet water over anicut; standing crops withering from excessive heat; those already withered cut and used as fodder; prices everywhere rising; at Masulipatam they fell slightly after rainfall; seers of 80 rupees weight, rice 7·52, *cholum* 8·53, *raggi* 9·01, *cumboo* 7·95; imports 195 tons; number on relief works 3,358; number gratuitously relieved 2,059.
Nellore (" ")	*Nil*	Average prices second sort rice 6·51, *cholum* 8·36, *raggi* 9·15, *cumboo* 8·50; imports by sea none, by land 30 tons into the town of Nellore; number on relief works 65,039; number fed gratuitously 29,098; rain urgently needed all over the district; standing crops withered or withering; pasturage getting scanty.
Cuddapah (" ")	·2 (average of 2 taluks).	Average prices seers per rupee, second sort rice 5·55, *cholum* 6·68, *raggi* 7·22, *cumboo* 6·96; people on relief works 148,840; fed gratuitously 101,425.
Bellary (" ")	*Nil*	Average price second sort rice 5·53, *cholum* 6 01, *raggi* 6·47, *cumboo* 6·5, seers of 80 tolas; imports, tons 5,328, accounts from 2 railway stations only; 308,052 on relief works; 158,345 gratuitously fed; supply of drinking water generally sufficient.
Kurnool (" ")	*Nil* except ·07 in Ramalkota.	Season unfavourable; water in Kurnool town abundant; average price second sort rice 5·36 imperial seers per rupee, *cholum* 6·56, *raggi* 7·21, *cumboo* 7·59; prices generally risen; grain in markets sufficient for present wants; coolies on relief works 210,602; gratuitously relieved 67,951; physique of coolies fair.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Madras—*concluded.*		
North Arcot (July 24th)	·15 (average of 2 stations.)	Average prices in Government seers second sort rice per rupee 6·0, *cholum* 7·2, *raggi* 7·0, *cumboo* 6·7, wheat 5·1; increase in prices owing to decreased importations; relief works' coolies 57,301; persons gratuitously fed 64,192; pasture insufficient.
South Arcot („ „)	Slight showers in Kallacoorchy.	Rice second sort $6\frac{1}{8}$ seers, *cholum* 7, *raggi* $7\frac{1}{4}$, *cumboo* $7\frac{1}{2}$, all dearer than last week; imports by sea 42 tons, rice by rail not known; none employed; fed gratuitously 18,886; pasture inadequate; *cumboo* crops either perished altogether or withering away, except patches under wells; early sown *cumboo* harvested here and there; outturn miserable.
Tanjore („ „)	Slight rain in different places of Tanjore, Combaconum, Mayaveram and Manargudy taluks.	Prices, seers, rice $6\frac{11}{16}$, *raggi* $8\frac{3}{4}$, *cumboo* $9\frac{1}{2}$, *cholum* $8\frac{5}{8}$; imports by sea 27·28 tons; rivers nearly half full.
Trichinopoly („ „)	·27 (average.)	Second sort rice $5\frac{4}{5}$, *cholum* $16\frac{4}{5}$, *raggi* $8\frac{1}{12}$, *cumboo* $7\frac{4}{5}$; imports of grain 560 tons; number on minor relief works 96; number fed gratuitously 3,247; pasture becoming scanty; prices rising.
Madura („ „)	Slight rain fell at Tirumangalum.	Second sort rice $6\frac{1}{5}$, *cholum* $7\frac{7}{10}$, *raggi* $8\frac{1}{2}$, *cumboo* $8\frac{3}{10}$; imports 1,519 tons; number on relief works 17,796; number gratuitously fed 28,218.
Tinnevelly („ „)	Slight rain in Tenkari taluk.	No freshes; standing crops generally good; drinking water wanted in dry villages; pasture insufficient in some places; prices continue to rise; average prices per rupee second sort rice 7 seers of 80 tolas, *cholum* 9, *cumboo* $9\frac{3}{4}$ and *raggi* 10; imports of grain 237 tons; number on relief works none; number gratuitously fed 1,827.
Coimbatore („ „)	Very slight rain, ·02 average.	Prices continue high with slight fluctuations; rice second sort 5·83, *cholum* 6·75, *raggi* 7·26, *cumboo* 7·88; imports estimated 1,923 tons; cultivation a little under wet, none under dry; standing crops fading; water supply available under principal irrigation works, becoming low in tanks and wells; on relief works 31,217; gratuitously relieved 73,568.
Nilgiris („ „)	Slight rain in Coonoor and Kotagiri.	Average prices in four stations, Gooty, Coonoor, Katagiri and Gudalur, rice $5\frac{3}{5}$ seers per rupee, *cholum* in three stations $6\frac{1}{10}$, *raggi* $6\frac{1}{10}$, *cumboo* in Ooty and Coonoor only 7; high prices due to deficient stock and impediment to transport; imports 86 tons; gratuitously fed 187.
Salem* („ „)	*Nil*	Prices of grains seers of 80 tolas, rice $5\frac{3}{8}$, *raggi* $6\frac{1}{4}$, *cumboo* $5\frac{13}{16}$, *cholum* $6\frac{3}{8}$; import of grains 700 tons; number on relief works 41,700; number gratuitously fed 105,500.
South Canara („ „)	3·08 (average.)	Prices rice 9·15 seers per rupee, *raggi* 10·97; no imports.
Malabar („ „)	2·29 (average of all taluks.)	Rain insufficient for existing cultivation which in many places is getting injured; markets well supplied; imports 579 tons; prices of rice rising everywhere except in Wynaad, Palghat and Cochin where stationary; highest $6\frac{1}{5}$ Indian seers in Wynaad, lowest 9 Indian seers in Cherakal, average $7\frac{7}{10}$ Indian seers per rupee; *raggi* 9 Indian seers per rupee in Wynaad, average elsewhere $11\frac{3}{8}$; 971 coolies employed on Kolathur roads; gratuitous relief afforded to 94 persons in Wynaad.
Chingleput („ „)	Slight rain in Trivellore, Ponany and Conjeveram.	Prices rice second sort 6·71, *raggi* 7·90, *cholum* 7·82; imports 176 tons; great distress reported among the people consequent on dearness of grain; water drying up; on relief works 28,473; gratuitously relieved 49,150.
Madras („ „)	0·01	Prices in seers of 80 tolas per rupee, rice second sort 5·84, *raggi* 7·31, *cholum* 7·7; imports 12,569 tons; number fed gratuitously in the city of Madras 27,520.
		General Remarks.—General prospects continue most gloomy; general failure of dry crop harvest owing to failure of south-west monsoon rains may be anticipated; numbers on State relief increasing enormously, thus involving heavy increased expenditure; total number fed gratuitously 731,267; total number on relief works 913,442; exports of grain from Madras by rail during the week ending the 21st instant $10,260\frac{1}{4}$ tons.
Bombay— (July 26th)		
Sind— („ 25th) Kurrachee ...	*Nil*	River on 23rd 13 feet 10 inches, on corresponding date last year $16\frac{1}{2}$ feet; fever prevalent; 2 cases of small-pox in Kurrachee; cotton crops fair.
Shikárpur ...	...	River 13 feet 1 inch against 15 feet 1 inch last year; *kharif* prospects improving; floods commenced; Jhalli and Ghotki bunds breached; cattle disease in Shikárpur taluka; measles in Lárkána taluka.
Hyderabad ...	...	River rising but 2 feet 4 inches lower than on same date last year, and 8 inches lower than average of last 10 years; locusts in Sakrand, no damage done to crops.

* On page 1996 of the Supplement to the *Gazette of India*, dated the 21st instant, opposite Salem the total number of persons gratuitously fed should be 103,800.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bombay—*concluded.*		
Upper Sind Frontier ...	*Nil*	Maximum temperature 111·1°, minimum 85·1°; crops in Katchi are suffering from want of rain; water-supply desert Begari canals fair; complaints general of scanty supply in Mirzabad and Sonewah.
Guzerat— (July 25th)		
Ahmedabad ...	*Nil*	
Kaira ...	·03	Last week's rainfall genera ; total fall since 1st June 10·98, for corresponding period last year 11·67; more rain required for rice and *bowta* lately transplanted, other crops well; health good.
Surat ...	*Nil*	Occasional falls of rain in some talukas, general complaint of its want everywhere; 81 cases of cholera in Surat, Bulsar and Pardi, 37 fatal.
Broach ...	·04	Total rainfall 6·44, generally wanted throughout district; cholera in Broach and Ankleswar; crops withering; prospects gloomy.
Khandesh and Násik— (July 25th)		
Khandesh ...	Slight showers of rain in most talukas; *nil* at Dhulia.	Much seed lost; crops withering; western talukas better than others; rain badly wanted throughout district; 38 deaths from cholera.
Násik ...	10·0 in Igatpuri; about half inch in Desh taluka.	More rain wanted for rice and *nagli* transplantation; early crops and *bajri* generally bad; insufficiency of grass for cattle, some again being sent to hills; 119 deaths from cholera.
Konkan—(July 25th)		
Tanna ...	2·04	Total rainfall 30·09; transplantation of crops slowly progressing; more rain required in northern talukas; cholera continues in 7 talukas.
Deccan—(July 25th)		
Poona ...	Average ·64	Average rainfall from 5th June 8·10, more rain wanted everywhere; crops in eastern districts will hold out a few days longer.
Ahmednagar ...	Slight fall in 4 talukas.	Sowing of *bajri* retarded, and crops withering; cholera in 9 talukas, cases 336, deaths 168.
Sholapur ...	·23	Total rainfall 11·28; young crops want rain; two deaths from cholera in Sholapur.
Satara ...	·41 in Satara; slight rain in different talukas.	Total rainfall since 1st June 6·55, more rain urgently required; crops still fair; 152 deaths from cholera.
Southern Mahratta Country—(July 25th)		
Belgaum ...	·07 in Belgaum, ·67 in Bidi; ·21 in Sampgaon; ·05 in Parasgad. ·04 in Chikori; *nil* in Gokak and Athni.	Total rainfall in Belgaum 22·68; crops at Sampgaon still good, withering elsewhere; rain wanted everywhere; one death from cholera at Sampgaon.
Dharwar ...	·13 in Mugud; ·49 in Shiggaon; ·14 in Ranibennur; and ·02 in Kalghatgi; *nil* elsewhere.	Crops withering in some places; rain much wanted; cholera disappearing, only 7 deaths.
Kanara ...	1·5 in Karwar.	Total rainfall 30·25, rain much wanted; cholera continues, deaths 78.
Kaládgi ...	*Nil*	No change for better; cholera decreasing, deaths 6 in 3 talukas.
Kattywar and Gaekwar's Territory—(July 25th)		
Rájkot ...	*Nil*	Weather cloudy; sowing in progress; health good in some parts.
Wadhwán ...	*Nil*	Health good; fears entertained of crops already grown up withering from want of rain.
Baroda ...	·10	Total rainfall 7·98.
		General Remarks.—The fall of rain throughout the week has been scanty and partial, more is urgently required in the Southern Mahratta Country, Konkan and the Deccan, while complaints of want of rain are again coming from Guzerat; cholera continues in the Deccan, Tanna and Surat, but has nearly ceased in the Southern Mahratta Country.
Bengal— (July 26th)		
Chittagong ...	11·09	Fever still prevalent.
Noakholly ...	6·10	Health much improved.
Chittagong Hill Tracts	4·61	

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bengal—*concluded.*		
Hill Tipperah ...	2·14	
Backergunge ...	4·12	District generally healthier; cholera disappeared.
Furreedpore ...	·70	
Dacca ...	7·85	
Tipperah ...	6·34	
Mymensingh ...	4·74	
24-Pergunnahs ...	4·74	Public health generally good.
Jessore ...	·77	
Nuddea ...	5·41	
Moorshedabad ...	1·84	
Pubna ...	·86	Cholera entirely disappeared; fever prevalent.
Rajshahye ...	·68	
Bogra ...	2·06	
Maldah ...	2·19	
Dinagepore ...	7·77	
Rungpore ...	3·78	
Cooch Behar ...	3·90	Cattle disease spreading; public health good.
Jalpáiguri ...	6·74	
Darjeeling ...	14·21; 7·83 in previous week.	
Midnapore ...	·26	
Howrah ...	1·90	
Hooghly ...	2·43	Public health normal; cattle disease in 2 villages.
Burdwan ...	1·83	
Bankoora ...	3·19	
Beerbhoom ...	3·68	
Sonthal Pergunnahs ...	4·14	
Bhágalpur ...	9·29	
Monghyr ...	7·12	
Purneah ...	11·01	
Durbhunga ...	11·52	Cholera much less.
Mozufferpore ...	4·35	
Sarun ...	1·57	
Chumparun ...	4·22	Cholera abating.
Patna ...	2·38	Health generally good.
Gya ...	1·18	
Shahabad ...	1·03	
Hazáribágh ...	3·21	
Lohardugga ...	1·87	Health good.
Manbhoom ...	2·32	
Singhbhoom ...	3·0	District healthy.
Balasore ...	·60	Public health good.
Cuttack ...	·71	Public health fair; few cases of cholera.
Pooree ...	1·20	A few cases of cholera still reported.
		General Remarks.—Good rain in most districts during the week and present general prospects favourable; but more rain required in some districts of Bengal Proper and in Hazáribágh and Palamow sub-division for winter rice crop, and in Patna, Gya, Shahabad and Sarun for all crops; in pergunnah Náridigar in North Bhágalpur crops said to be very backward; indigo, jute, and other early crops being reaped.
N.-W. P. and Oudh ...	...	Report not received.
Punjab— (July 25th)		
Delhi ...	*Nil*	Rain anxiously awaited; sowing operations suspended.
Hissar ...	*Nil*	Weather intensely hot and crops suffering; health good.
Umballa ...	*Nil*	Early sowings suffering; health good.
Jullundur ...	·1	*Kharif* prospects gloomy; health good.
Lahore ...	*Nil*	Sowing commenced; health good.
Ráwalpindi ...	Slight sprinkling only.	*Kharif* prospects gloomy; health good.
Mooltan ...	*Nil*	Rain wanted; health and crops good.
Dera Ismail Khan ...	*Nil*	Crops suffering; health good.
Peshávar ...	*Nil*	*Kharif* crop continues favourable but rain wanted; health good.
		General Remarks.—Rain wanted all over the Province.
Central Provinces— (July 26th)		
Upper Godávari (July 21st)	·23	More rain wanted; sowings retarded; cholera disappeared; prices steady.
Sambalpur ...	·67	Prospects of crops favourable; health good; prices steady.
Biláspur ...	2·45	Cotton well up; rice and other sowings progressing; health good; prices steady.
Raipur ...	Occasional showers.	Cloudy; prospects of crops not unfavourable as yet.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Central Provinces—*concld.*		
Bálaghát ...	·92	More rain wanted; crops doing well; health good; prices stationary.
Chhindwára ...	*Nil*	Cloudy; prospects of crops uncertain.
Chánda (July 22nd)	·46	Rains much needed; transplanting of rice delayed for want of rain; small-pox continues; prices rising.
Betúl („ 23rd)	5·77	Prospects good; prices steady.
Bhandára („ 24th)	2·14	More rain wanted for transplanting rice; other crops good.
Nágpur („ 25th)	·38	Prospects of crops favourable; prices rising.
Wardha ...	·71	Prospects of crops favourable yet.
Nimár ...	·63	Prospects of crops favourable as yet.
Hoshangabad ...	*Nil*	Prospects favourable.
Narsinghpur ...	*Nil*	Cloudy; sowings progressing; rain required; health good.
Jubbulpore ...	*Nil*	Cloudy; prospects favourable.
Saugor ...	*Nil*	Cloudy.
Damoh ...	*Nil*	Cloudy.
Mandla ...	1·14	Weeding continues; prices stationary.
Seoni ...	·10	Rain wanted for transplanting rice.
		General Remarks.—In most districts there has been little rain during the past week, and rain is now generally wanted; as yet the crop prospects continue favourable and prices are steady.
British Burma—(July 26th)		
Arrakan Division ...	11·0 in Akyab.	Ten deaths from cholera in Akyab town; cholera also in portions of Akyab district; otherwise public health good; ploughing progressing; crops being sown.
Pegu Division.		
Rangoon ...	2·48	Public health good; total rainfall 49 inches.
Bassein ...	9·6	Health good; total rainfall 65 inches; ploughing progressing.
Henzada ...	1·53 in week ending 21st instant.	Total rainfall in Henzada 30 inches; 28 deaths from cholera in Koondaw circle of Myanoung township; otherwise public health fair; Myanoung and Mengyee rainfall reports not received.
Prome ...	2·0	Eight cases of cholera in Prome, 4 in Padoung sub-division; total rainfall 21·32 inches; cultivation progressing, rather backward in Poungday.
Thayetmyo ...	3·0	Public health generally good; ploughing progressing; total rainfall 25·15 inches.
Thonkwa ...	Rainfall abundant.	Health good; crops seedlings in good condition.
Tenasserim Division ...	8·72 in Amherst; 12·2 in Shwegyeen; 6·23 in Tounghoo.	Public health fair except in Shwegyeen where choleraic diarrhœa is prevalent; prospects of crops good; stocks of paddy being rapidly exhausted.
		General Remarks.—Cattle disease in 7 townships of Akyab district, also in portions of Rangoon, Bassein and Henzada districts; price of grain continues high.
Assam—		
Gauháti (July 26th)	5·64	Very heavy showers have fallen and there is every prospect of more rain; *sali dhan* nurseries are reviving and new seeds are being sown; prospects of crops good.
Sylhet („ „)	12·54	Weather continues seasonable; prospects good.
Mysore and Coorg—(July 26th)	·45 in Bangalore; 3·54 in Coorg.	Prices of ordinary rice has risen to 9½ lbs. per rupee at Bangalore; distress on the increase; showers have fallen, but weather continues uncertain; the daily average number of persons on relief works and charitably relieved as per statement last tabulated is in the—

Bangalore district, including the town ...	8,007	and	62,128
Kolar	3,981	„	12,109
Túmkúr	4,575	„	23,847
Mysore	924	„	5,473
Hassan	1,996	„	7,253
Shimoga	1,327	„	964
Kadur	466	„	1,066
Chitaldroog	4,994	„	24,720
Total ...	26,270	„	137,560

excluding those employed by the Professional Department, daily average of which is 21,339.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Hyderabad Assigned Districts—		
Amráoti (July 26th)	·41	Rain urgently required for growing crops; cattle dying in two taluks of Wun District for want of fodder.
Central India—(July 25th)		
Indore ...	...	
Gwalior ...	...	
Neemuch ...	...	
Rutlam ...	...	
Sutna ...	2·28	Total 8·62.
		General Remarks.—Health good; prospects fair.
Rajputana—		
Abu (July 26th)	*Nil*	Barometer rising.
Marwar („ 21st)	·45 only	Tillage general; health good; no injury to crops as yet.
Meywar („ 20th)	3·3	Health good; cloudy.
Jhallawar („ 21st)	2·67	Weather fine; prospects good.
Ajmere („ 26th)	*Nil*	Prices rising; health good.
Jeypore ...	*Nil*	Strong westerly winds; sowing deferred; prices rising; health good.
Bhurtpore („ 25th)	1·5	Ploughing commenced; sowings postponed for want of rain; health good.
Ulwur ...	*Nil*	No signs of rain; forage scarce; much anxiety felt.

G. H. M. BATTEN,
Offg. Secy. to the Govt. of India.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

Abstract of the Proceedings of the Council of the Governor General of India, assembled for the purpose of making Laws and Regulations under the provisions of the Act of Parliament 24 & 25 Vic., Cap. 67.

The Council met at Simla on Thursday, the 12th July 1877.

The Council adjourned to Thursday, the 19th July 1877.

A. PHILLIPS,

Secretary to the Government of India,
Legislative Department.

Abstract of the Proceedings of the Council of the Governor General of India, assembled for the purpose of making Laws and Regulations under the provisions of the Act of Parliament 24 & 25 Vic., Cap. 67.

The Council met at Simla on Thursday, the 19th July 1877.

PRESENT.

His Excellency the Viceroy and Governor General of India, G.M.S.I., *presiding.*
His Honour the Lieutenant-Governor of the Panjáb, C.S.I.
The Hon'ble Sir E. C. Bayley, K.C.S.I.
The Hon'ble Sir A. J. Arbuthnot, K.C.S.I.
Colonel the Hon'ble Sir Andrew Clarke, R.E., K.C.M.G., C.B.
Major-General the Hon'ble Sir E. B. Johnson, K.C.B.
The Hon'ble Whitley Stokes, C.S.I.
The Hon'ble T. C. Hope, C.S.I.
The Hon'ble F. R. Cockerell.
The Hon'ble B. W. Colvin.

PANJÁB COURTS BILL.

The Hon'ble MR. STOKES asked leave to postpone the introduction of the Bill to consolidate and amend the law relating to Courts in the Panjáb.

Leave was granted.

LIMITATION OF SUITS BILL.

The Hon'ble MR. STOKES moved that the Reports of the Select Committee on the Bill for the limitation of suits and for other purposes be taken into consideration. He said that, under ordinary circumstances, he would not have made this motion until the Council had returned to Calcutta. For the Bill dealt with the whole range of civil litigation in India, and the Government desired that Bills of so wide a scope should always, if possible, be passed at the winter sittings. But as the Bill provided expressly for several proceedings under the new Code of Civil Procedure (see, for instance, section 14, clause 2 and Schedule II, Nos. 11, 153, 160, 161, 169, 172, 174, 175) which were not provided for by Act IX of 1871, it should come into force contemporaneously with that Code, that was to say, on the 1st of October 1877; and it should be passed and promulgated a sufficient time before that day to enable the new Act to be translated into the native languages and the public to become acquainted with its provisions. Moreover, the Bill had been carefully revised in Calcutta by a Committee composed of Sir Arthur Hobhouse, Sir Edward Bayley, Mr. Cockerell and Mahárájá Jotíndra Mohan Tagore, who concurred in recommending that the Bill, as then settled, should be passed; the revised Bill was published, in order to elicit criticism, in the Gazette of 31st March: few criticisms had since been received: few alterations

in substance had since been made, and of these none, as MR. STOKES thought the Council would admit, were of sufficient importance to require that the Bill should be republished and its passage postponed.

The first of these alterations was the omission, in section 6, of the paragraph which excluded from the provisions of the Limitation Act appeals from, and applications to review, decrees and orders of the High Courts in the exercise of their original jurisdiction. These appeals and applications were now regulated, in the case of the High Courts at Calcutta, Madras and Bombay, by rules made under the Charters of 1865. But, in the opinion of Mr. Justice Macpherson, there could be no possible reason for excluding them from the operation of the Limitation Act. Moreover, as Mr. Justice Kennedy had observed in his brief but valuable criticisms on the Bill,—

"There are many inconveniences in the present rule in the Calcutta High Court. The time for appeal now runs from the date of pronouncing the judgment, not from the day of the decree being passed. I think that this ought to be altered, as the effect of the judgment is not unfrequently mistaken until the decree is finally settled. Also the time for obtaining a copy of the judgment ought, as in the Mufassal, to be excluded; there is no refresher allowed for attendance to hear judgment, and, in the case of a written judgment especially, it is not always possible for Counsel to be sure what has been decided by the Bench, even if they be present in Courts constructed on such wretched acoustic principles as are those here."

We had therefore provided, in accordance with the opinion of Sir Richard Garth, Mr. Justice Macpherson and Mr. Justice Kennedy, that the period for such appeals and applications should be twenty days (the period allowed for appeals from decrees by the present practice of the High Courts at Fort William and Bombay) from the date of the decree or order. The period allowed for appeals from orders was, in the Bombay High Court, twenty days, in the Calcutta High Court, four days. We had followed the Bombay rule in this respect; Mr. Justice Kennedy saw no objection to our doing so, and Sir Michael Westropp had informed MR. STOKES that, in the High Court at Bombay, the rule had worked very well. In computing these periods of twenty days, the time requisite for obtaining a copy of the decree appealed against or sought to be reviewed and of the judgment on which it was founded would, under section 12, be excluded, and, under section 5, the Court would have power, in proper cases, to enlarge the period. The High Court at Allahabad had no ordinary original civil jurisdiction. But the period for appeals from, and applications to review, decrees made in the exercise of its extraordinary original civil jurisdiction would, under Nos. 156 and 173 of the second Schedule to the Bill, be ninety days, the period fixed under its present rules.

Under section 7 of the Bill, where a person entitled to institute a suit was a minor at the time from which the period of limitation was to be reckoned, he was entitled to institute the suit within the same period after he attained majority as would otherwise have been allowed from the time at which the cause of action arose. At the recommendation of Mr. Justice Turner and of Sayyid Mahmud, an Advocate of the North-Western Provinces High Court, the distinguished son of a most distinguished father, we had excluded from this section suits to enforce a right of pre-emption. Sayyid Mahmud observed that "the limitation of one year for a claim of pre-emption is perhaps not unduly long if the pre-emptor is not under legal disability at the time of the sale. But this period can at any time be extended indefinitely, a circumstance which not only works a great hardship upon the vendor but also upon the vendee." Then, after citing a judgment of Mr. Justice Turner (Indian Law Reports, 1 All. 207) as to the evils resulting from the right of pre-emption, and quoting the Hedáya, he concluded by expressing an opinion that, under Muhammadan law, the limitation for a claim of pre-emption was considerably less than one year, and that it was very doubtful whether the right of pre-emption was ever intended to be conferred upon persons suffering from a legal disability at the time of sale. Mr. J. W. Smyth, now one of the Judges of the Panjáb Chief Court, also recommended that pre-emption suits should be excluded from the operation of section 7, on the ground that—

"it would be an intolerable evil to allow a person, a minor at the date of the sale, to come into Court, it may be ten or fifteen years afterwards, and ask to have the sale transferred to him. The evil is not so much felt in provinces where the strict Muhammadan law of pre-emption applies, and where, unless a claim is at once made with certain forms, the

right is forfeited. But in the Panjáb no preliminary form of claim need be gone through (*vide* Act IV of 1872, sections 9 *et seq*); and here a vendee of land may be kept for years in suspense, in fact till a year after all persons in a village who were minors at the time of sale have attained their majority. The mere statement of the case in this way is sufficient to show the absurdity of the rule as it affects pre-emption cases."

We had altered section 10 and the second Schedule in accordance with a suggestion of Mr. Justice Green, one of the Judges of the Bombay High Court, so as to preclude the litigation likely to arise from the use of the words "good faith," and to protect a purchaser for valuable consideration from an express trustee, whether the purchaser had or had not notice of the trust at the time of the purchase. In this respect, our law would then agree with the present English law of limitation (3 & 4 Wm. IV, c. 27, sections 2, 24, 25), save that the lapse of time necessary to give protection would be twelve instead of twenty years; and this difference would disappear on the 1st January 1879, when the statute 37 & 38 Vic., c. 57, would come into force.

Section 14 of the present law excluded the time of a defendant's absence from British India, unless service of a summons to appear and answer could, during such absence, be made under the Code of Civil Procedure. But the Calcutta Trades Association, from whom we had received some practical remarks on the Bill, pointed out that it was frequently difficult, if not impossible, to find the address of a debtor after his departure from this country, and that a compliance with the requirements of the Code was therefore not always reasonably practicable. Of course, where the summons could not be served the clause requiring service would not apply: but it was proverbially difficult to prove a negative. The Committee felt the force of these remarks and struck out the exception in question, which, by the bye, did not occur in the corresponding provision of the English law (4 Anne, cap. 16, section 19) as to persons absent beyond the seas.

In section 19 we had struck out the exception which allowed oral evidence to be given of an acknowledgment wrongfully destroyed by the person upon whom it was binding. The case was one which could seldom occur, since the plaintiff had ordinarily the possession of the document. We had thought it simpler to make no exception to the rule in this clause, which excluded oral evidence of such documents.

In section 20 we had extended the effect of part payment to all debts, whether arising out of a contract in writing or not. "Why," asked Mr. Wilkinson, the Recorder of Rangoon, "should a part payment endorsed on a promissory note by the payor, or one admitted as such, in his own handwriting in the payee's bill-book, be entitled to more consideration than when a customer signs to a payment on account of principal in a shopkeeper's book or on the bill which he has made out in respect of articles that were purchased over the counter?" We thought, too, it would suffice to provide that the fact of part payment should appear in the handwriting of the person making it. The ordinary case of a debtor making a part payment by letter would thus be provided for.

We had provided not only that several partners or executors but also several joint contractors or mortgagees should not be chargeable by reason only of an acknowledgment or payment made by one of them. This was in accord with 19 & 20 Vic., c. 57, s. 14, and 3 & 4 Wm. IV, c. 27, sec. 28.

We had struck out the clause relating to successive trespassers, which was based on the opinion apparently held by the late Lord Romilly in *Dixon* v. *Gayfere*. The Committee were not sure that the proposed rule was right, and in any case it would have been of little or no practical utility.

In the second Schedule we had made a few changes as to the time from which the periods begin to run. Thus, in the case of suits to enforce a right of pre-emption, the present law provided that the period should begin when the purchaser took actual possession under the sale impeached. But in the North-Western Provinces High Court a doubt had been raised (I. L. R. 1 All. 315) as to the application of this provision to cases in which the subject of the sale was an equity of redemption, a reversionary interest or any other thing that did not admit of what the High Court termed "visible and tangible possession." The Committee, after much consideration, had determined on making the time run in such cases from the time when the instrument of sale was registered

Incidentally, the change would have the effect of promoting the use of written instruments in such transactions and of encouraging the practice of registration.

In the case of suits for money lent under an agreement that it should be payable on demand, we had made the time run from the date of the transaction, instead of from the demand, the date prescribed by the present law, the framer of which in this respect had followed a judgment of the Bengal High Court (6 Beng. 160), which judgment rested on what the authority of Mr. Justice Holloway (*quis jure peritior?*) emboldened Mr. Stokes to call a mistake of Austin's. It seemed unreasonable that a creditor should be able to give himself an unlimited time to sue by merely abstaining from making a demand. Moreover, as Mr. Justice Innes, one of the Judges of the Madras High Court, observed, in a minute to which the Committee were much indebted—

"It is a well known principle of English as well as Continental law, that the words 'payable on demand' are not a condition. The creditor, by the clause, does not seek to impose a conditional obligation, he merely gives notice to the debtor that he is to be ready to pay the debt at any time when called upon. If the obligation depended upon a personal act of the creditor (as Savigny observes), it would be extinguished by his death before demand, which is not the case. Consistently with this view it has always been held in England that a debt payable on demand was a debt from the date of the instrument, on which date therefore the cause of action arose (*Norton* v. *Ellam*, and other cases), and that time runs from that date and not from date of demand."

The Committee agreed with Mr. Innes in thinking it desirable that the law in India and that in England should be in accord on this point, as they were prior to the enactment of Act IX of 1871.

No. 125 related to suits during the life of Hindú widows to have their alienations declared to be void except for their lives, and No. 141 dealt with suits for possession of land to which the plaintiff was entitled on the death of a Hindú widow. We had extended the scope of these Numbers so as to meet the case of Muhammadan widows. Mr. J. W. Smyth informed us (and he was confirmed by the Panjáb Government and by Sir Edward Bayley) that—

"in the greater part of the Panjáb, Muhammadan widows succeed to their husbands' lands when there are no sons or descendants in the male line, and they hold such lands for life or till they marry again, exactly in the same way as Hindú widows succeed. Suits to set aside alienations made by Muhammadan widows, or to have them declared void, except for the life or till the remarriage of the widow, are quite as numerous in the Panjáb as suits to set aside alienations made by Hindú widows."

This fact, coupled with the existence of the undivided family system among the Muhammadans of the Lower Provinces of Bengal, shewed how cautious we should be in assuming that the profession of Islám involved the adoption of the Muhammadan law of property.

We had thought it better to restore the limitation of sixty years in the case of suits for foreclosure and redemption and suits by the Secretary of State in Council. The reasons for this change were clearly stated by Mr. Naylor, the Remembrancer of Legal Affairs, Bombay:

"There are many unredeemed mortgages of very old standing in this Presidency, and from the commencement of our rule we have always taught the people to think that there is virtually no period of limitation for the recovery of mortgaged property. The sudden change from sixty to thirty years will very much affect the nature of mortgage transactions, and whilst it can do no good it may do much harm. Sixty years is also, in my opinion, not too long a period to allow for suits on behalf of the Crown. I doubt, in fact, whether it is expedient to prescribe any limitation at all for such suits in a country where the rights of the State are so apt to fall into abeyance and get lost sight of; but if some period is thought necessary it should not be less than sixty years."

As regards mortgages, Mr. Naylor's opinion was supported by the authority of Mr. Gore Ouseley, the Financial Commissioner, Panjáb, and as regards suits on behalf of the Crown, by that of Colonel MacMahon, the Commissioner, Hissar Division.

We had extended from thirty to sixty days the period allowed for applications under sections 363 and 365 of the Code of Civil Procedure by persons claiming to be legal representatives of deceased plaintiffs and seeking to have their names entered on the record. Our reasons were two: first, because last February, when the Bill was introduced, Mahárájá Jotíndra Mohan Tagore said that "in most cases thirty days was the time of mourning for Hindús, and unless the time was extended, it might operate harshly; a man could not be

expected to come forward and put in his claim within the period of mourning;" secondly, because Mr. Broughton, the Administrator General of Bengal, had also stated that thirty days seemed too short a time to obtain representation—"at any rate," he said, "in my case, for it is the practice now to issue citations, in all but very exceptional cases, when I apply for letters of administration."

The other alterations which we had made were comparatively unimportant. They were all minutely stated in the final report; and MR. STOKES trusted that the Council would now allow the Bill to become law.

It was, no doubt, imperfect and incomplete. For instance, a Limitation Act should certainly comprise rules as to the time of commencing prosecutions for the various offences under the Penal Code, and we should have inserted the necessary provisions as to this matter, had we not felt the need of consulting the Local Governments before making so important an addition to our law, and for this there was no time. But such as it was, MR. STOKES could honestly say that no pains had been spared by Sir Arthur Hobhouse, Sir Edward Bayley, Mr. Cockerell and himself to make the Bill accurate and useful.

It would doubtless require repairs in the course of six or seven years. "Time," said Lord Plunket, speaking of the law of prescription, "Time holds in one hand a scythe, in the other an hour-glass. The scythe mows down the evidence of our rights, the hour-glass measures the period which renders that evidence superfluous." The great orator, had he been familiar with Indian legislation, would have rendered his metaphor complete by adding that the frame-work of his hour-glass would certainly decay, the glass be broken and the sand escape.

The Motion was put and agreed to.

The Hon'ble MR. STOKES then moved that the Bill as amended be passed. He said that he wished to supply an omission in his remarks on the former motion and to notice the recommendations made by certain officers of Bombay and the Panjáb, and by the Calcutta Trades Association, that the period allowed for suits for unsecured debts should be extended from three to six years.

If the matter were open at present to alteration, he would be inclined to agree with those gentlemen, especially as the English law of limitation for actions of debt grounded on simple contract was six years after the cause of action had arisen, and the facilities for recovering debts were certainly less in India than in England. But we must remember, first, that the present period of three years had been established in India since 1859, and though he could not speak positively as to the reason why so short a time had been fixed, one might fairly conjecture that it was owing to the fact that written evidence of payment was much more liable to destruction in this country than it was in England. Secondly, before making so important a change in the law, it would be necessary to refer the point to all the Local Governments; and judging from an experience now extending to nearly twelve years, the answers to that reference would certainly not be received and considered by the Home Department for six months, that was to say, nearly four months after the new Code of Civil Procedure (with which this Bill should come into force simultaneously) would have begun to operate. No doubt, the commencement of the Code might be postponed. But this would require further legislation; and the postponement might perhaps re-open questions which were now closed and would certainly for some months deprive the debtor-class of the benefits which the Code was intended to confer on them, and which, we had been assured, were urgently required. MR. STOKES hoped, therefore, that the Council would allow the Bill to pass to-day, and it would give some comfort to the gentlemen in question, and to the Hon'ble Mr. Hope, who, he believed, sympathised with them, if he mentioned briefly the alterations in favour of the creditor which would be made by this Bill if it were allowed to pass as it stood. First of all, the Bill provided for the case of a creditor affected by double or successive disabilities. Secondly, where a debtor was absent from British India, the Bill excluded the time of his absence, whether the creditor could or could not serve him with a summons to appear and answer. Thirdly, in the case of part-payment of principal, the Bill merely required that the fact of the payment

should appear in the handwriting of the debtor. As the law now stood, the debt must have arisen from a contract in writing, and the payment must appear not only in the handwriting of the debtor, but on the instrument, or in his own books, or in the books of the creditor. After the Bill had come into force, a part-payment of the amount of a tradesman's bill or a banya's account endorsed on the bill or account by the debtor would give a new period of limitation. In these three respects the position of the creditor would be distinctly improved by the Bill.

The Hon'ble Mr. Hope asked whether he had rightly understood the Hon'ble Member to say that he thought the Bill would probably require amendment in six or seven years.

The Hon'ble Mr. Stokes replied in the affirmative.

The Hon'ble Mr. Hope remarked that in that case he could only express his regret that so important a subject as that of the extension of the period of limitation for suits for money debts should be relegated to limbo for so long a time, and expressed his opinion that it would be preferable to defer, if necessary, the passing of this Act, as well as the operation of the Civil Procedure Code, till next January, in order to afford sufficient time to have the question sifted even in a more thorough manner, if possible, than it had already been sifted by the Deccan Riots Commission and others, whose reports on the subject had already been some five or six months in the possession of the Select Committee.

The Motion was put and agreed to.

The Council adjourned to Thursday, the 26th July 1877.

Simla; *The 19th July* 1877.

A. PHILLIPS,
Secretary to the Government of India,
Legislative Department.

Printed and published for the Govt. of India, *in the* Govt. Central Branch Press, *Simla.*

SUPPLEMENT TO

The Gazette of India.

Weekly condition report of the distressed districts of the Mysore Province.

PROVINCE OF MYSORE.

(No. 23.)

Condition report for the week ending 14th July 1877.

Bangalore District.—Markets continue fairly supplied. Prices have risen in all but three taluks. No rain during the week, and the crops have been already partially destroyed. Agricultural operations cannot be carried on owing to the rains holding off, and, as prices are rising very high, much distress is felt. Public health is bad owing to the prevalence of cholera, small-pox and dysentery.

Kolar District.—Markets moderately supplied. Prices rising. No rain during the week. The existing water supply is diminishing owing to the prevailing high winds. The standing crops are suffering from want of rain, and the out-look is far from hopeful. Fever, dysentery and small-pox are still prevalent.

Túmkúr District.—Markets fairly supplied. Prices have remained stationary in 5 taluks, but have risen in the other 3 taluks. Excepting at Tumkúr, where 6 cents were registered on the 14th instant, there has been no rain throughout the district. Ragi and other dry crops are fast withering from drought. Insects too have been committing much injury. Javari, sown in tank beds and under irrigation, in fair condition, but the extent is very limited. Cholera, diarrhœa and fever still prevail.

Mysore District.—Markets fairly supplied, except in the Gundlupet taluk where the supply was moderate. Prices rising. There was no rain in any of the taluks except Mysore and Malvalli, where 18 and 8 cents were respectively registered. The standing crops are withering, and ragi has not been sown for want of rain. Prospects have not improved, and the public health continues indifferent, cholera, fever and dysentery being still prevalent.

Hassan District.—Markets continue fairly supplied, except in some parts of the Arkalgúd and Harnhalli taluks. Prices are rising. Rain fell in 4 out of 9 taluks; the quantity registered being inconsiderable, except in the malnad where 2·70 inches were registered. The crops in the malnad taluks are fairly flourishing, but those in the Hassan, Harnhalli, Belur, Channaraypatna, and Attikuppa taluks are suffering from want of rain. In the two last named taluks, the maize crop suffered from rot owing to previous excessive rain. Sesamum was reaped in some parts of the Attikuppa taluk. The prospects of the season remain unaltered, and the public health is bad owing to the prevalence of fever, dysentery, small-pox and cholera.

Shimoga District.—Markets fairly supplied, except in the Channagiri and Honnali taluks. Prices rising. Rain fell in 6 out of 8 taluks, the quantity registered at the head-quarters of which varied from 18 cents to 8·95 inches at Nagar. The standing crops, excepting in the Honnali and Channagiri taluks, where they stand in need of rain, are in good condition. Cholera and fever are still prevalent.

Kadur District.—Markets continue fairly supplied, except in the Tarikere taluk, where the supply was moderate. Prices pretty steady. There was a good rainfall in the malnad taluks but little in the maidan taluks to the eastward. With the exception of the Banavar taluk and the maidan portion of Chikmagalur, the standing crops are doing well. The prospects of the season have not improved, and the public health continues to be bad; fever, dysentery, cholera and small-pox being still prevalent.

Chitaldroog District.—Markets continue fairly supplied, except in the Davangere, Pavagada and Budihal taluks. Prices are fluctuating. The standing crops are withering, and are likely to be destroyed should the rains keep off. In the Davangere taluk, the young crops were choked with sand owing to the high winds which prevailed and have also suffered much injury from insects. Public health was pretty good during the week, except in the Davangere taluk, where cholera and fever are still prevalent.

GENERAL REMARKS.

It will be seen from the condition reports of the districts that, excepting in the malnad portion of the province, there has been no rain for the week ending 14th July 1877. The S. W. monsoon rains having ceased prematurely, the young crops are generally withering, and

the gravest apprehensions are entertained as to the future prospects of this year. The state of affairs is truly deplorable, and the worst severities of famine have yet to be contended with. The ryots are in a state of despondency, ruined as they are by a succession of bad harvests, loss of their cattle and exhaustion of food-stocks and seed grain. The employment in the fields has become slack owing to the cessation of rains, and distress is on the increase. No efforts, however, are wanting on the part of district officers and their assistants in administering relief to alleviate the distress as much as possible. But no improvement can be expected so long as the rains are holding off.

2. The number of deaths from cholera reported during the week was 155, or 18 less than in the previous week. Although this epidemic has been somewhat cn the decline, yet public health has been indifferent owing to the prevalence of fever, dysentery, and other diseases.

3. The number of works in progress under revenue officers was 1,778, or 312 less than in the preceding week; but the decrease was chiefly under the head of "Miscellaneous works." On the other hand, the daily average attendance on the works which, last week, was 25,003, has, this week, increased to 26,270. The increase was chiefly in the Bangalore and Chitaldroog Districts.

4. The amount appropriated for expenditure on the above works was Rs. 15,97,814, of which Rs. 10,63,277 were expended, leaving an available balance of Rs. 5,34,537. The expenditure during the week was Rs. 23,334, or Rs. 3,762 more than in the previous week, as shewn under :—

	Past week.	Present week.
		Rs.
Bangalore District	4,787	9,403
Kolar "	3,580	3,096
Túmkúr "	1,594	2,345

Hassan "	1,876	1,751
Shimoga "	2,007	1,788
Kadur "	910	459
Chitaldroog "	3,099	2,142
Bangalore Municipality	992	1,444
Mysore "	0	356
Total ...	19,572	23,334

5. On works carried on under officers of Public Works Department, the daily average number of persons employed was 21,339, or 949 less than in the previous week. The decrease was generally in all the Districts, except Bangalore and Kolar. In consequence of the steady rise in prices, orders have been issued under the Chief Commissioner's authority in the Public Works Department, authorizing increased labor rates calculated on a sliding scale in accordance with the fluctuations in the price of grain, which will, it is believed, have the effect of attracting more labor to the works carried out under Departmental agency.

6. The daily average number of persons charitably relieved was 137,560, or 11,549 more than in the previous week. Excepting the Kadur District and Mysore Municipality which shew a decrease of 96 and 17 respectively, all the other Districts, including the Bangalore Municipality, shew an increase as particularized below :—

	Increase over previous week.
	Rs.
Bangalore District	1,779
Kolar "	637
Túmkur "	3,806
Mysore "	250
Hassan "	433
Shimoga "	101
Chitaldroog "	2,528
Bangalore Municipality	2,128
Total ...	11,662
Deduct decrease in Kadur District and Mysore Municipality ...	113
Net increase ...	11,549

7. Of the total number relieved at the kitchens and camps, 30,941 were men, 50,465 women, and 56,154 children. The total expenditure incurred up to 14th of July on account of gratuitous relief was Rs. 8,59,329.

8. The weight of grain imported by rail during the week, including the consignments to the Kolar Road Station, was 3,698 tons, or 1,843 less than in the preceding week, as shewn below:—

	Tons.
From Madras	3,214
„ Beypore and Malabar district	155
„ Trichinopoly, Tanjore, and Negapatam	189
„ other districts of Madras Presidency	140
Total ...	3,698

9. About 1,838 tons, or 137 less than in the previous week, were exported by road from Bangalore to the interior of the Province and the frontier taluks of the Madras Presidency as shewn hereunder:—

	Tons.
Towards the Túmkúr district	910
„ Bellary and Chitaldroog districts	55
„ Mysore district	302
„ Oossoor in the Salem district	174
To the taluks adjoining Bangalore	397
Total ...	1,838

10. There has been a considerable falling off in the imports by rail this week. A very small quantity was exported towards Chitaldroog district, where there is a great scarcity of food supply. The Central Famine Relief Committee at Bangalore have entered into a contract with one of the firms here for the supply of grain required for the kitchens in the Chitaldroog district up to end of August. But for this arrangement much difficulty would have been experienced in maintaining the kitchens in that district owing to the failure in the supply of carriage by road, the cattle having been withdrawn, it is understood, for agricultural operations. The monsoon in Coorg having checked importation of grain into that Province from the western coast, the Superintendent reports that he has made arrangements for obtaining a supply from Madras *viâ* Bangalore. This probably accounts for large quantities of grain being exported during the last fortnight from Bangalore towards Mysore.

11. The following statement shews the maximum and minimum prices of food-grains which prevailed during the week in each district:—

	Maximum in lbs. per Rupee. Rice, 2nd sort.	Ragi.	Minimum in lbs. per Rupee. Rice, 2nd sort.	Ragi.

Examiner, Public Works Accounts.

T. R. A. THUMBOO CHETTY,
Assistant Secretary.

B

Rain has fallen, though not abundantly, in the greater part of Khandesh and Nasik, and there have been showers in parts of every District. In Kaladgi, although no rain is reported, slight showers have fallen. There has, however, been no general fall, and rain is very much required throughout the whole of the famine area, particularly in the eastern talukas where the early crops are in many parts withering.

2. Grain has again risen in price, and jowari now averages only 14¾ lbs. for a rupee throughout the famine district. It is dearest in Dharwar, but dear everywhere except in Khandesh and Nasik.

3. The number of people upon relief works in the nine affected districts is 254,870 against 266,828 last week, and there are also 892 hill-men and immigrants employed in Ratnagiri and Kanara. The decrease is general, except in Kaladgi, where there has been a rise, and is most marked in Satara. Should seasonable rain be much longer withheld, it is feared that the numbers of people upon relief works will begin to rise again.

4. Cholera seems almost to have died out of the Kanarese districts of Kaladgi, Belgaum and Dharwar, but it continues more or less prevalent in the six northern Collectorates.

5. Arrangements have recently been made to facilitate the grain traffic by the improvement of ferries; and with a view to encourage the movement of grain importation by human labour exemption from tolls and ferry charges has been granted wherever practicable. This movement gives employment to the persons engaged in it, maintains the flow of grain into the famine districts, and sets free cattle for agricultural operations.

6. The Sanitary Commissioner has been again deputed to visit the Kaladgi district, and his first report on the condition of the people, both in their villages and on relief, has been received, and is satisfactory.

7. A table is appended contrasting the rainfall of the past season in each taluka of the famine area with the fall which has been reported during the current season, and showing also the average annual rainfall of the talukas.

8. The following table gives the expenditure by Government, during the week ending 7th July, upon charity in the relief of the aged and infirm poor; and in payments made to the young children of labourers employed upon relief works. Comparing the results shown in the table below with those shown in the last summary, it will be seen that the number of persons in receipt of Government charitable relief has decreased from 66,402 to 59,147, while the number of children under 7 years of age has decreased from 93,693 to 89,925.

The number of children varies with the number of labourers, and during the week ending 7th July (the latest for which complete returns are available) the number of labourers had decreased to 277,527. The number of people charitably relieved was 21·31 per cent. of the number of labourers upon relief works during the corresponding week.

Districts.	Collector's discretionary grant.			Expenditure incurred under the authority of Government Resolution No. 312 C. W.—1116 of 26th December 1876, on account of children under 7 years of age whose parents are upon relief works.		
	Average number of persons relieved during the week.	Expenditure during the week.	Total expenditure up to date.	Average number of children, and of women taking care of them.	Expenditure during the week.	Total expenditure up to date.

‡ Executive Engineer's return not received.

9. The following table gives the distribution of the people among the relief works in the nine affected districts employing 1,000 labourers, or more, during the week ending 14th July. It will be seen that 2,18,310, or more than four-fifths, of the labourers were concentrated upon the works enumerated :—

Districts.	Works.	Number of labourers.	Total.	REMARKS.
Khandesh ...	Songir-Nandoorbar Road ...	1,258	1,258	
Nasik ...	Kherwari-Sinnar Road	1,336	2,381

	Ron-Nawalgund Road ...	2,845		
	Poona-Hurryhur Road... ...	2,291		
	GRAND TOTAL ...	...	218,310	

10. Tables (A) and (B) are appended as usual. It will be seen that, during the week ending 14th July, the number of people upon Civil Works in the nine affected districts was 20,676, the number upon works under Public Works Department agency being 238,257.

The proportion of people upon the former continues, therefore, below ten per cent. of the total. It is to be noted that the figures given in these tables are taken from the progress returns of the works, and are brought up to the week ending 14th July, while the figures in the table prefixed to this summary are taken from the Collectors' telegrams, and refer to the week ending 21st July. It will be seen that the decrease in the number of people on relief works during the five weeks subsequent to 9th June has amounted to 143,751.

11. Maps are not sent with this summary.

12. A table is appended, showing the condition of the affected Native States.

13. With regard to the movements of food-grains, 6 tons were exported from Bombay to the Southern Mahratta ports during the week ending 21st July, and during the same period 5,935 tons were carried by the Great Indian Peninsula Railway to stations upon the Poona-Sholapur and Nasik-Bhusawal lines. The table below shows the quantities of grain sent by sea and rail from October till the 21st July to the Southern Mahratta ports and the Railway stations in the distressed districts. It will be seen that the total amount delivered up to the 21st July was 342,147 tons:—

Food-grains sent to	In October, November and December 1876.	In January and February 1877.	In March 1877.	In April 1877.	In May 1877.	In June 1877.	(In July up to 21st.)	Total.
	Tons.	Tons.	Tons.	Tons.	Tons.	Tons.	Tons.	Tons.
Southern Mahratta ports ...	44,215	29,534	16,798	21,399	28,657	4,491	782	145,876
South-Eastern line, from Poona to Sholapur ...	67,195	27,948	13,760	12,856	12,594	20,348	14,489	169,190
North-Eastern line, from Nasik to Bhusawal ...	12,829	4,237	3,234	2,346	1,221	2,014	1,200	27,081
TOTAL ...	124,239	61,719	33,792	36,601	42,472	26,853	16,471	342,147

14. The rainfall still continues insufficient and irregular. There has not been any return of the regular south-west monsoon rain, but the weather has been cloudy and overcast, and showers more often light, but occasionally heavy, have been falling generally over the affected area. These, together with the protection afforded by the cloudy sky, have been sufficient hitherto to prevent the total loss of the Kharif, though these crops are nearly everywhere reported to be suffering and, in many places, withering for want of sufficient moisture. It is to be remarked that the taluka returns which report the rainfall at the Thanna stations, where there are gauges, give only a very general and approximate idea of the quantity of rain that has really fallen, much of which may not have been recorded.

A break in the monsoon has again occurred in Guzerat, and is causing some anxiety.

Prices of food grains still continue to rise, but imports into the rural districts are more active, and the movement of grain transport by human labour is increasing. Orders have been issued to encourage and facilitate it as much as can legitimately be done.

The imports on the coast have been very trifling, those by rail are still increasing.

Owing to the continued adverse circumstances of the season, very little pressure has been applied to remove the people from relief; and in localities, where the distress is believed to be greatest, instructions have been given to the local officers to admit fresh comers freely, and to re-admit persons who had previously been receiving aid, should they desire to return. There has, however, again been a falling off in the number of labourers, the net decrease being 11,851. There has been a decrease of 7,256 persons receiving charitable relief, and a decrease of 3,768 in the number of young children.

The general condition of the people continues to be fairly good, although the continuance of the high prices of food due to the absence of seasonable rain throughout Southern India is causing in places some distress.

Cholera has almost disappeared in the Southern Mahratta Country, only 14 deaths having been reported from the three Kanarese Districts; in the Deccan it still prevails, but is not on the increase.

M. K. KENNEDY, Major-General, R. E.,
Secretary to Government.

NOTE.—The totals are not invariably the sum of the men, women and children, as in a few returns these particulars have not been given, the total number of labourers alone having been entered.
These figures are for the nine distressed districts only. The people upon relief works in Ratnagiri and Kanara are shown in Table A.

TABLE contrasting the Rainfall as yet reported during the current season (i. e., from 1st January 1877) with the Rainfall of the past season.

(According to the Collectors' weekly written reports.

† This is chiefly eastern rain.

Weekly Relief Report of the distressed districts of the Madras Presidency.

Proceedings of the Board of Revenue, Madras, No. 3284, *dated* 13*th July* 1877.

Maps for—

South Arcot.	Nellore.
Cuddapah.	Bellary.
Salem.	Coimbatore.
North Arcot.	Chingleput.
Madura.	

Statements.

No. 1. Prices.
" 2. Relief Report.
" 3. Talukwar Abstract of Relief.
" 4. Statistics of gratuitous relief.
" 5. Talukwar ditto.
" 6. Number and description of works.
" 7. Works under supervision of Public Works Department.
" 8. List of special establishment.
" 9. Memo. of sums sanctioned.

The relief reports for the week ending 7th July will be submitted to Government with the usual statements and maps marginally noted.

2. *Prices.*—There is a general rise in the prices of all food-grains throughout the distressed districts; the only cases in which there is a decline are the prices of cholum at Madura and Tinnevelly; the quotation for Trichinopoly as regards that grain must be wrong. The greatest rise in the price of rice occurs in Chingleput, where one seer less than in the preceding week is procurable for a rupee. In the Cuddapah, Kurnool, North Arcot, South Arcot, Trichinopoly, Madura, and Coimbatore Districts also there is a very appreciable rise varying from half to three-quarters of a seer. The rise in the price of cholum also shows highest at Chingleput, being $\frac{9}{10}$ths of a seer. In the Kistna, Cuddapah, North Arcot, South Arcot, Coimbatore, and Salem districts the price of that grain rose considerably. Ragi has become much dearer in most of the distressed districts; there is probably some error in the Kistna quotation, which shows a rise of more than two seers in the week; in Chingleput and Trichinopoly it exceeds a seer, and in Nellore, Cuddapah, Kurnool, North Arcot, and South Arcot, Madura, Tinnevelly, and Salem it amounts to half a seer and upwards. The figures for cumboo are not more favourable, the increase being general and the rise considerable as compared with last week's prices. About a seer less of this grain is procurable for a rupee in Kistna, Kurnool and South Arcot, and from half a seer to three quarters less in Cuddapah, Trichinopoly, Madura and Salem. In Malabar prices were stationary.

3. Examining details for taluks district by district, the Board find a very sharp rise in prices of all grains in the Nellore taluk; at Venkatagiri cholum and ragi are dearer, but cumboo is cheaper; in Ongole and Addanki there is a general rise in the price of all grains; some of the quotations, however, must be wrong, as, for instance, the rise of 4½ seers in the price of ragi at Ongole. In *Cuddapah* there is a slight decline in prices at head-quarters, but a general rise throughout the district, except in Royachoti, where prices are stationary; in Pullampett and Chitwail there has been no change in the prices of all dry grains; in Proddatore, Sidhout and Kamalapur the rise in the price of all food-grains is very marked.

In *Bellary* rice has fallen at Kudlighi and Madakasera, and cholum at Harpanhalli and Hudgalli; at the last-named place there is a slight rise in the price of rice, otherwise there is no change in the market in those two taluks where prices range highest. In Anantapore there is a sudden rise, to the extent of upwards of a seer and a half, in the price of rice, and that of dry grains is much higher in Gooty, Tadputry, and Anantapore.

In *Chingleput* the increase in the cost of rice is serious everywhere except at Trivellore; ragi, too, is dearer throughout the district, and the change is very noticeable in Madrantakam, Chingleput, and Ponneri.

In *North Arcot* the most remarkable feature is the very considerable enhancement of prices at Kangundi; the only station at which a decline in respect of any grain is recorded is Naraynavanam, where cholum and cumboo were cheaper; no quotations are given for Punganoor; at Trittany and Kalastry prices were stationary; elsewhere both rice and ragi were going up.

In *South Arcot* the rise in prices is general, except in the taluks of Chellambram and Kullacurchy.

In *Trichinopoly* also prices have gone up throughout the district; there is a marked rise in dry grains at head-quarters, and in rice at Perambalur.

In *Madura* there is a rise in the price of rice at Dindigul to the extent of 25 per cent. if the figures are trustworthy; all dry grains, however, are cheaper in that taluk, as is also cholum in the Palni taluk.

In *Salem* prices have slightly declined in Dharampury and are stationary in Uttengherry; elsewhere they have risen, especially as regards cholum in Salem and Namkal, and ragi at Athur and Namkal. In *Coimbatore* rice is much dearer at Erode, Pulladam, and Bhowany, and cholum at Pulladum and Coimbatore; and the rise in the prices of cholum and cumboo at Dharapuram is so excessive that the Board doubt the correctness of the return. In Pollachy prices of all grains are stationary, so are those of dry grains in Bhowany, Sattiamangalam, and Caroor. The marginal table shows the highest and lowest prices for rice and the dry grain most commonly in use in each district.

Districts.	Rice.		Dry grain.	
	Highest.	Lowest.	Highest.	Lowest.
Nellore	7·0	8·0	+8·75	12·25
Cuddapah	5·39	7·05	+6·37	9·08

Malabar	6·20	10·16	+9·00	13·16

* Ragi. † Cholum.

4. *Rainfall.*—The returns under this head are very disheartening. In Nellore, Cuddapah, Chingleput and Trichinopoly no rain at all was registered, and elsewhere there was but a mere sprinkling, the highest average being not a quarter of an inch. Most rain is reported from Madura, showers having fallen in Madura, Melur, Dindigul and Palni. The position is undoubtedly very critical, and, unless the monsoon sets in again steadily within a few days, the crops which have been put down must fail wherever they are dependent solely on the falling rain, as they are already reported to be withering in many of the districts. No reports of rain have reached the Board from the distressed districts since the date to which the returns relate. Even on the West Coast the fall was very light, the average being but 3·84 inches in Malabar and 4·33 inches in South Canara. The situation is such as to cause grave anxiety.

5. *Grants and Outlay.*—The grants up to the 7th July aggregate Rs. 1,85,87,283 and the outlay as reported was as follows :—

	In the week. Rs.	Up to the week. Rs.
Relief works	5,81,884	1,64,62,552
Gratuitous relief	2,52,768	21,02,489
Total ...	8,34,652	1,85,65,041

6. The following is an abstract of the statement showing the numbers and description of works in progress and completed during the week :—

	In progress. Number.	In progress. Length in miles.	Completed. Number.	Completed. Length in miles.
Roads—				
New works	506	408	148	611
Repairs	428	3,867	129	633
Total ...	934	7,275	277	1,244
Irrigation—				
New Works	103	...	27	...
Repairs	1,176	...	241	...
Miscellaneous	3,840	...	3,073	...
Total ...	6,053	...	3,618	...

7. *Numbers on relief works.*—The numbers in each district are compared below with those for last week :—

Districts.	30th June.	7th July.	
Kistna	3,768	3,283	— 485
Nellore	18,757	20,094	+ 1,337
Cuddapah	120,053	119,440	— 613
Bellary	296,869	302,928	+ 6,059
Kurnool	206,024	212,516	+ 6,492
Chingleput	30,570	28,555	— 2,015
North Arcot	52,008	47,715	— 4,293
South Arcot	63	91	+ 28
Madura	7,086	13,228	+ 6,142
Coimbatore	28,713	29,696	+ 983
Salem	41,400	41,799	+ 399
Total ...	805,311	819,345	+14,034
East Coast Canal	46,966	48,960	+ 1,994
Junction Canal ... Under Executive Engineer	Not known.	2,855	...
Junction Canal ... Commissioner of Police	...	788	+3,643
Grand Total ...	852,277	871,948	+19,671

In the *Kistna* district there is a slight decrease. In *Nellore* there is an increase of 1,337, partly accounted for by the inclusion in the returns of the numbers employed in the Rapur taluk, 753. Udayaghiri and Polur show an increase, and Atmakur a falling off. These fluctuations are not explained, and the numbers employed under the Department Public Works have not been shown separately in the returns, this should be done in future. It is presumed that the coolies in the Venkatagiri and Polur divisions and in the Gudur, Nellore, and Canighiri taluks are under the professional departments. The increase in the labourers at work on the East Coast Canal was 1,994. The marginally noted particulars regarding the districts to which the coolies belong have been extracted from the progress report. The numbers in *Cuddapah* have slightly decreased, the falling off occurring in the Pulivendla, Pullampett, Royachoti, and Voilpaud

Districts.	Forwarded by the R. D.	By the P. W. D. Recruiter's Contractors.	Total.

taluks; in the first-named taluk this is due to weeding of persons able to maintain themselves; in the others it is apparently owing to stoppage of works. The increase in Madanapalli is explained to be due to the greater completeness of the returns. The details for *Bellary* show the marginally noted results. The increase in numbers in Adoni is very considerable, and is attributed to more intense pressure and to an influx of paupers from the Nizam's dominions and Kurnool. It is also stated that about 6,000 of the decrepit poor have deserted village relief for the works attracted by the more favourable rates. The gangs must be weeded and careful inquiry should at once be made as to the true cause of the desertions, if it prove to be a fact, the result being reported in due course. It is observed that the statistics of gratuitous relief for Adoni show no falling off under village relief, and a very small decrease in relief-houses. The explanation as regards Alur and Dharamavarum is more intense pressure; and as regards Raidrug and Kudligi, greater completeness of returns. The large decrease in numbers in the western taluks is not satisfactorily explained, but is doubtless due to the steps taken by Mr. Puckle to reduce numbers as stated in his inspection reports. The decrease in Bellary is not explained. The numbers on the Bellary-Hubli Railway were 6,877, of which 3,173 belong to the Bellary taluk and 3,704 to Hospett. The increase in *Kurnool* is explained in the Collector's telegram to be due to fresh admissions of distressed coolies; details will be furnished in due course.

Taluks.	30th June.	7th July.	
Jamalamadugu	23,469	24,222	+ 753
Pulivendla	14,109	13,384	— 725

Harpanhalli	8,579	4,203	— 4,376
Huvinhadgalli	15,075	8,631	— 6,444
TOTAL ...	296,869	302,928	+ 6,059

8. In *Chingleput* the decrease occurs chiefly in Madurantakum and Trivellore; it is not important. On the Conjeveram and Chingleput line the numbers for last week, *viz.*, 24,966, are repeated; this should have been explained. In *North Arcot* the non-receipt of returns for Kangundi, for which the numbers were 1,080 last week, explains a portion of the decrease; the remainder is spread over several taluks and is noticeable chiefly in Wallajah, Narayanaveram, Punganur, Trittany, and Arconum. In *Madura* the increase is almost entirely due to an accession of 4,650 in the Pulni taluk, which is not explained; the returns are probably incorrect, the Collector will report on the point; there was also a considerable increase of numbers in Dindigul. The fluctuations in *Coimbatore* do not call for remark and those in Salem are not remarkable except in Namkal and Oossoor; the decrease in the former taluk is explained to be due to completion of works, and the increase in the latter to the more punctual submission of returns.

9. The total number working under the supervision of the Public Works Department was 214,277, as per enclosed statement, against 210,737 last week. This does not, however, include figures for Nellore, as those employed under the professional department have not been distinguished in the returns. For Kurnool the figures for the week ending 30th June are given, more recent information not being as yet available. Returns for the Junction Canal have, for the first time been received. Those furnished by the Executive Engineer in charge are for the week ending Thursday, 5th.

10. The new scale of wages appears to be in force everywhere, except in part of Jammalamadugu and in Bellary town, where the scale has not been raised in order to discourage emigrants and because inefficient gangs only, not turning out 50 per cent. of the ordinary tasks, are at work.

11. *Gratuitous relief.*—The following are the district totals:—

Districts.	30th June.	7th July.	Difference.
Kistna	1,145	827	—318
Nellore	27,980	27,034	—946
Bellary	56,362	64,652	+8,290
Cuddapah	148,366	154,071	+5,705
Kurnool	58,731	56,199	—2,532
Chingleput	35,256	42,924	+7,668
North Arcot	29,110	38,939	+9,829
South Arcot	10,606	12,663	+2,057
Trichinopoly	947	1,285	+338
Madura	15,976	18,101	+2,125
Tinnevelly	1,041	1,295	+254
Coimbatore	39,798	52,664	+12,866
Salem	94,418	103,720	+9,302
Malabar	87	113	+26
TOTAL ...	519,823	574,487	+54,664
In camps	183,105	207,526	+24,421
In villages	186,066	217,658	+31,592
3-pie children	149,507	148,476	- 1,031
* Kistna	1,145	827	—318

* Particulars not given.

12. There is a large increase in the numbers of those in receipt of gratuitous relief; it occurs both in camps and villages and is noticeable in Cuddapah, Bellary, Chingleput, North Arcot, South Arcot, Madura, Coimbatore and Salem. The only district which shows any appreciable decrease is Kurnool, and this cannot be explained till the detailed returns are received. The progress of the organization of measures for gratuitous relief may be gathered from the figures marginally noted. The number of relief centres in Kurnool and Kistna not having yet been reported, the figures for the last week have been repeated. The increase in the number of camps is chiefly in *Coimbatore*; in *North Arcot* the number of inspection circles has been increased from 116 to 142.

	30th June.	7th July.	
Number of relief centres	380	346	+ 34
Inspection circles formed	727	770	+ 43
Villages in which relief was given ..	6,623	6,970	+347

In *Nellore* the falling off in numbers is due to diminution of numbers, in camps in the Polur division, figures for Kandakur are omitted, and those for Rapur omitted last week are included; endeavours should be made to secure complete returns. The fluctuations in the numbers of 3-pie children in Atmakur, Udayagiri and Venkatagiri require explanation.

In *Bellary* the increase in numbers is under village relief and 3-pie children. Under the head of village relief the increase is principally in Dharmaveram, Hindupur, Hospett, Harpenhally and Huvinhadgally. The increase of about 2,500 3-pie children in Adoni in a single week calls for explanation, which should be furnished; there is also a considerable increase in Dharmaveram and Hospett.

In *Chingleput* the increase appears in Saidapet under camps, and in Trivellore under village relief and 3-pie children, explained to be due to the increasing pressure of distress.

In *Cuddapah* the increase comes under the head of village relief and occurs chiefly in Budwail, where the old and feeble have been sent back from the works to the villages.

In *North Arcot* numbers in camps have increased by about 4,000 and those in receipt of village relief by nearly 6,000. The increase under the former head is partly due to the inclusion of figures for Tripathy omitted last week; there is also a considerable addition to the numbers in camps at Wallájah and Vellore. The number of inspection circles for village relief has been increased by 26, chiefly in Punganur, where the system has evidently been more widely extended. In *Arcot* also numbers have largely increased. In *South Arcot*, the further extension of the village relief system accounts for the difference between the numbers as compared with last week. In Madura, on the other hand, the increase is chiefly in camps and is spread over all the taluks.

In *Coimbatore* the chief increase is in camps and amounts to 13,000, of which more than 6,000 is in Palladum; these figures indicate that distress has recently become more intense in that part of the district.

In *Salem* there is a small increase in camps, but the bulk of it comes under village relief. In Kristnagiri the numbers have risen from 15,515 to 23,721; in Dharampury, on the other hand, there has been a falling off of more than 2,000. Explanation is promised as regards the cause of the sudden increase in the former taluk.

13. The following statement shows the rates of reported mortality in camps and villages. There is a slight improvement in camps, but Cuddapah, North Arcot and Salem still show very badly. There were 35 deaths among 3-pie children, 4 each in Cuddapah and North Arcot, 9 in Salem, and 18 in Kurnool:—

Districts.	Camps and Relief Houses.			Village Relief.		
	Approximate strength.	Deaths in the week.	Ratio per mille per annum.	Approximate strength.	Deaths in the week.	Ratio per mille per annum.
Nellore	23,458	177	393	637	2	164

TOTAL ...	39,517	7,61,324

Advances to weavers are noted below:—

Cuddapah	166	2,221
Bellary	1,931	33,432
Madura	1,118	5,803
Coimbatore	2,010	6,390
Salem	39,137	1,81,414
TOTAL ...	44,362	2,29,260

16. The usual statement of establishments is enclosed, the cost is Rs. 1,31,748.

17. The average strength of resident paupers in Madras camps was 11,552, and of non-residents 11,977; the fresh admissions were 1,885, the strength in hospital on 7th July was 711, deaths numbered 179 (of which 165 took place in hospital) or in the rates of 884 per mille per annum. Of the 12,149 paupers who were resident on the 7th July, 5,037 belonged to Chingleput, 2,874 to North Arcot, 4,111 to Nellore, and 127 from other districts. The outlay during the week was Rs. 17,995, and up to the end of the week Rs. 6,81,844. The President of the Municipality had 2,957 paupers at the Sattengad relief camp, and 2,316 on works on the 7th July. The expenditure for the week was Rs. 2,141, and up to the end of the week Rs. 54,521.

C. A. GALTON,
Acting Secretary.

Communicated to the Government of India.

J. H. GARSTIN,
Addl. Secy. to Govt.

T. C. HOPE,
Addl. Secy. to the Govt. of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE, AGRICULTURE AND COMMERCE.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING THE 2ND AUGUST 1877.

GENERAL REMARKS.—There has been more or less rain during the week in all the districts of Madras: it has been heavy in Kistna and (though none is stated in the report) Bellary; moderate in Cuddapah, Nellore, Madras, Chingleput, Kurnool, North and South Arcot, and Tanjore; slight and insufficient in Trichinopoly, Madura, Tinnevelly, Coimbatore and Salem; the standing crops have been saved in many parts of the worst districts, and the prospects of the harvest are improved; distress however continues very severe. The numbers on relief works are 957,390, and on gratuitous relief 838,786, being 43,948 and 107,519 more than last week. In Mysore there have been tolerably general showers, which have slightly benefited the crops, but prospects are said to be not materially improved; the number of persons on works is 48,198, and on charitable relief 151,436, which are 589 and 13,876 more than last week. In Bombay there has been good rain in Kanara, Sholapur and Satara, and beneficial showers throughout the Deccan, Southern Mahratta Country, Konkan and Khandesh; in Sind the river is very low, and loss of crops is feared in consequence; rain is much wanted in Guzerat. In the Central Provinces there has been good rain in most districts, and the prospects of the crops are favourable; more rain is wanted in the Eastern districts, Narsinghpur, Seoni, Damoh, Saugor and Mandla. In Berar there has been good rain, but more is required; the crops are in fair condition. In Central India a little rain is reported from Rutlam, Neemuch and Indore, but more is everywhere needed. In Rajputana there has been no rain except at Abu, and the crops will be in danger if it does not soon fall. In Bengal there has been an abundant fall in the Eastern and Central districts; it has been insufficient in Patna and Gya, but apparently good rain has fallen in other districts of Behar; rain is also required in Chota Nagpore and Orissa. In Assam and Sylhet the fall has been good and prospects are favourable. In Burma the monsoon continues good and the crops promise well. In the North-Western Provinces and Oudh slight rain is reported from all districts, but it has as yet been insufficient, especially in the west. In the Punjab good rain is reported from Ráwalpindi, Mooltan and Lahore, and showers from other districts; rain is generally wanted, but the condition of the crops is fair.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Madras—*		
Kistna (July 31st)	4·48 in Masulipatam; 5·69 in Gudivada; 4·38 in Palnad; 3·60 in Bezwada; 3·30 in Repalli; 2·45 in Nandigama; 3·0 in Guntur; 1·25 in Sattanapali; 1·10 in Bapatla; ·20 in Narsarowpet; about 6·0 in Vissanapet; 4·0 in Nuzvid divisions.	Tanks received some supplies; anicut canals partially supplied; the rain saved surviving dry crops and proved useful for sowing and transplantation; prices rose in some and stationary in other taluks owing to exportation; seers of Rs. 80 weight, rice 7·08, *cholum* 8·06, *raggi* 8·52, *cumboo* 7·61; import by land, rice 112·72 tons, *cholum* 78·12; number on relief works 5,223; number gratuitously relieved in camps 1,557, in villages 1,885, by people 392; grass sprouting again.
Nellore (" ")	·30 in Nellore; ·35 in Kavali; ·50 in Venkatagiri; 1·85 in Darsi; ·25 in Kanigiri; ·65 in Kandukur; 1·50 in Ongole.	Average prices second sort rice 6·03, *cholum* 7·70, *raggi* 8·41, *cumboo* 8·22; imports by sea 6½ tons; rice 55 tons, *cholum* 1½ tons and *raggi* 23 tons were brought into the town of Nellore; number on district relief works 20,581, number on canal 50,096; number fed gratuitously in camps 36,169, village relief 1,458 against 1,123, children of coolies employed on works 2,814; standing crops said to be saved to a great extent in Ongole, Kandukur, Gudur and Polur, drooping or withering elsewhere.
Cuddapah (" ")	1·14 (average of 10 taluks.)	Average prices seers per rupee, second sort rice 5·26, *cholum* 6·6, *raggi* 7·12, *cumboo* 6·96; people on relief works 154,885, increase 6,045, due to pressure of distress; fed gratuitously in camps 14,800, increase 754, due to severe distress and to transfer to relief camps of feeble persons on relief works and sickly patients in villages; otherwise fed 103,528, increase 16,149, due to transfer of camp inmates to villages; imported rice from 17th to 23rd July 1,746 tons.

* In the Madras weather and crop report for the week ending the 26th July 1877, published at pages 2060 and 2061 of the Supplement to the *Gazette of India* of the 28th July 1877, opposite Kistna, for "number gratuitously relieved 2,059, read "2,859"; opposite Tanjore, for "imports by sea 27·28" read "2,728"; opposite Trichinopoly, for "number fed gratuitously 3,247" read "2,447"; opposite Tinnevelly, for "imports of grain 237 tons" read "2,377 tons."

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Madras—*continued.*		
Bellary (July 31st)	...	Average prices second sort rice 5·14, boiled rice at Bellary 5·94, *cholum* 5·72, Jubbulpore *cholum* at Bellary 7·21, *raggi* 6·04, *cumboo* 5·75, seers of 80 tolas; import 4,855 tons; 323,936 on relief works; 181,143 gratuitously fed, of whom 20,352 in relief houses, and 7,768 in relief camps.
Kurnool („ „)	·86 (throughout the district up to Saturday, more since.)	Season prospect improving; at present average price second sort rice 5·28 imperial seers per rupee, *cholum* 6·48, *raggi* 6·71, *cumboo* 6·81; slight general rise in prices; grain in markets sufficient for present wants; coolies on relief works 214,371; gratuitously relieved 75,532, of whom 17,166 are in relief camps, 4,742 in relief houses, 40,939 are children under 7 years, and 12,685 under village relief; 204 tons of private grain imported into two taluks.
North Arcot („ „)	·77 (average of 10 stations.)	Average prices in Government seers, second sort rice per rupee 5·5, *cholum* 6·5, *raggi* 6·4, *cumboo* 6·4, wheat 4·9; relief works' coolies 58,726; persons gratuitously fed in camps 19,967, persons otherwise gratuitously fed 44,030.
South Arcot („ „)	1·9 in Tindevanum; 1·5 in Teroomalay; nearly 1·0 in Huzur, Villapuram, Verdachellam, Chillambram; ·75 in Kalacoorchy; ·4 in Tricalore.	Rice second sort 6 seers, *cholum* 7, *raggi* $7\frac{1}{5}$, *cumboo* $8\frac{3}{4}$, last grain a little cheaper; newly harvested *cumboo* coming into market; number employed last day, men 39, women 24, children 5; fed in relief houses and camps, men 506, women 1,152, children 1,533, deaths 17; fed in 184 villages, men 3,837, women 7,342, children 16,322, deaths 19; the rain was of some service to standing crops, if followed by more rain shortly, *cumboo* will be partially harvested.
Tanjore („ „)	From ·2 to 2·35 in different places in the district.	Prices seers rice $6\frac{1}{2}$, *raggi* $8\frac{1}{4}$, *cumboo* $8\frac{7}{8}$, *cholum* $8\frac{1}{4}$; imports by sea, rice 1,529 tons, dry grains 9 tons; relief works none; rivers very low.
Trichinopoly („ „)	·11 (average); fair rain in parts of Pudukotta.	Week ending 28th July, second sort rice $5\frac{3}{4}$ seers, *cholum* 7, *raggi* $7\frac{3}{5}$, *cumboo* $7\frac{3}{10}$; imports of grain during this week 771 tons; number on works at Sluppur on 28th July 581; number fed in relief camp 3,817, otherwise gratuitously fed by Government 1,379, by private subscription 2,293; dry crops very critical; rain much wanted.
Madura („ „)	Showers about Shevagunga; slight rain fell in Tirumungalum, Dindigul and Melur.	Rice second sort $6\frac{1}{5}$, *cholum* $7\frac{1}{10}$, *raggi* $8\frac{2}{5}$; imports, rice 4,009 tons, other grains 4; number on relief works 22,559, increase due to cessation of agricultural operations; gratuitously fed in camps and houses 17,746, increase in money dole 3 pie, children 4,528.
Tinnevelly („ „)	Slight rain on hills.	No freshes; standing crops generally good, but require rain; average prices per rupee second sort rice $6\frac{1}{2}$ seers of 80 tolas, *cholum* $8\frac{1}{2}$, *cumboo* $9\frac{1}{4}$ and *raggi* $7\frac{3}{4}$; import of grain, rice 2,073 tons; number on relief works *nil*; number gratuitously fed in camps 2,182; number otherwise fed 1,091.
Coimbatore („ „)	·50 in 3 days at Sattiamangalum; ·48 in 2 days at Collegal.	Prices (slight fall) rice second sort 5·90, *cholum* 6·95, *raggi* 7·32, *cumboo* 7·61; imports estimated rice 1,895 tons, other grains 155; no cultivation; standing crops withering, save in Sattiamangalum; on relief works 29,015; gratuitously relieved in centres 94,527, in villages 532, 3 pie children 1,706, total 125,781.
Nilgiris („ „)	Slight rain at Kotagiri and Gudalur.	Average prices four stations (Ooty, Cogvoora, Kotagiri and Gudalur) rice $5\frac{7}{10}$ seers per rupee, *cholum* $6\frac{1}{10}$, *raggi* 7, *cumboo* in two stations 7; imports week ending 28th July, rice $115\frac{1}{4}$ tons, *cholum* $1\frac{1}{2}$, *raggi* 3, *cumboo* $\frac{1}{4}$; about 300 under relief in camps and relief houses, and 5 starving travellers daily relieved by village officers.
Salem („ „)	·5	Prices of grains seers of 80 tolas, rice $5\frac{9}{16}$, *raggi* $6\frac{1}{4}$, *cumboo* $6\frac{1}{16}$, *cholum* $6\frac{7}{16}$; import of all grains 560 tons; number on relief works 47,200; number gratuitously fed in camps 27,200, ditto otherwise 82,600, ditto by private charity 80.
Malabar („ 30th)	3·39 (average) of all taluks.)	More rain wanted for first crop cultivation; dry cultivation not promising; markets well supplied; imports by sea rice 756 tons; by land rice 1,448 tons, *raggi* 8 tons; exports by land rice 2,883 tons, *raggi* 123 tons; prices of rice rising everywhere, except in Palghaut, where stationary; highest $5\frac{5}{8}$ Indian seers in Wynaad, lowest $8\frac{1}{2}$ in Cherakal, average $7\frac{2}{5}$ Indian seers per rupee; *raggi* $8\frac{1}{16}$ Indian seers per rupee in Wynaad, average elsewhere $10\frac{5}{8}$; gratuitous relief afforded to 33 men, 31 women and 30 children in Wynaad and 25 men in Palghaut; 1,703 coolies on Kolothur roads.
Chingleput („ 28th)	From ·5 to 1·25 in all taluks except Sydapet where the fall was slight.	Prices rice second sort 6·39, *raggi* 7·31, *cumboo* 7·70, *cholum* 7·11; imports rice 174·25 tons, *raggi* 33·50, *cumboo* ·25, *cholum* 2·53; cholera in all the taluks except Trivellore, in Conjeveram 56 deaths occurred from this epidemic alone; fever, small-pox and dysentery prevalent more or less throughout the district; condition of cattle bad, 200 head of cattle reported to have perished in Conjeveram; pasturage insufficient; water drying up; on relief works 28,446; gratuitous relief in camps 21,959, in other places 38,011.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Madras—*concluded.*		
Madras (July 31st)	1·13	Prices in seers of 80 tolas per rupee, rice second sort 6·57, *raggi* 7·98, *cholum* 7·7; imports rice 11,719 tons, other grains 3,766. *General Remarks.*—General prospects of harvest somewhat improved in those districts where rain has fallen; distress however continues very severe; total number fed gratuitously 838,786; total number on relief works 957,390; exports of grain from Madras by rail during the week ending the 28th ultimo 10,157¼ tons.
Bombay— (Aug. 2nd)		
Sind— („ 1st)		
Kurrachee ...	·01 on the 29th.	River on 30th 14 feet 9 inches, same date last year 17 feet 1 inch; 2 cases of small-pox in Kurrachee, disease still in 4 talukas; locusts in two talukas, no damage; crops suffering in 3 talukas from river being low.
Shikárpur ...	...	River 11 feet 6 inches, same date last year 15 feet 4 inches; want of water greatly felt; if river does not rise very soon existing cultivation will perish; weather cloudy.
Hyderabad ...	...	River again falling, 14 feet 6 inches on 31st against 17 feet 3 inches on corresponding date last year, 10 years' average 15 feet 6 inches; crops generally suffering; no signs of rain; high winds.
Upper Sind Frontier ...	*Nil*	Weather cooler; *kharif* sowing progressing; locusts seen flying from north-west to south-east in Tappa Ghauspur.
Guzerat— (Aug. 1st)		
Ahmedabad ...	·17	Total rainfall 8·02, more wanted.
Kaira ...	·29; light showers.	*Bajri* well; high wind; rain much required for crops; rivers very low; prices rising; public health good.
Surat ...	1·31; slight fall throughout the district.	More rain urgently required; crops generally good except rice; 90 cholera cases at Bulsar, Paroli and Surat, 45 fatal.
Broach ...	·20	Total rainfall 6·64; crops suffering for want of rain; cholera throughout district except Jambusar and Ohod.
Khandesh and Násik— (August 1st)		
Khandesh ...	·71 in Dhulia; slight showers almost throughout collectorate.	Total rainfall 6·15; sowing progressing where fall has been sufficient, in other places young plants withering; cholera spreading rapidly, cases 231, fatal 69.
Násik ...	Slight rain (about ·20) in Desh talukas; 3·5 in Nándgaon.	Rice and early crops bad; 81 deaths from cholera.
Konkan—(August 1st)		
Tanna ...	4·97	Total rainfall 35·06; transplantation retarded, but rainfall increased everywhere during last 4 days; cholera continues in 7 talukas.
Deccan—(August 1st)		
Poona ...	Average ·50.	Rainfall from 5th June 9·49 inches.
Ahmednagar ...	·49 in Nagar 1·55 in Jamkhed; slight fall in 6 talukas.	Total rainfall 10·42; crops suffering except in Jamkhed and Karjat; cholera in 7 talukas, cases 383, deaths 167.
Sholapur ...	3·6	Total rainfall 14·09; young crops good.
Satara ...	·79	Total rainfall since 1st June 7·34, favourable showers falling, slight rain in some talukas; prospects of crops good; 207 deaths from cholera.
Southern Mahratta Country—(Augt. 1st)		
Belgaum ...	1·08; ·83 in Athni; slight showers north of Gokák; none elsewhere.	Total rainfall 23·76; rain much wanted; crops withering everywhere except in villages where rain has fallen in Athni and Chikori talukas; 4 deaths from cholera.
Dharwar ...	·06 in Mugud, ·20 in Nawalgund, ·69 in Gadag, ·58 Mundargi, ·21 in Kalghatgi, and ·38 in Ron.	Crops have withered in some places; good rain has since fallen in almost all talukas; cholera has almost disappeared, 2 deaths.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bombay—*concluded.*		
Kanara ...	5·2 in Kanara.	Total rainfall 35·45; cholera continues, deaths 79.
Kaládgi ...	·44	Total rainfall 5·95, fall general but scanty in 4 talukas; little *kharif* already sown in Bijapur, Bágalkot and Bádámi, slightly benefited by rain; cholera continues, deaths 20 in 5 talukas.
Kattywar and Gaekwar's Territory—(Augt. 1st)		
Rájkot ...	·06	Weather cloudy; rain much wanted; price of grain increasing.
Wadhwán ...	·05	Total rainfall 1·37; health good; crops same as before.
Baroda ...	·12	Total rainfall 8·10.
		General Remarks.—Rain generally wanted everywhere except in Satara and Sholapur, where young crops are good; recent showers in the Southern Mahratta Country, Deccan, Konkan and Khandesh have somewhat improved prospects there; but both in Guzerat and Sind the crops are suffering from drought; cholera spreading in Násik, Khandesh, Surat and Broach, continues in Tanna, Nagar, Poona, and Satara.
Bengal— (August 2nd)		
Chittagong ...	7·79	Cholera reported from Teknaaf.
Noakholly ...	21·33	Health much improved.
Chittagong Hill Tracts	10·45	
Hill Tipperah ...	4·52	
Backergunge ...	2·51	
Furreedpore ...	1·98	
Dacca ...	3·90	
Tipperah ...	4·80	
Mymensingh ...	24·13	
24-Pergunnahs ...	4·78	Public health in general good.
Jessore ...	2·72	
Nuddea ...	·48	
Moorshedabad ...	2·50	Health good.
Pubna ...	1·35	Cholera entirely disappeared; fever still prevalent.
Rajshahye ...	2·30	
Bogra ...	9·61	
Maldah ...	2·07	
Dinagepore ...	Some rain daily.	
Rungpore ...	8·60	Public health remarkably good.
Cooch Behar ...	9·88	Public health good.
Jalpáiguri ...	2·26	
Darjeeling ...	Return not received.	
Midnapore ...	4·09	
Howrah ...	4·32	
Hooghly ...	2·20	Public health normal; cattle disease still in 2 villages.
Burdwan ...	1·66	Some fatal cases of cholera reported from Raneegunge
Bankoora ...	1·34	
Beerbhoom ...	·67	
Sonthal Pergunnahs ...	·42	
Bhágalpur ...	Return not received.	
Monghyr ...	3·33	
Purneah ...	3·18	
Durbhunga ...	3·40	Cholera cases still occur, but deaths comparatively few.
Mozufferpore ...	4·02	
Sarun ...	2·35	
Chumparun ...	2·87	
Patna ...	·33	Health generally good.
Gya ...	·06	
Shahabad ...	2·08	
Hazáribágh ...	2·94	
Lohardugga ...	·28	
Manbhoom ...	1·97	
Singhbhoom ...	1·79	District healthy.
Balasore ...	·64	Public health good.
Cuttack ...	2·83	The Mahánadi is rising rapidly from rain in the interior; a few cases of cholera here and there; otherwise public health good.
Pooree ...	·12	Cholera disappeared.
		General Remarks.—Good rainfall in Bengal Proper, and general prospects favourable; want of rain still very much felt in Patna, Gya, Shahabad, and Sarun, and in all districts of Chota Nagpore; rain also wanted in Orissa, and in Sonthal Pergunnahs except Godda sub-division; early rice being reaped and indigo manufactured; excessive rain in Mymensingh injured rice crops in Sudder sub-division, and high flood in the Koosee caused damage in West Purneah.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
N.-W. P. and Oudh—		
Benares ...	·8	More urgently needed.
Allahabad ...	Slight showers at head-quarters on 29th and ·1 on 31st ultimo; 2·4 in Phúlpur Tahsil and ·4 in Handia on 1st instant; ·4 in Allahabad on 2nd instant; *nil* elsewhere.	Every appearance of a speedy rainfall.
Jhansi ...	Slight showers on 1st instant.	Weather cloudy.
Agra ...	·8 in pargana Khairagarh on 1st instant.	
Meerut ...	·2 on 1st instant; general rain throughout district on the same date.	
Bareilly ...	Slight and partial showers.	Good rain required before rice can be sown; other crops sown, when rain first fell, are drying up fast; no present sign of rain.
Kumaon ...	Slight showers.	
Lucknow ...	Slight drizzle on 31st ultimo and 1st instant.	
Sitapur ...	·1 on 29th ultimo; ·3 on 1st instant.	Rain very partial; east wind; very cloudy.
Fyzabad ...	Slight rain on 27th and ·3 on 30th ultimo; ·14 on 2nd instant.	
		General Remarks.—Weather cloudy and unsettled; slight rain has fallen throughout the province, but insufficient as yet for the crops especially in the western districts; towards the east the rainfall has been great.
Punjab— (Aug. 2nd)		
Delhi ...	Occasional slight showers.	Rain much required; health good.
Hissar ...	*Nil*	Crops drying up for want of rain; health good.
Umballa ...	Slight shower.	Crops have suffered much for want of rain, especially cotton; health good.
Jullundur ...	·7 on 31st July.	No report regarding crops and health.
Lahore ...	1·0 on 31st July.	Crops and health good.
Ráwalpindi ...	2·0 (·4 on 31st July).	Prospects of crops fair and health good.
Mooltan ...	1·2 at head-quarters.	Crops and health good.
Derajat ...	Very slight	Health good.
Peshâwar ...	*Nil*	Crops favourable but rain wanted; health good.
		General Remarks.—Rain wanted; crops fair and health good.
Central Provinces—		
Upper Godávari (July 28th)	1·99	Cloudy; crops improved by recent rain, more wanted to save them; health good; prices steady.
Sambalpur ...	·58	Rain much wanted; prices steady.
Bilâspur ...	4·35	More rain urgently wanted; second sowings were damaged in progress; cotton good; no epidemic; prices steady.
Raipur ...	3·0	Sowings completed; cattle disease prevalent; slight cholera in places; prices stationary.
Bálaghát ...	1·51	Crops in tahsil Búrha favourable; rain much wanted for rice crops in Behar, where cattle disease is prevalent; prices steady.
Chhindwára ...	·17	Rain wanted; health good; prices stationary.
Chánda (July 29th)	7·65	Cloudy; transplanting rice commenced; small-pox continues; cattle disease reappeared; prices rising.
Betúl („ 30th)	·81	Prospects good; no epidemic; prices stationary.
Bhandára („ 31st)	9·66	Rain opportune for transplanting rice; fever prevalent; prices rising.
Nágpur (August 1st)	7·90	Prospects favourable; health good; prices rising.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Central Provinces—*contd.*		
Wardha ...	2·42	Weeding commenced; prospects of crops favourable; small-pox in places.
Nimár ...	·29	Cloudy; rain wanted; small-pox continues; prices rising.
Hoshangabad ...	1·94	Prospects favourable.
Narsinghpur ...	....	Cloudy; rain wanted; sowings completed; health good; prices rising.
Jubbulpore ...	1·54	Prospects and health good; prices falling.
Saugor ...	·04	Cloudy; crops suffering.
Seoni ...	·45	Transplanting of rice retarded for want of rain; health good.
Damoh ...	...	Rain much wanted; prices rising.
Mandla ...	...	Rain wanted; fever continues; prices steady.
		General Remarks.—Most districts have had rain and in the province generally the crops prospects are favourable; in the eastern districts and in Narsinghpur, Saugor, Damoh, Seoni and Mandla, more rain is still wanted; prices show no marked fluctuations, and the general health is good.
British Burma— (August 2nd)		
Arrakan Division ...	11·0	Fourteen deaths from cholera in Akyab town, a few cases also in contiguous townships of Akyab district; otherwise public health good; favourable reports from Kyouk-phyoo and Sandoway districts; rains seasonable; ploughing and sowing progressing everywhere.
Pegu Division.		
Rangoon ...	9·8	Public health good; crops progressing well; total rainfall 50·7 inches.
Bassein ...	7·2	Health good; total rainfall 73 inches; ploughing going on.
Henzada ...	6·50 in week ending 28th ultimo; 0·50 in Myanoung in week ending 21st ultimo; 1·50 in Yeagheen in week ending 23rd ultimo.	Total rainfall in Henzada 36·50 inches, in Myanoung 20·50, and in Yeagheen 26 inches; 15 deaths from cholera reported from Kyanghin and 10 from Menghee townships, otherwise public health good; ploughing steadily progressing.
Prome ...	1·70	Thirty deaths from cholera in Prome, 5 in Padoung, and 9 in Mahathaman; cultivation progressing; total rainfall 22·47 inches.
Thayetmyo ...	0·78	One death from cholera in Myedi, otherwise public health good; ploughing progressing favourably; total rainfall 25·93 inches.
Thonkwa ...	Rainfall abundant.	Health good; paddy seedlings healthy.
Tenasserim Division ...	6·0 in Amherst; 8·3 in Shwegyeen; 4·67 in Tounghoo.	Agricultural prospects and public health fair, health improved at Shwegyeen.
		General Remarks.—Slight cattle disease in Rangoon district and in Monio and Tahpoon townships of Henzada district; one-third of paddy land in Tenasserim division remaining unsown; prices of grain slightly lower.
Assam—		
Gauháti (August 2nd)	4·03	Weather overcast, with frequent showers of rain; *asu* crops nearly reaped; outturn is reported from six to ten annas; *sali dhan* cultivation progressing favourably, though somewhat backward.
Sylhet („ „)	7·34	Weather continues favourable; prospects good.
Mysore and Coorg— (August 2nd)	·75 in Bangalore; 4·13 in Coorg.	Price of ordinary rice has fallen again from 9½ to 10½ lbs. per rupee at Bangalore; the showers that have fallen pretty generally in the districts have been beneficial but not so as to improve agricultural prospects materially and there is no diminution in the prevailing distress; the daily average number of persons on relief works and charitably relieved as per statement last tabulated is in the—

Bangalore district, including the town ...	8,507	and	69,945
Kolar	5,127	„	11,734
Túmkúr	3,524	„	26,727
Mysore	2,267	„	6,171
Hassan	2,085	„	7,240
Shimoga	1,277	„	1,045
Kadur	482	„	1,033
Chitaldroog	4,884	„	27,541
Total ...	28,153	„	151,436

excluding those employed by the Professional Department, daily average of which is 20,045.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Hyderabad Assigned Districts—		
Amráoti (Aug. 2nd)	1·52	Crops progressing fairly; more rain urgently required.
Central India—(Aug. 1st)		
Indore ...	·06	Total 12·85; more rain needed.
Gwalior ...	*Nil*	Prospects gloomy.
Neemuch ...	·16	Total 4·47.
Rutlam ...	·22	Total 9·61; more rain needed; prices rising.
Sutna ...	*Nil*	Health good; prospects fair.
Rajputana—		
Abu (Aug. 2nd)	·10	Total rainfall 9·56; occasional clouds; want of rain felt.
Sirohi (July 29th)	*Nil*	Health good; high wind; clouds.
Marwar („ 29th)	*Nil*	Crops suffering; prices rising; health good.
Bikanir („ 25th)	...	Very hot; want of rain much felt; prices rising.
Meywar („ 27th)	...	Health good; rain required.
Harowtee ...	*Nil*	
Jhallawar (July 28th)	...	No change.
Ajmere (Aug. 2nd)	*Nil*	Crops will be in danger shortly.
Jeypore ...	*Nil*	High westerly winds; very hot; rain much needed; health good.
Bhurtpore (Aug. 1st)	*Nil*	Prices rising; health good.
Ulwur ...	*Nil*	Prices steady; scarcity of forage become more severely felt.

Offg. Secy. to the Govt. of India.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

Abstract of the Proceedings of the Council of the Governor General of India, assembled for the purpose of making Laws and Regulations under the provisions of the Act of Parliament 24 & 25 Vic., Cap. 67.

The Council met at Simla on Thursday, the 26th July 1877.

PRESENT :

His Excellency the Viceroy and Governor General of India, G. M. S. I., *presiding.*

His Honour the Lieutenant-Governor of the Panjáb, C. S. I.

His Excellency the Commander-in-Chief, K. C. B.

The Hon'ble Sir E. C. Bayley, K. C. S. I.

The Hon'ble Sir A. J. Arbuthnot, K. C. S. I.

Colonel the Hon'ble Sir Andrew Clarke, R. E., K. C. M. G., C. B.

Major-General the Hon'ble Sir E. B. Johnson, K. C. B.

The Hon'ble Whitley Stokes, C. S. I.

The Hon'ble T. C. Hope, C. S. I.

The Hon'ble F. R. Cockerell.

The Hon'ble B. W. Colvin.

BOMBAY REVENUE JURISDICTION ACT AMENDMENT BILL.

The Hon'ble SIR ALEXANDER ARBUTHNOT asked leave to postpone the motion which stood in his name, namely, that the Bill to amend the Bombay Revenue Jurisdiction Act, 1876, be taken into consideration. He explained that a letter had lately been received from the Bombay Government stating that the Bill in question had not yet been translated into the Native languages. The translation was, however, being proceeded with, and the Government of India would be informed as soon as it was done. Under these circumstances he thought that the further consideration of the Bill should be postponed until the translation had been published.

Leave was granted.

PANJÁB COURTS BILL.

The Hon'ble MR. STOKES introduced the Bill to consolidate and amend the law relating to Courts in the Panjáb, and moved that it be referred to a Select Committee. He said that the justification of this Bill was to be found in the schedule, where the Council would find enumerated the seven Acts through which the rules relating to the Civil Courts of the Panjáb were now scattered—*dispersa in omnes partes multitudo.* But though the primary object of the Bill was to consolidate and arrange these rules, the opportunity had not been neglected of making a few amendments which twelve years' experience of the working of those Courts had shown to be desirable. These were all set forth in the Statement of Objects and Reasons, and it was needless to take up the time of the Council by recapitulating them.

One change, however, might be held to require explanation. The Council was aware that the Panjáb was pre-eminently what the old French lawyers called a *pays de coutumes* as distinguished from the *pays de droit écrit*, by which they meant those parts of France in which the Roman law prevailed. The Panjáb Laws Act (IV of 1872, section 5) accordingly laid down with startling generality that, in questions regarding inheritance, special property of females, betrothal, marriage, dower, adoption, guardianship, minority, bastardy, family relations, wills, legacies, gifts, partition, or any religious usage or institution, the rule of decision should be "any custom of any body or class of persons"—the meaning probably was "any custom applicable to the parties concerned"—"which

is not contrary to justice, equity and good conscience, and has not been declared to be void by any competent authority," and (section 7) that all local customs should be regarded as valid unless they were contrary to justice, equity or good conscience, or had, before the passing of that Act, been declared void by any competent authority.

Now it appeared that the prevalent opinion of the Panjáb lawyers was, that a question as to the existence of an usage which had to be established by evidence was not matter for special appeal under section 372 of Act VIII of 1859, and that it would not be matter for second appeal under the corresponding section (584) of the new Code of Civil Procedure; and hereon Mr. Fitzpatrick, now one of the Judges of the Panjáb Chief Court, had made some remarks which were so clear and pertinent that MR. STOKES would do wrong if he did not read them to the Council:

"In this Province, where the great bulk of the law is customary law, I think it is desirable that this Court should have power in special appeal or on reference under section 19 (if the system of reference is to be adopted) to look into the evidence on which the question of the existence of a custom has been decided by the Courts below. I have no wish to alter in the least the enactment which gives custom so great a preponderance in the Panjáb; but I must say I view with some alarm the prospect there is before us if this Court has not the fullest power of control over the decision of questions of customary law. In the first place, though the question as to the existence or non-existence of a custom is one to be settled by evidence, it is one of far greater delicacy and difficulty than any ordinary question of fact. Moreover, a wrong decision on an ordinary question of fact has no effect beyond the sphere of the particular matter before the Court, while a wrong decision on a question of custom affects the law applicable in all subsequent cases of a similar nature. Further, the great variety of customs recognized by the Courts as having the force of law is already beginning to give rise to difficulties; and though I have no wish, as I say, to retrace our steps and give custom less preponderance than it has at present, I think we should be most careful to guard against the possibility of existing customs branching out into greater diversities than they now present. If we leave the matter altogether in the hands of the lower Courts, I apprehend existing customs will branch out into greater diversities. The differences in the evidence adduced in individual cases, and the differences of disposition in individual officers, must often lead to this, that what is in reality one and the same custom will develop different varieties in different jurisdictions. The only check on this is to give the fullest powers to the central authority to review all decisions on questions of custom."

With Mr. Fitzpatrick the Panjáb Government concurred, and the Bill accordingly contained a clause which would add (of course only in the Panjáb) to the grounds on which a second appeal might be brought the existence or non-existence, validity or invalidity, of a custom alleged to have the force of law.

His Honour THE LIEUTENANT-GOVERNOR said that he had little to add to what his hon'ble friend Mr. Stokes had already said. The Bill was one for consolidating the various enactments regarding the Courts of Civil Justice in the Panjáb. It contained little that was new, and nothing which involved the change of any important principle. It had been carefully considered by the learned Judges of the Chief Court of the Province and by other officers of experience; and it embodied the provisions which had been found necessary in practice for the regulation of the Courts of Civil Justice, and for the distribution of appellate work in those Courts. It would, when passed, make the law affecting the Panjáb Courts of Civil Justice much more clear and easy than it was at present.

The Motion was put and agreed to.

The Hon'ble MR. STOKES then moved that the Bill be published in the *Gazette of India* in English, and in the *Panjáb Government Gazette* in English and such other languages as the Local Government may think fit.

The Motion was put and agreed to.

The following Select Committee was named:—

On the Bill to consolidate and amend the law relating to Courts in the Panjáb,—His Honour the Lieutenant-Governor, the Hon'ble Sir Edward Bayley, and the Hon'ble Messrs. Cockerell and Colvin and the Mover.

The Council adjourned to Thursday, the 2nd August 1877.

SIMLA;
The 26th July 1877.

A. PHILLIPS,
Secretary to the Government of India,
Legislative Department.

Printed and published for the GOVT. OF INDIA, *in the* GOVT. CENTRAL BRANCH PRESS, *Simla.*

is not contrary to justice, equity and good conscience, and has not been declared to be void by any competent authority," and (section 7) that all local customs should be regarded as valid unless they were contrary to justice, equity or good conscience, or had, before the passing of this Act, been declared void by any competent authority.

And it appeared that the prevailing opinion of the Punjab lawyers was, that a question as to the existence of a usage which had to be established by evidence was not matter for special appeal under section 372 of Act VIII of 1859, and that it would not be matter for second appeal under the corresponding section (584) of the new Code of Civil Procedure; and therefore Mr. Fitzpatrick, however, as the Judge of the Punjab Chief Court, had made some remarks which were so clear and pertinent that Mr. Stokes would do wrong if he did not read them to the Council:—

"In this Province, where the great bulk of the law is customary law, I think it is desirable that the [illegible] should have power to [illegible] under section [illegible] [illegible]"

Mr. Fitzpatrick, the Punjab Government, concurred, and the Bill [illegible] [illegible] in the grounds on which a second appeal might be brought the existence of [illegible] custom, validity or invalidity of a custom alleged to have the force of law.

His Honour the Lieutenant-Governor said that he had little to add to what the Hon'ble Mr. Stokes had already said. [illegible] the various [illegible] regarding the Courts [illegible] the Punjab. It contained [illegible] [illegible] of the Chief Court of the Province [illegible] [illegible] [illegible] that it was at present.

The Motion was put and agreed to.

The Hon'ble Mr. Stokes then moved that the Bill be published in the Gazette of India in English, and in the Punjab Government Gazette in English and in such other languages as the Local Government may think fit.

The Motion was put and agreed to.

The following Select Committee was named:—

On the Bill to consolidate and amend the Law relating to [illegible] [illegible] and the Hon'ble Messrs. [illegible] and the Mover.

The Council adjourned to Thursday, the 2nd August 1877.

Irrigation.

REVENUE REPORT, IRRIGATION DEPARTMENT, PUNJAB, FOR THE YEAR 1875-76.

Nos. 198—211 I, dated Simla, the 23rd July 1877.

Read—

Letter from the Government of the Punjab, Public Works Department, Irrigation Branch, No. 708I of 2nd March 1877, forwarding a copy of the Revenue Report of Irrigation Works in the Punjab for the year 1875-76 by the Chief Engineer, and of the Resolution of that Government reviewing the same, with its enclosures.

OBSERVATIONS.—The Governor General in Council regrets that this report has been received $3\frac{1}{2}$ months after the prescribed date, and observes that no explanation has been furnished of the cause of delay.

2. Including all the canals in operation the area irrigated has decreased from 1,208,703 acres in 1874-75 to 1,098,429 acres in 1875-76: this unfavorable result is chiefly due to the heavy rain-fall of the year which enabled the cultivators to dispense with irrigation for their cold weather crops. The great bulk of the decrease has occurred on the two permanent canals,—the Western Jumna and the Bari Doab—and a comparison of the areas irrigated during the past eight years shows that the falling-off is much more marked on the former than on the latter canal.

Years.	Western Jumna Canal.		Bari Doab Canal.	
	Acres irrigated.	Percentage of 1868-69 to 1872-73.	Acres irrigated.	Percentage of 1868-69 to 1872-73.
Average of five years, 1868-69 to 1872-73	413,440	100·0	265,767	100·0
1873-74	311,747	75·4	232,146	87·3
1874-75	382,847	92·6	279,813	105·2
1875-76	309,595	74·9	214,599	80·7

3. A strong characteristic of the rain-fall of the year was the exceptional heaviness of the local fall near Delhi in September, and in the upper portion of the Bari Doab during August and September 1875. On the 9th September, 23 inches fell in 30 hours near Delhi, and the resulting floods caused most serious injury to the various works in the neighbourhood, while the floods in the river Ravi and in the Bari Doab breached the weir and outlet at Madhopur, besides damaging severely the newly finished earthwork of the Subraon Branch.

4. The total amount of capital sunk in the Punjab canals to the end of the year under review was Rs. 3,33,55,030, as shown in the tables of financial results attached to this Resolution, while up to the same date the excess of nett revenue over interest charges amounted to Rs. 1,91,56,700.

5. The heavy floods before alluded to increased the working expenses of the year, and the nett profits from direct revenue consequently exhibit a falling-off in comparison with the returns of previous years.

6. It is stated in para. 3 of the Resolution by the Local Government that the nett revenue of the year including land revenue was Rs. 16,58,470. If the charge for interest (Rs. 12,51,884) be deducted from this sum, there will remain a surplus of Rs. 4,06,586; but in para. 5 of the same Resolution it is stated that the nett revenue exceeds the charge for interest by only Rs. 3,85,465. The difference of Rs. 21,121 is apparently due to the deficit on the working of the Madhopur Workshops, which has been included in the one set of figures and not in the other.

ORDER.—Ordered, that copies of this Resolution and of the report be forwarded to the Secretary of State, and to the Financial and Revenue, Agriculture and Commerce Departments for information.

Ordered also, that copies of the Resolution be forwarded to the Government of the Punjab and the several other* Local Governments and Administrations in the Public Works Department, Irrigation Branch, for information.

* The Governments of Madras, Bombay, Bengal, North-Western Provinces and Oudh.
The Chief Commissioners of the Central Provinces, British Burmah and Mysore and Coorg.
The Resident at Hyderabad.
The Agents to the Governor General for Central India and Rajpootana.

Ordered further, that this Resolution, the Resolution of the Local Government, and the Chief Engineer's report, with a few selected tables, be forwarded to the Home Department for publication in the *Gazette of India* Supplement.

Proceedings of the Hon'ble the Lieutenant-Governor of the Punjab and its Dependencies, in the Public Works Department, No. 907I., dated 2nd March 1877.

READ—

Revenue Report for 1875-76 by Chief Engineer, Irrigation Works, with enclosures.

RESOLUTION.—The aggregate expenditure during the year on all works under the control of the Irrigation Department amounted to Rs. 35,67,014, of which Rs. 8,99,579 were contributed by the Native States, so that the expenditure of Government funds amounted to Rs. 26,67,435; of this, Rs. 10,52,049 was for canals in operation, including Madhopur Workshops, and Rs. 16,15,386 for those under construction.

2. The total capital invested up to the end of the year—

	Rs.
On canals in operation...	2,02,37,518
" under construction	82,69,226
Madhopur Workshops	5,84,928
	2,90,91,672
Contributed by Native States for Sirhind Canal	41,80,089
TOTAL EXPENDITURE ...	3,32,71,761

3. The total income of the canals in operation was Rs. 19,46,494 excluding, and Rs. 29,99,134 including, land revenue dependent on the works. The working expenses amounted to Rs. 13,40,664, so that the net revenue was Rs. 6,05,830, or 3·15 per cent. on the capital excluding, and Rs. 16,58,470, or 8·63 per cent. including, the land revenue dependent on the works. This shows a slight decrease in the direct, and increase on the total, returns over the preceding year.

4. If, however, the assessments be taken, the percentages are reduced to 1·37 and 6·04, respectively, on account of the heavy rain-fall of the year having enabled the cultivators to dispense with irrigation for their cold weather crops.

5. The charge for interest for the year amounts to Rs. 12,51,884, and the net revenue exceeds this by Rs. 3,85,465. For canals in operation, the excess is Rs. 7,70,811. The total excess of net revenue over interest up to the end of the year was Rs. 1,90,59,083, or about 66 per cent. of the capital of Rs. 2,90,91,672 expended.

6. There has been a great falling-off in the area irrigated during the year, which was only 1,098,429 acres, against 1,208,073 in the previous year, and 1,146,377 the average of the preceding seven years. The following table shows a comparison:—

AREA IRRIGATED.	1875-76.	1874-75.	1869-70.	Average of three previous years.
	Acres.	Acres.	Acres.	Acres.
Permanent canals ...	524,194	662,660	730,470	523,245
Inundation canals ...	574,235	545,413	530,940	521,622
TOTAL ...	1,098,429	1,208,073	1,261,410	1,044,867
				Average, 10 previous years.
RAINFALL.				
Permanent canals.	Inches.	Inches.	Inches.	Inches.
Western Jumna Canal	32·84	28·14	18·18	28·13 for 5 stations.
Bari Doab Canal	46·29	18·76	19·88	25·10 for 9 "
Inundation canals.				
Delhi and Gurgaon Irrgn. Works ...	36·50	24·92	16·10	24·83 for 5 } not quite regular.
Upper Sutlej Inundation canals ...	19·18	8·57	8·05	8·62 " 4 } not quite regular.
L. S. and C. Inundation canals ...	3·04	4·26	5·60	4·93 " 3 } not quite regular.
Indus canals	4·52	6·20	5·55	6·28 " 2 } not quite regular.

7. The working expenses amounted to Rs. 13,40,664, or nearly 69 per cent. on the direct, and 45 per cent. on the total, income: this is much in excess of the previous year, when the percentages were 59 and 39 respectively, and also of the average of the previous four years—62 and 41 per cent. This is due to the heavy repairs rendered necessary by the floods, especially at the head of the Bari Doab Canal.

WESTERN JUMNA CANAL.

8. There was a decrease of 73,252 acres in area irrigated. The decrease was chiefly under sugarcane and wheat, and increase in rice and cotton. The latter was 22·47 per cent. of the gross area irrigated.

9. The profit by the assessments of the year was 11·71 per cent. on the direct, and 22·23 per cent. on the total, income, being a decrease of 8·58 per cent. of the former, and 9·21 of the latter, in the previous year.

10. The duty obtained from the water (entering the canal) showed a decrease of one acre per cubic foot in the kharif and 28 acres in the rabbi crop.

11. The balance of water-rate uncollected at the end of the year was Rs. 4,564 more than that at the end of the previous year.

DELHI AND GURGAON WORKS.

12. There was a decrease of 2,461 acres in the irrigated area during the kharif, but an increase of 1,447 acres during the rabbi; on the whole a decrease of 1,014 acres. The variations in the irrigation from these works are entirely due to those in the rain-fall.

The rain-fall up to September was very moderate, but during this month the fall was the largest yet known—19 or 23 inches in 30 hours. There was a great decrease in sugarcane, cotton and rice, but a very slight decrease in wheat.

13. The expenditure on repairs was Rs. 11,179, or 47 per cent. less than that of the previous year, the cost during that year being abnormally high.

There was a loss of 4·50 per cent. on the total income.

BARI DOAB CANAL.

14. There was an increase of 5,121 acres during the kharif, but a decrease of 70,335 acres in the rabbi, or a decrease of 65,214 acres during the year. The former is due to the scanty rain-fall during the previous rabbi crop, and to the very small fall during May and June of this year, and the latter to the exceptional heavy rain of July, August and September, which enabled the cultivators to raise their crop without the aid of canal water. There was a decrease under rice, sugarcane and wheat, but an increase under cotton. The increase is attributable to the more even distribution of water from the present pipe outlets than from the old wooden mogahs.

15. The profit by the assessment of the year was 1·01 on the direct and 2·12 per cent. on the total income, against 3·07 and 4·64 of the previous year. The working expenses were Rs. 1,43,481, or 42 per cent. in excess of that of the previous year; the excess is entirely due to the heavy repairs rendered necessary to the outlet and weir across the Ravi at Madhopur, which were very severely damaged by the floods of July, August and September 1875.

16. The duty obtained from the water entering the canal was 10·01 acres in excess during kharif, but 13·78 acres less in the rabbi than the previous year.

17. Taking the proportion of areas of villages irrigating in each district, it is much below the averages of the previous year. There was a marked decrease in the Gurdaspur District, which was 9·20, against 15·29 of the previous year; the Superintending Engineer attributes it to the substitution of the old wooden mogahs by the earthen pipes, and also to discouraging irrigation in the upper part of the canal, so as to induce the people to take to their wells again, it being quite possible to irrigate from them alone in most of the villages along that part of the canal.

18. There was a larger falling-off in the mill-rent this year than that of the previous year; it was due to the damage done to several of the mill-houses by the heavy rain and floods of the year.

19. The balances uncollected at end of year were about one-third smaller than the previous year, *viz.*, Rs. 6,926 out of a demand of Rs. 7,10,224.

LOWER SUTLEJ INUNDATION CANALS.

20. The area irrigated was 4,195 acres in excess of the previous year, which is due to a better cold weather supply during 1875-76 than the previous year.

21. The total income showed a profit of 158·99 per cent.; it is slightly in excess of the percentage of the previous year.

22. The cost of maintenance per acre irrigated and to the cultivators were 0·58 and 1·45 respectively, against 0·97 and 1·66. The decrease is due to increase in area irrigated without a corresponding increase in the charges.

UPPER SUTLEJ INUNDATION CANALS.

23. The loss this year was 21·14 per cent. on the direct and 5·99 including the indirect revenue, against 23·18 and 3·22 of the previous year. Taking the assessment of the year, the percentages were 19·84 per cent. loss on direct and a profit of 9·02 including the indirect income. This improvement is due to an increase of 54,817 acres irrigated over the previous year. There was a slight falling-off in rice and cotton, but the area under wheat was the largest yet known, *viz.*, 57,793, against 19,566 of the previous year.

INDUS SERIES.

24. There was a decrease of 26,862 acres in comparison with previous year; the falling-off was principally in the kharif crop; it was due to the low level of the river in the months of May, June and July.

25. The loss on direct revenue was 35·34 per cent., and on the total income a profit of 6·67 per cent. The former is chiefly due to less assessment of Rs. 22,112 on account of contribution or clearance rate.

SHAHPUR CANALS.

26. The irrigated area was 2,565 acres less than the previous year; the working expenses, Rs. 5,214, and the revenue, Rs. 6,250, so that there was a profit of 4·88 per cent. on the

capital. The profit of last year was 19·82. The cause of decrease is attributed to the canals flowing a month later last year than this, consequently only about two-thirds of the area cultivated last year was brought under the plough this year.

By Order of the Hon'ble the Lieutenant-Governor,

R. HOME, *Major, R. E.,*

Offg. Joint-Secretary to Government, Punjab, P. W. D., Irrigation Branch.

CHIEF ENGINEER'S REVIEW OF REVENUE REPORT FOR 1875-76.

WESTERN JUMNA CANAL CIRCLE.

WESTERN JUMNA CANAL.

1. The addition to the capital during the year has been Rs. 5,16,138, making the total up to the end of the year, including the capitalization of abatement of land revenue, Rs. 43,27,634.

2. The principal expenditure was as follows:—

	Rs.
On Jumna dam ...	1,75,543
New Main Line ...	67,156
New Delhi Branch ...	92,206
Surveys ...	16,474
Increase of Suspense Account, being collection of materials ...	1,56,508
Sundries ...	8,251
	5,16,138

3. The Revenue Account, based on collections, shows a net profit of Rs. 6,33,559 excluding, and Rs. 10,34,837 including, land revenue dependent on the works. The percentages of profit on the outlay are 16·64 and 27·18 respectively. In the last year they were 17·18 and 28·32 respectively. The decrease is due to the increase of capital, as, although the working expenses were greater by Rs. 36,421, the revenue was Rs. 55,812 in excess of that of the previous year.

4. The net revenue was in excess of the charges for interest by Rs. 8,52,392 for the year, and Rs. 2,27,02,052 to the end of the year.

5. If the earnings of the year be taken into account, there is a falling-off in the receipts of Rs. 1,87,341, which reduces the percentages of profit to 11·72 and 22·26 respectively. This is due to the heavy rains enabling the people to dispense largely with the use of the water in the cold season.

6. The result of the past three years, based on the earnings, is as follows:—

		1875-76.	1874-75.	1873-74.
		Rs.	Rs.	Rs.
Income ...	Water-rates ...	7,64,809	9,47,929	8,10,302
	Miscellaneous ...	56,567	69,027	41,594
	Total direct ...	8,21,376	10,16,956	8,51,896
	Land revenue dependent ...	4,01,278	3,72,563	3,72,563
	Total ...	12,22,654	13,89,519	12,24,459
Working expenses ...	Works ...	1,28,120	1,03,806	1,24,626
	Establishment ...	2,47,038	2,34,931	2,48,356
	Total ...	3,75,158	3,38,737	3,72,982
Percentage of net profit on capital ...	Direct ...	11·72	20·29	15·36
	Indirect ...	22·26	31·44	27·32
	Area irrigated, acres ...	309,595	382,847	311,747

The falling-off in the water-rate is, as explained above, due to the rain-fall. The reduction in miscellaneous revenue is due to less receipts from plantations, which were quite exceptional in the preceding year, owing to the demand for timber for the re-modelling works.

7. The charges for maintenance per acre irrigated have been as follows:—

	1875-76.	1874-75.	1873-74.	Average for previous five years.
Whole canal ...	1·21	0·88	1·20	0·96
Repairs of distributaries ...	0·07	0·03	0·06	0·06

The heavy cost of repairs was due to the floods of the year, and to the fact that many of the bridges in the Delhi Division had become dangerous, as, pending the sanction to the re-modelling scheme, repairs had been delayed as long as possible.

8. The area irrigated was less than in any year since 1862-63, when it was as low as 303,361 acres. The following table shows a comparison :—

	Kharif.	Rabbi.	Total.	Rain-fall.
1875-76	188,188	121,406	309,595	32·84
1874-75	160,118	222,729	382,847	28·14
1873-74	171,630	140,117	311,747	32·36
Average of five years, 1869-70 to 1873-74 ...	202,929	210,511	413,440	28·74
Average of ten years, 1865-66 to 1874-75 ...	...	...	411,309	28·13

It will be seen that there was a larger area watered in the kharif than in either of the previous years, and that the falling-off is in the cold season, when, the ground having been thoroughly saturated, the cultivators were enabled to grow crops not requiring water.

9. The principal crops watered have been—

	1875-76.	1874-75.	1873-74.	Average of six years.
	Acres.	Acres.	Acres.	Acres.
Sugar-cane	26,555	33,439	42,068	38,733
Rice	51,827	50,029	43,818	43,756
Cotton	69,577	58,236	54,806	81,444
Wheat	80,039	151,067	83,355	145,328
Total ...	227,998	292,771	227,047	309,261

10. The percentages of flow and lift irrigation and double-cropped land were—

	Kharif.		Rabbi.		Total.		Double-cropped land.
	Flow.	Lift.	Flow.	Lift.	Flow.	Lift.	
1875-76	96·08	3·92	90·57	9·43	93·91	6·09	10·31
1874-75	96·04	3·96	91·49	8·51	93·38	6·62	13·55
1873-74	94·24	5·76	79·00	21·00	87·39	12·61	9·92
Average of five years ...	94·59	5·41	85·29	14·71	90·07	9·93	12·17

11. The proportions of kharif and rabbi irrigation have been as follow :—

	Kharif.	Rabbi.
1875-76	60·78	39·22
1874-75	41·83	58·17
1873-74	55·05	44·95
Average of six years	48·51	51·49

12. The areas irrigated in acres per cubic foot of supply have been—

	Kharif.	Rabbi.
1875-76	73	61
1874-75	74	89
1873-74	83	60
Average of five years	90	88

These calculations are especially doubtful on this canal, on account of the quantity of drainage water which enters the channel.

13. The average water-rate per acre irrigated and per cubic foot of discharge is low, as there was a decrease in the duty of the water, and the crops irrigated were of the lower classes :—

	Per acre irrigated.		Per cubic foot of supply.	
	Kharif.	Rabbi.	Kharif.	Rabbi.
1875-76	2·75	2·03	203	124
1874-75	3·01	2·08	226	187
1873-74	3·07	2·03	254	121
Average of five years	2·86	2·11	239	166

N. B.—These differ from the rates given in last year's report, which were per cubic foot utilized, while these are per cubic foot of total supply.

14. The cost of measurements and preparing the demand statements was, per 100 acres—

	1875-76.	1874-75.	1873-74.	1872-73.
	Rs.	Rs.	Rs.	Rs.
MEASUREMENTS.				
Kharif	1·65	1·74	1·84	1·37
Rabbi	2·43	1·42	2·15	2·08
DEMAND STATEMENTS.				
Kharif	0·65	0·72	0·37	0·55
Rabbi	0·93	0·58	0·53	0·54

The Superintending Engineer states that the increase of rates is due to the decrease of area dealt with.

15. The balance unrealized at the end of the year was slightly in excess of the previous year, *viz.*, Rs. 88,469 against Rs. 83,905, but both show a great improvement over 1873-74, when the balance was Rs. 1,81,555.

DELHI AND GURGAON IRRIGATION WORKS.

16. There was no expenditure on capital account during the year; the total amount was, as before, Rs. 1,83,410.

The amount of interest due for the year was Rs. 8,253, and the total deficit, excluding land revenue, was up to date Rs. 4,07,996.

17. There is at present in the accounts a sum shown as profit, including land revenue dependent on the works, amounting to Rs. 1,17,319; but, as the Financial Commissioner has now definitely stated that nothing beyond the water-rates levied by the Canal Department has been charged on these lands in addition to the land revenue at unirrigated rates, it appears probable that we must accept the deficit given in the preceding para. as the financial result of them. The correction has not been made in this year's accounts, because some slight doubt exists as to whether the Financial Commissioner has included the works in the Delhi territory, regarding which a further reference has been made.

18. The amount of direct income for the year was Rs. 4,744, being Rs. 1,842 less than in the previous year. The working expenses were Rs. 12,580, so that the nett loss, exclusive of interest, was Rs. 7,836, or 4·27 per cent. on the capital.

19. The assessments of the year only amounted to Rs. 4,326, showing a slightly worse result than the collections. The principal falling-off was in water-rate Rs. 418. The miscellaneous revenue was about the same, but a decrease of Rs. 345 in the sale of produce was balanced by an increase of Rs. 355 in the fines, which only amounted to Rs. 10 in 1874-75. The Superintending Engineer explains that they were levied on account of the cultivators having occupied Government lands without authority.

20. The areas irrigated and the rain-fall have been as follow:—

	1875-76.	1874-75.	1873-74.	Average of five years.
	Acres.	Acres.	Acres.	Acres.
Kharif	154	2,615	684	1,484
Rabbi	8,260	6,813	15,849	9,168
TOTAL ...	8,414	9,428	16,533	10,652
	Inches.	Inches.	Inches.	Inches.
Rain-fall—average of five stations	36·5	24·9	39·0	24·1

21. Although the total rain-fall is similar to that of 1873-74, the distribution was very different; on the 9th September, 19 inches fell in 24 hours and 23 inches in the 30 hours. The reading on the Najafgarh jhîl gauge rose 13 feet in 36 hours, that is to say, that within that time fifteen thousand million of cubic feet of water entered the reservoir. The water was flowing three feet over the parapets of the bridges on the cut in rear of the old lines in the Delhi Cantonments. Old bridges of the most solid nature, built in the time of the Moguls, have been carried away, and the country generally was very much damaged.

22. The Civil Officers in Gurgaon have objected to the re-construction of some of the works, and the whole question of their maintenance is under consideration.

23. The principal crops grown are shown below:—

	1875-76.	1874-75.	1873-74.	Average of five years.
	Acres.	Acres.	Acres.	Acres.
Sugarcane	...	564	...	...
Cotton	1	28	3	25
Rice	16	969	...	292
Wheat	5,647	5,697	13,423	7,242

24. The cost of measurements per 100 acres was Re. 1·4, against Re. 2·11 in the previous year, and that of preparing the demand statement Re. 0·94, against Re. 0·79.

BARI DOAB CIRCLE.

Bari Doab Canal.

25. The capital debit to this canal, exclusive of interest, was increased during the year by Rs. 3,88,332, making the total capital at the end of the year Rs. 1,45,16,124. In this is included Rs. 3,917 for capitalization of abatement of land revenue.

26. The principal expenditure was on additions to the head works, distributaries, and to the works on the Kasur and Sobraon Branches now approaching completion.

27. The charge for interest for the year amounted to Rs. 6,43,912, and the balance unpaid at the end of the year to Rs. 48,51,568.

28. The Revenue Account given by the Examiner, which is based on collections, shows that the profit of the year, exclusive of the land revenue dependent on the canals, amounted to Rs. 2,90,946, or 2·06 per cent. on the Capital, and including that item to Rs. 4,57,479, or 3·24 per cent. This is slightly less than in either of the two previous years, and the decrease was caused by the heavy cost of repairs rendered necessary by the unusual rain-fall of the year.

29. The earnings of the year, that is to say, the revenue of the kharif and rabbi crops of 1875-76, are less than the collections by Rs. 1,48,388. This falling-off was in the rabbi crop, and was due to the heavy rain enabling the cultivators to dispense with the use of canal-water.

30. The rates of profit, calculated according to the earnings of the year, would thus have been 1·09 per cent. and 2·12 per cent. respectively, excluding and including the land revenue dependent on the canals.

31. There was an increase in the expenditure on repairs of Rs. 94,921, due entirely to the damage done to the canal head-works and to the mills; there was a decrease on all other items except plantations, on which there was a slight increase of expenditure; 118 acres were planted during the year.

32. There was an increase in the charge for establishments of Rs. 13,415 on direction and accounts, and Rs. 14,244 in executive establishment, or Rs. 27,659 in all. This is mostly due to promotions in the establishments, and the necessity for employing the Officers of the Special Works Division on the heavy repairs to the weir at Madhopur.

33. The total cost of maintenance or working expenses amounted to Rs. 4,80,939 for the irrigation of 214,599 acres, or Rs. 2·24 per acre. This is somewhat more than Re. 1 per acre in excess of the rate in the previous year—Re. 0·75 and Re. 0·86 in excess of the cost in 1873-74 and 1872-73 respectively. The reasons for the excess have been given in the preceding paragraphs.

34. The nett demands for water-rate during the year, including the balances of the previous year, amounted to Rs. 7,08,651, of which only Rs. 6,927 remained uncollected at the end of the year, against Rs. 10,191 in the previous year. The amount remitted was Rs. 4,831.

35. There was a decrease of Rs. 1,044 in the miscellaneous revenue, entirely due to the falling-off in mill-rents, Rs. 15,874. There was an increase in every other item, especially in the receipts from plantations and sales of canal produce—Rs. 9,582 and Rs. 5,416 respectively. It was explained in the report of 1874-75 that the mill-rents were very high owing to the canal not being closed; they were in work for more days, and the rate is a daily one. In this year, on the contrary, the damage done to the canal, and also to the mills themselves, by the extraordinary floods of the year, similarly reduced the returns.

36. There is a falling-off of Rs. 58,185 in the land revenue dependent on the canals, due to the same causes as the reduction in water-rates; the average rate is only Re. 0·73 per acre, against 0·869 and 0·88 in the two previous years. The details are given in Appendices B, C, D of Superintending Engineer's report. The total amount assessed was Rs. 1,57,600.

37. The demands on the above account, including old balances, amounted to Rs. 2,46,573, the remissions to Rs. 73,037, and the balance uncollected to Rs. 4,990, little more than one-third of the balance at the end of the previous year.

The remissions were—

	1875-76.	1874-75.
	Rs.	Rs.
For Jagirdars' rights	41,278	33,233
„ well lands	30,552	6,176
„ sundries	1,207	2,885
	73,037	42,294

38. The Superintending Engineer, in para. 10 of his report, has given a comparative table of the rain-fall, which accounts very clearly for the falling-off in the irrigation of the year as compared with that of previous years. The rain-fall was in—

	Excess over 1874-75.		Total.	Total fall, 1875-76.
	Kharif.	Rabbi.		
Gurdaspur	32·52	3·37	35·89	61·43
Amritsar	31·10	0·85	31·95	45·90
Lahore	15·57	0·15	15·72	31·53

The maximum fall in these districts since 1863-64 is,—in Gurdaspur, 45·1 in 1863-64; in Amritsar, in the same year, 37·8; and in Lahore 25·7 inches in 1867-68. These figures are taken from a comparative abstract of meteorological results prepared in the office of the Financial Commissioner.

39. The following table shows a comparison of the areas irrigated:—

	Kharif.		Rabbi.		Total.
	Acres.	Per cent.	Acres.	Per cent.	
Average, 1868-69 to 1872-73 ...	92,563	34·83	173,204	65·17	265,767
1873-74 ...	100,913	43·5	131,233	56·5	232,146
1874-75 ...	87,214	31·2	192,599	68·8	279,813
1875-76 ...	92,335	43·0	122,264	57·0	214,599

It will be seen that the falling-off was in the rabbi, which is accounted for by the rain-fall being late, very little having fallen until July, and then the excessive fall so saturated the ground that irrigation was not afterwards required.

40. In the principal crops grown there is a falling-off in all but cotton, which shows the largest area since 1867-68:—

	Average of eight years.	1874-75.	1875-76.
	Acres.	Acres.	Acres.
Sugarcane	9,210	8,900	8,729
Rice	38,460	27,638	24,511
Cotton	18,128	17,612	33,215
Wheat	131,133	145,593	91,218

41. There is a falling-off of 5,558 acres, or rather more than one-fifth, in the area of double cropped lands as compared with last year, which is satisfactory.

42. The proportion of flow irrigation varies but little, but is slightly in excess in the current year and in the kharif:—

	Year.	Kharif.	Rabbi.
Average of five years	89·34	92·98	87·17
1874-75	87·66	92·93	85·27
1875-76	89·83	93·80	86·84

43. The water-rate per acre irrigated and per cubic foot entering the canal is shown in the following table; also the duty per cubic foot:—

	Duty.	Kharif.		Rabbi.		Duty.
		Rate per acre.	Per cubic foot.	Per acre.	Per cubic foot.	
	Acres.					Acres.
1875-76	49·14	3·13	153·69	2·16	173·48	80·17
1874-75	39·13	3·17	124·25	2·15	202·20	93·95
1873-74	40·24	3·25	131·05	2·17	178·49	82·44
1872-73	47·90	3·16	151·59	2·17	173·22	79·28
1871-72	34·73	2·64	91·56	2·06	241·00	108·25
Average ...	42·22	3·07	130·42	2·14	193·67	88·82

44. The cost of repairs to the canal and distributaries was less than in the previous year, as the canal could not be closed until late in the year, owing to the water being required at Lahore during the visit of His Royal Highness the Prince of Wales. The following shows the rate per mile :—

	1875-76.	1874-75.	1873-74.
	Rs.	Rs.	Rs.
Canal	178·36	193·33	337
Distributary	48	64	52

This will probably lead to increased cost in the ensuing year, as there have now been two seasons in which a full clearance has not been possible.

45. There was a slight increase in the cost of measurements and preparing the demand statements, but the latter were submitted to the Deputy Commissioners before the fixed dates.

46. On the whole, this has been a disastrous year to the canal, owing to the excessive floods and rain-fall, which not only damaged the canal, but reduced the area of irrigation.

LOWER SUTLEJ AND CHENAB INUNDATION CANALS.

47. The capital was increased during the year by Rs. 347, making the total up to the end of the year Rs. 1,07,908.

48. The direct income, as shown by the Examiner of Accounts, amounts to Rs. 1,21,403, but this includes the contributions from the labor fund (zarnágha), and the value of statute labor. The actual collections only amounted to Rs. 5,531.

49. The principal item of income on these canals is the land revenue dependent on them, amounting to Rs. 2,13,299, and including this the operations of the year show a profit of Rs. 1,71,008 or 158·98 per cent.; the loss by direct income only was Rs. 39·31 per cent.

50. Including the land revenue, the receipts for the year have exceeded the charge for interest by Rs. 1,66,160, and up to the end of the year by Rs. 31,52,735.

51. The expenditure on maintenance has been as follows. This does not include the statute labor.

	1875-76.	1874-75.	1873-74.
	Rs.	Rs.	Rs.
Works from Imperial Funds	8,623	9,761	11,572
Fine Fund	26,337	12,956	23,708
Establishment	39,199	44,017	39,178
TOTAL ...	74,159	66,734	74,458

52. The miscellaneous receipts and the expenditure from the Fine Fund for the last three years have been as follow :—

	1875-76.	1874-75.	1873-74.
	Rs.	Rs.	Rs.
Miscellaneous receipts	5,531	5,127	8,229
Expended from Fine Fund	26,337	12,956	23,708
TOTAL ...	31,868	18,083	31,937

53. The number of statute laborers called out was less than in the previous year. The following table gives the details :—

	1875-76.		1874-75.		1873-74.	
	Number.	Percentage.	Number.	Percentage.	Number.	Percentage.
Present	410,882	80·71	529,042	81·45	451,759	83·53
Remitted	30,978	6·09	35,365	5·44	33,449	6·19
Absent	67,192	13·20	85,132	13·11	55,586	10·28
TOTAL CALLED OUT ...	509,052	...	649,539	...	540,794	
Fines levied, Zarnágha	Rs. 33,604	...	Rs. 42,566	...	Rs. 28,315	

54. The value of the statute labor employed, as calculated at the rate of six annas per man, the current rate of the district, is Rs. 1,54,081. The amount entered in the Provincial accounts, Rs. 89,535, is the value calculated at the time the settlement was made, since when the price of labor has very much increased.

55. The following table shows the areas irrigated. That in this year is the largest on record.

	Kharif.		Rabbi.		Total.
	Acres.	Percentage.	Acres.	Percentage.	
Average of five years	136,422	61·80	84,329	38·20	220,751
1874-75	163,605	59·77	110,083	40·23	273,688
1875-76	134,280	48·32	143,603	51·68	277,883

56. The kharif crop was below the average, owing to the late date at which the rivers rose, but they rose so high and continued in flood so long that there was a large increase in the rabbi.

57. The same reasons which affected the area irrigated also influenced the nature of the crops grown, reducing the acreage under indigo, rice and sugar, and increasing the wheat and turnips; the following table gives a comparison with the average. The details are given in Superintending Engineer's report, para. 13.

	Average of five years.	1875-76.	1874-75.
	Acres.	Acres.	Acres.
Indigo	37,328	33,189	51,399
Cotton	24,042	25,127	30,180
Rice	8,914	7,732	9,463
Sugarcane	3,230	2,923	3,497
Millet (Jowár)	44,830	41,698	50,337
Wheat	41,673	64,406	60,261
Turnips	15,526	25,324	19,331

58. The cost of irrigation to the cultivators has been lower than in any year for the last six years—

	Average of five years.	1875-76.	1874-75.
	Rs.	Rs.	Rs.
Value of labor supplied	1,86,152	1,54,081	1,98,391
Fine Fund	37,068	33,604	42,566
Land Revenue	2,13,299	2,13,299	2,13,299
Direct water-rate assessments	672	679	679
Total ...	4,37,191	4,01,663	4,54,935
Per acre ...	1·98	1·45	1·66

59. The total cost of maintenance, which shows approximately what would have been the cost to Government if statute labor was not in existence, has been—

	1875-76.	1874-75.	1873-74.
	Rs.	Rs.	Rs.
Works from Imperial Funds	8,623	9,761	11,572
Fine Fund	26,337	12,956	23,708
Establishment	39,199	44,017	39,178
Value of statute labor	1,54,081	1,98,391	1,69,410
Total	2,28,240	2,65,125	2,43,868

60. The balance at credit of the (Fine Fund) Zarnágha at the end of the year was Rs. 2,19,324. It is very difficult with the small establishment in this division to superintend properly any large expenditure in addition to the ordinary work; but the Superintending Engineer has been asked whether the same rolls which suffice for assessing the amount of fine would not suffice for fixing an amount of compensation to be paid to laborers who are detained

beyond the usual time, in consequence of the number of absentees making it impossible for those present to complete the clearance in the usual time.

61. In paragraph 17 of the Superintending Engineer's report the duty of the water is calculated at 66·97 acres per cubic foot of supply, against 46·93 acres in the previous year, which is satisfactory; but the calculations are very rough.

62. The cost of measurements is somewhat less than in the previous year.

63. The rain-fall was generally less than in 1874-75, varying from 4·2 at Shujabad to 0·6 at Mailsi, while last year it varied from 7·9 at Mooltan to 0·6 at Mailsi.

UPPER SUTLEJ INUNDATION CANALS.

64. The capital of these canals was increased during the year by Rs. 22,777, which raised the total, including capitalization of abatement of land revenue, to Rs. 5,15,985.

65. The revenue account is affected by corrections for past years; with the exception of a small amount in the Lahore District, the whole is shown as land revenue dependent on the canals, and the gross total is Rs. 83,620, and the loss for the year on the working of the canals is Rs. 29,446, and up to the end of the year Rs. 1,71,596.

66. The total deficit, including interest, amounts to Rs. 5,03,839.

67. The total assessments of the year amount to Rs. 90,096, which would reduce the deficit to Rs. 22,970 for the year, and to Rs. 1,65,120 in all.

68. The following table shows the areas irrigated in the last two years compared with the average of five years:—

	Kharif.	Rabbi.	Total.
	Acres.	Acres.	Acres.
Average	56,526	33,237	89,763
1874-75	49,749	34,371	84,120
1875-76	48,719	90,218	138,937

This shows that the year has been a successful one, the area irrigated being larger than in any previous year, except 1869-70, when 148,924 acres were irrigated. A bad year for the permanent is always a good year for inundation canals, owing to the heavy rain swelling the volume in the rivers.

69. It is very unsatisfactory that the operations of the year should result in a loss of 5·99 per cent. on the capital invested; and it is evident that the whole subject must be reconsidered at the end of the five years for which the rates have been fixed. There is no doubt that many lands are benefited besides those that are irrigated; for if these canals were stopped, the height of the spring-level would be lowered in the neighbourhood, and the lands would rapidly become unculturable, as it is in the portions of the district not affected by the canals or by the river.

70. There is a slight decrease in the area of the more important crops, as shown by the annexed table, but a large increase in wheat:—

	Average of five years.	1874-75.	1875-76.
	Acres.	Acres.	Acres.
Rice	11,670	8,922	7,776
Cotton	11,261	14,380	11,721
Sugarcane	39	57	43
Wheat	19,866	19,566	57,793

71. The duty of the water per cubic foot of discharge has been 40·13 acres in the kharif, and 152·14 in the rabbi. The Katora and Lower Sohág have been included for the first time; they are still in an undeveloped state, especially the latter. The Superintending Engineer's report, paragraph 18, gives the detail for each canal.

72. The cost of repairs is shown below:—

	1875-76	1874-75.
	Rs.	Rs.
Per mile of canal	237·35	213·15
Per mile of distributary	146·47	162·32

The figures for 1874-75 differ from those in the last report, owing to the addition of the Katora and Lower Sohág. The increase in canal repairs in this season was due to the heavy floods; the apparent decrease on those of the distributaries, to the repairs not having been executed at the end of the year.

73. The cost of measurement per 100 acres has been—

	1875-76.	1874-75.
In the Lahore District	2·34	2·37
In the Montgomery District	0·717	1·06.

In the latter district the work is done by the patwárís, and the result is satisfactory.

The cost of preparing the demand statements has been :—

	1875-76.	1874-75.
In Lahore	0·58	0·98
In Montgomery	0·34	0·36

74. The balance uncollected at the end of the year amounted to Rs. 26,505, against Rs. 13,187 in the previous year. This is due to the large increase in the rabbi irrigation.

The discharges of the River Sutlej measured during the year were—

	Cubic feet.
20th December 1875	9,819
14th January 1876	9,466

INDUS INUNDATION CANALS.

75. The capital account of these canals was increased during the year by Rs. 1,06,581, making the amount at the end of the year Rs. 5,75,211, which includes capitalization of abatement of land revenue.

76. The total direct revenue amounts to Rs. 24,381; but I have heard from the Financial Commissioner that there was a sum of Rs. 24,464 erroneously credited to another Department, which was discovered too late for entry in the Examiner's accounts.

77. The amount credited as land revenue dependent on the canals is Rs. 1,97,024; this is due to correction of last year's accounts, as will be seen in the foot-note to the abstract of financial results. The collections of the year were Rs. 1,38,620.

78. The new rates of assessment of the fluctuating or indirect revenue dependent on the works came into force from 1st April 1874.

The amounts of collections were as follow :—

	Rs.
1874-75	1,39,342
1875-76	1,38,620

The demands on this account were fixed by the Settlement Commissioner, and the estimated share of which to be credited to the Irrigation Department was computed by that officer as follows :—

	Rs.	A.	P.
Two-thirds of chahi nahri jama	98,065	12	0
The whole of the banjari jama	71,652	14	0
TOTAL ...	1,69,718	10	0

But this amount is subject to fluctuations on account of two causes—

1st.—Remissions.

2nd.—Newly irrigated lands.

79. The result of the working of the year, according to the closed accounts, is a loss of Rs. 1,65,632, or 35·35 per cent. on the capital excluding, and a profit of Rs. 31,392, or 6·7 per cent. including, the land revenue dependent on the canals; as this latter is the principal item of revenue on these canals, the result is satisfactory.

80. If we make the corrections noted above, we have for the working of the year—

		Rs.	
Direct revenue ...	... ...	24,381	
Corrections ...	... ...	24,464	
	Total ...	48,845	Loss Rs. 1,41,168, or 30·13 per cent.
Land revenue ...	... ...	1,38,620	
		1,87,465	
Working expenses	... ...	1,90,013	
Loss ...	... ...	2,548, or 0·54 per cent.	

81. The amount of unpaid interest at debit of these canals, if only the direct income be considered, was Rs. 1,90,010 for the year, and Rs. 17,85,190 to the end of the year; but, including the land revenue dependent on the canals, the accounts show a profit of Rs. 7,014 for the year, and Rs. 1,92,470 to the end of the year. The latter is the only correct way of calculating the result of these works, as the direct revenue is only the estimated value of the half cost of clearance which is paid by the cultivators; there are no water-rates.

These figures differ from those in the preceding paragraph, because they include the corrections on account of the last year.

82. The addition to the capital was on account of the purchase of Abdul Rahím's Canal in I'sa Khel, and to river embankments for the protection of the country from floods.

83. The cost of maintenance is less than in the previous year by a few rupees only.

84. The miscellaneous revenue is less by Rs. 350, which is due to a falling-off in the sale of timber and fuel.

85. The following table shows the rain-fall and the areas irrigated; there is a falling-off in the present year in the area, on both crops, below that of last year, and of the average also, owing to the low level of the river in the three first months of the year :—

	1875-76.	1874-75.	Average of five years.
	Acres.	Acres.	Acres.
Kharif	103,324	121,804	120,054
Rabbi	41,636	50,018	46,677
Total ...	144,960	171,822	166,731
	Inches.	Inches.	Inches.
Rain-fall	9·20	9·90	7·64

86. The principal falling-off in area irrigated is in indigo, wheat, and millets. The following table shows the comparative areas :—

	Average of five years.	1875-76.	1874-75.
	Acres.	Acres.	Acres.
Rice	9,108	9,383	9,839
Indigo	15,867	9,956	14,953
Cotton	25,968	28,182	29,934
Wheat	41,989	39,768	45,270
Millets	55,493	38,830	54,299

87. The percentage of lift irrigation is greater; it was 11·13 in the kharif and 4·77 in the rabbi; but Superintending Engineer explains that it is almost a constant quantity, the percentage being greater because the whole area is less.

	Flow.	Lift.
Average of five years	90·97	9·03
1875-76	90·70	9·30
1874-75	91·81	8·19

88. The cost of the measurements by patwárís seems to be steadily on the increase, which is not satisfactory, and the civil authorities will be addressed on the subject. That for preparing the demand statements is also high in the year under review. The rates are as follow per 100 acres :—

	1875-76.	1874-75.	1873-74.
Measurements	2·54	2·34	1·59
Demand statements	0·08	0·7	0·24

89. The cost to Government of the clearance is more by Rs. 5,436 than it would have been if the full half cost had been levied from the cultivators, but is less by Rs. 20,772 than in the previous year.

90. The minimum discharges of the Indus in December and January were 23,039 and 21,041 cubic feet per second, respectively, while the reduced levels of the water were 1·8 and 2·35 higher than in 1874-75. This would seem to show that Mr. Garbett's statement in 1874-75, that the bed of the river was lower, is erroneous, but that the level fluctuates with the position of the main stream and the alterations in the silt deposits.

SHAHPUR CANALS.

91. There was no addition to the capital during the year. The amount invested remains as before, Rs. 21,221.

	Rs.
92. The expenditure on maintenance has been on clearances	4,448
Establishment	766
Total	5,214

93. The revenue was	6,250
The net profit, exclusive of interest, was ... ... or 4·88 on the Capital.	1,036
And inclusive of interest ... ... for the year, and Rs. 5,708 to the end of the year.	80

94. The area irrigated was 4,041 acres, which showed a decrease of 2,565 on 1874-75, but was slightly in excess of that in 1873-74. The late rising of the river probably caused the deficiency.

95. The average rate of maintenance was Rs. 1·29 per acre, and of water-rate 1·54 per acre. Both are in excess of the rates of the last two years.

96. The principal crops irrigated were :—

	1875-76.	1874-75.
Cotton	1,642	3,143
Jowár	621	776
Wheat	759	481
Gram	516	709

97. The management of these canals is in the hands of the Deputy Commissioner.

GENERAL.

98. The Capital debits to each series of canals, exclusive of interest, according to the examiner's returns, stand thus :—

SERIES OF CANALS.	Capital, 1st April 1875.	Addition during the year 1875-76.	Capital on 1st April 1876.	Add contributions.	Grand total capital, 1st April 1876.
Canals yielding Income.	Rs.	Rs.	Rs.	Rs.	Rs.
Western Jumna Canal	38,11,496	5,16,138	43,27,634	......	43,27,634

MADHOPUR WORKSHOPS ...	5,66,211	18,717	5,84,928	......	5,84 928
GRAND TOTAL ...	2,64,90,938	26,79,721	2,91,70,659	41,80,089	3,34,50,748

99. The interest debited to each series of canals is as follows :—

SERIES OF CANALS.	ON CAPITAL OUTLAY.		
	To 1st April 1875.	During 1875-76.	Total.
	Rs.	Rs.	Rs.
Western Jumna Canal	36,63,376	1,82,445	38,45,821
Delhi and Gurgáon Irrigation Works	2,18,341	8,253	2,26,594
Bári Doáb Canal	1,00,10,789	6,43,912	1,06,54,701
Lower Sutlej and Chenab Inundation Canals	66,445	4,848	71,293
Upper Sutlej Inundation Canals	3,09,376	22,867	3,32,243
Indus Inundation Canals	2,47,833	24,378	2,72,211
Shahpur Canals	3,868	956	4,824
Sirhind Canal	7,36,402	3,09,566	10,45,968
Swát River Canal	8,955	3,143	12,098
Special Survey, Deraját Circle	27,226	10,030	37,256
Ditto, Lower Bári Doáb Circle	44,543	15,954	60,497
Mádhopur Workshops	2,43,043	25,532	2,68,575
TOTAL ...	1,55,80,197	12,51,884	1,68,32,081

100. The estimated value of the crops irrigated during the year was as follows :—

Western Jumna Canal	1,36,52,833
Delhi and Gurgáon Irrigation Works	2,60,059
Bári Doáb Canal	64,15,958
Lower Sutlej and Chenab Inundation Canals	37,35,430
Upper Sutlej Inundation Canals	14,73,644
Indus Inundation Canals	46,56,230
Shahpur Canals	42,030
TOTAL ...	3,02,36,184

101. The following statement shows the rainfall and area irrigated by the permanent and inundation canals for five years :—

SERIES OF CANALS.	1871-72.	1872-73.	1873-74.	1874-75.	1875-76.
Rainfall.	Inches.	Inches.	Inches.	Inches.	Inches.
Western Jumna Canal	70·17 to 10·7	46·56 to 20·2	49·9 to 12·5	77·6 to 9·9	52·7 to 23·3
Delhi and Gurgáon Irrigation Works ...	27·8 " 8·5	30·40 " 20·4	44·6 " 34·0	31·3 " 16·8	46·4 " 23·6
Bári Doáb Canal	65·35 " 9·33	53·23 " 18·87	55·29 " 17·87	50·18 " 10·30	68·09 " 23·16
Lower Sutlej and Chenab Inundation Canals	5·24 " 0·71	9·16 " 3·53	8·10 " 2·59	7·9 " 0·6	3·7 " 0·6
Upper Sutlej Inundation Canals ...	7·78 " 9·0	19·18 " 10·80	9·82 " 6·5	9·40 " 7·10	35·75 " 7·00
Indus Inundation Canals	3·0 " 1·3	14·20 " 2·50	8·1 " 0·7	9·9 " 1·3	9·2 " 0·6
Areas irrigated.	Acres.	Acres.	Acres.	Acres.	Acres.
Permanent Canals	731,455	580,616	543,893	662,660	523,194
Inundation Canals	431,749	573,522	445,930	545,413	574,235
TOTAL ...	1,163,204	1,154,138	989,823	1,208,073	1,097,429

102. The present season was unfavourable for all the canals except those on the Lower Sutlej and Chenab, owing to the great amount of rainfall and the late rising of the rivers.

H. W. GULLIVER, *Colonel, R.E.,*
Chief Engineer, Irrigation Works, Punjab.

IENT OF INDIA,

DEPARTMENT OF REVENUE, AGRICULTURE, AND COMMERCE.

Weekly condition report of the distressed districts of the Mysore Province.

PROVINCE OF MYSORE.

(*No.* 24.)

Condition report for the week ending 21st July 1877.

Bangalore District.—Markets fairly supplied. Prices have risen in all the taluks but Magadi, where they were steady. Excepting showers in some parts of the Nelamangala taluk and at Bangalore, there has been no rain throughout the district, and the crops are withering in consequence. Distress continues to be very great. Cholera, fever, diarrhœa, &c., are still prevalent.

Kolar District—Markets moderately supplied. Prices have risen in all the taluks. No rain during the week except at Chikballapur, where 20 cents were registered. Water-supply diminishing. The standing crops are generally withering for want of rain. Public health is bad owing to the prevalence of fever, dysentery, diarrhœa, &c.

Túmkúr District.—Markets continue fairly supplied, except in the Kunigal taluk where the supply was moderate. Prices of food-grains remained stationary in three taluks, but rose in the other five taluks. Excepting at Túmkúr and Tiptur, where a fall of 8 and 60 cents respectively were gauged on the 21st instant, no rain fell in the district during the week. Ragi and other dry crops are reported to be fast withering. Small-pox, cholera, diarrhœa and fever are still prevalent.

Mysore District.—Markets fairly supplied, except in the Ashtagram, Heggaddevankote, Mandya and Malvalli taluks, where the supply received was moderate. Prices have risen in all the taluks. There has been no rain except at Periyapatna and Mandya, where 12 and 20 cents were respectively registered, and scarcity of water is beginning to be felt. The standing crops have been either lost or are failing fast. Later ragi has not been sown as yet. Prospects are getting worse, and the public health is bad, cholera, small-pox, fever and dysentery being still prevalent.

Hassan District.—Markets fairly supplied, except in the Harnhalli and Arkalgúd taluks, where importation was slack. Prices had risen in all but two taluks, where they were stationary. Rain fell only in 4 out of 9 taluks, the quantity registered at the head-quarters thereof varying from 10 cents to 1·20 inches. The standing crops in the Hassan, Belur, and Attikuppa taluks have suffered both from want of rain and the attacks of insects, but those in the Manjarabad and Channaraypatna taluks are doing well, with the exception, however, of maize in the latter. Black and green gram and maize were harvested in the Attikuppa taluk. Cholera, fever, dysentery and small-pox are still prevalent.

Shimoga District.—Markets fairly supplied, except in the Honnali, Kavaledurga, Nagar and Channagiri taluks. Prices of food-grains remained stationary in three taluks, but rose in the other five taluks. Rain fell in five taluks, the maximum quantity registered at the head-quarters amounting to 5·09 inches. The standing crops, except in the Malnad, are in need of rain. Cholera and fever are still prevalent.

Kadur District.—Markets continue fairly supplied, except in the Lakvalli taluk. Prices rising. Rain fell in 5 out of 6 taluks, the quantity registered at the head-quarters ranging from 2 cents to 3·60 inches. The crops in the Tarikere, Chikmagalur and Banavar taluks are withering for want of rain, while in the other taluks they are doing well. The prospects continue indifferent, and the public health is bad owing to the prevalence of fever, small-pox and cholera.

Chitaldroog District.—Markets fairly supplied, except in some parts of the Davangere, Pavagada and Budihal taluks. Prices are fluctuating. No rain during the week. The standing crops on dry lands are generally fading; but those under tanks and kapile wells are in good condition. It is feared that all the crops will die away, should there not be a speedy fall of rain. Cholera, fever and dysentery prevail, except in the Dodéri and Hiriyur taluks.

General Remarks.

The reports for the week ending 21st July 1877 are more discouraging than those of the previous weeks. The rainfall was scanty except in a few taluks of the Kadur and Shimoga districts. The young crops, especially those recently sown, were fast withering from drought, and the rise in the price of grain had increased the distress among the poorer classes who were reduced to great straits. Since the 21st, however, the weather has been pretty favourable. Good showers of rain had fallen in Bangalore, Túmkúr and Mysore, and the reports from other districts are awaited. The outturn of the later crops that may be saved, if the present

favourable weather continues, would, it is apprehended, be very little, as a greater portion of the sowings had already withered or failed for want of seasonable rain. It is still possible to get a good crop in many places from fresh sowings, provided there is a good and continued rainfall.

2. Public health remains unchanged, and no improvement can be expected so long as the present scarcity lasts and the high prices of food-grains continue. It is said, and there can be no doubt of the fact, that, owing to enhanced cost of living, many respectable families are subsisting on half the proper quantity of food necessary to preserve them in health. The number of deaths from cholera reported during the week was 197, or 42 more than in the previous week.

3. The number of works in progress under revenue officers was 1,791, or 13 more than in the preceding week. The increase was chiefly under "Tank works." The daily average number of persons employed was 28,153, or 1,883 more than that of last week. The increase was principally in the Bangalore and Kolar districts.

4. The amount appropriated for expenditure on the above works was Rs. 16,10 936, of which Rs. 10,83,890 were expended, leaving an available balance of Rs. 5,27,046. The expenditure during the week was Rs. 20,613, or Rs. 2,721 less than in the previous week, as shewn under :—

	Past week. Rs.	Present week. Rs.
Bangalore district	9,403	5,401
Kolar "	3,096	3,939
Túmkúr "	2,345	1,640
Mysore "	550	1,612
Hassan "	1,751	2,638
Shimoga "	1,788	1,938
Kadur "	459	478
Chitaldroog "	2,142	1,923
Bangalore Municipality	1,444	1,044
Mysore "	356	...
Total ...	23,334	20,613

It is noticeable that, in the Bangalore district, although a larger number of coolies had been employed during the week under review, yet the amount shewn as expended is considerably less than that of the previous week. It is probably owing to payments not being made regularly. The Deputy Commissioner's attention will be drawn to this point.

5. The daily average number of persons employed on works carried on under officers of the Professional Department was 20,045, or 1,294 less than in the previous week. The Supervisor in the Chitaldroog Range reports that, owing to the scarcity in the villages, many are quitting the works in search of grain in other districts. In the Hemavati and Cauvery Divisions the decrease is owing, it is said, to ryots being busily engaged in ploughing and planting, and no increase in numbers is expected until the channels which have been opened are again closed. The decrease in the other divisions is attributed partly to insufficiency of wages owing to enhanced prices of food-grains, and partly to many of the coolies being unable to do a proper day's work. It is hoped that the introduction of the new scale of wages, the reduction of tasks by 25 per cent. in cases where the physique of the coolies renders such a measure necessary, and the daily or more frequent payment of wages will result in drawing a larger number of persons requiring relief to the works under the Public Works Department.

6. The number of recipients of gratuitous relief is still on the increase. The daily average number fed this week was 151,436, consisting of 33,778 men, 55,861 women and 61,797 children. The increase over past week was 13,876, as shewn hereunder :—

	Increase.	Decrease.

Hassan "	5,315
Shimoga "	517
Kadur "	749
Chitaldrood "	13,538
Bangalore Municipality	9,358
Mysore "	1,279
Total ...	87,472

8. The weight of grain imported by rail during the week, including the consignments to the Kolar-road station, was 4,061 tons, or 363 more than in the previous week as noted below:—

	Tons.
From Madras	3,535
" Beypore and Malabar district	229
" Trichinopoly, Tanjore and Negapatam	78
" other places	219
Total ...	4,061

9. The President of the Committee appointed for the examination of grain brought into Bangalore, reports that, from 25th May to 30th June, about 886 bags, suspected to contain damaged rice, were examined, of which all but 252 were passed.

10. As a proof of the increased activity of the trade ever since the commencement of famine, it may be interesting to know that, from November 1876 up to 21st July 1877, about 117,673 tons of grain were imported into Bangalore by rail, the value of which, calculated according to the wholesale prices which prevailed in each week, amounted to Rs. 1,77,30,788, which amount of wealth has, in consequence, been practically extracted from the fiscal and financial resources of this territory and transferred to other temporarily more favoured provinces.

11. About 2,078 tons, or 240 more than in the previous week were exported by road from Bangalore to the interior of the province and the frontier taluks of the Madras Presidency as particularized below:—

	Tons.
Towards Túmkúr district	792
" Bellary and Chitaldroog districts	289
" Mysore district	442
" Oossoor in the Salem district	153
To the taluks adjoining Bangalore district	402
Total ...	2,078

12. The average prices of food-grains in each district are given in columns 29 and 30 of the return appended to this narrative, and the following is an abstract shewing the maximum and minimum prices which prevailed during the week:—

	Maximum in lbs. per rupee. 2nd sort rice.	Maximum in lbs. per rupee. Ragi.	Minimum in lbs. per rupee. 2nd sort rice.	Minimum in lbs. per rupee. Ragi.
Bangalore district ...	10½	14	8	10

Mysore " ...	9	12	7	11
Hassan " ..	10	12	8½	8⅔
Shimoga " ...	10	12	6	8
Kadur " ...	10	11	7	9
Chitaldroog " ...	9	13	8	10

13. From reports received from district officers to the enquiry made as to the condition of sheep, to which allusion was made in Famine Report No. 9, it appears that there has been a great increase of mortality as compared with last year; but there are no means of ascertaining what proportion of the loss is due to the drought only, as the stocks have been largely diminished by slaughter for food. The number of deaths reported in the whole province during 1876-77 was 128,172, or 72,991 more than that of the previous year.

"By Order,"

T. R. A. THUMBOO CHETTY,

Assistant Secretary.

* Such as digging and repairing wells, prickly-pear clearances, &c.
‡ Corrected figures given.
§ Approximate figures given.
† All the labourers upon the Dhond-Manmad Railway have been included under Ahmednagar.
‖ For details and dates see table appended.

A considerable quantity of rain has fallen during the week. Heavy showers have passed over the greater part of the eastern districts, greatly benefiting the young crops, and there has also been a slight return of the south-west monsoon rain in the western districts. Some talukas and portions of talukas have, however, not had rain, and the condition of the crops there causes anxiety.

2. Grain has again risen in price, and jowari now averages scarcely 13 lbs. for the rupee throughout the famine area. There is, however, no very material change in prices in the districts where food is dear, the marked rise in the general average being due to the increased cost of grain in Khandesh and Nasik, where it has hitherto been comparatively cheap.

3. The number of people upon relief works in the nine affected districts, is 246,825 against 253,807 last week, and there are also 688 hill-men and immigrants employed in Ratnagiri and Kanara. There is a marked decrease in Ahmednagar, Sholapur and Satara, where the rainfall during the week has been favourable, but there is a slight increase in the two southern districts, Dharwar and Belgaum, and a large increase in Kaládgi.

4. There has been no cholera in Sholapur, and very little in the three Kanarese Collectorates, but it continues in the remaining five districts.

5. The Sanitary Commissioner has submitted a further report from the Kaládgi district, and speaks favourably of the condition of the people, whether upon relief or subsisting upon their own resources in their villages.

6. The table showing the rainfall of each taluka is appended as usual, and the prevailing prices of the staple food-grains are now shown, for the first time, against each taluka. It will be observed that jowari varies between 7 lbs. the rupee in the Dharwar taluka where it is dearest, and 35 lbs. the rupee in the Shahada taluka of the Khandesh Collectorate where it is cheapest.

7. The following table gives the expenditure by Government, during the week ending 14th July, upon charity in the relief of the aged and infirm poor; and in payments made to the young children of labourers employed upon relief works. Comparing the results shown in the table below with those shown in the last summary, it will be seen that the number of persons in receipt of Government charitable relief has decreased from 59,147 to 48,857, while the number of children under 7 years of age has decreased from 89,925 to 81,489.

The number of children varies with the number of labourers, and during the week ending 14th July (the latest for which complete returns are available) the number of labourers had decreased to 259,787. The number of people charitably relieved was 18·8 per cent. of the number of labourers upon relief works during the corresponding week.

Districts.	Collector's discretionary grant.			Expenditure incurred under the authority of Government Resolution No. 312 C. W.—1116 of 26th December 1876, on account of children under 7 years of age whose parents are upon relief works.		
	Average number of persons relieved during the week.	Expenditure during the week.	Total expenditure up to date.	Average number of children, and of women taking care of them.	Expenditure during the week.	Total expenditure up to date.

† Executive Engineer's return not received.

8. The following table gives the distribution of the people among the relief works in the nine affected districts employing 1,000 labourers, or more, during the week ending 21st July. It will be seen that 207,682, or more than four-fifths, of the labourers were concentrated upon the works enumerated :—

Districts.	Works.	Number of labourers.	Total.	REMARKS.
Khandesh ...	Songir-Nandoorbar Road ...	1,124	1,124

	Hullial-Annigerry Road ...	2,939		
	GRAND TOTAL ...	...	207,682	

9. Tables (A) and (B) are appended as usual. It will be seen that, during the week ending 21st July, the number of people upon Civil Works in the nine affected districts was 19,785, the number upon works under Public Works Department agency being 226,086.

The proportion of people upon the former continues, therefore, less than 10 per cent. of the total. It is to be noted that the figures given in these tables are taken from the progress returns of the works, and are brought up to the week ending 21st July, while the figures in the table prefixed to this summary are taken from the Collectors' telegrams, and refer to the week ending 28th July. It will be seen that the net decrease in the number of people on relief works during the six weeks subsequent to 9th June has amounted to 157,017.

10. Maps are not sent with this summary.

11. A table is appended showing the condition of the affected Native States.

12. With regard to the movements of food-grains, 75 tons were exported from Bombay to the Southern Mahratta ports during the week ending 28th July, and during the same period 6,319 tons were carried by the Great Indian Peninsula Railway to stations upon the Poona-Sholapur and Nasik-Bhusawal lines. The table below shows the quantities of grain sent by sea and rail from October till the 28th July to the Southern Mahratta ports and the Railway stations in the distressed districts. It will be seen that the total amount delivered up to the 28th July was 348,541 tons:—

Food-grains sent to	In October, November and December 1876.	In January and February 1877.	In March 1877.	In April 1877.	In May 1877.	In June 1877.	(In July up to 28th.)	Total.
	Tons.	Tons.	Tons.	Tons.	Tons.	Tons.	Tons.	Tons.
Southern Mahratta ports ...	44,215	29,534	16,798	21,399	28,657	4,491	857	145,951

North-Eastern line, from Nasik to Bhusawal ...	12,829	4,237	3,234	2,346	1,221	2,014	1,524	27,405
TOTAL ...	124,239	61,719	33,792	36,601	42,472	26,853	22,865	348,541

13. The rainfall has been better and more general during the week, and has materially benefited the eastern districts, where heavy showers have fallen over large areas; but the regular south-west monsoon has not yet fully returned anywhere, though there have been light showers, from the monsoon quarter, along the entire western border of the famine tract. The rain that has fallen has greatly helped the growing crops, particularly in Ahmednagar, Sholapur, Satara, and Kaládgi; it has arrived in time to save much of the kharif in these districts, and if the monsoon rain should return shortly, in sufficient quantity, and prevail generally, the season may still be a favourable one. Better rain has fallen on the Malabar Coast within the last few days, and it may be expected to extend northwards. Light showers have fallen in Guzerat and Kattiwar, but some anxiety still exists as regards the prospects of the season in those parts of the Presidency.

Prices of food-grain have not materially varied, except in Nasik and Khandesh, where they have risen considerably; in these Collectorates, however, grain has hitherto been comparatively cheap. Imports into the rural districts are still active, and the movement of transport by human labour continues.

Imports on the coast have been more considerable, and grain is now being sent down, by steamers, to such ports as are open. This movement is likely to extend. The grain traffic from the coast to the interior is considerable.

The quantity of grain brought by the railway has again increased. This traffic is very active, and would be much more so if the Railway Company had engine power sufficient to enable them to deal with all that offers at their stations.

As the season has not hitherto been so favourable as was anticipated, no pressure has been applied to cause the people to leave relief, except in some very clear cases; but in the districts where the rainfall has been favourable, except in Kaládgi, people still continue to leave of their own accord, and there has again been a diminution in the number of labourers, the net decrease being 7,186; there has also been a decrease of 10,290 persons receiving charitable relief, and a decrease of 8,436 in the number of young children.

Although prices are still maintained at a very high level, the rain that has fallen during the week has materially improved the position. The general condition of the people is not deteriorating, and will improve as soon as there is a further good fall of monsoon rain.

Cholera is not increasing.

M. K. KENNEDY, Major-General, R. E.,
Secretary to Government.

" 5. Talukwar ditto.
" 6. Description of works.
" 7. Works under the supervision of Public Works Department.
" 8. List of special establishment.
" 9. Memo. of sums sanctioned.

The relief reports for the week ending 14th July will be submitted to Government with the usual statements and maps as marginally noted.

2. *Prices.*—The general rise in the prices of all food-grains noticed in last week's report still continues: in South Arcot, Trichinopoly, Madura, and Coimbatore especially this advance is very marked, amounting in the first-mentioned district to a diminution of one seer per rupee for rice and two seers for each of the dry food-grains; a very appreciable rise in prices in these districts was noticed last week also, and it would seem that stocks are running short. Turning to details for each district, there are no very remarkable changes in *Nellore*; rice has risen at six stations, fallen slightly at three, and is stationary elsewhere; as regards dry grains there is a tendency to rise, but prices have fallen at Rapur. The quotations for *Cuddapah* show a tendency to rise, but it is nowhere very marked; in Madanapally prices of ragi and cholum have fallen. In *Bellary* prices are generally slightly higher; they are most severe in the western taluks and the quotation for rice at Hadgally, 4·86 seers per rupee, is the highest yet recorded. In *Chingleput* there is no particular change; rice has advanced at Conjeveram and Trivellore and ragi at Sydapett. In *North Arcot* rice has fallen again at Kangundy by one seer, but the high prices of other food-grains at that station noticed last week still continue. At Wallajah, Wandewash, Kalastry, Narayanavanum, Venkatgahiricottah, and Arnee rice is half a seer dearer and at Chendraghiry and Tritinnai one seer dearer; the rise in prices at the two stations last mentioned is marked in regard to all food-grains. In *South Arcot* the enhancement of prices is serious and it is general throughout the district; dry grains especially have risen enormously. In *Trichinopoly* there are no quotations for rice and cumboo at Kulitalai, and for dry grains at Udayarpallime—this should have been explained. In Madura rice is very dear in Dindigul and Pulni and still more so at Pariakolum, but the rise at the last mentioned place is so great that it is possible the quotation may be incorrect. The price of cholum has risen considerably, and dry grains appear to be scarce generally judging from the paucity of quotations. The same remark applies to Tinnevelly. In Salem there is a tendency to rise everywhere; it is most noticeable in Athur and Dharmapury. In *Coimbatore* the state of the market is serious; from recent reports the Board learn that owing to a block on the South Indian Railway imports from Negapatam have been impeded and they understand that similar hindrances to the receipt of supplies from the western coast have been experienced, rice is quoted at 4·89 seers per rupee at Collegal and Bhowany, and nowhere is more than a trifle above six seers procurable. Cholum, too, is very expensive. The highest and lowest prices for rice and the dry grains most commonly in use in each district are shown in the margin.

Districts.	Rice, 2nd sort.		Dry grain.	
	Highest.	Lowest.	Highest.	Lowest.
Nellore	6·50	7·87	* 8·53	12·25
Cuddapah	5·30	6·64	† 6·37	9·00

Malabar	6·20	9·14	9·00	13·16

* Cholum. † Ragi.

3. *Rainfall.*—The Board regret that they cannot give a more cheering account of the progress of the monsoon than they were enabled to do last week. From Nellore, Cuddapah, Kurnool, Chingleput, North Arcot, and Tinnevelly no rain at all is reported, and elsewhere the showers were too light and local to be of much service; the highest fall was an inch at Virdachellam, and the number of stations at which rain was registered in no district exceeds four, excluding Malabar, where the monsoon continued very light, the average for the district being only 1·58 inches and the total rainfall from the 1st January to the end of the week being 10 inches below the average of the past three years for the same period. Since the date of these returns tidings of rain have reached the Board from Vizagapatam and Kistna only; the prospects must, therefore, the Board regret to say, be regarded as very gloomy.

4. *Grants and Outlay.*—The grants up to the 14th July aggregate Rs. 1,91,12,283, and the outlay as reported was as follows:—

	In the week.	Up to the end of the week.
	Rs.	Rs.
Relief work	6,16,203	1,71,29,619
Gratuitous relief	2,61,861	23,64,589
Total ...	8,78,064	1,94,94,208

5. The numbers and description of works in progress and completed during the week are shown in the subjoined abstract. No returns have been received from Kurnool since 16th June, to which date the figures now included relate; the Collector should submit the required information punctually :—

	In progress.		Completed.	
	Number.	Length in miles.	Number.	Length in miles.

Junction Canal ... { „ Commissioner of Police ...	788	908	...
Grand Total ...	872,048	883,028	+10,980

7. In the *Kistna* district there is a slight decrease. In *Cuddapah* there was a very large accession of numbers occurring chiefly in the northern taluks; the details are noted in the margin. The explanation shows that the increase is attributable to greater pressure of distress. The details for Bellary are given in the margin. There is again a very serious increase of numbers in Adoni explained to be due to the influx of paupers from the Nizam's Dominions and from Kurnool. From 6,000 to 7,000 immigrants from Hyderabad are stated to be on the works. The matter demands investigation, however, as the whole population of the taluk is only 181,583. Mr. Puckle is about to visit the taluk and will report on the state of affairs in due course. The increase in numbers in Gooty and Tadpatry is due to more intense pressure of distress; the cause as regards Harpanhally is not explained. The decrease in Anantapur, Huspett, and Huvinhadgalli is stated to be owing to weeding and stoppage of works, and the returns for Raidrug are not complete. The numbers on the Bellary-Hubli Railway were 78,38, *viz.*, from Bellary 3,139 and Hospett 4,699. Particulars for Kurnool are not yet available.

Taluks.	7th July.	14th July.	
Jamalamadugu	24,222	28,935	+4,713
Pulivendla	13,384	15,757	+2,373

Harpanhalli	4,203	8,275	+ 4,072
Huvinhadgalli	8,631	6,394	— 2,237
Total ...	302,928	305,723	+ 2,795

8. In *Nellore* the decrease is partly explained by the non-receipt of returns for Darsi. In Kavali and Udayagiri there was a considerable decrease in numbers the cause of which has not yet been explained. The numbers under the supervision of the Department of Public Works were 2,718 as shown in the margin.

Nellore	1,568
Kandukur	27
Ongole	328
Kanigiri	795
	2,718

The marginal abstract shows the districts to which the coolies employed on the East Coast Canal belong. In *Chingleput* the numbers on the Conjeveram-Chingleput line remain exactly the same as in the two previous weeks *viz.*, 24,966. In *North Arcot* the cause of the increase is not explained; it is due partly to the inclusion in this week's returns of the numbers in Kangundy (1,086) and apparently to greater intensity of distress in Wallajah, Kalastry, and Punganur. In *Madura* numbers have fallen off in Melur and risen in Tirumangalam and Palni. The fluctuations in *Coimbatore* do not call for remark. In the *Salem* district the falling off occurs principally in Salem and Namkal and is attributed to the completion of works.

Districts.	Forwarded by the R. D.	By the P. W. D. Recruiter and Contractors.	Total.
Nellore	5,785	32,839	38,624
Cuddapah	3,526	1,126	4,652
Kurnool	1,780	...	1,780
Belllary	2,188	388	2,576
Kistna	605	...	605
Total ..	13,884	34,353	48,237

9. The total number of famine coolies working under the supervision of the Department of Public Works was 208,101 against 214,277 last week, as per enclosed statement. From Bellary detailed reports from Pennakondah and Sundur have not been received; and the information for North Arcot is not given in a shape which will admit of its being embodied in the statement; the attention of the Collector has been called to the subject. The returns received from the Executive Engineer in charge of the Junction Canal are for the week ending Thursday, 12th instant.

10. The enhanced rate of wages appears to be in force everywhere except in parts of Jammalamadugu in Cuddapah, of Wallajah, Arconum, and Maderpauk in North Arcot, and Kanigiri in Nellore. The Collectors concerned should explain the reason for the existence of the lower rate.

11. *Gratuitous relief.*—The following are the district totals:—

Districts.	7th July.	14th July.	
Kistna	827	1,494	+667
Nellore	27,034	26,725	—309

TOTAL ...	574,487	608,479	+33,992
In camps	207,526	223,697	+16,171
In villages	217,658	228,346	+10,688
3-pie children	148,476	154,942	+ 6,466
* Kistna	827	1,494	+667

* Particulars not given.

12. The increase in the numbers in receipt of gratuitous relief is large, but not so great as in last week; all forms of gratuitous relief have been more extensively availed of and the growth of numbers occurs principally in Cuddapah, Chingleput, Madura, and Coimbatore. In Cuddapah the increase is chiefly under the head of village relief, in Madura and Coimbatore under that of camps, and in Chingleput under both heads. The increase under the head of 3-pie children is most marked in Bellary; it occurs also in Cuddapah, North

Arcot, Madura, and Salem; in Kurnool there was a considerable decrease. The progress of organization of measures for gratuitous relief is indicated by the marginal figures. For Kurnool and Kistna the figures for the previous week have been repeated. The increase in the number of camps occurs chiefly in Coimbatore and Salem and the decrease in inspection circles in North Arcot; it is due to the omission of the Punganur Returns. In *Nellore* the fluctuations do not call for remark. In *Cuddapah* the large increase is due to the transfer of the weakly to village relief and to the greater completeness of the returns. It occurs chiefly in the Sub-division, where the system was not extensively worked till recently. In *Bellary* the decrease is under the head of relief houses in the western taluks; under 3-pie children there is an increase of 4,693 during the week, due doubtless to the large accession of numbers on the works. In *North Arcot* the decrease is due merely to the omission of figures for Punganur and Tripathy; but for this a considerable increase would have appeared. In *South Arcot* distress is being more severely felt and village relief has been more widely applied. In *Madura* the sudden rise in the number of 3-pie children calls for remark. In *Coimbatore* distress is becoming more widespread; hence the increase of numbers in receipt of gratuitous relief. In *Salem* the figures show an increase under camps and decrease under village relief; this is explained to be due to the popularity of the camps, but the returns from the villages are not complete and the falling off appears to be nominal only.

	7th July.	14th July.	
Number of relief centres	382	393	+ 11
Inspection circles formed	770	753	— 17
Villages in which relief was given ..	6,988	7,331	+343

13. The following statement shows the rates of reported mortality in camps and villages. The mortality has increased considerably; this feature is specially marked in the Salem district; the much lower death-rate in villages is due probably to the deaths not being invariably reported:—

Districts.	Camps and relief houses.			Village relief.		
	Approximate strength.	Deaths in the week.	Ratio per mille per annum.	Approximate strength.	Deaths in the week.	Ratio per mille per annum.
Nellore	22,812	231	528	869	...	...

* Including East Coast Canal.

15. Grants sanctioned by the Board up to date aggregate Rs. 2,07,76,493.

16. The following statement shows transactions under the Land Improvement Act:—

	In the week.	To the end of the week.
	Rs.	Rs.
Nellore	2,040	93,196
Cuddapah	2,630	1,33,926
Bellary	6,690	2,22,355
Kurnool	1,075	9,640
Chingleput	3,291	84,873
North Arcot	2,710	18,600
Madura	1,069	65,595
Tinnevelly	...	32,900
Coimbatore	1,585	19,659
Salem	11,536	91,778
TOTAL ...	32,626	7,72,522

Advances to weavers are noted below:—

Cuddapah	147	2,368
Bellary	10,441	44,706
Madura	370	6,173
Coimbatore	2,455	8,815
Salem	25,844	2,07,258
TOTAL ...	39,257	2,29,260

The advances to weavers in Salem up to date amount to a very considerable sum, and the weekly outlay in this direction is so large as to call for explanation. The Collector will report on what system the advances are made, what precautions are taken to ensure that the money shall be properly applied and the value recovered in cloth, what recoveries have been made up to date and how the cloth has been disposed of.

17. The usual statement of establishment is enclosed; the cost is Rs. 1,28,265.

18. The average strength of resident paupers in Madras camps was 13,069 and of non-residents 12,487; the fresh admissions were 2,933; the strength in hospital on 14th July was 801; deaths numbered 219 (of which 211 took place in hospital) or in the ratio of 927 per mille per annum. Of the 14,234 paupers who were resident on 14th July 6,499 belonged to Chingleput, 4,798 to North Arcot, 2,490 to Nellore, and 447 to other districts. The outlay during the week was Rs. 17,751 and up to the end of the week Rs. 6,99,595. The President of the Municipality had 2,190 paupers at the Sattingad relief camp and 2,308 on works on the 14th July. The expenditure for the week was Rs. 4,135 and up to the end of the week Rs. 58,657.

C. A. GALTON,

Acting Secretary.

F

J. H. GARSTIN, *Addl. Secy. to Govt.*
Revenue Department.

T. C. HOPE,
Additional Secretary to the Govt. of India.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING THE 9TH AUGUST 1877.

GENERAL REMARKS.—In Madras moderate rain is reported from Malabar, Chingleput, Salem, Trichinopoly, North Arcot, Kurnool, Bellary, Nellore, and Kistna, and parts of Cuddapah, Madura and Tinnevelly: in Tanjore, South Arcot and Coimbatore the fall has been very light; general prospects are reported to be somewhat improved. The number on relief works is 983,505, an increase of 26,115 on last week, and on gratuitous relief 1,001,589, an increase of 162,803. In Mysore there have been good showers and prospects have improved: in Coorg abundant rain has fallen; the number on relief works is 45,214, and on gratuitous relief 164,439: the former is less by 2,984, and the latter more by 13,003 than last week. In Bombay there has been fair rain in the Southern Mahratta Country and in Satara: some has also fallen in the other Deccan districts, but more is much required everywhere except in Sholapur: in Khandesh and Násik the fall has been slight and more is much needed; the crops are suffering also in parts of the Konkan; in Guzerat the rainfall has been trifling and the crops are withering; in Sind the river is rising in the upper districts, but the crops in Hyderabad and Kurrachee are suffering from drought. In the Central Provinces there has been good and general rain; the rice crops have suffered in some places, but the prospects of the *kharif* generally are very good. In Berar there has been rain and the condition of the crops is fair. In Central India abundant rain is reported from Sutna, and showers from Indore, Rutlam and Neemuch; prospects in Malwa are good, but in Gwalior rain is much needed. No rain has fallen in Rajputana except a little in Meywar; the crops are suffering and anxiety is felt. In Bengal there has been good rain in most districts; in Behar prospects have improved in Gya and Shahabad, but the crops in Patna and Sarun are still backward; in Pooree the rice is suffering for want of rain; the condition of the crops in the province generally is otherwise good. In Assam rain is reported from the Valley districts and Sylhet, and prospects are favourable. In the North-Western Provinces and Oudh there has been good general rain in the Eastern districts and Bundelkhand: fair showers have also fallen in Agra, Lucknow and Fyzabad, as well as in Kumaun; in the west, especially in the Meerut Division, there has been no rain to speak of and the crops are suffering. In the Punjab no rain fell during the week, and it is everywhere much wanted.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Madras—		
Kistna (August 7th)	·09 in Masulipatam; 4·15 in Nandigama; 1·40 in Vinukonda; 1·25 in Narsarowpett; 1·0 in Tiruvur; and 1·0 in Repalli; ·50 in Guntur; slight elsewhere.	2¼ feet water over anicut; canal supply insufficient, but a small fresh is telegraphed from Kurnool; maize, *sajja*, *cholum*, dry paddy, wet paddy, &c., sown; standing crops much improved by rain, more is still required; prices slightly fallen generally; seers of 80 rupees weight, rice 7·31, *cholum* 8·55, *raggi* 9·31, *cumboo* 7·90; imports at Guntur and Bezwada, rice tons 114·95, *cholum* 62·50, *raggi* 12·50; number on relief works 11,200, great increase of strangers on the Kommamur work; number gratuitously relieved in camps 1,052, in villages 1,765, by people 135.
Nellore („ „)	·27 in Nellore; ·70 in Atmakur; ·20 in Venkatagiri; 1·85 in Darsi; 1·0 in Udayagiri.	During week ending the 4th August, prices second sort rice 5·96 seers, *cholum* 7·37, *raggi* 8·31, *cumboo* 8; number on work 19,697 (with three omitted returns, probably 22,600); Buckingham canal 46,795; number of 3-pie children 5,468; number in relief camps 40,709 (with three omitted returns probably 45,000); number on village relief 11,233; virulent outbreak of cholera near Nellore; crops withering except under wells.
Cuddapah („ „)	·60	Prices second sort rice 5·65, *cholum* 6·69, *raggi* 7·27, *cumboo* 7·06; people on relief works 147,947; 3-pie children 19,543; fed gratuitously in camps 14,825, in villages 91,993; relieved by private charity 639; standing crops much improved by recent rain.
Bellary („ „)	·6 in Bellary and Hospett; ·4 in Gooty and Anantapur; ·3 in Tadpatry; 1·1 in Hindupur; ·8 in Madaksira; moderate rain in Hadgally, Alur, Dhurmaveram, and Harpanhally. During last week ·4 in Bellary; 3·5 in Hospett; 4·0 in Ramandroog; 2·0 in Kudligi; 2·3 in Hadgally; ·7 in Harpanhally; 2·7 in Alur; 2·4 in Adoni; 2·4 in Gooty; ·6 in Tadpatry; ·7 in Raidroog; 2·1 in Anantapur; ·2 in Pennakonda.	District prices, second sort rice 5·27, *cholum* 6·25, *raggi* 6·9, *cumboo* 6·3; town price, boiled rice 6·21, Jubbulpore *cholum* 7·21 seers of 80 tolas; numbers on works 337,691; number of 3-pie children 91,762; numbers in relief camps or houses 30,456, on village relief 75,635; private charity none; increase due to pressure of famine; wet crops under tanks, wells and channels promising; dry crops where sown and surviving fair.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Madras—*concluded.*		
Kurnool (August 7th)	·76 in 6 taluks, more wanted.	Average price, second sort rice 5·42 seers per rupee, *cholum* 6·39, *raggi* 6·82, *cumboo* 6·60; number on works 213,477; number of 3-pie children 28,532; number in relief camps and houses 22,811; number of village relief 14,689; number relieved by private charity 3,500, chiefly in Bunganapally; crops under the canal are in fair condition; existing dry crops in other places saved for the present.
North Arcot („ „)	1·2 (average of 13 stations.)	For week ending the 3rd August, average prices in Government seers, second sort rice per rupee 6, *cholum* 6·6, *raggi* 6·8, *cumboo* 6 6, wheat 5·1; decrease in prices owing to importations; relief works coolies 55,088; number of 3-pie children 13,320; village relief 36,320; in camps or relief houses 22,544; condition of crops or harvest poor.
South Arcot („ „)	·2 in Trincomaly; slight drizzle in Tindevanum; *nil* elsewhere.	Prices, second sort rice 6 seers, *cholum* $6\frac{3}{4}$, *raggi* $7\frac{1}{4}$, *cumboo* $9\frac{3}{8}$; *cumboo* little cheaper owing to newly harvested produce coming in; imported by sea 123 tons of rice; number on works 520; fed in 4 relief camps and houses 4,062; relieved in 218 villages 41,424; children receiving 3 pie 28; pasture inadequate; later sown *cumboo* doing well, those early sown harvested partially; yield scanty.
Tanjore („ „)	Rain fell in some places of Tanjore, Mayaveram, Mannargudi, and Puttukcotai taluks varying from ·2 to ·9 inch.	Prices, rice $6\frac{1}{2}$ seers, *raggi* $8\frac{9}{16}$, *cumboo* $10\frac{5}{8}$, *cholum* $11\frac{3}{8}$; imports by sea, rice 897 tons; dry grains, tons 379; relief works none; rivers low.
Trichinopoly („ „)	About 1·0 inch; fair rain in parts of Pudkotta.	For week ending 4th August, second sort rice 5·79 seers, *cholum* 7·97, *raggi* 7·09, *cumboo* 7·30; number on works 395; numbers relieved in camps 4,557, in houses 2,541, village relief 1,849; dry crops very critical; harvest of *cumboo* in some parts of Museri, Udyarpolliem and Perambalur far below average.
Madura („ „)	1·0 in Shivagunga; ·50 in Dindigul and slight in a few places.	Rice second sort $6\frac{7}{10}$, *cholum* $7\frac{1}{2}$, *raggi* $8\frac{2}{5}$, *cumboo* $8\frac{1}{2}$; on works 18,492; 3-pie children 2,956; fed in camps 21,526, in villages and houses 20,791.
Tinnevelly („ „)	Good shower of rain at Virdupetti, slight fall in three other taluks.	Rice second sort $6\frac{1}{2}$ seers of 80 tolas, *cholum* $8\frac{1}{2}$, *cumboo* $8\frac{1}{2}$, *raggi* $8\frac{1}{4}$; numbers in relief camps 3,643, relief houses 1,438, village relief 528, private charity 280; standing crops generally good but require rain.
Coimbatore („ „)	·12	Prices, rice second sort 6·03, *cholum* 7·03, *raggi* 8·0, *cumboo* 8·11; numbers on works 27,356; 3-pie children 2,038; in relief centres 109,793, on village relief 760; crops or harvest generally bad.
Nilgiris („ „)	Good rain in Ooty during past 3 or 4 days, in other parts either *nil* or scanty.	Average prices, rice $5\frac{13}{20}$ seers per rupee, *cholum* $6\frac{1}{10}$, *raggi* $6\frac{3}{4}$, *cumboo* $6\frac{1}{10}$; supplies in week have improved; no relief works; 318 under relief in camps, 96 in relief houses; barley and wheat being harvested in some places; standing crops condition indifferent from deficient rainfall.
Salem („ „)	1·125	Prices of grain, seers of 80 tolas, rice $5\frac{3}{4}$, *raggi* $6\frac{1}{4}$, *cumboo* $6\frac{1}{8}$, *cholum* $6\frac{11}{16}$; imports of all grains 1,400 tons; number on relief works 52,300; number gratuitously fed in camps 31,800, ditto otherwise 96,500, ditto by private charity 350.
Malabar („ 6th)	1·56 (average of all taluks.)	Prices of rice highest $5\frac{3}{8}$ in Wynaad, lowest $8\frac{3}{4}$ in Cochin, average elsewhere $7\frac{1}{2}$ Indian seers per rupee; *raggi* $7\frac{1}{8}$ Indian seers per rupee in Wynaad, average elsewhere $10\frac{2}{3}$; 1,232 coolies on Kolathur roads; gratuitous relief to 42 men, 5 women and 50 children in Wynaad and to 415 people in Palghaut; crops much benefited by the rain; reaping of first crop commenced in one or two places; crop promises to be equal to average; harvesting will be general in about three weeks.
Chingleput („ 7th)	1·5 in Madarantakam; 1·0 in Trivellore; from ·5 to 1·0 in Ponnery and more than ·5 in the remaining taluks.	Prices, rice second sort 6·96, *raggi* 7·46, *cumboo* 7·70, *cholum* 7·64; imports rice 193 tons, *raggi* 28, *cumboo* 25, *cholum* 2; pasturage improving; water sufficient; on relief works 28,715; gratuitous relief in camps 25,485; in other places 33,348.
		General prospects somewhat improved, but distress continues very severe; total number fed gratuitously 10,01,589; total number on relief works 9,83,505; exports of grain from Madras by rail during the week ending the 4th instant $11,018\frac{1}{4}$ tons.

At page 2118 of the Supplement to the *Gazette of India* of the 4th August 1877, opposite Trichinopoly, for "number fed in relief camps 3,817" read "2,817."

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bombay— (Aug. 9th)		
Sind— („ 8th)		
Kurrachee ...	...	River on 6th 13 feet 11 inches, 3 feet 11 inches lower than on same date last year; one case of small-pox in Kurrachee, disease in Kotri and Manjhand; crops suffering from low state of river.
Shikárpur ...	...	River 13 feet 10 inches; canals now amply supplied; cultivation in full progress; no signs of rain.
Hyderabad ...	*Nil*	River again rising slowly, 14 feet 2 inches yesterday against 16 feet 11 inches on same date last year, 10 years' average 16 feet 7 inches; *kharif* prospects generally gloomy; districts healthy.
Upper Sind Frontier ...	...	Weather cool; *kharif* sowing progressing.
Guzerat— (Aug. 8th)		
Ahmedabad ...	·02	Total rainfall 8·04, more wanted; crops suffering.
Kaira ...	Light showers in two talukas.	*Kharif* crops withering; prices very high; large exports of grain; public health good.
Surat ...	*Nil* in Surat and Olpad; slight in other talukas.	Rice crops have suffered, other crops withering; cholera in Surat, Bulsar and Paroli, deaths 32.
Broach ...	·01	Total rainfall 6·65; crops as before.
Khandesh and Násik— (Aug. 8th)		
Khandesh ...	·46 in Dhulia.	Total rainfall 6·61, good heavy fall very much wanted throughout collectorate; crops as before; cholera continues unabated, cases 311, deaths 100; ague prevalent in western talukas.
Násik ...	·18 in Desh talukas; 6· in Igatpuri.	Crops withering, chiefly in Yeola and Báglán; fodder scarce; 74 deaths from cholera.
Konkan— (Aug. 8th)		
Tanna ...	5·64	Total rainfall 40·70; transplantation stopped in many places and crops withering; more rain immediately required in three coast talukas; in others prospects slightly improved; cholera has increased throughout collectorate.
Deccan— (Aug. 8th)		
Poona ...	1·68 (average).	Rainfall from 5th June 10·80 inches, more wanted everywhere, particularly at Sirur, part of Purandhar, Indapur and Bhimthari, where crops have partially dried up.
Ahmednagar ...	·11	Total rainfall 10·53, slight in six talukas, more badly wanted; crops withering where there is no moisture; cholera in eight talukas, cases 220, deaths 185.
Sholapur ...	·11	Total rainfall 14·93; young crops good; prices of grain high; 17 deaths from cholera.
Satara ...	3·27	Total rainfall 10·61, fall general; crops mostly good; 76 deaths from cholera.
Southern Mahratta Country—(Angt. 8th)		
Belgaum ...	2·18 in Belgaum, 4·46 in Bidi, ·81 in Chikori, ·72 Sampgaon, ·26 in Gokák ·15 in Athni, ·10 in Parasgad.	Total rainfall in Belgaum 25·94; crops good in some talukas, withering in others; cholera continues.
Dharwar ...	1·03 in Dharwar, 2·08 in Mugud, 1·58 in Hubli, ·08 in Gadag, ·77 in Shiggaon, ·50 in Ron, ·21 in Ránibennur, 1·17 in Hángal, ·70 in Karajgi, 2·07 in Kalghatgi, ·06 in Hirekerur.	Crops reviving everywhere except in Nawalgund taluka; cholera has disappeared.
Kanara ...	...	
Kaládgi ...	·14	Total rainfall 6·09, fall general but scanty; little *kharif* already sown generally but partly benefited by rain except in Muddebihál and Hungunda; slight cholera in northern talukas, 6 deaths.
Kattywar and Gaekwar's Territory—(Augt. 8th)		
Rájkot ...	*Nil.*	Strong wind; grass very scarce; price of grain rising.
Wadhwán ...	·16	Total rainfall 1·53; health good; crops thriving in some talukas, withering in others.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bombay—*concluded.*		
Baroda ...	·22	Public health good.
		General Remarks.—River rising in Upper Sind, but crops suffering from drought in Hyderabad and Kurrachee, and withering for want of rain in Guzerat; more rain urgently required in parts of Tanna and in all Deccan Collectorates except Sholapur and Satara, where the *kharif* crops are good; recent showers in Southern Mahratta Country have revived crops there; cholera has nearly disappeared thence, but continues in Deccan, Tanna and Surat.
Bengal— (August 9th)		
Chittagong ...	4·07	Barometer low; heavy rain on evening of 8th instant; fever still very prevalent; cholera reported from south.
Noakholly ...	4·07	Health much improved.
Chittagong Hill Tracts	8·79	
Hill Tipperah ...	4·59	
Backergunge ...	3·71	Fever prevalent in 7 thanas; cattle disease appeared in 3 thanas.
Furreedpore ...	7·21	
Dacca ...	2·15	Heavy rain and high wind on night of 8th instant.
Tipperah ...	2·17	
Mymensingh ...	5·57	
24-Pergunnahs ...	2·75	Health in general good.
Jessore ...	2·82	
Nuddea ...	2·11	
Moorshedabad ...	1·99	
Pubna ...	1·72	Fever not increasing.
Rajshahye ...	3·31	Fever very prevalent.
Bogra ...	5·37	
Maldah ...	7·60	
Dinagepore ...	1·03	
Rungpore ...	·04	
Cooch Behar ...	7·58	Public health very good.
Jalpáiguri ...	·09	
Darjeeling ...	Return not received.	
Midnapore ...	2·31	
Howrah ...	4·34	
Hooghly ...	3·29	Public health normal; no new cases of cattle disease.
Burdwan ...	·51; 2·57 in Culna.	
Bankoora ...	3·22	
Beerbhoom ...	3·05	
Sonthal Pergunnahs ...	2·16	
Bhágalpur ...	1·34	
Monghyr ...	Return not received.	
Purneah ...	·55	
Durbhunga ...	1·10	
Mozufferpore ...	·16	Health good.
Sarun ...	·48	
Chumparun ...	·60	
Patna ...	2·60	
Gya ...	4·53	
Shahabad ...	·25	
Hazáribágh ...	2·18	
Lohardugga ...	3·92	
Manbhoom ...	·53	
Singhbhoom ...	2·64	District healthy.
Balasore ...	2·56	Public health good.
Cuttack ...	3·81	A few cases of cholera reported.
Pooree ...	·14	Cholera disappeared from the city.
		General Remarks.—Seasonable rain in nearly all districts; transplantation of late rice well advanced; early rice and indigo being reaped; excessive rain in Mymensingh caused floods; in Gya and Shahabad prospects have improved; Patna and Sarun still backward; very scanty rain in Pooree, and rice crops suffering; in Palamow prospects not favourable, crops damaged by insects; rain still wanted in Manbhoom.
N.-W. P. and Oudh— (August 9th)		
Benares ...	More than 5 inches.	
Allahabad ...	General rain throughout district on 3rd and 4th, and light showers in parts since.	Prospects much improved.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
N. W. P. and Oudh—*contd.*		
Jhansi ...	1·5 on 4th ·6 on 7th besides lighter showers.	Field operations in active progress.
Agra ...	Good rain on 1st, 2nd and 3rd, none since.	
Meerut ...	·3 in Hapur Tahsil.	Hot winds drying up crops.
Bareilly ...	Good rain here and there.	Rain insufficient for rice.
Kumaon (Aug. 6th)	Rain fell generally throughout the district.	There is a good prospect for the crops.
Lucknow ...	Fair rain in Lucknow on 2nd and 7th, but no general rain in district.	
Sitapur ...	*Nil*	Weather sultry.
Fyzabad ...	·5 on 3rd and ·3 on 4th, some on 7th.	Rain eastward beneficial, greatly needed elsewhere.
		General Remarks.—Rain has been general in the eastern districts and in Bundelkhand and has been very beneficial to the crops; towards the west the showers have been very slight, the Meerut division especially suffering from heat and dryness.
Punjab— (Aug. 9th)		
Delhi ...	...	Crops suffering from want of rain; general health good.
Hissar ...	*Nil*	Crops drying up; fodder running short in Sirsa district; health generally good.
Umballa ...	*Nil*	Crops drying up; health good.
Lahore ...	*Nil*	Sowings in progress; health good.
Ráwalpindi ...	*Nil*	Health good.
Pesháwar ...	*Nil*	Crops continuing favourable; health good.
Dera Ismail Khan ...	*Nil*	Crops suffering; health good.
		General Remarks.—Rain much wanted; health of the Province good.
Central Provinces—		
Upper Godávari (Aug. 4th)	9·36	Cloudy; prospects of crops much improved, health good; prices steady.
Sambalpur ...	1·79	Cotton suffering from insects which will disappear on heavy rainfall; rice crops fair; more rain wanted; prices steady.
Biláspur ...	9·68	Cotton favourable; more rain required in Mungeli to remove grasshoppers; fever prevalent; prices steady;
Raipur ...	1·12	Transplanting rice commenced; prospects of *kharif* good; small-pox and cattle disease prevalent; prices stationery.
Bálaghát ...	4·50	Prospects of crops good; rain wanted in Kalamghi; health good; prices easy.
Chhindwára ...	1·96	Prospects of crops favourable; health good; prices steady.
Chánda (Aug. 5th)	1·17	Cloudy; transplanting rice continues; crops good; small-pox continues; prices falling.
Betúl (August 6th)	·87	Prospects of crops good except rice which requires more rain; prices stationery.
Bhandára („ 7th)	4·76	Transplanting rice continues; *jowari* promising; fever continues; small-pox abating; prices rising.
Nágpur („ 8th)	6·15	Prospects of *kharif* good; no epidemic; prices falling.
Wardha ...	1·46	Showery during the week; break wanted for weeding; prospects of *kharif* good,
Nimár ...	3·14	Prospects of *kharif* good; small-pox continues; prices steady.
Hoshangabad ...	3·10	Prospects of crops fair; prices steady.
Narsinghpur ...	4·0	Prospects good, prices rising.
Jubbulpore ...	6·97	Prospects and health good; prices easier.
Saugor ...	2·32	Crops revived; more rain wanted.
Seoni ...	1·69	Transplanting rice continues; health good.
Damoh ...	4·32	Anxiety regarding crops removed; prices stationary.
Mandla ...	3·49	Prospects improved; fever continues; prices steady.
		General Remarks.—Rain has been general all over the province and the prospects of the *kharif* are favourable; in some parts rice suffered, but the harvest generally is promising; health good and no notable fluctuation in prices.
British Burma ...	...	Report not received.
Assam—		
Gauháti (August 9th)	2·10	Weather sultry and oppressive; *sali* cultivation progressing; prospects favourable.
Sylhet („ „)	5·47	A good deal of sun and wind; general prospects favourable.

At page 2121 of the Supplement to the *Gazette of India* of the 4th August 1877, in the general remarks relating to the North-Western Provinces and Oudh report, for the last word 'great' read 'greater.'

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Mysore and Coorg— (Aug. 9th)	·62 in Bangalore; 7·44 in Coorg.	The price of ordinary grain has fallen from 10½lbs to 11½ per rupee at Bangalore; good showers have fallen in the districts, in Coorg sufficient to improve prospects; distress great from high prices; numbers at relief kitchens increasing; the daily average number of persons on relief works and charitably relieved as per statement last tabulated is in the—
		Bangalore district, including the town ... 8,719 and 78,424
		Kolar ... ... 5,257 „ 12,143
		Túmkúr ... ... 3,176 „ 27,970
		Mysore ... ... 786 „ 6,084

		Total ... 25,875 „ 164,439
		excluding those employed by the Professional Department, daily average of which is 19,339.
Hyderabad Assigned Districts—		
Amráoti (Aug. 9th)	1·0	Crops progressing fairly; more rain required; public health good.
Central India—(Aug. 8th)		
Indore ...	·86	Total rainfall 13·71
Gwalior ...	*Nil*	Total „ 4·95; no crops; great heat.
Neemuch ...	·20	Total „ 4·67.
Rutlam ...	·41	Total „ 10·2
Sutna ...	9·46	Total „ 16·12; health and prospects good.
Bhopal ...	...	16·0 inches in Sehore up to 2nd instant, prospects of crops in Malwa fair.
		General Remarks.—Scanty rainfall throughout the Agency; rain much needed in Gwalior.
Rajputana—		
Abu (Aug. 9th)	*Nil*	Cloudy; anxiety felt; prices rising.
Sirohi („ 5th)	...	Health good; want of rain felt; high winds; clouds.
Marwar („ 8th)	*Nil*	Heat intense during day, nights cool; prospects unfavourable; health good
Bikanir („ 1st)	...	Heat intense; crops and fodder withering for want of rain; prices rising.
Meywar („ 3rd)	·10	Total rainfall 5·0; water-supply and health good.
Harowtee („ 9th)	*Nil*	Crops suffering from drought.
Jhallawar („ 3rd)	*Nil*	Weather cloudy; prospects fair.
Ajmere („ 9th)	*Nil*	Crops suffering; health good.
Jeypore („ 8th)	*Nil*	Cloudy weather; some anxiety about crops.
Bhurtpore („ 9th)	*Nil*	Prospects unfavourable; health good.
Ulwur („ 8th)	*Nil*	Hot wind day and night; prices rising; great scarcity of forage.

G. H. M. BATTEN,

Offg. Secy. to the Govt. of India.

GOVERNMENT OF INDIA.

HOME DEPARTMENT.

Prize offered for the best essay on the vicissitudes of Aryan civilization in India.

(*Vide* page 1653 of the Supplement to the *Gazette of India*, dated 16th June 1877.)

No. 66 Public, dated India Office London, the 21st June 1877.

From—The Secretary of State for India,

To—The Government of India.

Dated 14th March 1877.

In continuation of my despatch No. 44, dated the 26th of April last, I forward, herewith, a translation of a further notice received from the Italian Minister at this Court, relative to the prize to be awarded at the International Congress of Orientalists to be held at Florence in 1878, for the best essay upon the vicissitudes of Aryan civilization in India.

TRANSLATION.

Notice respecting the competition.

THE general Committee of the fourth International Congress of Orientalists to be convened in Florence in September 1878, have published on the 12th January last the programme of the competition for the prize of 5,000 *lire* offered by His Excellency the Minister of Public Instruction in the Kingdom of Italy for the best work on the vicissitudes of Aryan civilization in India. Inasmuch as the Committee deemed it possible that the vote of some of the examiners might be altogether wanting, or might not arrive in time, and being desirous that in every case the number of votes or opinions given by the judges should not be too few, they have unanimously determined to allow for two additional examiners, one foreign and one Italian, so that the entire number of examiners shall be seven instead of five, *viz.*, five foreigners and two Italians.

No other regulation affecting the competition will be altered. The Committee beg all delegates of the Congress to give all possible publicity to the present notice, and to procure its insertion in the public journals.

In the name of the Committee,

ROME;
The 14th March 1877.

M. AMARI, *President*.
A. DE GUBERNATIS, *Secretary*

ARTHUR HOWELL,
Offg. Secy. to the Govt. of India.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

Abstract of the Proceedings of the Council of the Governor General of India, assembled for the purpose of making Laws and Regulations under the provisions of the Act of Parliament 24 & 25 Vic., Cap. 67.

The Council met at Simla on Thursday, the 2nd August 1877.

PRESENT:

His Excellency the Viceroy and Governor General of India, G.M.S.I., *presiding*.

His Honour the Lieutenant-Governor of the Panjáb, C.S.I.

His Excellency the Commander-in-Chief, K. C. B.

The Hon'ble Sir E. C. Bayley, K.C.S.I.

The Hon'ble Sir A. J. Arbuthnot, K.C.S.I.

Colonel the Hon'ble Sir Andrew Clarke, R.E., K.C.M.G., C.B.

Major-General the Hon'ble Sir E. B. Johnson, K.C.B.

The Hon'ble Whitley Stokes, C.S.I.

The Hon'ble F. R. Cockerell.

The Hon'ble B. W. Colvin.

The Hon'ble T. C. Hope, C.S.I.

BOMBAY REVENUE JURISDICTION ACT AMENDMENT BILL.

The Hon'ble SIR ALEXANDER ARBUTHNOT moved that the Bill to amend the Bombay Revenue Jurisdiction Act, 1876, be taken into consideration. He said that the only communication which the Government had received with reference to this Bill was one from the Government of Bombay, dated the 11th of last month, in which it was stated that "under the circumstances of the case, and having regard to the facts and considerations set forth in the proceedings of the Council of the Governor General for making Laws and Regulations in June last, when the Bill was introduced, His Excellency in Council has no remarks or suggestions to offer to the Bill being passed as soon as may be convenient." The Bill, he might add, had been published in the *Bombay Government Gazette*, both in the English, Maráthí, Guzaráthí, and Kanarese languages. He had no further remarks to make now in addition to those which he had made on the occasion of introducing the Bill.

The Hon'ble MR. HOPE asked the Hon'ble Mover if he would be so good as to inform him why Act XI of 1852 and Bombay Act II of 1863 were named in this Bill. As far as he was aware they had no relevancy to the subject of the measure; but he should be glad to have the explanation regarding them which the Hon'ble Member would no doubt be able to afford.

The Hon'ble SIR ALEXANDER ARBUTHNOT said he was sorry that, not having had any previous notice of the Hon'ble Member's question, and not having by him the Acts to which it referred, he could not at that moment afford him the information for which he asked. If Mr. Hope had informed him beforehand, he would have looked into the matter and been prepared to reply to his question.

The Hon'ble MR. HOPE said that possibly his Hon'ble friend Mr. Stokes could give the information asked for.

The Hon'ble MR. STOKES said that the clause in which reference was made to the Acts in question had been substantially framed by Sir Arthur Hobhouse, who was unlikely to have inserted them without a good reason. He had not the Acts by him: they would require careful examination; and he was therefore unable at present to answer Mr. Hope's question. At the worst, however, the mention of them in the Bill was merely superfluous, and could not possibly do any harm. As a matter of drafting he thought the Bill would be improved by omitting mention, not only of Act XI of 1852 and of Bombay Act II of 1863, but also of Act XXIII of 1871 and Bombay Acts VII of 1863 and III of 1874. The clause would then run thus: "and nothing in section four shall be held to prevent the Civil Courts in the Districts mentioned in the second schedule hereto annexed from exercising such jurisdiction as, according to the terms of any law in force on the 28th day of March 1876, they could have exercised over" the three classes of claims specified in the Bill.

The Hon'ble MR. HOPE said that Mr. Stokes' suggestion would entirely meet the case.

His Excellency THE PRESIDENT asked Mr. Hope whether he had got the two Acts which he had mentioned.

The Hon'ble MR. HOPE replied that he had, and enquired of Mr. Stokes whether he would like to look at them.

The Hon'ble MR. STOKES replied in the negative.

The Hon'ble MR. HOPE continued, observing that, so far as he understood the subject, the two Acts had no operation whatever in the districts named in the second Schedule of the Bill. It was perfectly true that they could do no very serious harm, but appearing as they did in a Bill of this description, which was well known to have been most carefully considered by both the Government of India and the Secretary of State, they might lead various parties to suppose all sorts of applications and meanings in the Bill which were never intended, and might even lead to troublesome and useless litigation. It would, he thought, be admitted that if the Acts had no more relevancy to the subject than the Post Office or the Railway Act, their insertion in the Bill was very undesirable, even if it did not do absolute harm. He did not venture to say that they had no relevancy, but he could not see what relevancy they had.

His Excellency THE PRESIDENT asked Mr. Hope whether he wished to make any motion.

The Hon'ble MR. HOPE said that if he might move that the words referring to those Acts should be struck out, he should be happy to do so. Of course he had not been able to give three days' notice of this motion; but then three days' notice had not been given of the meeting of the Council itself.

The Hon'ble SIR ALEXANDER ARBUTHNOT thought that, under the circumstances, the best course would be to defer the consideration of the Bill in order that the point under discussion might be looked into. He should mention that the Bill was drafted by their late colleague, Sir Arthur Hobhouse, and he could not but believe that he had some valid reason for inserting in the Bill the words to which Mr. Hope had taken exception. He should not like, therefore, to assent to their excision without further considering the matter, and inquiring into it with his hon'ble colleague, the Law Member.

The Hon'ble MR. HOPE said he should regret the postponement of the passing of the Bill, and was quite satisfied with the solution suggested by the Hon'ble Mr. Stokes.

His Excellency THE PRESIDENT expressed his opinion that the matter had better be allowed to stand over for further consideration, as suggested by his Hon'ble friend Sir A. Arbuthnot.

The consideration of the Bill was postponed.

M

NEGOTIABLE INSTRUMENTS BILL.

The Hon'ble MR. STOKES moved that the Hon'ble Sir Edward Bayley and the Hon'ble Mr. Cockerell be added to the Select Committee on the Bill to define and amend the law relating to Promissory Notes, Bills of Exchange and Cheques.

The Motion was put and agreed to.

The Council adjourned to Thursday, the 9th August 1877.

SIMLA;
The 2nd August 1877.

A. PHILLIPS,
Secretary to the Government of India,
Legislative Department.

E, AND COMMERCE.

Weekly condition report of the distressed districts of the Mysore Province.

PROVINCE OF MYSORE.

(*No.* 25.)

Condition report for the week ending 28th July 1877.

Bangalore District.—Markets fairly supplied. Prices pretty steady. There has been rain generally throughout the district, with the exception of the Hoskote and Devanhalli taluks; the quantity gauged at head-quarters varying from 40 cents to 2·73 inches. Wherever rain has fallen, ploughing and fresh sowing have been carried on, and the crops are in tolerably good condition. Agricultural prospects are, however, at present extremely critical. Public health continues bad, owing to the prevalence of cholera, dysentery, &c.

Kolar District.—Markets fairly supplied, except in the Mulbagal, Gudibanda, Sidlagatta and Gumnayakanpalya taluks, where the supply was only moderate. Prices generally steady. Light showers of rain fell in all the taluks, except Gumnayakanpalya, the maximum quantity registered at the head-quarters thereof being 1·70 inches. Javari and ragi in wet lands are in fair condition, but the other crops are withering for want of rain. Fever, small-pox and cholera are still prevalent.

Túmkúr District.—Markets continue fairly supplied, except in the Kunigal taluk, where importation was slack. Prices of food-grains rose in all the taluks except Honnavalli, where they fell slightly. Rain fell generelly throughout the district; the quantity registered at the head-quarters of taluks ranging from 25 cents to 2·04 inches. The fall came at a most opportune moment, and ragi and other dry crops, which had still some life in them, have revived considerably. Javari crops under irrigation are thriving well. Matters have taken a favourable turn; the ploughs are at work again, and the ryots are beginning to pick up heart. Cholera, diarrhœa and fever still prevail.

Mysore District.—Markets fairly supplied with rice, but difficulty is experienced in procuring ragi. Prices fluctuating. Light showers of rain had fallen generally throughout the district. The standing mungar or early crops are failing. Javari and sesamum are being harvested in some places. Cholera has abated to a great extent, but dysentery and fever are still prevalent.

Hassan District.—Markets continue fairly supplied, except in the Harnhalli and Nagamangala taluks, where importation was slack. Prices had risen generally in all the taluks. Light showers of rain fell in almost all the taluks, the maximum quantity registered being 1·45 inches at Saklespur. In some parts of the Hassan, Channaraypatna, Attikuppa, Belur and Harnhalli taluks, the crops are reported on unfavourably, especially in the last named taluk. Maize and sesamum are being reaped in the Channaraypatna and Attikuppa taluks. Prospects, it is said, are not encouraging in the maidan taluks. Fever and dysentery prevail throughout the district, as also cholera and small-pox to a limited extent.

Shimoga District.—Markets fairly supplied, except in the Channagiri, Honnali, Ságar and Kavaledurga taluks. Prices of food-grains remained stationary in three taluks, but rose in the other five taluks. Rain fell generally throughout the district, except in the Honnali taluk; the quantity registered at the head-quarters varying from 10 cents to 4·21 inches. The standing crops in the maidan portion of the district are withering; in the Malnad too paddy crops stand in need of rain. Cholera and fever are still prevalent.

Kadur Disrtict.—Markets continue fairly supplied, except in the Múdgere, Koppa and Lakvalli taluks, where it is difficult to procure ragi. Prices remained stationary in two taluks, but rose in the remaining four. Rain fell in all the taluks, and from 14 cents to 3·60 inches were registered at the head-quarters. Except in the maidan portions of Tarikere and Chikmagalur, and the Kadur portion of Banavar, the crops are doing well. The prospects continue indifferent, and the public health is bad, owing to the prevalence of fever, dysentery and small-pox.

Chitaldroog District.—Markets fairly supplied, except in some parts of the Davangere and Budihal taluks. Prices remained pretty steady. Good rain fell throughout the district during the week, and has allayed the serious apprehensions that were felt previously. Cholera has much abated, but fever and dysentery are still prevalent.

A

GENERAL REMARKS.

During the week ending 28th July 1877, showers of rain have fallen generally throughout the province, and though these have not sufficed, except to a partial extent, to revive the standing crops which had previously suffered from drought, sowing has been resumed in several districts, and prospects were a little more hopeful.

2. Public health remains much the same as last reported, but cholera has greatly abated, the number of deaths reported during the week being only 112, or 85 less than in the previous week.

3. The number of works in progress under Revenue officers was 1,727, and the daily average number of persons employed on the same was 25,875 as against 28,153 of the previous week. The decrease was chiefly in the Túmkúr, Mysore, Hassan and Kadur districts.

4. The amount appropriated for expenditure on the above works was Rs. 16,36,182, of which Rs. 11,06,313 were expended, leaving an available balance of Rs. 5,29,869. The expenditure during the week under review was Rs. 22,423, or Rs. 1,810 more than in the previous week, as shewn under :—

	Past week. Rs.	Present week. Rs.
Bangalore district	5,401	5,816
Kolar „	3,939	4,301
Túmkúr „	1,640	1,108
Mysore „	1,612	515
Hassan „	2,638	1,866
Shimoga „	1,938	5,331
Kadur „	478	149
Chitaldroog „	1,923	1,867
Bangalore Municipality	1,044	1,470
Mysore „	...	...
Total ...	20,613	22,423

The President of the Mysore Municipality has omitted to shew, in his returns, any expenditure for the last two weeks. Explanation has been called for.

5. The daily average number of persons employed on works carried on by the professional department was 19,339, or 706 less than in the previous week. The largest decrease was in the Túmkúr, Hassan and Shimoga districts.

6. The daily average number of recipients gratuitous relief was 164,439, consisting of 37,113 men, 60,987 women and 66,339 children. The increase over past week was 13,003, as shewn hereunder :—

	Increase.	Decrease.
Bangalore district	3,377	...
Kolar „	409	...
Túmkúr „	1,243	...

Shimoga ,, ...	10	10	6	7½
Kadur ,, ...	10	10	6½	9
Chitaldroog ,, ...	9	13	7½	9½

11. With reference to a telegram recently published in the Madras mail, alleging that the scale of diet at the Mysore Central Relief kitchen had been greatly reduced and alarming consequences were anticipated, the Chief Commissioner has instituted enquiries of the Commissioner of the Ashtagram Division who reports that there is no foundation for the newspaper correspondent's statement. Owing to a difficulty in procuring ragi, rice had to be substituted. Each adult receives ⅘ths of a seer per diem, being somewhat over the sanctioned diet scale for rice rations of ½ seer per diem. The method of issuing grain rations to families, consisting of gosha women and others unable to attend the kitchens, being found inconvenient and liable to abuse, tickets are now furnished to individuals. The measure has occasioned no public excitement as stated, and the Chief Commissioner would not have deemed it necessary to advert to the matter, had it not obtained currency in other public journals.

"By Order,"

T. R. A. THUMBOO CHETTY,

Assistant Secretary.

(No. 25.)

* Such as digging and repairing wells, prickly-pear clearances, &c.

† All the labourers upon the Dhond-Manmad Railway have been included under Ahmednagar.

‡ Corrected figures given.

§ Approximate figures given.

‖ For details and dates see table appended.

There has been a favourable fall of rain in Dharwar, and satisfactory accounts are received regarding the condition of the crops in the greater part of that Collectorate and in Satara. In the remaining districts the showers have been more partial, and the crops in several talukas require more rain, and in some cases are withering from want of it.

2. A slight fall has taken place in the prices of food-grains; jowari now averaging a little over 13 lbs. for the rupee throughout the famine area. It is satisfactory to notice that food is becoming a little cheaper in Satara, Belgaum, and Dharwar.

3. The number of people upon relief works in the nine affected districts is 2,64,314 against 2,51,145 last week, and there are also 963 hill-men and immigrants employed in Ratnagiri and Kanara. The increase is due to the very large influx of people upon the relief works in Kaladgi; the remaining eight districts showing a net decrease of 4,790.

4. Cholera appears to be on the decrease, and there have been no cases in Belgaum and Dharwar where the disease was at one time very prevalent.

5. The Sanitary Commissioner has submitted further reports regarding the Kaladgi Collectorate. The condition of the people, whether upon relief works or subsisting in their villages upon their own resources, is stated to be fairly good, though the pressure due to the high prices of food is increasing, and causing the people to resort very largely to the relief works.

6. The table showing the rainfall and prices in each taluka is appended.

7. The following table gives the expenditure by Government, during the week ending 21st July, upon charity in the relief of the aged and infirm poor; and in payments made to the young children of labourers employed upon relief works. Comparing the results shown in the table below with those shown in the last summary, it will be seen that the number of persons in receipt of Government charitable relief has decreased from 48,857 to 44,933, while the number of children under 7 years of age has decreased from 81,489 to 74,569.

The number of children varies with the number of labourers, and during the week ending 21st July (the latest for which complete returns are available) the number of labourers had decreased to 246,618. The number of people charitably relieved was 18·21 per cent. of the number of labourers upon relief works during the corresponding week.

Districts.	Collector's discretionary grant.			Expenditure incurred under the authority of Government Resolution No. 312 C. W.—1116 of 26th December 1876, on account of children under 7 years of age whose parents are upon relief works.		
	Average number of persons relieved during the week.	Expenditure during the week.	Total expenditure up to date.	Average number of children, and of women taking care of them.	Expenditure during the week.	Total expenditure up to date.

8. The following table gives the distribution of the people among the relief works in the nine affected districts employing 1,000 labourers, or more, during the week ending 28th July. It will be seen that 201,049, or more than four-fifths, of the labourers were concentrated upon the works enumerated :—

Districts.	Works.	Number of labourers.	Total.	REMARKS.
Khandesh ...	......	...	...	
Nasik ...	Kherwari-Sinnar Road... ...	1,103	2,175

	GRAND TOTAL		201,049	

9. Tables (A) and (B) are appended as usual. It will be seen that, during the week ending 28th July, the number of people upon Civil Works in the nine affected districts was 21,838, the number upon works under Public Works Department agency being 221,752.

The proportion of people upon the former continues, therefore, less than 10 per cent. of the total. It is to be noted that the figures given in these tables are taken from the progress returns of the works, and are brought up to the week ending 28th July, while the figures in the table prefixed to this summary are taken from the Collectors' telegrams, and refer to the week ending 4th August. It will be seen that the net decrease in the number of people on relief works during the seven weeks subsequent to 9th June has amounted to 159,023.

10. Maps are not sent with this summary.

11. A table is appended showing the condition of the affected Native States.

12. With regard to the movements of food-grains, 1,631 tons were exported from Bombay to the Southern Mahratta ports during the week ending 4th August, and during the same period 6,727 tons were carried by the Great Indian Peninsula Railway to stations upon the Poona-Sholapur and Nasik-Bhusawal lines. The table below shows the quantities of grain sent by sea and rail from October till the 4th August to the Southern Mahratta ports and the Railway stations in the distressed districts. It will be seen that the total amount delivered up to the 4th August was 356,899 tons:—

Food-grains sent to	In October, November and December 1876.	In January February and March 1877.	In April 1877.	In May 1877.	In June 1877.	In July 1877.	In August (up to 4th.)	Total.

13. There has been a favourable rainfall in the southern Collectorates; and elsewhere there have been showers which have fallen generally over the affected area, and have benefited the crops within their influence. The south-western monsoon still continues light, but has been sufficient for cultivation in the Konkan and western districts. The kharif crops, except here and there, have been preserved where sown, but are in much need of good rain. In Guzerat and Kattywar sufficient rain is still withheld, but there are some indications of a better fall. Anxiety is still felt as regards these parts of the Bombay Presidency, and in anticipation of a failure of the monsoon, precautionary measures are under consideration.

Prices of food-grain are slightly easier, and imports to be to rural districts continue sufficient. The stringency as regards prices is caused, not only by the circumstances of the season, and the crop prospects in the Bombay Presidency; which are not on the whole very unfavourable, but also by the heavy demand for food in the famine districts of Madras and Mysore, and of the Nizam's dominions. This demand, as it at present exists, together with the probability of its increase, aggravate the difficulty in Bombay by causing the trade to maintain prices at a very high level in expectation of a better market. It seems now that much relief in this respect cannot be looked for until the prospects of the next crop are assured.

The imports of grain on the coast have been much greater, and have amounted to 1,631 tons during the week. The railway has also delivered more grain than last week at the different stations in the famine districts, namely, 6,727 against 6,319 tons. The delivery would have been far greater had a block not occurred on the Great Indian Peninsula Railway line, due to the want of engine power necessary to enable the Railway Company to deal with the through traffic from the northern Indian lines, as well as with their own traffic. Very large quantities of grain are now awaiting despatch at many of the railway stations.

It has not been found practicable to apply general pressure to the people to induce them to leave the relief works, but in five districts there has been a decrease in the number of people on works; in the other four there has been an increase, and this has been very marked in Kaladgi where the number has risen considerably; the net increase throughout the famine area amounts to 13,385. There has been a decrease of 3,924 receiving charitable relief, and a decrease of 6,920 in the number of young children.

The high prices that still prevail, and the protracted absence of general heavy rain, have retarded improvement in the general condition of the people.

Cholera is decreasing.

M. K. KENNEDY, Major-General, R. E.,
Secretary to Government.

Telegraphic returns of more recent rain have been received, but cannot yet be properly collated.

The monsoon set in on the 19th June above Ghauts.

* This is chiefly eastern rain.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE, AGRICULTURE, AND COMMERCE.

Weekly Relief Report of the distressed districts of the Madras Presidency.

Proceedings of the Board of Revenue, Madras, No. 3524, *dated 27th July* 1877.

Maps for—

Nellore.	Madura.
Chingleput.	Bellary.
Cuddapah.	North Arcot.
Coimbatore.	South Arcot.
Salem.	

Statements.

No. 1. Prices.
„ 2. Relief Report.
„ 3. Talukwar Abstract of ditto.
„ 4. Statistics of gratuitous relief.
„ 5. Talukwar Statistics of ditto.
„ 6. Number and description of works.
„ 7. Works under the supervision of Public Works Department.
„ 8. List of special establishment.
„ 9. Memo. of sums sanctioned.

The relief reports for the week ending 21st July will be submitted to Government with the usual statements and maps as marginally noted.

2. *Prices.*—The prices of all food-grains have risen almost universally, but the district averages show no very sudden advance in any district; in Trichinopoly prices may be said to be stationary, and in Coimbatore there is even a slight decline in the prices of rice and cholum. The districts of Kistna, Nellore, Cuddapah, Chingleput, North Arcot, and Tinnevelly are those in which the advance in the price of rice is most appreciable, amounting to about half a seer per rupee. Turning to details for each district, the *Nellore* returns show a considerable rise in the price of rice at all stations except four; dry grains have risen in like manner; at Venkatagiri, Rapur, and Kandukur prices are stationary. In *Cuddapah* prices are extremely high everywhere, but especially at Jammalamadugu, Budwail, and Kadiri, where barely five seers of rice are procurable for a rupee; in *Bellary* the only change is a slight movement upwards; the average for all dry food-grains is higher than in any other district. In *Chingleput* the advance is gradual everywhere; in *North Arcot* there is not much change in the prices of dry grains, but rice is dearer by a seer at Vellore and Kangundy and by two seers at Tripaty, whilst at Wallajah second sort rice is stated not to have been procurable; hence the quotation is for first-sort rice. The very considerable enhancement of the price at Tripaty is perhaps due to misquotation in the preceding week when rice was reported to be cheaper by a seer than at any other station in the district; the Board, however, doubt the correctness of the statement that second sort rice was not obtainable at Wallajah, a place of considerable trade in close proximity to the line of rail. The mattter should be explained. There is no change in the market; in *South Arcot* and in *Trichinopoly* prices are given for second sort rice as compared with quotations for third sort last week; in Udayarpoliem only 4·72 seers of rice are procurable for a rupee and dry grains are not quoted. In *Madura* and *Tinnevelly* there is no particular change to note; in *Coimbatore* there is a decline in the price of rice at head-quarters and at Erode, Bhowany, Sattiamangalam, Caroer, and Uudumulpettah, but at Collegal it has advanced to 4·48 seers per rupee; cholum is not quoted, and ragi is less than six seers a rupee; no dry grains are quoted for the head-quarter station, but it can hardly be that they are not procurable. In *Salem* the tendency is upwards. but it is nowhere very marked. The highest and lowest prices for rice and the dry grains most commonly in use are marginally noted.

Districts.	Rice, second sort.		Dry grain.	
	Highest.	Lowest.	Highest.	Lowest.

* Ragi. † Cholum.

3. *Rainfall.*—The report under this head is again, the Board regret to say, anything but satisfactory; in Nellore, Bellary, and Madura the register for the week is blank, and elsewhere the fall has been too light and partial to be of much service. At no station was more than three-quarters of an inch registered (Malabar of course excluded) and generally the fall was only a few cents. The Board are glad, however, to be able to state that since the date to which the returns relate telegraphic intimation of a change for the better has reached them from several quarters; good falls of rain have been reported from Vizagapatam, Godavery, Kistna, and Bellary, and the monsoon rains which have been holding off so long appear to be setting in again; the Board trust that this relief will be in time to save the withering crops to some extent; for the pasturage and water-supply the rains will prove of inestimable benefit.

4. *Grants and Outlay.*—The grants up to the 21st July aggregate Rs. 2,07,77,283 and the outlay as reported was as follows :—

	In the week.	Up to the end of the week.
	Rs.	Rs.
Relief work	6,36,669	1,77,37,519
Gratuitous relief	3,23,737	26,88,869
Total ...	9,60,406	2,04,26,388

5. The number and description of works in progress and completed during the week are shown in the subjoined abstract:—

	In progress.		Completed.	
	Number.	Length in miles.	Number.	Length in miles.
Roads—				
New works	508	3,367	160	669
Repairs	444	3,896	135	656

Salem	38,038	43,254	+ 5,216
Total ...	830,455	856,874	+26,419
Buckingham Canal...	48,237	48,453	+ 216
Junction Canal ... { Under the Executive Engineer ...	3,426	4,240	} + 766
Junction Canal ... { " Commissioner of Police ...	908	860	
Grand Total ...	883,026	910,427	+27,401

The returns show a net increase of 27,401, the districts in which the accession of numbers is most marked being Cuddapah, North Arcot, Madura, and Salem. In *Nellore* the figures given in the abstract do not represent the real state of affairs, as the returns are not complete, figures for Darsi and Venkatagiri being wanting; excluding these two divisions, there appears to have been a slight falling off due to the stoppage of works in Kandukur, the reason for which is not explained. The numbers at work on the Buckingham Canal with the districts to which the coolies belong are shown in the margin; those under the supervision of the Public Works Department throughout the rest of the district numbered 3,385.

Districts.	Forwarded by the P. W. D.	By the P. W. D. Recruiters and Contractors.	Total.
Nellore	5,729	32,953	38,682
Cuddapah	3,918	1,126	5,044
Kurnool	1,888	...	1,888
Bellary	2,146	388	2,534
Kistna	305	...	305
Total ..	13,986	34,467	48,453

7. In *Cuddapah* there was again a considerable enhancement of numbers occurring chiefly in the Proddatur taluk and ascribed to the increased pressure of distress; the fluctuations in the other taluks are not so marked; the figures for Madanapally and Voilpaud appear to have been repeated from last week. In *Bellary* there was a net increase of only 1,720, but in the Adoni taluk numbers again rose by 9,393. The cause of the startling excess of numbers in that taluk still remains a

Taluks.	14th July.	21st July.	
Jamalamadugu	28,935	27,921	—1,014
Pulivendla	15,757	16,366	+ 609
Proddattur	6,766	13,126	+6,360
Cuddapah	4,092	4,468	+ 376
Budwail	17,401	18,406	+1,005
Sidhout	946	2,065	+1,119
Pullumpett	11,334	10,757	— 577
Kadiri	6,368	7,155	+ 787
Royachoti	11,878	11,064	— 814
Madanapulli	18,285	18,285	..
Voilpaud	10,986	10,986	..
Total ...	132,748	140,599	+7,851

mystery; it has been explained that the works are more extensive than elsewhere and provide for a portion of the distressed population of the neighbouring taluks, as well as for large numbers of starving paupers from the Nizam's dominions and Kurnool; this explanation does not, however, satisfactorily account for the fact that the coolies employed in the Adoni taluk number more than a third of the total for the district and very nearly as many as all the labourers on works throughout the Cuddapah district. The Board suspect that some other cause is at the root of the matter. The increase elsewhere is due to greater intensity of distress, whilst the marked falling off in Kudligbi, Harpenhally, and Dhurmaveram is ascribed to the measures introduced by Mr. Puckle. The numbers on the Bellary-Hubli Railway were 9,685, *viz.*, 3,667 from Bellary and 6,080 from Hospett.

Taluks.	14th July.	21st July.	
Adoni	105,411	114,804	+ 9,393
Alur	37,022	36,600	— 422
Gooty	16,210	16,843	+ 633
Tadpatri	22,929	23,834	+ 905
Anantapur	13,197	13,068	— 129
Dharmaveram	12,838	11,238	— 1,600
Pennakonda	3,200	2,729	— 471

Hospett	6,618	7,266	+ 648
Sundur	3,442	3,055	— 437
Kudligi	21,820	15,652	— 6,168
Harpanhalli	8,275	4,482	— 3,793
Huvinhadgalli	6,394	7,193	+ 799
TOTAL ...	305,723	307,443	+ 1,720

8. In *Chingleput* the increase is slight and does not call for remark. The numbers on the Conjeveram-Chingleput line are again exactly the same as in the preceding week, *viz.*, 24,966; the explanation of this is, the Board believe, that gangs are always maintained at the same strength. Under the Department Public Works 943 coolies were employed. In *North Arcot* the increase is not explained: it is spread over the whole district. In *Madura* the increase occurs chiefly in Tirumangalum and is attributed to cessation of agricultural operations; the nature of the work on which the coolies in Dindigul are employed should be more clearly explained and the Collector will report on the subject. In *Coimbatore* increase of distress raised the number of applicants for labour in Erode, Caroor, Bhowany, and Pollachy. In *Salem*, the taluks of Salem, Namkul, and Uttengherry show a considerable increase of numbers attributed to the commencement of fresh works.

9. The total number of famine coolies working under the supervision of the professional department was 222,400 against 208,101 in the preceding week as shown in the statment enclosed. The figures for Kurnool are those for the week ending 14th July and no information of this nature can as yet be furnished for North Arcot. The Collector will supply details in future. The returns for the Junction Canal are now made up to Saturday instead of Thursday.

10. The enhanced rate of wages appears to be in force everywhere except in parts of Jammalamadugu, in Cuddappah; Wandewash, Wallajah, Trittany, and Madapauk in North Arcot; and Kanigiri in Nellore. The reason has not yet been explained.

Gratuitous Relief.—The following are the district totals:—

Districts.	14th July.	21st July.	
Kistna	1,494	3,090	+1,596
Nellore	25,734	29,959	+4,225

* Kistna	1,494	3,090	+1,596

* Particulars not given.

12. The growth in the numbers in receipt of gratuitous relief is very serious and indicates the extent to which the pressure of distress is beginning to be felt in all the districts which have been much affected by the adverse nature of the season. In Cuddapah, Bellary, Kurnool, Chingleput, North Arcot, Madura and Coimbatore the augmentation in the number of paupers dependent on State relief is especially formidable. The increase in camps and relief houses occurs in Coimbatore, Nellore and Kurnool and under village relief in Cuddapah,

Madura, and Salem; in Bellary, Chingleput, and North Arcot the increase is divided between the two forms of relief, but in the last mentioned districts it falls mainly under the head of Village Relief, Bellary, Kurnool, and North Arcot are chiefly responsible for the additional number of 3-pie children. The marginal figures indicate roughly the progress of measures for gratuitous relief. In Coimbatore and Salem nine and fifteen fresh camps or relief houses were opened respectively; the increase in the number of inspection circles occurs in North Arcot and is chiefly nominal, being due to the inclusion of figures for Punganur; the extension of the village relief system to fresh villages is noticeable principally in Cuddapah, Chingleput, North Arcot and Madura.

	14th July.	21st July.	
Number of relief centres	393	422	+ 29
Inspection circles formed	756	786	+ 30
Villages in which relief was given ..	7,469	7,964	+495

In *Nellore* the increase is general; in *Cuddapah,* it is most marked in the taluks of Cuddapah, Budwail, Voilpaud, Royachoti, and Kadiri; in Bellary it occurs principally in the Bellary, Harpanhally, Alur, and Anantapur taluks. In *North Arcot* nearly half the increase is accounted for by the greater completeness of the returns, figures for Punganur and Tripaty being given this week. Numbers rose very considerably, however, in Vellore, Arcot, and Wallajah taluks. In *Chingleput* there has been a large accession to the numbers fed in villages in the Trivalore and Ponneri taluks and to the inmates of the Palaveram camp. In *South Arcot* and *Madura* the increase is distributed throughout the district; in *Coimbatore* it occurs chiefly in Erode, Pulladam, Caroor, and Coimbatore, and in *Salem* in the taluks of Salem, Trichengode, Dharampuri, and Krisnagherry the figures for Uttengherry show a large falling off stated to be caused by relegation of able-bodied paupers to work.

13. The following statement shows the ratio of reported mortality in camps and villages calculated on the average strength for the week under report and that preceding; there is no improvement but rather the reverse:—

DISTRICTS.	CAMP AND RELIEF HOUSES.			VILLAGE RELIEF.		
	Approximate strength.	Deaths in the week.	Ratio per mille per annum.	Approximate strength.	Deaths in the week.	Ratio per mille per annum.

TOTAL ...	14,305,997	902,067	702,992	1,605,059	11·22

* Including those employed on the Buckingham Canal.

15. Grant sanctioned by the Board up to date aggregate Rs. 2,14,01,493.

16. The following statement shows transactions under the Land Improvement Act:—

District.	In the week.	To the end of the week.
	Rs.	Rs.
Nellore	220	93,416
Cuddapah	1,130	1,35,056
Bellary	17,615	2,67,825
Kurnool	910	10,550
Chingleput	1,401	86,274
North Arcot	3,105	21,705
Madura	545	66,140
Tinnevelly	...	32,900
Coimbatore	1,400	21,059
Salem	5,900	97,678
Total ...	32,226	8,32,603

Advances to weavers are noted below:—

	Rs.	Rs.
Cuddapah	166	3,515
Bellary	4,302	49,008
Madura	1,113	7,286
Coimbatore	1,617	10,462
Salem	49,870	2,57,128
Total ...	57,068	3,27,399

The large outlay in Salem in this form of relief still continues; the explanation called for in reviewing last week's returns is awaited.

17. The usual statement of establishments is enclosed; the cost is Rs. 1,24,446 per mensem.

18. The average strength of resident paupers in Madras camps was 14,852 and of non-residents 12,668. Of the 14,797 paupers who were resident on the 21st July the numbers belonging to the several districts are distinguished in the margin. The strength in hospital on the 21st July was 812, deaths numbered 229 (of which 218 took place in hospital) or in the ratio of 855 per mille per annum. The outlay during the week was Rs. 16,507, up to the end of the week Rs. 7,16,102. The President of the Municipality had 3,280 paupers at the Settengad camp, and 2,233 on works on the 21st July. The expenditure for the week was Rs. 8,051, and up to the end of the week Rs. 66,708.

Chingleput	7,584
North Arcot	4,577
Nellore	2,260
Other districts	376

* Figures for last week.

REVENUE BOARD OFFICE,
MADRAS;
The 27th July 1877.

C. A. GALTON,
Acting Secretary.

ERRATUM.—In the Board's relief report for the week ending 14th July 1877, dated 20th July 1877, No. 3385, paragraph 16, Statement of Advances to Weavers, last column, *for* "Rupees 2,29,260," *read* "Rupees 2,69,350."

(By order.)
C. A. GALTON,
Acting Secretary.

Revenue Board Office, Madras, 30th July 1877.

Relief Report for the Kistna and Kurnool Districts for the week ending 14th July 1877.

Proceedings of the Board of Revenue, No. 3483, *dated 25th July* 1877.

Read Relief Reports for week ending 14th July 1877, from Collector of Kistna, dated 17th July 1877, and from Kurnool, dated 20th July 1877.

The Relief Reports for the Kistna and Kurnool districts for the week ending 14th July will be submitted to Government in continuation of the Board's Proceedings, dated 20th July 1877, No. 3385.

2. *Prices and rainfall.*—The price of rice has risen at eight stations in the Kistna district and that of each of the dry grains at five; the most noticeable feature in the Return is the very sudden enhancement of prices of all grains at Vinkonda; prices generally rule highest in that taluk and Palnad. The only fall of rain was 10 cents at Repalli, but subsequent telegrams have conveyed tidings of an inch of rain at Vesanapetta and Masulipatam. In *Kurnool* prices of all grains have risen in Ramalakota and Nundikotkur, and the quotations for rice are now extremely high throughout the district, but especially at the two stations just mentioned, where five seers are not procurable for a rupee. The price of cholum has gone up at four stations and that of ragi at five. No rain was registered during the week, and no subsequent information on this subject has reached the Board up to date.

3. *Relief works.*—Numbers on the Commamur Canal have fallen again, being 3,162 against 3,383 in the previous week.

Details for Kurnool are as follow :—

Taluks.	7th July.	14th July.	——
Ramalakota	35,819	36,990	+ 1,171
Nundikotkur	24,817	26,362	+ 1,545
Nandial	31,717	32,274	+ 557
Sirwell	21,611	19,695	— 1,916
Koilkuntla	27,597	27,234	— 363
Pattikonda	36,446	25,784	— 662
Cumbum	37,805	37,249	— 556
Markapur	6,704	6,748	+ 44
TOTAL ...	212,516	212,336	— 180

There is a net decrease of 180; the fluctuations in the several taluks are not such as to call for any special remark. The increase in the first three is attributed to greater intensity of distress and the decrease elsewhere to transfer of the inefficient to gratuitous relief. The higher scale of wages was in force throughout the district.

4. Particulars connected with works under the Department of Public Works are noted below :—

Taluks.	Number of works.	Outlay. In the week.	Outlay. To the end of the week.	Number of coolies.
		Rs.	Rs.	
Ramalakota	21	10,636	1,62,733	17,550
Nandikotkur	5	14,091	1,02,747	17,152
Patticonda	21	3,003	28,725	5,498
Koilkuntla	2	...	1,876	...
Nandial	3	—41,987	2,34,026	19,042
Sirwell	7	16,532	3,97,661	19,428
Markapur	1	...	1,316	...
Total ...	60	2,275	9,29,084	78,670

Nearly 2,000 more labourers than in the preceding week were employed under professional supervision. The *minus* figure under outlay in Nandial during the week is due to the adjustment of an erroneous charge.

Gratuitous Relief.—In the *Kistna* district comparison with the previous week is not possible as the Returns for the week ending 7th July did not include operations in Vinkonda. The number of persons relieved at the four relief centres was 998 and in villages 496. No deaths are reported. The details for Kurnool are as follow :—

Taluks.	7th July.	14th July.	—
Ramalakota	12,372	13,043	+ 671
Nandikotkur	2,984	3,426	+ 442
Nandial	7,021	5,100	—1,921
Sirwell	3,873	4,718	+ 845
Koilkuntla	6,715	6,743	+ 28
Pattikonda	7,202	8,540	+1,338
Cumbum	12,623	12,582	— 41
Markapur	3,409	3,194	— 215
Total ...	56,199	57,346	+1,147
In camps, &c.	10,412	12,500	+2,088
Village relief	5,519	6,053	+ 534
Three-pie children	40,268	38,793	—1,475

There was a net increase of 1,147 resulting from an increase under camps and village Relief ascribed to greater pressure of distress and a decrease under 3-pie children explained to be due to improved check and the transfer of weakly children to relief-houses. The total number of deaths was 245 of which half occurred in the Ramalakota taluk; the death-rate is also again high in Pattikonda and Cumbum. Under 3-pie children the deaths numbered 23, of which half occurred in Ramalakota and the remainder in Pattikonda and Koilkuntla. The deaths in camps and villages were 139 and 83, respectively, or in the ratio of 633 and 748 per mille per annum—a considerable increase of mortality as compared with last week's figures. The outlay on gratuitous relief was Rs. 16,550 in the week and Rs. 2,57,530 up to the end of the week.

C. A. GALTON,

Acting Secretary.

Statement showing the statistics of gratuitous relief in certain districts of the Madras Presidency for the week ending 14th July 1877.

25th July 1877.

C. A. GALTON,
Acting Secretary.

T. C. HOPE,
Additional Secy. to the Govt. of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE, AGRICULTURE AND COMMERCE.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING THE 16TH AUGUST 1877.

GENERAL REMARKS.—In Madras good rain is reported from Malabar, and parts of Tinnevelly and the Nilgiris: moderate showers have fallen in Salem, Tanjore, South Arcot, Chingleput, Bellary, and parts of Kistna and Kurnool; in these districts the dry crops require more rain, but have been benefited by what has fallen; in Nellore, Cuddapah, North Arcot, and Coimbatore the showers have been light and insufficient, and in Trichinopoly there has been no rain. The total number of persons on relief works is 958,160, and in receipt of gratuitous relief 1,077,682: the former are less by 25,345 than last week, the latter more by 76,093. No report has been received from Mysore, but it is believed that showers have fallen throughout the province and that prospects are somewhat improved. In Bombay good rain has fallen in Kanara and Dharwar: more is much wanted in parts of Belgaum and Kaládgi; in the Deccan districts prospects are good in Satara and Sholapur, but rain is urgently required in Poona and Ahmednagar; in the Konkan the crops are suffering from deficient rainfall; in Khandesh and Násik there has been no rain of any use, and the condition of the crops is very bad; in Guzerat light rain is reported from Ahmedabad, and parts of Broach and Surat; great anxiety is felt for the crops, which are withering; in Sind the river is extremely low, and want of water is generally felt; the number of persons on relief works is 258,452 and on charity (including young children) 121,072. In the Central Provinces the rainfall has been general, except in Nimár and Saugor; prospects are good, but in some districts more rain is required for the rice. In Berar there has been no rain, and it is urgently needed. In Central India rain is reported only from Sutna, and there only ½ of an inch; in Gwalior distress is said to be impending. In Rajputana no rain has fallen during the week, and unless some falls soon there will be much loss of crops. In Bengal there has been general heavy rain, except in Sarun, Pooree and Cuttack, where more is wanted; prospects are on the whole exceedingly favourable. In Assam prospects are good. In Burma the fall has been copious, and floods are reported in several districts. In the North-Western Provinces and Oudh there has been good rain in Benares, but in no other district; showers are reported from Lucknow, Jhansi and Kumaon; elsewhere no rain has fallen, and hot westerly winds prevail. No rain has fallen in the Punjab, and the crops are drying up.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Madras—		
Kistna (August 14th)	1·0 in Vissanapet; about ·5 in Gudivada and Palnad.	Prices slightly risen in some taluks; seers of Rs. 80 weight, rice 7·24, *cholum* 8·41, *raggi* 8·61, *cumboo* 7·60; 16,349 people on works, 3-pie children not reported, camp relief 1,495, village relief 2,116, private charity 135; standing crops require more rain.
Nellore („ „)	*Nil* in 4 taluks, few slight and partial showers elsewhere.	Prices second sort rice 5·74 seers, *cholum* 6·69, *raggi* 7·36, *cumboo* 7·08; numbers on works 23,427, canal 40,857; 3-pie children 5,019, relief camps 46,431, village relief 1,104; crops good in Polur and part of Gudur Delta villages and few places under wells, withered or withering elsewhere.
Cuddapah („ „)	·1	Prices second sort of rice 5·74, *cholum* 7·71, *raggi* 7·24, *cumboo* 7·34; people on relief works 142,363; children 22,410, fed gratuitously in camps 15,616, in villages 91,432, relieved by private charity 639; crops under irrigation works are generally good, but in dry lands are withering owing to high winds and want of more rain.
Bellary („ „)	·4 in Dharmaveram and Pennakonda; ·2 in Hindupur; moderate rain in Hadgally.	District prices, second sort rice 5·49, *cholum* 6·03, *raggi* 6·06, *cumboo* 5·79; town prices, boiled rice 6·48, Jubbulpore *cholum* 7·20 seers of 80 tolas; on works 317,434; children 84,565, in relief camps or houses 29,861, on village relief 86,210; wet crops under tanks, wells and channels promising; dry crops, where sown and surviving, fair.
Kurnool („ „)	·66 in 3 taluks; *nil* elsewhere.	Average prices, second sort rice 5·29, *cholum* 6·22, *raggi* 6·72, *cumboo* 6·46; on works 217,346; children 43,300, in camps and houses 25,113, village relief 17,819, private charity 4,200, chiefly in Bunganapally; more rain wanted; crops under canal are in fair condition; surviving dry crops in other places thriving for the present.
North Arcot („ „)	·30 (average of 8 stations).	Average prices second sort rice per rupee 6·1, *cholum* 6·7, *raggi* 6·8, *cumboo* 7·1, wheat 5·1; on relief works 58,843; children 13,564, in camps or relief houses 27,800 by village relief 55,138, by private charity 1,500; condition of crops or harvest poor.

At pages 2211 and 2212 of the Supplement to the *Gazette of India* of the 11th August 1877, opposite Kistna for "number gratuitously relieved in amps 1,052" read "1,652;" opposite Nellore for "with taree omitted returns probably 22,600" read "21,600;" opposite Malabar for "5 women and 50 cchildren in Wynaad" read "52 women, 41 children."

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Madras—*concluded.*		
South Arcot (Augt. 14th)	1·8 in Cuddalore; ·5 in Tricalore.	Rice second sort 6 seers, *cholum* 7, *raggi* 7¼, *cumboo* 9½; 92 tons of rice imported by sea; on works 817; children 10, in camps and houses 21,326, by village relief 44,738, by private charity 1,256; cattle weak but healthy; pasture inadequate; *cumboo* yield, where harvested, very poor; standing crops suffering from want of rain.
Tanjore („ „)	Partial, not exceeding 1·0.	Prices stationary; rivers ¾ths full; wet crops generally good, dry not good; many places in harvest.
Trichinopoly („ „)	*Nil*	Second sort rice 5·65 seers, *cholum* 7, *raggi* 7·53, *cumboo* 7·30; on works 2,425; in camps 2,536, in houses 1,800, village relief 842, 3-pie children 379; *cumboo* in parts of Museri, Perambalur, Udayarpolliem and Valan, and rice in Kalutalai harvested far below average; dry crops withering; freshes good.
Madura („ „)	Slight rain fell in Dindigul.	Rice second sort 6·77, *cholum* 8·44, *raggi* 8·76, *cumboo* 8·75; on works 27,107; 3-pie children 6,124, in camps and houses 26,432, village relief 18,817; standing crops withering.
Tinnevelly („ „)	Good rain on hills ...	Rice second sort 7 seers of 80 tolas, *cholum* 8¾, *cumboo* 9, *raggi* 9½; number in camps 3,895, in relief houses 996, village relief 1,077, private charity 1,858; fresh of 5½ feet and still running; crops in dry villages withering, but under tanks, wells and river valley in excellent condition.
Coimbatore („ „)	·29	Rice second sort 6·45, *cholum* 7·55, *raggi* 8·55, *cumboo* 8·75; numbers on works 27,874; 3-pie children 2,269, in relief centres 131,108, village relief 1,177, private charity unknown; crops or harvest generally bad.
Nilgiris („ „)	Good rain towards Neddivuttum, in other parts partial.	Average prices, rice 5·65 seers per rupee, *cholum* 6·1, *raggi* 7·1, *cumboo* 6·5; no relief works; in camps 238, about 90 in relief houses; one family under village relief; wheat, barley, samy and mustard are being harvested; towards the east seedlings are indifferent from deficient rain.
Salem („ „)	1·25	Prices, rice 5·75, *raggi* 6·23, *cumboo* 6·31, *cholum* 6·75; on works 56,000; 3-pie children 370, in camps or relief houses 39,600, village relief 98,300, private charity 200; condition of crops or harvest failing.
Malabar („ „)	7·72 (average) ...	Average prices, rice 7½, *raggi* 7 in Wynaad, elsewhere 10·58; 9 people at Manantoddy and 92 people at Palghaut gratuitously relieved, about 14,000 people fed by private charity; rain sufficient for cultivation; crops promising, reaping commenced in Kurumbranad and Ponani.
Chingleput („ „)	Slight rain fell in Madurantakam and Trivellore; from ·75 to 2·0 inches in other taluks.	Prices, rice second sort 6·93, *raggi* 7·57, *cumboo* 7·70, *cholum* 7·84; harvest in Conjeveram; pasturage improving; on relief works (reports incomplete) 27,308; in camps 21,413, in other places 58,293.
		General Remarks.—General prospects—no change since last week, distress increasing; total number fed gratuitously 1,077,682; total number on relief works 958,160; exports of grain from Madras by rail during the week ending the 11th instant 11,596 tons.
Bombay— (Aug. 16th)		
Sind— („ 15th)		
Kurrachee ...	*Nil*	River at Kotri on 13th 14 feet 5 inches against 17 feet 11 inches on same date last year; great cry for water; much loss anticipated; crops in Kacha drying up for want of water; large numbers of cattle dying in Sakro from scarcity of forage; small-pox in Kotri town, numbers of people passing through Mugalbhin from Kutch; fever generally prevalent.
Shikárpur ...	...	River low all last week, only 11 feet 10 inches to-day; rice suffering much from want of water; no floods yet in Rohri division; no signs of rain.
Hyderabad ...	*Nil*	River rose during past week to 15 feet 2 inches, but was yesterday only 14 feet 5 inches, same date same last year 17 feet 10 inches, average of 10 years 16 feet 10 inches; complaints general of want of water.
Upper Sind Frontier ...	*Nil*	*Kharif* and *peshras* crops flourishing, cotton especially good along river; water-supply in Begári branches inadequate.
Guzerat— (Aug. 15th)		
Ahmedabad ...	·45	Total rainfall 8·30.
Kaira ...	...	Want of rain beginning to be severely felt; *kharif* crops withering; prices very high; weather cloudy; public health good.
Surat ...	*Nil* in Surat and Olpád; slight in other talukas.	Crops withering; fodder scarce in Olpád and Choryási; cholera in Surat, Bulsar and Párdi, deaths 70.
Broach ...	·30 in Ankleswar ...	Rain much wanted; crops withering; no fodder, cattle being sent to Rájpipla; cholera in Broach, Ankleswar and Hánsot.
Khandesh and Násik— (Aug. 15th)		
Khandesh ...	...	Rain has quite ceased; crops withering, insects destroying them in some talukas; people, especially Bheels, in great distress; prospects more gloomy; cholera prevalent, cases 315, deaths 149.
Násik ...	*Nil* eastwards; ·10 elsewhere.	State of *udid mung* hopeless, *bajri* critical; 131 deaths from cholera.
Konkan— (Aug. 16th)		
Tanna ...	1·12	Total rainfall 41·82; want of sufficient fall felt throughout district; crops withering in all talukas; cholera throughout district; scarcity of grain in Dáhánu taluka.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bombay—*concluded.*		
Deccan— (Aug. 15th)		
Poona ...	Avra ge ·44; from 5th June 11·14.	Except in Nawal rain wanted everywhere, particularly at Sirur-Bhimthari, Indápur and Purandhar; a few cases of cholera in district.
Ahmednagar ...	·02 in Nagar; slight in 3 talukas.	Total rainfall 10·55, more very urgently wanted; crops suffering where there is no moisture; cholera in 5 talukas, cases 159, deaths 69.
Sholapur ...	·48	Total rainfall 15·41; young crops still good; distress owing to high prices.
Satara ...	2·40	Total rainfall 13·01, fallen in all talukas except Mán; crops generally good; 146 deaths from cholera.
Southern Mahratta Country—(Angt. 15th)		
Belgaum ...	3·52 in Belgaum, 8·65 in Bidi, 1·32 in Chikori, 1·10 in Gokák, ·98 in Sampgaon, ·73 in Parasgad.	Total rainfall in Belgaum 29·46, more much wanted everywhere except in Bidi; crops improving except where fall is deficient; cholera continues, deaths 15.
Dharwar ...	1·90 in Dharwar, 1·83 in Mugud, 1·60 in Hubli, ·30 in Nawalgund, ·38 in Nargund, ·68 in Gadag, ·59 in Mundargi, ·85 in Shiggaon, ·37 in Rániben-nur, ·65 in Karajgi, ·70 in Hirekerur, ·53 in Ron, 1·49 in Hángal, 1·54 in Kalghatgi.	Crops generally good, but withering in few places in 4 talukas; rice crops require more rain; public health good, but high mortality among destitute poor.
Kanara ...	7·5 in Karwar ...	Total rainfall 48·85; cholera continues, deaths 65; prospects improved.
Kaládgi ...	·15	Total rainfall 6·24, more urgently wanted throughout collectorate; *kharif* already sown generally benefited in places where rain fell, withering in others; sowing resumed in Bijapur and Hungund; 19 deaths from cholera.
Kattywar and Gaekwar's Territory—(Augt. 15th)		
Rájkot ...	·02	Total rainfall 4·80; weather cloudy; high wind blowing; rain much wanted; price of grain rising.
Wadhwán ...	*Nil*	Want of rain much felt; health good.
Baroda ...	*Nil*	Prices of food grains rising.
		General Remarks.—Want of rain in Sind, Guzerat, Kattywar, Tanna, Násik and Khandesh causing great anxiety as early sown crops are withering; rain much wanted in all Deccan districts except Sholapur and Satara where crops are good; prospects better in Dharwar and Karwar, but more rain urgently wanted in Kaládgi and Belgaum; number on relief works 258,452; number on charity 46,410; number young children 74,662; average price of *jowari* 12½ pounds, varying from $9\frac{5}{16}$ in Dharwar to 18¾ in Khandesh.
Bengal— (August 16th)		
Chittagong ...	14·58	
Noakholly ...	2·87	Health fair.

At page 2213 of the Supplement to the *Gazette of India* of the 11th August 1877, opposite Ahmednagar for "cholera cases 220" read "420;" opposite Sholapur in the rainfall column for "·11" read "·44."

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bengal—*concluded.*		
Monghyr ...	2·82; ·24 in previous week.	
Purneah ...	·90	
Durbhunga ...	4·04	
Mozufferpore ...	1·27	Health good.
Sarun ...	·73	
Chumparun ...	1·19	
Patna ...	1·21	Health good.
Gya ...	2·11	
Shahabad ...	1·58	
Hazáribágh ...	1·74	Heavy rain commenced on 9th, and was falling on 10th instant.
Lohardugga ...	2·94; about 5·0 since reported by Commissioner.	Health good; many cases of small-pox in Palamow sub-division.
Manbhoom ...	6·51	
Singhbhoom ...	5·82	District healthy.
Balasore ...	3·19	Cattle-pox caused some damage on east coast.
Cuttack ...	·53	Health good.
Pooree ...	·35	
		General Remarks.—Heavy rain with high wind in most districts of Bengal Proper; in Chota Nagpore districts and in Sonthal Pergunnahs high wind caused slight mischief to early rice now being reaped, but heavy rain very beneficial to late rice; moderate rain in Behar and prospects on the whole good, but Sarun still backward; rainfall in Pooree insufficient and crops suffering; more rain wanted in Darjeeling, Jalpáiguri, Patna and Gya; *bhadoi* crop in Aurungabad sub-division of Gya said to be a failure.
N.-W. P. and Oudh—(August 17th)	...	Report not received.
Benares ...	4·0 during week ending the 15th instant.	Crops well and healthy.
Allahabad ...	*Nil*	Prevailing wind westerly.
Jhansi ...	Partial shower on 10th.	Winds have stopped; crops already sown are drying up and fodder is scarce; rain is much wanted.
Agra ...	*Nil*	Very little *kharif* sown; wind variable.
Meerut ...	*Nil*	Hot west winds; prices rising.
Bareilly ...	*Nil*	Hot winds burning up young crops; rice crops lost; prices rising.
Kumaon ...	A few partial showers.	Crops beginning to feel the want of rain but no irremediable damage has been yet done.
Lucknow ...	1·2 on 12th in tahsil Maliabad; *nil* elsewhere.	Great heat.
Sitapur ...	*Nil*	Dry hot west wind.
Fyzabad ...	*Nil*	
		General Remarks.—A week of sun and heat; great damage done to crops.
Punjab— (Aug. 15th)		
Delhi ...	...	Rain urgently needed; crops and grass almost dried up; health good.
Hissar ...	*Nil*	Crops drying up; health good generally; few cases of small-pox in Rohtak district.
Lahore ...	...	Rain very much required; health good.
Ráwalpindi ...	*Nil*	Agricultural prospects gloomy; health good.
Pesháwar ... } Dera Ismail Khan ... }	*Nil*	Crops suffering; health good.
		General Remarks.—There has been no rain during the week, and crops are drying up in consequence; the public health continues good.
Central Provinces—		
Upper Godávari (Aug. 11th)	·80	Fresh sowings commenced in places; prospects of crop improved; more rain wanted; health good; prices stationary.
Sambalpur ...	6·15	Rain opportune; prospects of crop favourable; health good; prices rising.
Biláspur ...	7·5	Crops doing well; fever prevalent; prices steady.
Raipur ...	6·37	Weeding and transplanting *dhan* in active progress; crops favourable; small-pox continues; prices unchanged.
Bálaghát ...	2·35	Cloudy; crops favourable, but more rain wanted; health good; prices stationary.
Chhindwára ...	1·43	Prospects favourable; health good; prices steady.
Chánda (Aug. 12th)	1·18	Transplanting of rice continues; health good; prices falling.
Betúl („ 13th)	3·30	Prospects good; no epidemic; prices stationary.
Bhandára („ 14th)	3·95	Transplanting of rice continues; crops favourable; fever prevalent; small-pox abating; prices unchanged.
Nágpur („ 15th)	·47	Prospects of crops favourable; fever prevalent; prices rising.
Wardha ...	1·32	Prospects of *kharif* favourable; weeding continues.
Nimár ...	*Nil*	Weather close; crops favourable; small-pox continues; prices rising.
Hoshangabad ...	·46	Prospects favourable.
Damoh ...	·3	Prospects favourable.
Narsinghpur ...	·50	Cloudy; prospects and health good; prices rising.
Mandla ...	·99	Prospects of crops good; fever continues; prices steady.
Jubbulpore ...	·34	Prospects favourable.
Saugor ...	*Nil*	Rice suffering.
Seoni ...	·61	*Kharif* thriving, but rain required.
		General Remarks.—Rainfall general during past week, and although more rain is wanted for rice in some districts the crops prospects are favourable; prices show little change.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
British Burma— (August 16th)		
Arrakan Division— (Aug. 7th)	10·0 in Akyab ...	Five deaths from cholera in Akyab town; a few cases also in interior; otherwise public health good; rains seasonable; ploughing and sowing going on everywhere.
(„ 14th)	13·0 in Akyab ...	Eight deaths from cholera in Akyab town; otherwise health good; agricultural prospects fair.
Pegu Division. (Aug. 14th)		
Rangoon ...	5·83	Public health good; crops progressing favourably, but ploughing late in portions of Syriam sub-division owing to inundation; choleraic diarrhœa reported in Hpoungling; total rainfall 60·16 inches.
Bassein ...	6·0	Health good; total rainfall 88·7 inches; ploughing and planting going on; high rise of river at Bassein.
Henzada ...	5·50 in week ending 11th instant; 3·0 in Myanoung during week ending 4th instant; 8·0 in Yeaghin during week ending 6th instant.	Total rainfall in Henzada 49 inches, in Myanoung 26, and in Yeaghin 35 inches; 43 deaths from cholera reported from Mengyee and two from Kyangheen townships; otherwise public health good; cultivation progressing.
Prome ...	5·81	Twenty-four deaths from cholera in Prome, 16 in Poungday, 12 in Mahathaman, seven in Shwelay, six in Shwedoung, and two in Padoung; cultivation progressing; total rainfall 29·96.
Thayetmyo ...	8·82	General health not good; three deaths from cholera in Thayetmyo town; total rainfall 27·64.
Thonkwa ...	Rainfall abundant ...	Health and crops good.
Tenasserim Division— (Aug. 7th)	3·91 in Tounghoo ...	Public health good in Tounghoo district; two-thirds of paddy cultivation progressing.
(Aug. 14th)	16·11 in Amherst; 1·60 in Tounghoo; 7·5 in Shwegyeen.	Public health fair.
		General Remarks.—Cattle disease continues in Akyab district and in Monio and Mengyee townships of Henzada district; in Bassein district western bank Ngawoon opposite embankment flooded; rise of river at Bassein very high, part of strand road flooded; abnormal floods in Prome now subsiding; probable damage therefrom; cultivation in Thayetmyo district retarded through high rise of river in lower parts of district; excessive rain in Amherst district likely to damage low-lying crops; floods in Tounghoo district damaging crops.
Assam—		
Gauháti (August 16th)	·86; slight showers on 14th and 15th.	Weather sultry and oppressive; rice cultivation prospects hopeful.
Sylhet („ „)	2·10	Weather variable; prospects of crops fair; some fever and small-pox are reported.
Mysore and Coorg—	...	Report not received.
Hyderabad Assigned Districts—		
Amráoti (Aug. 16th)	*Nil*	Crops in some parts of province fair, in others withering; rain urgently needed.
Central India—(Aug. 15th)		
Indore ...	*Nil*	Total rainfall 13·71.
Gwalior ...	...	Total 4·95; no change of weather; famine impending.
Neemuch ...	*Nil*	Total 4·67; sky clear; crops suffering.
Rutlam ...	*Nil*	Total 10·2; *makka* crop withering; public health good.
Sutna ...	·20	Total 16·22; health and prospects good.
		General Remarks.—Rain much needed throughout the Agency.
Rajputana—		
Abu (Aug. 16th)	*Nil*	Much anxiety felt; prices rising; barometer stationary.
Sirohi („ 12th)	*Nil*	Health good; young crops will suffer unless rain falls within next week; high winds and clouds.
Marwar („ 13th)	...	No change; rain urgently required; prices rising; failure of grass crops feared.
Bikanir („ 10th)	*Nil*	Fearfully hot; want of rain seriously felt; seeds sown and fodder dried up; prices rising.
Meywar („ 13th)	...	Water decreasing daily; health very good; prospects precarious; rain urgently necessary.
Harowtee („ 11th)	*Nil*	Weather fine; anxiety felt; prices rising.
Jhallawar („ 10th)	·75	Prospects at present unchanged.
Ajmere („ 16th)	*Nil*	High winds; prices rapidly rising; health good; the crops are in much danger.
Jeypore ...	*Nil*	No immediate signs of rain; westerly winds with great solar heat; crops being scorched; much anxiety; prices rising; health good.
Bhurtpore (Aug. 16th)	...	No change; hot westerly winds.
Ulwur ...	*Nil*	People much alarmed; forage very scarce.
		General Remarks.—Unless rain comes within a very few days, there will be much distress and damage.
Nepal (Aug. 8th)	3·05 in previous week.	Total this year 26·56; the average rainfall for five years (1871-75) up to the end of July is 30·96, so that the total fall of the present season is not much below the average; weather bright and very hot; agricultural prospects much improved by recent rain; *ghya* rice beginning to ear; every field transplanted; *baniahs* who were holding back stocks are now bringing them into the market and prices have fallen slightly in consequence.

Offg. Secy. to the Govt. of India.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

Abstract of the Proceedings of the Council of the Governor General of India, assembled for the purpose of making Laws and Regulations under the provisions of the Act of Parliament 24 & 25 Vic., Cap. 67.

The Council met at Simla on Thursday, the 9th August 1877.

PRESENT:

His Excellency the Viceroy and Governor General of India, G. M. S. I., *presiding.*
His Excellency the Commander-in-Chief, K. C. B.
The Hon'ble Sir E. C. Bayley, K. C. S. I.
The Hon'ble Sir A. J. Arbuthnot, K. C. S. I.
Colonel the Hon'ble Sir Andrew Clarke, R. E., K. C. M. G., C. B.
The Hon'ble Sir J. Strachey, K. C. S. I.
Major-General the Hon'ble Sir E. B. Johnson, K. C. B.
The Hon'ble Whitley Stokes, C. S. I.
The Hon'ble F. R. Cockerell.
The Hon'ble B. W. Colvin.
The Hon'ble T. C. Hope, C. S. I.

BOMBAY REVENUE JURISDICTION ACT AMENDMENT BILL.

The Hon'ble SIR ALEXANDER ARBUTHNOT moved that the Bill to amend the Bombay Revenue Jurisdiction Act, 1876, be taken into consideration. He said:—"It will be in the recollection of Your Lordship and the Council that, at our last meeting, in consequence of a question put by the Hon'ble Mr. Hope in regard to the relevancy of two Acts, which are mentioned in the first section of the Bill, to the subject with which the Bill is intended to deal, it was settled, after some discussion, that the further consideration of the Bill should be postponed until this meeting. It was stated on that occasion, both by my hon'ble and learned friend the Legal Member, and by me, that the draft of this Bill was framed by our late colleague Sir Arthur Hobhouse; and I expressed my unwillingness to assent to any alteration in the wording of the Bill, which was framed by a person so thoroughly competent as our late colleague, without more mature and careful consideration than we could possibly give to the matter seated round this table. This view was assented to by the Council, and since our last meeting I have gone into the question with my hon'ble colleague Mr. Stokes, and have come to the conclusion that, so far as we are competent to form a judgment on the subject, the objection taken by the Hon'ble Mr. Hope to the mention of the Acts to which he referred, is a valid objection, and that the reference to them had better be eliminated from the Bill. We hold, at all events, that that reference is in no way necessary, and, as far as we can see, it is open to objection on the score of irrelevancy, which the Hon'ble Mr. Hope advances. While, however, we have come to this conclusion, we think it right to say that we feel satisfied from what we know of our late learned and eminent colleague, that he did not put these points into the draft, which was framed by him, without having reasons for doing so which satisfied his own mind, and which we should not venture to impugn. What these reasons may have been we are quite unable to say, and, as I have mentioned, it appears to us clear that the reference to the Acts in question is, at all events, unnecessary. Under the circumstances we have thought it better that not only that particular reference should be eliminated, but that the reference which is made in the Bill as it now stands, to certain other Acts should also be omitted, and that the section should run in this way:—

"'And nothing in section four shall be held to prevent the Civil Courts in the Districts mentioned in the second schedule hereto annexed from exercising such jurisdiction as, according to the terms of any law in force on the twenty-eighth day of March 1876, they could have exercised over claims against Government.'

"I propose, in the event of my motion for the consideration of the Bill being adopted, to move the amendment which stands in my name on the notice paper; but, before proceeding further, I think it right to mention to the Council that, since our last meeting, a letter has been received from the Government of Bombay suggesting the insertion in the Bill of an additional section repealing two sections, namely, the 9th and 10th, of the Revenue Jurisdiction Act of 1876, which relate to the subject of appeals. With the permission of Your Lordship I will read to the Council the statement of the grounds on which this recommendation is made. It has been made to the Government of Bombay by their Legal Remembrancer in these terms:—

"'But in order to provide against the difficulty which had been foreseen by this Government, two sections were introduced into the Act (9 and 10), one prescribing certain powers of appeal from proceedings of Revenue Officers, and the other authorizing the Local Government to call for records and reverse or modify any order of a Revenue Officer. Such provisions, I need not say, form part of the proper scope of the Revenue Code Bill,' [that is a Bill now before the Council of the Governor of Bombay, and which I hope will shortly be passed] 'and without them that Bill would be incomplete.'

"'And whereas sections 9 and 10 of Act X of 1876 apply only to cases in which, "but for the passing of that Act, any act or omission of a Revenue Officer would have been open to question in a Civil Court," it has been necessary in the Code Bill to provide generally for *all* cases.'

"I have gone into this question with my hon'ble colleague Mr. Stokes, and we are agreed that it is not necessary to repeal these two sections at present; that it is not desirable that during the interval which must elapse before the Revenue Code Bill of the Bombay Council comes into operation, there should be no provision for appeals of the nature of those referred to. My hon'ble friend Mr. Stokes, as he probably will tell the Council, is not of opinion that the provisions of the Bombay Revenue Code as they now stand in their Bill at all clash with the provisions of our sections 9 and 10 of the Act passed last year; and his view is that the proper course is to leave sections 9 and 10 of the Revenue Jurisdiction Act in force until the Bombay Revenue Code is passed, and then, when that is passed, if it comes up in such a form as will enable the Viceroy to assent to it, and if it becomes law, the right course will be, in order not to have two laws dealing with the same subject, to pass a short Act repealing the two sections of the Act passed last year, and leaving appeals to be dealt with under the local law, which is called the Bombay Land-Revenue Code."

The Motion was put and agreed to.

The Hon'ble SIR ALEXANDER ARBUTHNOT moved that, in section 1, lines 8, 9 and 10, the words and figures "Acts No. XI of 1852, No. XXIII of 1871, and Bombay Acts No. II of 1863, No. VII of 1863, and No. III of 1874, or of," and in line 10 the word "other," be omitted.

The Hon'ble MR. HOPE said that as the Motion which had been put was substantially the same as the suggestion made by the Hon'ble Law Member on the last occasion when the Council met, which MR. HOPE had said at the time would, in his opinion, entirely meet the difficulty which he had had the honour of bringing forward, he begged leave to withdraw the second motion which stood in his name on the same subject.

With reference to the other point which the Hon'ble Mover had noticed, which was raised by the letter from Bombay, he had not been made aware of the arrival of that letter; but the omission did not matter since, as he was exceedingly glad to find, it was not proposed to take any action upon it. The proposal made by the Legal Remembrancer of Bombay in that letter had already been made once before in the course of the consideration of the Revenue Jurisdiction Act. It was then very carefully considered by the Select Committee and Sir Arthur Hobhouse, and it was decided, pretty much as it had now been decided, first, that it was quite premature to do anything

on the assumption that the Bombay Revenue Code Bill would very soon become law, and, secondly, that whenever it did become law it would be very easy to put the sections in question into the next Obsolete Enactments Bill which happened to come before the Council.

The Motion was put and agreed to.

The Hon'ble SIR ALEXANDER ARBUTHNOT moved that the Bill as amended be passed.

The Hon'ble MR. HOPE said :—" I feel it to be a matter of satisfaction that the soundness of the principles of the Revenue Jurisdiction Act, which I last year had the honour of carrying through this Council with the full concurrence and support, not only of some Hon'ble Members whom I still see present, but of Sir A. Hobhouse, Sir W. Muir and the late Viceroy Lord Northbrook, has not been in any instance even impugned by the highest authority. This satisfaction which I feel is not in any way inconsistent with the fact that we are now required by that authority to effect certain alterations in that Act, as will be apparent on consideration of what those alterations are.

"I will first notice clauses (*a*) and (*c*). They refer to claims against Government—

" '(*a*) relating to any property appertaining to the office of any hereditary officer appointed or recognized under Bombay Act No. III of 1874, or any other law for the time being in force, or of any other village officer or servant ;'

and

" '(*c*) to receive payments charged on, or payable out of, the land-revenue.'

"The present Bill provides that nothing in section 4 of the Revenue Jurisdiction Act shall prevent the Courts in the Old Provinces from exercising any jurisdiction over these matters which they otherwise could have exercised.

"The Hon'ble Mover, in his speech on July 14th, said that the object of the Revenue Jurisdiction Act was 'to exempt from the jurisdiction of the Civil Courts claims connected with property appertaining to hereditary offices * * * * and claims to receive payments charged on, or payable out of, the land-revenue.'

"This seems to me scarcely accurate. I think I may safely affirm that it was not intended to make in these two respects any alteration at all in the existing law.

"The idea was that, as we were making an Act on the subject of the jurisdiction of the Courts, it ought, for convenience of reference, to deal as far as possible with the whole subject, and to embody existing law in concise and indisputable terms. In accordance with this idea, and with the full concurrence of the Bombay Government, both the provisions now in question, and several others, were inserted.

"As to Watans, which are the subject of clause (*a*), the full powers of the Government to deal with them, which have existed since the beginning of British rule, were declared in Bombay Regulation VI, 1833, repeated in Bombay Act VII, 1863, and saved in Bombay Act III, 1874. Moreover, the Pensions Act excluded the Courts from trying suits relating to any thing payable by Government in respect of any office, and the Government of India in the Legislative Department ruled in 1873 that the terms of that Act were 'sufficiently large to include all the cash emoluments of the holders of Watans or hereditary offices.' This clause was originally put into the Bill by the express desire of the Bombay Government, and in their final letter of general objection they said that this clause was 'unreservedly approved of.'

"As to payments chargeable on, or payable out of, the land-revenue, (*c*), the case is similar; the Pensions Act covers them all, and they were inserted merely to make the subject complete.

"The Bill now before us will, to the best of my belief, effect no change whatever in the law on these two subjects. The Courts will be excluded as before. I am aware that it has been supposed that cases might arise under (*a*), not (*c*), from which the Courts are not barred; but I never heard any one clearly define them. If there be such, they must be of so exceptional and peculiar a nature that no one could object to their being referred to the Civil Courts.

"The case of (*b*) remains. Here I think we must frankly admit that the alteration is a real one. At the same time, it is not ordered to be made in consequence of any difference of principle, and it is not likely to have any very extended application.

"As to principle, I am glad to observe that the Secretary of State does not say anything even to imply that the measure regarding ináms was in itself either unjust, unnecessary, or unsound. The ground assigned is merely that the attachment felt by a population to an old protective privilege should not be disregarded even though such protection may really be unnecessary. As to this ground, I hope I may venture to say, without disrespect to the high quarter by which it is put forward, that it seems to me quite sufficient to justify the legislation we are considering to-day. Popular prejudices must always form an element in the calculations of the statesman, and it is perhaps only just and politic that some concession should be made to prejudices which have been expressed so emphatically and persistently as in the present instance.

"Regarding the application of this clause (*b*), I quite concur with what fell from the Hon'ble Mover as to its being very limited. The misapprehensions as to the scope of this part of the Revenue Jurisdiction Act contributed in no slight degree to swell the distaste with which the measure was regarded. It was supposed that the Act would affect cases of title to, or ownership of, land, and a certain 'Chikli Tanna case' was cited as a type. It was also imagined that the Act would affect questions of succession, and here a certain Kaira case was the exemplar. The fact, however, is that the Act did not touch either one class of cases or the other.

"What it did touch was, as I said in Council on 28th March 1876, a small residue of cases which the summary settlement Act VII of 1863 had failed to draw in, and which would arise from time to time as the survey settlements were effected. As regards those cases, the fact is that the argument previously used—that they were too inconsiderable to justify the maintenance of special legislation, reserving for them a resort to the Civil Courts which was unknown in the rest of India—is also good for leaving this resort untouched when it is found to be clung to sentimentally as an ancient privilege. The worry and waste of time and money which litigation involves will indeed continue, together with other inconveniences which were cited when the Act was passed, but the people will, on the whole, lose more by this than the Government. The Government, which, it has been shown in the debates in this Council, apparently gains about three out of four civil suits brought against it, will not risk very much; and the people, if they really relish the expenses and uncertainties of litigation, may be left to enjoy them,—the more so in that the tendency of revenue officers to keep things smooth and to decide in favour of the subject whenever they decently can has been established beyond dispute. As an illustration of this, supplementary to the now famous one regarding the views of local officers in the Canara case, which was afforded by the Bombay High Court in the Kabilpur judgment, I now feel at liberty to mention that, so far from I myself having been the promoter of, or responsible for, the proceedings which led to the Kabilpur suit, that suit would never have occurred if the advice I tendered had not been set aside.

"With reference to this clause (*b*), then, I would say in conclusion that I think the Council may pass it, not only because, as the Hon'ble Mover has

said, it is the Government's 'plain duty to obey,' but with an intelligent and ready assent."

The Motion was put and agreed to.

MADRAS DISTRICT JUDGES BILL.

The Hon'ble MR. STOKES moved for leave to introduce a Bill to enable the District Judges of the Presidency of Fort St. George to suspend and remove certain ministerial officers. He said that this was a small matter, and he would explain the necessity for the Bill in a very few words. Section 23 of the Madras Civil Courts Act, 1873, provided that the ministerial officers of the Courts of the Subordinate Judges and District Munsifs should be appointed, and might be suspended or removed from office, by such Subordinate Judges and District Munsifs respectively, subject to the approval or confirmation of the District Judge within whose jurisdiction these Courts were situate; but the District Judge had no power in the first instance to suspend or remove those ministerial officers of his own motion. The proposed Bill would give him such power, which would obviously be useful in case of fraudulent collusion between Munsifs and their sarishtadárs, instances of which were said to occur from time to time, *occasione oblatâ*. The Bill had been suggested by the High Court at Madras, and was supported by the recommendation of the Madras Government. Similar legislation appeared to be needed in the Lower and North-Western Provinces of the Presidency of Fort William. But as neither of the two High Courts and two Local Governments here concerned had complained of the defect, the Bill was, for the present, confined to Madras.

The Motion was put and agreed to.

The Council adjourned *sine die.*

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE, AGRICULTURE, AND COMMERCE.

Relief Report for the Kistna and Kurnool Districts for the week ending 21st July 1877.

Proceedings of the Board of Revenue, dated 1st August 1877.

Read Relief Reports from the Collector of the Kistna district, dated 24th July 1877, and from the Collector of Kurnool, dated 27th July 1877.

The relief reports for the Kistna and Kurnool districts for the week ending 21st July will be submitted to Government in continuation of Board's Proceedings, dated 27th July 1877, No. 3524.

2. *Prices and rainfall.*—The week's returns for the *Kistna* district show a very considerable rise in prices both of rice and dry grains. This is specially marked as regards the latter in the Nandigama taluk; in five taluks the advance in the price of rice amounts to a diminution in the quantity obtainable for a rupee by one seer, and in two taluks by even more. The quotations for all dry food-grains are considerably higher almost universally. Rain was registered in seven taluks, the fall being heaviest in Sattenapalli and Bander and amounting to nearly an inch and an inch and a half respectively. In *Kurnool* prices of all food grains are generally so high that the advance is not so marked as elsewhere, they may be said to be almost stationary at very high figures; the rainfall was but a light sprinkling in Ramalakota. Telegraphic reports of steady and copious falls of rain have, however, reached the Board from both districts since the period to which these returns relate, and it is understood that the growing crops are saved for the present.

3. *Relief works.*—Numbers on the Commamur Canal remained almost the same as in the preceding week, being 3,164 against 3,162; the Board have since learnt that increase of distress has necessitated resumption of work on the Kistna river embankment. The details for *Kurnool* are as follow :—

Taluks.	14th July.	21st July.	——
Ramalakota	36,990	38,582	+ 1,592
Nandikotkur	26,362	26,742	+ 380
Nandial	32,274	30,560	— 1,714
Sirwell	19,695	19,674	— 21
Koilkuntla	27,234	26,902	— 332
Pattikonda	25,784	25,593	— 191
Cumbum	37,249	36,140	— 1,109
Markapur	6,748	6,409	— 339
TOTAL ...	212,336	210,602	— 1,734

The fluctuations are nowhere very marked; the increase in Ramalakota and Nandikotkur is explained to be due to increasing pressure of distress, and the falling off elsewhere is partly due to the drafting of infirm coolies to relief-houses, and partly to desertion owing to the reluctance

A

of some to proceed to a distance from their homes. The higher scale of wages was in force throughout the district.

4. Particulars connected with works under the Public Works Department are subjoined :—

Taluks.	Number	Outlay.		Total number of coolies.
		In the week.	To the end of the week.	
		Rs.	Rs.	
Ramalakota	21	10,960	1,73,693	17,355
Nandikotkur	5	12,832	1,15,579	16,966
Patticonda	21	3,437	32,162	5,084
Koilkuntla	2	...	1,876	...
Nandial	4	14,080	2,48,105	18,738
Sirwell	7	15,855	4,13,516	19,129
Markapur	1	...	1,316	...
Total ...	61	57,164	9,86,247	77,272

There is a slight decrease in numbers employed under professional supervision.

5. *Gratuitous relief.*—In the *Kistna* district numbers in relief-houses and in receipt of village relief have risen from a total of 1,494 to 3,090; the money-dole system has been extended to nearly 100 additional villages. The number of deaths during the week was two in relief-houses and one in villages. The particulars for Kurnool are given below :—

Taluks.	14th July.	21st July.	—
Ramalakota	13,043	13,747	+ 704
Nandikotkur	3,426	3,588	+ 162
Nandial	5,100	10,271	+ 5,171
Sirwell	4,718	6,310	+ 1,592
Koilkuntla	6,743	7,910	+ 1,167
Pattikonda	8,540	9,189	+ 649
Cumbum	12,582	13,451	+ 869
Markapur	3,194	3,485	+ 291
Total ...	57,346	67,951	+ 10,605
In camps, &c.	12,500	17,113	+ 4,613
Village relief	6,053	8,766	+ 2,713
Three-pie children	38,793	42,072	+ 3,279

There was a considerable increase in the week under review under all forms of gratuitous relief. This is partly due to the removal from works of the old and feeble; the only taluk in which the increase is very marked is Nandial, but the correctness of the returns as regards the large accession of 3-pie children which chiefly occurs in that taluk is doubted. The number of deaths was 343, the high rates of mortality previously noticed in Ramalakota, Pattikonda, and Cumbum still continuing; deaths among 3-pie children numbered 42, of which half occurred in Ramalakota and 19 in Pattikonda. The deaths in camps and villages were 221 and 80, respectively, or in the ratio of 778 and 563 per mille per annum. The outlay on gratuitous relief was Rupees 19,564 in the week and Rs. 2,77,094 up to the end of the week.

C. A. GALTON,

Acting Secretary.

Statement showing the statistics of gratuitous relief in certain districts of the Madras Presidency for the week ending Saturday the 21st July 1877.

REVENUE BOARD OFFICE, MADRAS,
1*st August* 1877.

C. A. GALTON,
Acting Secretary.

Weekly Relief Report of the distressed districts of the Madras Presidency.

Proceedings of the Board of Revenue, Madras, No. 3618, *dated* 3rd *August* 1877.

Maps for—

Kurnool.	North Arcot.
Coimbatore.	South Arcot.
Bellary.	Tanjore.

Statements.

No. 1. Prices.
2. Relief report.
„ 3. Talukwar abstract of ditto.
„ 4. Statistics of gratuitous relief.
„ 5. Talukwar ditto.
„ 6. Number and description of works.
„ 7. Works under supervision of Public Works Department.
„ 8. List of special establishments.
„ 9. Memo. of sums sanctioned.

The relief reports for the week ending 28th July will be submitted to Government with the usual statements and maps as marginally noted.

2. *Prices.*—The rapid rise in prices which has been noticed in recent reports appears to have been somewhat checked by the general improvement in the condition of the standing crops owing to the late rains; in *Kistna* and Coimbatore there has been a slight fall in prices, and in Salem they may be said to be stationary; in *South Arcot* there was a marked decline in the price of cumbu, due no doubt to the fact that the newly harvested grain is coming in to the market; *Nellore* and *North Arcot* alone show any considerable advance in the price of rice. Turning to details for each district in *Nellore* the most marked feature is a very sharp rise in the prices of all grains at Venkatagiri; in Kandukur also there has been a considerable advance; in *Cuddapah* there are no very marked fluctuations; in *Bellary* prices have gone up, chiefly in the Head Assistant Collector's division, rice being quoted at 4·32 seers per rupee at Pennacondah and Hindupur; this is due to the insufficiency of the market supplies, which has formed the subject of correspondence. In *Chinglepat* the price of rice has risen at three stations and fallen at three; dry grains are stationary. In *North Arcot* there is again a very serious rise in the price of rice at Tripathy, only four seers being procurable for a rupee; there is also a marked advance at Trithany, Gudiattum, Madupauk and Venkatagiricotta, the increase is explained to be due to decreased importations, but the Board do not see why it should chiefly affect places like Tripathy, Trithany, and Gudiattum, which being on the line of railway, should be exceptionally well supplied; no dry food-grains are quoted for Wandewash; this should be explained; it can hardly be that they were not procurable at all. In *South Arcot* the only point to note is the fall in the price of cumbu in the Villapuram, Cuddalore and Chedambaram taluks. In *Trichinopoly* there has been a rise in prices at Perambalur, but at Udiyarpoliem rice has fallen again; in *Madura* there is no noticeable change in *Tinnevelly*; the pressure of high prices is greatest in Strivilliputtur; in *Coimbatore* there is a still further advance in the prices of rice at Collegal, barely four seers being procurable for a rupee; elsewhere there is a tendency to fall. In *Salem* prices of dry grains are stationary, at Oossoor rice is very dear and dry grains are not quoted, this should be explained. The highest and lowest prices for rice and the dry grain most commonly in use are given in the margin.

Districts.	Rice, second sort.		Dry grains.	
	Highest.	Lowest.	Highest.	Lowest.
Nellore	5·00	7·00	* 7·37	10·50
Cuddapah	4·98	5·81	* 5·25	7·12

Malabar	5·62	8·50	7·88	11·37

* Ragi. † Cholum.

3. *Rainfall.*—It is with pleasure that the Board have to record a fall of rain in every district during the week, which has in many places saved the drooping crops; so far the influence of this burst of the monsoon has been felt chiefly in the northern districts, but the Board trust that it will extend more widely over the south.

In *Kistna* the falls have been very heavy and general, the average for the district being 3·47 inches; the rain is stated in the Collector's weekly telegram to have saved the surviving dry crops and to be useful for sowing and transplantation; in *Nellore* rain was registered at 7 stations, and at Ongole and Darsi 1½ inches were obtained; in *Cuddapah* the fall was general throughout the district, except apparently at Madanapalli; in Pullampet as much as 2½ inches were registered, and at Cuddapah, Pulivendla, Jammalamadugu, Prodatur, Sidhout, Kadiri and Kamalapur between one and two inches fell. This welcome intelligence should have been telegraphed to the Board; no intimation of it was received till the receipt of the weekly returns.

In *Bellary* also the rain was general, except apparently over a portion of the southern taluks. At Hospett 3½ inches were recorded, and at Gooty, Anantapur, Kudlighi, Hadgalli, Alur and Adoni two inches and more. The telegraphic reports from *Kurnool* have intimated that showers have fallen every where, and that the crops are saved for the present. In *Chinglepat* the fall was very light in the north of the district; in *North Arcot* also the rain was partial, and nowhere, except Arcot, reached an inch. In *Trichinopoly, Madura, Tinnevelly* and *Coimbatore* there was a mere sprinkling, and in *Salem* nothing more than light showers occurred except at Trichengode.

4. *Grants and Outlay.*—The grants up to the 28th July aggregated Rs. 2,13,87,283, and the outlay reported was as follows:—

	In the week. Rs.	Up to the end of the week. Rs.
Relief works ...	6,45,226	1,85,44,920
Gratuitous relief	3,73,366	30,64,728
Total ...	10,18,592	2,16,09,648

5. The number and description of works in progress and completed during the week was as follows:—

	In progress.		Completed.	
	Number.	Length in miles.	Number.	Length in miles.
Roads—				
New works	519	3,373	158	675
Repairs	480	4,003	145	743
Total ...	999	7,376	303	1,418
Irrigation—				
New Works	97	...	26	...
Repairs	1,228	...	333	...
Miscellaneous	3,976	...	3,361	...
Total ...	6,300	...	4,023	...

6. *Numbers on relief works.*—The following figures show the numbers in each district as compared with numbers on the works in the preceding week.

Districts.	21st July.	28th July.	
Kistna	3,164	5,294	+ 2,130
Nellore	16,471	23,726	+ 7,255
Cuddapah	140,599	146,682	+ 6,083
Bellary	307,443	324,867	+17,424
Kurnool	210,602	214,371	+ 3,769
Chingleput	30,044	28,340	— 1,704
North Arcot	56,269	58,411	+ 2,142
South Arcot	...	68	+ 68
Trichinopoly	96	581	+ 485
Madura	17,716	22,559	+ 4,843
Coimbatore	31,216	28,395	— 2,821
Salem	43,254	45,755	+ 2,501
Total ...	856,874	899,049	+42,157
Buckingham Canal...	48,453	50,096	+ 1,643
Junction Canal ... { Under the Executive Engineer ...	4,240	4,373	+ 133
Junction Canal ... { „ Commissioner of Police ...	860	1,648	+ 788
Grand Total ...	910,427	955,166	+44,739

The increase during the week was even more considerable than in the previous week, and was most marked in Nellore, Cuddapah, Bellary and Madura. In *Nellore* the increase is nominal, being due to the greater completeness of the returns, figures for Kandukur, Darsi and Venkatagiri being supplied this week; the total for these three divisions covers the whole increase. The numbers at work on the Buckingham Canal, with the districts to which the coolies belong, are marginally noted; those employed under the supervision of the Department Public Works throughout the rest of the district numbered 3,245.

Districts.	Forwarded by the Revenue Department.	By D. P. W. Recruiters and Contractors.	Total.
Nellore	6,031	34,188	40,219
Cuddapah	3,973	1,126	5,099
Kurnool	1,860	...	1,860
Bellary	2,235	388	2,623
Kistna	295	...	295
Total ..	14,394	35,702	50,096

7. In *Cuddapah* numbers are still greatly on the increase, the accession of numbers being greatest in Proddatur owing to increased pressure of distress, and in Pullampett owing to the opening of the Northern Section of the Cheyair embankment and to transfer of paupers fit for work from camps. The figures for Voilpaud appear to be those for the week before last; this should be explained.

Taluks.	21st July.	28th July.	
Jamalamadugu	27,921	27,484	−4,377
Pulivendla	16,366	17,092	+ 726
Proddatur	13,126	15,373	+2,247
Cuddapah	4,468	4,569	+ 101
Budwail	18,406	19,036	+ 630
Sidhout	2,065	2,198	+ 133
Pullampett	10,757	12,979	+2,222
Kadiri	7,155	7,465	+ 310
Royachoti	11,064	13,018	+1,954
Madanapulli	18,285	16,482	−1,803
Voilpaud	10,986	10,986	..
Total ...	140,599	146,682	+6,083

In *Bellary* the enhancement of numbers is greater than any where else, it is accounted for chiefly by the continued and serious accumulation of paupers on the works in Adoni; the only explanation afforded in the returns is pressure of distress, and the real cause of the excessive proportion of coolies on works in that taluk as compared with the rest of the district has not been satisfactorily cleared up; about 35,000 are alleged to belong to other taluks; the only other taluk in which numbers have increased largely is Bellary, greater intensity of distress being the reason assigned. In Sundur the decrease is due to stoppage of works. The numbers on the Bellary-Hubli Railway were 8,824.*

Taluks.	21st July.	28th July.	
Adoni	114,804	126,623	+11,819
Alur	36,600	37,715	+ 1,115
Gooty	16,843	17,488	+ 645
Tadpatri	23,834	25,289	+ 1,455
Anantapur	13,068	12,577	− 491
Dharmaveram	11,238	12,008	+ 770
Pennakonda	2,729	3,579	+ 850
Hindupur	1,740	1,938	+ 198
Madaksira	5,937	6,897	+ 960
Raidrug	15,657	15,495	− 162
Bellary	27,395	31,451	+ 4,056
Hospett	7,266	6,990	− 276
Sundur	3,005	228	− 2,777
Kudligi	15,652	15,480	− 172
Harpanhalli	4,482	4,672	+ 190
Huvinhadgalli	7,193	6,437	− 756
TOTAL ...	307,443	324,867	+17,424

* Bellary	3,454
Hospett	5,370
	8,824

8. In *Chingleput* there is a slight decrease; it occurs in Madurantacam, but there is a great discrepancy between the figures entered in the comparative memorandum which accompanied the return and those given in the returns themselves for this taluk; this should be explained: the numbers on the Conjeveram-Chingleput line rose to 25,316. In *North Arcot* the increase occurs chiefly at Vellore; no explanation is afforded.

In *Madura* numbers have swelled in Tirumangalum and Palni owing to the failure of the harvest and want of rain. In *Coimbatore* the falling off appears to be due to the coolies being in transit from one work to another. In *Salem* fresh works have been commenced in Dharampuri and numbers have increased in that taluk.

9. The total number of famine coolies working under the supervision of the professional department was 2,26,220 against 2,22,400 in the previous week; the figures for Kurnool are those for the week ending 21st July, and no particulars of this nature have been received from North Arcot.

10. The enhanced rate of wages appears to be in force everywhere except in parts of Nellore and North Arcot; the explanation called for is awaited.

11. *Gratuitous Relief.*—The following are the district totals:—

Districts.	21st July.	28th July.	
Kistna	3,090	2,975	− 115
Nellore	29,959	42,441	+12,482
Cuddapah	100,188	118,328	+18,140
Bellary	170,260	184,754	+14,494
Kurnool	67,951	75,532	+ 7,581
Chingleput	57,198	62,119	+4,921
North Arcot	64,192	63,997	− 195
South Arcot	18,886	30,692	+11,806
Trichinopoly	1,887	4,596	+ 2,709
Madura	31,968	39,110	+7,142
Tinnevelly	1,827	3,273	+ 1,446
Coimbatore	75,079	96,765	+21,686
Salem	106,197	110,389	+4,192
Malabar	94	94	...
TOTAL ...	728,776	835,065	+106,289
In camps	263,683	313,925	+50,242
In villages	291,103	340,708	+49,605
3-pie children	170,900	177,457	+ 6,557
* Kistna	3,090	2,975	−115

* Particulars not given.

12. There is again an alarming increase in the number of those in receipt of gratuitous relief, testifying to the very severe pressure of distress; its intensity appears to have been much more widely felt during the past fortnight, for in that period no less than 2,27,000 paupers have been added to those on the hands of the State. During the week under review Nellore, Cuddapah, Bellary, Kurnool, Chingleput, South Arcot, Madura and Coimbatore contribute very largely; the increase is nearly equally divided between camps and village relief.

In Nellore, Chingleput, and Coimbatore it occurs chiefly in camps and relief houses; in Cuddapah, South Arcot and Madura in villages; in Kurnool under both heads; whilst in Bellary there has been extensive drafting of inmates of camps and relief houses to villages. The increase in the number of 3-pie children is not so large as in the previous week; it occurs almost entirely in Bellary, where 6,500 additional children were paid the prescribed dole; in Cuddapah there was an increase; in Kurnool an equivalent decrease. The marginal figures show the progress of measures taken for gratuitous relief. The increase in relief-houses occurs in Coimbatore and Salem, where 11 and 14 additional centres were established respectively; the decrease in inspection circles occurs in Ramnad, it is not explained; in Bellary and Nellore there was an increase; the extension of the village relief system appears to have been general except in Salem, where there has been a falling off owing to the greater popularity of the camps apparently in Nellore.

	21st July.	28th July.	
Number of relief centres	424	451	+ 27
Inspection circles formed	790	783	— 7
Villages in which relief was given ..	8,056	8,617	+559

In *Nellore* the increase is accounted for in a great measure by the arrival of those relegated from Madras camps. In *Cuddapah*, Budvail, Voilpaud and Kadiri contribute most largely to the increase, enhanced prices and the greater severity of distress being the causes assigned; in *Bellary*, Adoni, Bellary, Raidrug and Anantapur chiefly furnish the additional recipients of relief. In *North Arcot* returns for Tripathy are wanting, otherwise this district also would have shown a considerable increase; the figures for Arcot, as compared with those for the preceding week, indicate that the returns for that taluk are not complete. In *Chingleput* the increase was general, and in *South Arcot* more widespread distress has necessitated the inauguration of measures of relief throughout a much larger portion of the district; in *Madura*, Terumangalum and Pereacolum contribute most largely, and in *Coimbatore* the pressure is being more intensely felt in the Sub-division and Paladum. In *Salem* the whole increase is accounted for under camp relief in the Salem taluk it is partly attributed to the establishment of nursery kitchens for children.

13. The following statement shows the rates of reported mortality in camps and villages, calculated on the average strength for the week under report and that preceding. The average is slightly lower:—

Districts.	Camps and relief houses.			Village relief.		
	Approximate strength.	Deaths in the week.	Ratio per mille per annum.	Approximate strength.	Deaths in the week.	Ratio per mille per annum.
Nellore	31,097	280	469	1,290	...	...

Total ...	14,305,997	942,429	791,435	1,733,864	12·12

* Inclusive of those employed on the Buckingham Canal.

15. Grants sanctioned by the Board up to date aggregate Rs. 2,34,25,493.

16. The following statement shows transactions under the Land Improvement Act:—

	In the week.	To the end of the week.
	Rs.	Rs.
Nellore	1,265	94,681
Cuddapah	550	1,35,606
Bellary	14,265	2,80,785
Kurnool	1,780	12,330
Chingleput	6,201	92,475
North Arcot	4,981	26,686
Madura	1,781	67,921
Tinnevelly	...	32,900
Coimbatore	350	21,409
Salem	9,129	1,06,807
TOTAL ...	40,302	8,71,600

Advances to weavers are noted below:—

Cuddapah	875	4,390
Bellary	6,859	56,089
Madura	1,649	8,935
Coimbatore	1,757	12,219
Salem	14,366	2,71,494
TOTAL ...	25,506	3,53,127

17. The usual statement of establishments is enclosed; the cost is Rs. 1,31,642 per mensem.

18. The average strength of resident paupers in Madras camps was 15,088 and of non-residents 13,421. Of the 14,830 paupers resident on the 28th July the marginally noted districts contributed the numbers set opposite each. The numbers employed on various works outside the camps were 9,017. The strength in hospital on the 28th July was 892; deaths numbered 237 (of which 230 took place in hospital) or in the ratio of 825 per mille per annum. The outlay during the week was Rs. 21,539 and up to the end of the week Rs. 7,37,641. The President of the Municipality had 2,890 paupers at the Sattangad camp and 2,302 on works on the date above-mentioned. The outlay during the week was Rs. 1,321 and up to the end of the week Rs. 67,029.

Chingleput	7,991
North Arcot	5,205
Nellore	1,324
Other districts	310
TOTAL ...	14,830

* Such as digging and repairing wells, prickly-pear clearances, &c.

‡ Corrected figures given.

§ Numbers not received; last week's figures given.

† All the labourers upon the Dhond-Manmad Railway have been included under Ahmednagar.

‖ For details and dates see table appended.

Favourable rain has fallen in Sholapur, Satara, Belgaum and Dharwar, very materially benefiting the prospects of the crops in those districts. Less satisfactory reports are received from the remaining five Collectorates, and that from Khandesh is especially gloomy. As, however, out of a population of 10,28,642 only 3,705 people are upon relief works, and considering also that there is little, if any, charitable relief, and that prices are very much lower than in most of the affected districts, the Collector would appear to have over-estimated the existing unfavourable condition of his district.

2. The average price of jowari throughout the famine area has risen, it being now only about 12½ lbs. per rupee, but this is due to the rise in Khandesh, Nasik, Ahmednagar and Poona, where grain has not hitherto been excessively dear; and it is satisfactory to note that in Satara, Kaladgi, Belgaum and Dharwar, where food is dearest, prices have slightly fallen during the week.

3. The number of people upon relief works in the nine affected districts is 2,57,456 against 2,63,461 last week, and there are also 996 hill-men and immigrants employed in Ratnagiri and Kanara. The figures for Kaladgi are not yet available. There has been a slight rise in the numbers upon works in Khandesh, Nasick, Ahmednagar and Dharwar, and a decrease in Poona, Sholapur, Satara and Belgaum, the net decrease in the eight affected districts, for which returns are available, amounting to 6,005. The decrease in the numbers upon relief in Sholapur is very marked.

4. Cholera continues, but is not increasing.

5. Further reports have been received from the Sanitary Commissioner, who has now spent about a month in the Kaladgi Collectorate, the district in which the distress is the greatest. The Sanitary Commissioner considers the general condition of the people, whether on relief or not, to be fairly good; that civil agency rates, guarded by the provisions ordered by Government for special treatment of special cases, are sufficient for people performing civil agency tasks; and that the measures of relief ordered by Government, if properly carried out, meet every possible contingency that can arise. The Sanitary Commissioner points out that the chief difficulty exists in the cases of obstinate persons who will neither go to relief works nor relief houses, and who neglect their children. Such cases are engaging the attention of the relief officers.

6. The table showing the rainfall and prices in each taluka is appended.

7. The following table gives the expenditure by Government, during the week ending 28th July, upon charity in the relief of the aged and infirm poor; and in payments made to the young children of labourers employed upon relief works. Comparing the results shown in the table below with those shown in the last summary, it will be seen that the number of persons in receipt of Government charitable relief has increased from 44,933 to 46,410, while the number of children under 7 years of age has increased from 74,569 to 74,662.

The number of people charitably relieved was 18·91 per cent. of the number of labourers upon relief works during the corresponding week.

Districts.	Collector's discretionary grant.			Expenditure incurred under the authority of Government Resolution No. 312 C. W.—1116 of 26th December 1876, on account of children under 7 years of age whose parents are upon relief works.		
	Average number of persons relieved during the week.	Expenditure during the week.	Total expenditure up to date.	Average number of children, and of women taking care of them.	Expenditure during the week.	Total expenditure up to date.

* No expenditure has been incurred by the Collector.

† No expenditure has been incurred by the Collector and Executive Engineer.

8. The following table gives the distribution of the people among the relief works in the nine affected districts employing 1,000 labourers, or more, during the week ending 4th August. It will be seen that 224,183, or more than four-fifths, of the labourers were concentrated upon the works enumerated:—

	GRAND TOTAL		224,183	

9. Tables (A) and (B) are appended as usual. It will be seen that, during the week ending 4th August, the number of people upon Civil Works in the nine affected districts was 20,322, the number upon works under Public Works Department agency being 240,832.

The proportion of people upon the former continues, therefore, less than 10 per cent. of the total. It is to be noted that the figures given in these tables are taken from the progress returns of the works, and are brought up to the week ending 4th August, while the figures in the table prefixed to this summary are taken from the Collectors' telegrams, and refer to the week ending 11th August. It will be seen that the net decrease in the number of people on relief works during the eight weeks subsequent to 9th June has amounted to 143,777.

10. Maps are not sent with this summary.

11. A table is appended showing the condition of the affected Native States.

12. With regard to the movements of food-grains, 5,168 tons were exported from Bombay to the Southern Mahratta ports during the week ending 11th August, and during the same period 5,625 tons were carried by the Great Indian Peninsula Railway to stations upon the Poona-Sholapur and Nasik-Bhusawal lines. The table below shows the quantities of grain sent by sea and rail from October till the 11th August to the Southern Mahratta ports and the railway stations in the distressed districts. It will be seen that the total amount delivered up to the 11th August was 367,692 tons:—

Food-grains sent to	In October, November and December 1876.	In January February and March 1877.	In April 1877.	In May 1877.	In June 1877.	In July 1877.	In August (up to 11th.)	Total.

13. The rain-fall during the week has continued good in the southern Collectorates of Satara, Belgaum and Dharwar. It has also been sufficient in Sholapur and in parts of Poona and Ahmednagar, but more is urgently wanted in the remaining portions of the two last named Collectorates, and in Khandesh and Nasik; in Kaladgi there have been partial showers. The south-west monsoon has been heavier on the coast and in the Konkan districts, and along the western line of ghauts where, as a rule, the rainfall has been sufficient. Crops are generally good where rain has fallen, but in many parts they are greatly in need of water. Rain still holds off in Guzerat and Kattiwar, and the anxiety regarding these portions of the presidency is increasing.

The average prices of food-grain over the whole affected area have slightly risen, but there has been a slight fall in those districts where grain is dearer, and the general result is, therefore, not unsatisfactory.

Imports of grain on the coast have largely increased, and have amounted to 5,168 tons as against 1,631 tons last week. On the other hand, the deliveries by rail to the famine districts have fallen from 6,727 in the last week to 5,625 tons this week. The decrease is not due to any diminution in the amount of grain seeking transport, but to the incapacity of the railway to carry it in sufficient quantities in addition to the general traffic of the line. Looking to the paramount character of the demand for food supplies, not only in Bombay, but in Madras and in the Nizam's dominions, measures have now been taken, giving a preference to famine traffic over all general traffic to such an extent as may be necessary, to ensure that there shall be no falling off in a quantity which has been determined on as necessary in the Bombay affected districts, at Hyderabad, and at Raichore for Madras.

There has been a net decrease in the number of people on works of 6,059; there has been an increase in those receiving charity of 1,477, and an increase of 93 in the number of young children.

The condition of the people is not worse, though its improvement is retarded by the continuance of high prices everywhere, and the absence of rain in some parts. The approaching full resumption of traffic with the ports on the coast, and the arrival at maturity of extensive areas of crops in some districts, should favourable rain continue to fall, will shortly, it is expected, lead to an amelioration of the general position.

Cholera is not increasing.

M. K. KENNEDY, Major-General, R. E.,
Secretary to Government.

Telegraphic returns of more recent rain have been received, but cannot yet be properly collated.
The monsoon set in on the 19th June above Ghauts.
* This is chiefly eastern rain.
† For the week ending 28th July.

C. E. BERNARD,
Additional Secy. to the Govt. of Ind...

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE, AGRICULTURE AND COMMERCE.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING THE 23RD AUGUST 1877.

General Remarks.—In Madras good rain is reported from Malabar and the Nilgiris: in Vizagapatam 8 inches have fallen, but the amount is said to be insufficient: in Kistna also there has been very beneficial rain, and an inch and a half has fallen in one taluk of Chingleput; elsewhere the fall has been slight, though general; prospects are said not to be improving, and distress is increasing. The numbers on relief works are 933,055, less by 25,105 than last week: on gratuitous relief 1,205,391, which is more by 127,709 than last week. No report has been received from Mysore. In Bombay, except in Kanara, there has nowhere been any sufficient fall: want of rain is urgently felt in the Northern Deccan, Kattywar, Guzerat, Khandesh, Násik and the Konkan; in Sind the extreme lowness of the river causes great anxiety. The numbers on relief works are 264,794, 6,342 more than last week, and on charitable relief (including children) 131,458, 10,486 more than last week. There has been little rain during the week in the Central Provinces, except in Sambalpur and Raipur; the break is injurious to the rice crops, but these will be saved if rain falls within ten days; otherwise general prospects are favourable. No rain is reported from Berar, where it is urgently needed. Nor has any fallen in Central India, where the crops are suffering. In Rajputana the only rain reported is slight showers in Ajmere, Jeypore and Ulwur: the condition of the crops is critical, and there is a general want of fodder and pasture. In Bengal heavy rain has fallen in the Central, Eastern and Northern Districts; in parts of Behar, Orissa, and Chota Nagpore more is required for the transplantation of the late rice; general prospects are good. Heavy rain has also fallen in Sylhet, and good rain in the Valley districts of Assam, where prospects are favourable. No report has been received from Burma. In the North-Western Provinces and Oudh slight rain is reported from the Eastern districts, and good showers at Fyzabad; slight showers have also fallen at Jhánsi, Agra, Meerut and Bareilly, but the Western portion of the Provinces is suffering severely from drought. In the Punjab rain is reported from Umballa, Ráwalpindi and parts of the Lahore district: agricultural prospects are bad.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Madras—		
Vizagapatam (Aug. 21st)	8·0 in 12 taluks...	Second sort rice 8, *cholum* 13, *cumboo* 15, *raggi* 13; pasture abundant; 2,720 reported fed by private charity at Vizagapatam; rain insufficient; seedlings dying; *nuvulu* beginning to be harvested, is a good crop; transplanting rice delayed
Godavery („ „)	Slight rain in all taluks.	Rice 8¾, *cholum* 10½, *raggi* 12, *cumboo* 14½; 196 poor fed, about 1,000 fed daily by private charity at Coconada; crops good in Delta; surviving crops reviving in uplands; no harvest; Godavery 2 feet 11 inches over anicut.
Kistna („ 20th)	General rainfall varying from about ·5 to 2·0 on 13th.	Rice 7·24, *cholum* 8·32, *raggi* 8·22, *cumboo* 7·71; 17,261 on works; 3-pie children not reported; camp relief 1,542; village relief 2,708; private charity 120; rain very beneficial to standing crops.
Nellore („ 21st)	·30	August 18th, rice 5·70, *cholum* 6·58, *raggi* 7·19, *cumboo* 7·47; on works 33,767; canal 40,999; children 7,531; camps and houses 47,895; village relief 3,000; crops not bad in Polur and Udayagiri, elsewhere withering, except under wells.
Cuddapah („ „)	·08	August 17th, rice 5 57, *cholum* 6·63, *raggi* 7·01, *cumboo* 7·59; on works 139,748; children 21,193; camps and houses 14,469; village relief 92,554; private charity 828; crops under irrigation good; in dry land withering owing to want of rain; harvest of *cholum, raggi, cumboo* and paddy in parts, outturn about a quarter.
Bellary („ „)	·7	August 18th, rice 5·58, *cholum* 6·03, *raggi* 6·25, *cumboo* 5·7; on works 276,443; children 74,529; camps and houses 27,556; village relief 120,629; no private charity; crops under wells good, others fair, save to the north, where in places by absence of rain they have withered; harvest none.
Kurnool („ „)	·63 (average of 6 taluks); *nil* in Cumbum division.	August 18th, rice 5·32, *cholum* 6·25, *raggi* 6·61, *cumboo* 6·65; on works 212,226; children 36,150; camps and houses 24,071; village relief 23,803; private charity 5,193; cholera, small-pox and fever prevalent; surviving dry crops in fair condition, but more rain wanted shortly.
North Arcot („ „)	·36 (average of 9 stations).	August 17th, second sort rice 5·8, *cholum* 6·7, *raggi* 6·7, *cumboo* 6·9, wheat 5·1; relief works 65,084; 3-pie children 14,555; in camps or relief houses 22,795; village relief 64,543; private charity 1,150; condition of crops or harvest poor.
South Arcot („ „)	·32	August 18th, rice 6, *cholum* 6·97, *raggi* 7, *cumboo* 9·39; on works 7,290; children 71; in camps and houses 37,989; village relief 47,073; private charity 1,342; crops in critical condition; *cumboo* harvested in parts, outturn very poor.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Madras—*concluded.*		
Tanjore (Aug. 21st)	Slight and partial ...	Prices rising, rice 6·25, *cholum* 8·52, *raggi* 10·25, *cumboo* 9·0 seers per rupee; on works 1,000; three-pie children 3,085; in camps or relief houses 500; village relief 7,749; private charity 4,233; rivers nearly full; condition of crops or harvest, wet crops generally good, dry not good in many places; *raggi* and gingelly seed harvested in some places, yield poor.
Trichinopoly („ „)	·21	August 18th, rice 5·72, *cholum* 7, *raggi* 7·20, *cumboo* 6·98; on works 6,375; children 720; camps and houses 5,695; village relief 679; dry crops withering; harvest of *valan* and *cumboo* in parts, outturn about half; freshes moderate.
Madura („ „)	·35 in Dindigul; slight near the coast.	Rice second sort 6·63, *cholum* 7·76, *raggi* 8·01, *cumboo* 8·04; on works 17.810; in camps and houses 16,674; in villages 19,605; three-pie children 2,518; cholera deaths 484; paddy harvest in Periacolum to some extent; crops on the ground withering.
Tinnevelly („ „)	Good shower on hills...	Rice second sort $6\frac{3}{4}$ seers, *cholum* 9, *cumboo* 9, *raggi* $9\frac{1}{2}$; relief camps 6,000; relief houses 1,442; village relief 1,473; private charity 3,996; moderate fresh in Tambrapurni continued till the 17th; standing crops generally good, but require rain.
Coimbatore („ „)	·24	August 18th, rice 6·42, *cholum* 7·77, *raggi* 8·47, *cumboo* 8·86; on works 29,915; children 1,990; in camps and houses 142,733; village relief 2,526; private charity unknown; dry crops withering; harvest of dry grains in parts, outturn $\frac{1}{8}$th.
Nilgiris („ „)	1·85; heavy rain in south-east.	August 18th, rice 5·89, *cholum* 6·39, *raggi* 6·99, *cumboo* 7·34; relief works none; camps and houses 518; village relief 10; private charity unknown.
Wynaad ...	...	Crops withering in parts; harvest of *samay, ganjee,* wheat and mustard, outturn of *samay* half, other grain between $\frac{1}{4}$th and $\frac{1}{8}$th.
Salem (Aug. 21st)	·375	August 20th. rice 5·76, *raggi* 6·33, *cumboo* 6·41, *cholum* 6·78; works 47,400; children 230; camps and relief houses 50,200; village relief 144,900; charity 130; crops failing; village relief rising 47 per cent. due to pressure of famine.
Malabar („ 20th)	9·57 (average of all taluks.)	Rice (average) $7\frac{1}{2}$ Indian seers, *raggi* $7\frac{1}{3}$ in Wynaad, elsewhere $10\frac{2}{3}$; gratuitous relief to 17 people in Manantoddy, 50 in Vythery, 81 in Palghaut; the daily average of people fed by private charity is 35,715; rain is amply sufficient for cultivation; crops promising; harvesting begun in some taluks.
Chingleput („ 21st)	1·5 in Madarantakum; ·5 in Ponneri; ·12 in Chingleput; ·33 in Conjeveram and Sydapet.	Rice second sort 6·57, *raggi* 7·17, *cumboo* 7·70, *cholum* 7·60; relief works 29,270; in camps 38,053; other places 46,309.
		General Remarks.—General prospects not improving; prices generally stationary, but exceedingly high; distress consequently increasing and extending; total number fed gratuitously 1,205,391; total number on relief works 933,055; exports of grain from Madras by rail during the week ending the 18th instant $12,192\frac{1}{2}$ tons.
Bombay— (Aug. 23rd)		
Sind— („ 22nd)		
Kurrachee ...	*Nil*	River on 20th 13 feet 11 inches, on same date of 1876 18 feet 1 inch, and of 1875 17 feet 2 inches; great cry for water everywhere; prospects gloomy; many immigrants from Kutch; small-pox in Dadu taluka, and measles in Mánjhánd.
Shikárpur ...	...	River 12 feet 5 inches, on same date last year 15 feet 8 inches; want of water still felt, but low lands well supplied; no floods yet in Rohri division; *rabi* prospects bad; no signs of rain.
Hyderabad ...	...	From 14th to 18th river 13 feet 9 inches, on 21st 14 feet, last year on same date 18 feet, and average of 10 years ending 18th 16 feet 4 inches, average of past 9 years 16 feet 11 inches; district healthy.
Upper Sind Frontier ...	*Nil*	Days sultry, nights cold; water low in canals; if river does not rise, *kharif* crops will suffer.
Guzerat— (Aug. 22nd)		
Ahmedabad ...	·20	No change.
Kaira ...	*Nil*	Crops withering; rivers very low; clouds gathering, but wind still high; public health good.
Surat ...	*Nil* in Surat and Olpád; slight in other talukas.	Crops withering; cattle removed from Olpád and Choryási for want of fodder; cholera in Surat and Pardi, 8 deaths.
Broach ...	·02	Total rainfall 6·66; cholera in city and Hansot; prospects unchanged.
Khandesh and Násik— (Aug. 22nd)		
Khandesh ...	*Nil*	Crops withering; 306 deaths from cholera.
Násik ...	*Nil*, except few cents westwards.	Prices slightly dearer; no improvement; 105 deaths from cholera.
Konkan— (Aug. 22nd)		
Tanna ...	1·21	Total rainfall 43·3; agricultural prospects doubtful; crops suffering in most parts for want of sufficient rain; prices rising considerably; cholera prevalent throughout collectorate; poor people from distressed districts pouring daily into the town of Tanna.
Deccan— (Aug. 22nd)		
Poona ...	Average rainfall ·51	Average rainfall from 5th June 11·45; except in Máwal, rain wanted everywhere; a few cases of cholera in the districts; distress decidedly increasing; *bajri* and *jowari* sold at $12\frac{1}{2}$ and 12 pounds, respectively.

At page 2268 of the Supplement to the *Gazette of India* of the 18th August 1877 in the rainfall column opposite South Arcot, for "1·8 in Cuddalore" read "·8".

Opposite Madura for "on works 27,107" read "on works 27,117."

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bombay—*concluded.*		
Ahmednagar ...	Slight in 2 talukas ...	Total rainfall 10·55; crops generally suffering; prospects unfavourable; cholera in 5 talukas, cases 66, deaths 50.
Sholapur ...	·12	Total rainfall 15·53, rain required for young crops; people suffer from high prices.
Satara ...	·30; slight fall in other talukas except Mánur.	Total rainfall since 1st June 13·30; crops generally good; rain urgently required in eastern districts; 43 deaths from cholera.
Southern Mahratta Country—(Aug. 22nd)		
Belgaum ...	·19	Total rainfall 29·65; fair rain in west of district, here crops are still good, next to none in eastern part of district, where crops are dying, in some villages withered; rain urgently required everywhere; 15 deaths from cholera.
Dharwar ...	·41 in Dharwar; ·43 in Mugud; ·13 in Hubli; ·18 in Shiggaon; ·40 in Ranibennur; ·80 in Hangal; ·43 in Kalghatgi; ·80 in Hirekerur; *nil* elsewhere.	Crops reported to have withered here and there on black soil, are suffering from insects in Hangal taluka; public health good; but high mortality among destitute poor.
Kanara ...	3·70	Total rainfall 52·50; 69 deaths from cholera.
Kaládgi ...	*Nil*	*Kharif* generally withering for want of rain; 22 deaths from cholera.
Kattywar and Gaekwar's Territory—(Aug. 22nd)		
Rájkot ...	...	Weather cloudy; rain much wanted; price of grain rising; water and grass scarce; health good.
Wadhwán ...	·04	Total rainfall 1·57; no change.
Baroda. ...	*Nil* since 8th.	
		General Remarks.—The situation is unchanged since last week except for the worse; the lowness of the river in Sind and the continued absence of rain in Guzerat and the Northern Deccan cause the greatest anxiety, while in the Southern Mahratta Country and the southern part of the Deccan also, more rain is urgently required; on works 264,794, on charity 51,166, and young children 80,292; prices, *jowari* from 9 pounds per rupee in Kaládgi and Dharwar to 18 pounds in Násik.
Bengal— (August 23rd)		
Chittagong ...	19·51	Health fair.
Noakholly ...	5·91	
Chittagong Hill Tracts	10·36	
Hill Tipperah ...	3·11	Health good; much hoof disease among cattle, but little or no mortality.
Backergunge ...	3·16	
Furreedpore ...	8·84	Weather fine on 21st and 22nd instant.
Dacca ...	8·13	
Tipperah ...	13·63	
Mymensingh ...	6·25	Health good.
24-Pergunnahs ...	5·98	
Jessore ...	1·89	
Nuddea ...	2·67	
Moorshedabad ...	6·23	
Pubna ...	2·85	Fever prevalent.
Rajshahye ...	10·13	
Bogra ...	4·09	
Maldah ...	3·97	
Dinagepore ...	3·86	Mild fever prevalent.
Rungpore ...	4·50; 1·69 in previous week.	
Cooch Behar ...	1·52	Health good.
Jalpáiguri ...	1·92	
Darjeeling ...	6·83	
Midnapore ...	·63	
Howrah ...	5·03	
Hooghly ...	4·22	Health fair.
Burdwan ...	6·88; 7·16 in Culna.	
Bankoora ...	·70	
Beerbhoom ...	1·85	Health good.
Sonthal Pergunnahs ...	·77	
Bhágalpur ...	3·09	Sporadic small-pox.
Monghyr ...	·95	
Purneah ...	1·84	
Durbhunga ...	4·70	

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bengal—*concluded.*		
Mozufferpore ...	1·18	Health good.
Sarun ...	1·06	
Chumparun ...	1·33	
Patna ...	·62	
Gya ...	·48; 5·01 in Nowada; 2·1 in Jehanabad; 1·57 in Aurungabad.	
Shahabad ...	1·28	
Hazáribágh ...	4·19	Health good.
Lohardugga ...	4·60	Health good.
Manbhoom ...	2·93	
Singhbhoom ...	3·73	District healthy.
Balasore ...	1·86	Health good; some cholera in Bhuddruck.
Cuttack ...	·72	Some cholera in town, otherwise health good.
Pooree ...	1·76; 3·17 in Khoordah.	Health good.
		General Remarks.—Heavy rain in most districts of Bengal Proper; general prospects good except in Jalpáiguri where rain is required; harvesting of early rice and transplanting of late rice almost completed; inundations in Midnapore rivers have caused some damage; in Behar generally and in parts of Orissa and Chota Nagpore divisions more rain still wanted for transplantation.
N.-W. P. and Oudh—		
Benares ...	·1 to ·3 on 19th, and slight and partial showers on 22nd.	If more rain falls soon, crops will have sustained no harm.
Allahabad ...	Slight showers in south on 20th and 22nd.	Wind westerly and hot during greater part of week, now north-east.
Jhansi ...	Only a slight shower on 22nd.	Rain too little to be of any use; prospects very bad; people emigrating in considerable numbers.
Agra ...	Slight rain on 21st and 22nd.	Since then prices have improved.
Meerut ...	Slight rain on 21st in two tahsils; none elsewhere.	Very hot.
Bareilly ...	Slight showers on 20th and 21st.	Rain not enough to do real good; hot winds have done great damage.
Kumaun ...	*Nil*	A storm passed over outer belt of district on 20th; weather hot and hazy with little wind; rice crops in a critical state.
Lucknow ...	*Nil*	Prevailing wind westerly and hot.
Sitapur ...	Only a slight shower in district on 19th, but no general rain.	Cloudy and wind easterly.
Fyzabad ...	Good rain on 18th and 21st.	Drought during early part of week.
		General Remarks.—Prospects not materially altered since the last report; there has been slight rain in the eastern districts and in parts of Oudh, but the west is still suffering severely from drought, and the cultivating classes of the Jhansi division are beginning to emigrate to Malwa; prices are rising, though not rapidly.
Punjab— (Aug. 22nd)		
Delhi ...	...	Much anxiety felt for want of rain; health good.
Hissar ...	*Nil*	Village tanks drying up; crops perishing; pasturage becoming scarce; price of food-grains rising; health generally good.
Umballa ...	1·10	Crops nearly withered; health good.
Lahore ...	·4 at Chunián; ·1 at Sharakpur; slight rain at *Sadar* and Kasúr.	*Kharif* failing; health good.
Mooltan ...	...	Crops suffering much for want of rain; health good.
Ráwalpindi ...	·8	Health good.
Peshâwar ...	...	Rain much wanted; crops suffering; health good.
Dera Ismail Khan ...	*Nil*	Crops suffering; price of food-grains rising; health good.
		General Remarks.—A fair quantity of rain fell generally in the Punjab during the week, but the regular rains are still keeping off; agricultural prospects continue gloomy; general health good.
Central Provinces—		
Upper Godávari (Aug. 18th)	·20	Crops drying up for want of sufficient rain; health good; prices rising.
Sambalpur ...	5·7	Crops flourishing; health good; prices steady.
Bilâspur ...	·87	Crops good; break favourable; fever continues; prices steady.
Raipur ...	2·33	Crops good; few cases of cholera; small-pox continues; prices slightly risen.
Bálaghát ...	...	Clear; transplanting rice stopped where tank water is not available; transplanted rice suffering for want of rain.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Central Provinces—*concld.*		
Chhindwára ...	...	Clear; prospects of crops fair; health good; prices steady.
Chánda (Aug. 19th)	...	Hot; transplanting rice continues; prospects of crops on the whole; favourable, health good; prices rising.
Betúl („ 20th)	·03	Rain much needed, especially for crops on high land; health good prices stationary.
Bhandára („ 21st)	...	Clear; prospects favourable, but rain much wanted for transplanted rice; fever continues; prices rising.
Nágpur („ 22nd)	...	Clear during the whole week; prospects of crops and health good; prices risen considerably
Wardha ...	...	Clear; rain wanted; weeding finished.
Narsinghpur ...	·11	More rain wanted; health good; prices rising.
Damoh ...	·67	Rice crops improved, but more rain wanted; prices risen.
Mandla ...	...	Clear; prospects of crops favourable as yet, but more rain wanted; fever continues; prices steady.
Nimár ...	...	Clear; scorching sun with high wind; rain much needed; crops suffering.
Hoshangabad ...	*Nil*	Prospects of crops fair as yet, but more rain wanted.
Jubbulpore ...	·82	Prospects good.
Saugor ...	Slight rain on 20th ...	Rice crops improved, but more rain wanted.
Seoni ...	*Nil*	Break continues; prospects fair.
		General Remarks.—In most of the rice districts rain is anxiously looked for; as yet the general prospects are favourable, but if no rain fall within ten days the rice crops will suffer seriously; prices are rising.
British Burma—	...	Report not received.
Assam—		
Gaubáti (Aug. 23rd)	2·12	Weather seasonable; transplantation of *sali* crops progressing; prospects good.
Sylhet („ „)	10·06	Heavy rain in all parts; prospects good; a little sickness in places.
Mysore and Coorg ..	...	Report not received.
Hyderabad Assigned Districts—		
Amráoti (Aug. 23rd)	*Nil*	In parts of province crops withering, in others fair; rain most urgently needed.
Central India— (Aug. 22nd)		
Indore ...	*Nil*	Clouds reported from different parts and great heat; crops are suffering.
Rajputana—		
Abu (Aug. 23rd)	*Nil*	Much anxiety; prices steady; clear sky.
Sirohi („ 19th)	...	Crops uninjured, but rain wanted; grass becoming scarce; health good; high winds.
Marwar („ 18th)	*Nil*	Water still abundant in tanks and wells; health good; crops drying up fast; wind continues with increased fury; prices rising fast; prospects more unfavourable.
Meywar („ 17th)	*Nil*	Water decreasing daily; health good; prospects precarious; rain urgently required.
Harowtee („ 18th)	*Nil*	Weather hot; prospects bad.
Jhallawar („ 17th)	*Nil*	Fodder very scarce; prospects not good.
Ajmere („ 23rd)	Slight showers last night.	Not enough rain to do good; prospects cause serious anxiety; grass unprocurable in most places; cattle suffering.
Jeypore	Drops ...	High variable winds; clouds at intervals; heat intense; nights cool; prices firm; health good.
Bhurtpore (Aug. 23rd)	...	No change; wind westerly; health good.
Ulwur ...	·53 after sand-storm last night.	Much more rain wanted; prices steady.
Nepal (Aug. 14th)	1·27 in previous week	Agricultural prospects doubtful; considerable anxiety was felt at the beginning of the week owing to a break in the rains which lasted several days; the young transplanted rice was said to be drying up on high lands; within the last 48 hours there have been several heavy showers which will do good; the price of grain is high as per following table:—

	March 1877. Seers per rupee.	August 1877. Seers per rupee.
Fine rice	9	$6\frac{1}{4}$
Coarse „	$12\frac{3}{4}$	7
Maidá	$12\frac{1}{4}$	10
Atta	$14\frac{1}{4}$	$11\frac{1}{2}$
Dál	$9\frac{1}{2}$	$10\frac{1}{8}$

RE, AND COMMERCE.

Weekly condition report of the distressed districts of the Mysore Province.

PROVINCE OF MYSORE.

(*No.* 27.)

Condition report for the week ending 11th August 1877.

Bangalore District.—Markets fairly supplied. Prices have risen slightly. Light showers of rain fell in five out of the nine taluks in the District. The crops are said to be withering and, in some places have been destroyed by insects. Cultivation is retarded owing to high winds and want of sufficient rain. Fever and dysentery are still prevalent.

Kolar District—Markets continue fairly supplied, except in the Sidlagatta and Gumnayakanpalya Taluks, where importation was slack. Prices of food grains rose in two taluks, but remained pretty steady in the others. There was no rain in the District with the exception of 9 cents at Kolar. Irrigated ragi is in fair condition, but the other standing crops are withering for want of rain. Javari is being harvested in some places, small-pox, cholera and fever are still prevalent.

Túmkúr District.—Markets fairly supplied. Prices rose in four taluks, and fell in all the others excepting Koratagere, where they were stationary. The rainfall during the week was scanty, only a slight fall ranging from 30 to 60 cents being reported from the Taluks of Túmkúr, Kadaba and Chiknayakanhalli. Dry crops are in need of rain; but javari and other crops under irrigation are in good condition. Prospects are still very uncertain. Cholera is on the decline, but diarrhœa, and fever are prevalent.

Mysore District.—Markets continue fairly supplied, except in the Ashtagram, Gundlupet and Malvalli taluks, where importation was slack. Prices pretty steady. Light showers of rain fell generally throughout the district. Sugarcane and paddy crops under irrigation are in good condition. Javari and sesamum crops were harvested in some places, the yield being estimated at ¼th of that of au average year. Prospects remain unchanged, and the public health is bad owing to the prevalence of cholera and dysentery in some places.

Hassan District.—Markets fairly supplied, except in the Harnhalli taluk where importation was slack, and in Manjarabad where there was a difficulty in procuring ragi. Prices fluctuating. There has been rain in all the taluks except Nagamangala, Channaraypatna and Narispur, the quantity registered at the head-quarters ranging from 18 cents to 6·95 inches. The paddy crops in the Manjarabad and Belur taluks and also those below channels in Attikuppa are thriving. Ragi in the Attikuppa and javari in the Harnhalli taluks are being destroyed by insects. The dry crops are withering. Javari was reaped in Attikuppa and Nagamangala, and sesamum also in the latter taluk. Cholera and small-pox are confined to the Arkalgúd aud Harnhalli taluks, but fever and dysentery prevail almost throughout the district.

Shimoga District.—Markets moderately supplied. Prices pretty steady. Good rain fell in almost all the taluks and revived the withering crops considerably. The standing crops are generally in good condition, and fresh sowings have been made in some places in the Honnali and Sorab taluks. Fevers, dysentery and cholera are still prevalent.

Kadur District.—Markets fairly supplied, except in the Tarikere, Mudgere and Lakvalli Taluks, where importation was slack. Prices of food grains rose in all but two taluks where they were steady. Rain fell in all the taluks of the District, and from 17 cents to 10·50 inches were gauged at their head-quarters. The standing crops, except in the Malnad portion of Chikmagalur and the Kadur portion of Banavar, are doing well. Ragi and beans were sown in some places in the Tarikere taluk during the week. Fever and dysentery are prevalent in almost all the taluks, and small-pox at Chikmagalur.

Chitaldroog District.—Markets continue fairly supplied, except in the Davangere and Budihal taluks. Prices fell slightly. Light showers of rain fell in four taluks, the maximum quantity registered at the head-quarters thereof being only 20 cents. Except in the Chitaldroog taluk, the standing crops stand in need of more rain. Forage is procurable, and the cattle appear to be healthy. Prospects may now be said to be more favorable. Fever, dysentery and diarrhœa prevail in several parts of the district.

General Remarks.

During the week ending 11th August 1877, the Malnad taluks lying on the margin of the Western Ghats have had an ample rainfall, so much as 30 inches and 52½ cents having been gauged at the head-quarters of Nagar taluk; but though good showers have fallen, the rainfall has been still scanty in the rest of the province. The crops not already destroyed by the preceding drought have, however, revived and the prospects are more hopeful.

2. There has been no great improvement in the condition of the people since the last report, except in the Shimoga district, where public health is reported to have been generally good. The number of deaths from cholera were returned at 109 as against 141 of the previous

week. Although this epidemic was somewhat on the decline, fever, diarrhœa, and small-pox were prevalent.

3. The number of works in progress under revenue officers was 1,706, being nearly the same as in last week, and the daily average number of persons employed on them was 24,296 as against 24,327 of the previous week. Although, on the whole, there was a slight decrease of only 31, the returns of the Bangalore district shew that the number of coolies employed daily was less than in the preceding week by 1,002. The attention of the Deputy Commissioner will be drawn to this great falling off in the numbers.

4. The amount appropriated on works under Civil officers up to 11th August was Rs. 17,47,430, of which Rs. 11,86,230 were spent, leaving an available balance of Rs. 5,61,200. It is presumed that a greater portion of this sum had already been appropriated on works, estimates for which are under preparation, and that, pending formal sanction to the estimates, the appropriations have not been booked. The expenditure during the week under review was almost the same as in last week, as will be seen from the following abstract:—

	Past week. Rs.	Present week. Rs.
Bangalore district	5,469	5,126
Kolar "	3,387	3,350
Túmkúr "	832	1,234
Mysore "	540	1,356
Hassan "	3,127	1,848
Shimoga "	2,043	2,127
Kadur "	149	2,532
Chitaldroog "	3,130	1,608
Bangalore Municipality	789	510
Mysore "	71	74
Total ...	19,537	19,765

5. The President of the Mysore Municipality has erroneously omitted to include, in his previous returns, the expenditure incurred on municipal works. The error has been rectified this week, which accounts for the large increase in the amounts entered in columns 15 and 16 of the statement which accompanies this narrative.

6. The daily average number of persons employed on works carried on by the Professional Department was 21,935, or 686 more than in the previous week. The increase was chiefly in the Mysore District, where the adoption of more liberal rates of wages by the Public Works Department has served to attract labour.

7. The total number employed daily on works, both under Civil and Department Public Works officers, was 46,231, which, on an average, amounts to about 1·78 per cent. on the population of the affected area.

8. The number of persons gratuitously relieved was 187,175, consisting of 44,553 men, 71,523 women and 71,099 children. The increase over past week was 12,333, as shewn hereunder:—

	Increase. over past week.	Decrease.
Bangalore district	380	0
Kolar "	881	0
Túmkúr "	4,739	0
Mysore "	73	0
Hassan "	409	0
Shimoga "	0	68
Kadur "	728	0
Chitaldroog "	1,825	0
Bangalore Municipality	3,375	0
Mysore "	0	9
Total ...	12,410	77
Deduct decrease ...	77	
Net increase ...	12,333	

The largest increase was in the Kolar, Túmkúr, Kadur and Chitaldroog Districts, and in the Bangalore town and cantonment.

9. The proportion of the number charitably relieved to the population of the affected area is about 7·19 per cent. The Commissioner of Nagar reports that very few of the agricultural classes holding pattas have been compelled to come to the kitchen, though they have sent many of their shikmidars (under-tenants) and relatives whom they can no longer support. More than 75 per cent. of those gratuitously relieved are women and children, and although many of them could do some light work, it is really difficult to find employment for them in or about the kitchens; but, wherever this can be done, the recipients of gratuitous relief are made to earn their food to some extent by labor.

10. The time has arrived when large projects on which to give employment to those who are still able to work, but who prefer wandering from one relief kitchen to another, must be devised. The attention of local officers is being given to the subject, and, for the relief of the crowds who have flocked into Bangalore, commencement is now being made on the extension of the railway from the present Terminal Station at Bangalore to the town, a distance of about three or four miles.

11. The total expenditure incurred up to date on account of charitable relief was Rs. 12,84,725, of which Rs. 1,31,027 were spent during the week as shewn below:—

	Rs.
Bangalore district	35,546
Kolar "	8,806
Túmkúr "	22,880
Mysore "	2,478
Hassan "	6,543
Shimoga "	1,558
Kadur "	1,789
Chitaldroog "	19,321
Bangalore Municipality	30,868
Mysore "	1,238
Total ...	1,31,027

12. The want of European officers to help the Deputy Commissioners, in organizing relief operations, and controlling the expenditure at relief houses and camps, has been much felt, and it has been found necessary to detach three additional officers from the Mysore Revenue Survey and an Assistant Conservator of the Forest Department for these duties. Special arrangements have also been made for the medical and sanitary inspection of the relief houses and hospitals in the Nundydroog Division by the appointment of five additional medical officers.

13. The weight of grain imported by rail during the week, including the consignments to the Kolar-road station, was 3,986 tons, or 412, more than in last week, and 1865 less than in the preceding week as shewn below:—

	Week ending— 28th July 1877.	4th Aug.	11th Augt.
From Madras	4,520	2,972	3,286
" Beypore Malabar, and Coimbatore districts	524	299	240
" Trichinopoly, Tanjore and Negapatam	582	253	379
" other places	225	50	81
Total ...	5,851	3,574	3,986

14. About 2,071 tons, or 234 more than in the previous week, were exported by road from Bangalore to the interior of the province and the frontier taluks of the Madras Presidency as particularized below:—

	Tons.
Towards Túmkúr district	547
" Bellary and Chitaldroog districts	567
" Mysore district	255
" Oossoor in the Salem district	149
To taluks adjoining Bangalore	553
Total ...	2,071

15. The average prices of food grains were, on the whole, pretty steady. Rice of the second sort was sold in the three districts of the Nundydroog Division at 10 lbs. per rupee, and in the Ashtagram Division and Chitaldroog District at 9 lbs. and in the Shimoga and Kadur Districts at 8 lbs. a rupee. The following is an abstract shewing the maximum and minimum prices of ragi and rice which prevailed during the week in each district.

	Maximum in lbs. per rupee. 2nd sort rice.	Ragi.	Minimum in lbs. per rupee. 2nd sort rice.	Ragi.
Bangalore district ...	12	13	8½	9
Kolar " ...	11	13½	9	11½
Túmkúr " ...	10	12	9½	11
Mysore " ...	9½	12	8½	10
Hassan " ...	10½	12½	8	9½
Shimoga " ...	10	9	7	8
Kadur " ...	8½	10	6¾	9
Chitaldroog " ...	10	13	8	10

16. With regard to emigration, the Deputy Commissioner of Mysore District reports that a small number of persons proceeded during the week to coffee estates, while deportation of unfit weak coolies from the Wynaad and Nilgiris in large numbers continue to be made.

"By Order,"

T. R. A. THUMBOO CHETTY,

Assistant Secretary.

* Such as digging and repairing wells, prickly-pear clearances, &c.
† All the labourers upon the Dhond-Manmad Railway have been included under Ahmednagar.
‡ Corrected figures given.
§ Approximate figures given.
‖ For details and dates see table appended.

The rainfall in Sholapur, Satara, Dharwar, and western parts of Belgaum, has been satisfactory, and the condition of the early crops is generally promising. In the greater part of the remaining Collectorates of the famine area, the rain has been insufficient, and more is much wanted.

2. The average price of jowari throughout the famine area has slightly risen, being now 12⅓ lbs. for the rupee.

3. The number of people upon relief works in the nine affected districts is 2,63,797 against 2,67,391 last week, and there are also 997 hill-men and immigrants employed in Ratnagiri and Kanara. There has been an increase in Khandesh, Násik, and Ahmednagar, and a decrease in the remaining six districts.

4. Cholera is prevalent in Khandesh, but is not very severe elsewhere. The disease has worked its way from south to north, and has now almost disappeared from Dharwar, where it commenced.

5. The following table gives the expenditure by Government, during the week ending 4th August, upon charity in the relief of the aged and infirm poor; and in payments made to the young children of labourers employed upon relief works. Comparing the results shown in the table below with those shown in the last summary, it will be seen that the number of persons in receipt of Government charitable relief has increased from 46,410 to 51,166, while the number of children under 7 years of age has increased from 74,662 to 80,292. During the week referred to, the number of people upon relief works first commenced to increase after the regular weekly decrease of the previous two months.

The number of people charitably relieved was 19·33 per cent. of the number of labourers upon relief works during the same week.

Districts.	Collector's discretionary grant.			Expenditure incurred under the authority of Government Resolution No. 312 C. W.—1116 of 26th December 1876, on account of children under 7 years of age whose parents are upon relief works.		
	Average number of persons relieved during the week.	Expenditure during the week.	Total expenditure up to date.	Average number of children, and of women taking care of them.	Expenditure during the week.	Total expenditure up to date.

* No expenditure has been incurred by the Collector.

† No expenditure has been incurred by the Collector and Executive Engineer.

6. Tables (A) and (B) are appended as usual. It will be seen that, during the week ending 11th August, the number of people upon Civil Works in the nine affected districts was 21,476, the number upon works under Public Works Department agency being 245,580. The proportion of people upon the former continues, therefore, less than 10 per cent. of

the total. It is to be noted that the figures given in these tables are taken from the Progress Returns of the works, and are brought up to the week ending 11th August, while the figures in the table prefixed to this Summary are taken from the Collectors' telegrams, and refer to the week ending 18th August. It will be seen that the net decrease in the number of people on relief works during the nine weeks subsequent to 9th June has amounted to 1,37,874.

7. The following table gives the distribution of the people among the relief works in the nine affected districts employing 1,000 labourers, or more, during the week ending 11th August. It will be seen that 2,25,769, or more than five-sixths, of the labourers were concentrated upon the works enumerated :—

8. Maps are not sent with this summary.

9. A table is appended showing the condition of the affected Native States.

10. With regard to the movements of food-grains, 5,501 tons were exported from Bombay to the Southern Mahratta ports during the week ending 18th August, and during the same period 5,182 tons were carried by the Great Indian Peninsula Railway to stations upon the Poona-Sholapur and Nasik-Bhusawal lines, making a total of 10,682 tons for the week. The table below shows the quantities of grain sent by sea and rail from October till the 18th August to the Southern Mahratta ports and the railway stations in the distressed districts. It will be seen that the total amount delivered up to the 18th August was 378,375 tons:—

Food-grains sent to	In October, November and December 1876.	In January February and March 1877.	In April 1877.	In May 1877.	In June 1877.	In July 1877.	In August (up to 18th.)	Total.
	Tons.	Tons.	Tons.	Tons.	Tons.	Tons.	Tons.	Tons.
Southern Mahratta ports	44,215	46,332	21,399	28,657	4,491	857	12,300	158,251
South-Eastern line, from Poona to Sholapur ...	67,195	41,708	12,856	12,594	20,348	20,484	13,419	188,604
North-Eastern line, from Nasik to Bhusawal ...	12,829	7,471	2,346	1,221	2,014	1,524	4,115	31,520
TOTAL ...	124,239	95,511	36,601	42,472	26,853	22,865	29,834	378,375

11. The rainfall during the week has been fairly good in Sholapur, Satara, and Dharwar, less propitious in Belgaum, and very inadequate in much of the remaining five famine districts. The south-west monsoon has not yet returned in sufficient force to supply rain to the northern and eastern parts of the Presidency, but a slight fall is reported from Ahmedabad, and there are indications of approaching rain in other parts of Gujerat; should it be withheld much longer, the loss of early crops will be considerable.

Prices of food grains remain almost stationary.

Imports of grain on the coast have slightly increased, and have amounted to 5,501 tons against 5,168 tons last week. On the other hand, imports by rail into the Bombay famine districts have decreased from 5,625 tons last to 5,182 tons this week, being a decrease in the weekly deliveries of 1,545 tons during the last fortnight. This result is due to increased demands for Madras and Hyderabad, necessitating, on account of insufficient engine power, diminished deliveries elsewhere.

There has been a net decrease in the number of people upon works of 3,593; but the numbers upon charitable relief have increased by 4,756, and there has been also an increase of 5,630 in the number of young children.

The condition of the people is as reported last week, improvement being still retarded by the continuance of high prices and the prolonged absence of general rain. No material amelioration of the present situation can be expected until a favourable fall of rain secures what yet remains of the early, and permits the sowing of the later, crops.

Cholera is not increasing.

M. K. KENNEDY, Major-General, R. E.,
Secretary to Government.

Note.—The totals are not invariably the sum of the men, women and children, as in a few returns these particulars have not been given, the total number of labourers alone having been entered.
These figures are for the nine distressed districts only. The people upon relief works in Ratnagiri and Kanara are shown in Table A.

Table contrasting the rainfall as yet reported during the current season (i. e., from 1st January 1877) with the rainfall of the past season, shewing also the current prices (in pounds per rupee) of staple food-grains.

(According to the Collectors' weekly written reports.)

Telegraphic returns of more recent rain have been received, but cannot yet be properly collated.
The monsoon set in on the 19th June above Ghauts.
‡ This is chiefly eastern rain.
§ For the week ending 4th August.

Letter from Dr. Lyon on European and Indian Dietaries.

No. 316P., dated Bombay Castle, 10th August 1877.

From—MAJOR-GENERAL M. K. KENNEDY, Secy. to the Govt. of Bombay, P. W. Dept.,
To—The Addl. Secy. to the Govt. of India, Dept. of Revenue, Agriculture and Commerce.

In continuation of my letter No. 340 E.—1098, Local, dated 11th May 1877, and with reference to Surgeon-Major Cornish's letter, dated 30th idem, published in the Supplement to the *Gazette of India* of the 7th July 1877, I am directed by His Excellency the Governor in Council to forward, for the information of the Government of India, a letter from Surgeon-Major Lyon, Chemical Analyser to the Government of Bombay, on the subject of European and Indian Dietaries.

Dated Bombay, 23rd July 1877.

From—SURGEON-MAJOR I. B. LYON, F. C. S., Chemical Analyser to Govt., Bombay,
To—MAJOR-GENERAL M. K. KENNEDY, Secy. to the Govt. of Bombay, P. W. Dept.

Surgeon-Major Cornish, Sanitary Commissioner for Madras, in a letter dated 30th May, published in the *Gazette of India* of the 7th July, makes some remarks on my memorandum of the 7th May, which I think call for reply on my part.

2. Paragraph 3 of Dr. Cornish's letter opens the discussion in the following words: "In all the scales of diet drawn up by Surgeon-Major Lyon he has proceeded on the assumption that there is no theoretical objection to the proposition that the quantity of food required by adults is proportionate to their weight, provided, of course, always that the quantity of work expected from them is likewise proportioned to their weight. This method of procedure is, in my opinion, extremely fallacious, and I shall briefly show why any scale of diet drawn up in furtherance of this view must be received with the greatest caution."

3. In reply to this I assert, (1) that the foundation on which my three diet scales rest is practically independent of the proposition Dr. Cornish disputes; (2) that it is not my proposition but Dr. Cornish's arguments against it that are "extremely fallacious."

4. Dr. Cornish's arguments against the proposition he disputes are contained in paragraphs 5 to 8 of his letter. The following is, I think, a fair summary of them:—

(1).—Dr. Cornish's 5th paragraph reads: "If there was any relation between the weight of an individual and his capacity for assimilating food and effecting work requiring an expenditure of force, there might be some show of reason for laying down a principle that men require food in proportion to their weight. *But we know as a fact that there is no such correspondence*—that in a very considerable number of persons the power to work diminishes as the body increases in weight, notably in those who with increasing years tend to develop fat instead of muscle."

(2).—In paragraph 6, Dr. Cornish cites (*a'*) "instances of persons of large appetite who never get fat;" (*b'*) "persons who are not large eaters who lay on an amount of flesh that becomes a serious burden and inconvenience to them;" and (*c'*) a quotation from Shakespear.

(3).—In paragraph 7, (Dr. Cornish cites the case of the "Claimant," also of "Athletes," in support of a statement with which the paragraph concludes, *viz.*: "*There is in fact no relation between the ability and capacity for labour and mere weight of body as Mr. Lyon would seem to suggest.*"

(4).—Dr. Cornish in his 8th paragraph writes: (*a'*) "One might think that questions connected with the idiosyncracies of the individual, his age, race, temperament, habit of body, slowness or rapidity of vital changes, were to be set aside as of no value in comparison with a theory that the body needs sustenance in proportion to its bulk;" and (*b'*) "I suppose Mr. Lyon would admit that a very different amount of nutriment is needed for a spare man of large frame and without fat, and another of equal weight, but whose size depended on an abnormal deposition of fat in his tissues, yet this weight theory makes no distinction between the requirements of the two."

5. In replying to these arguments I must first correct two assertions made by Dr. Cornish, which for distinction sake I have italicised; being general assertions founded on exceptional instances, they are not warranted by his facts. So far as his facts go, all Dr. Cornish is justified in stating is,—"But we know as a fact that" *in some cases* "there is no such correspondence," and "There is in fact" *in some cases* "no relation between the ability and capacity for labour and mere weight as Mr. Lyon would seem to suggest." Dr. Cornish's Shakesperian quotation, as it in no way furthers his argument, I pass by without remark.

6. Excluding the two unwarranted general assertions and the quotation from Shakespear, the rest of Dr. Cornish's arguments against the proposition under discussion consist in the citation of a series of particular cases, exceptions or apparent exceptions to the proposition. Such cases are valid arguments against the universal truth of the proposition only. Their value against its general truth depends on the proportion the number of true exceptions bears to the number of cases with which the proposition, if practically applied, would have to deal. And it must be recollected also that the practical application of the proposition would consist, not in feeding each individual adult separately according to his weight, but in taking the average weight of a large number of individuals, and feeding them on a uniform scale according to that average. The practical application of the proposition would, in fact, not be individual and universal, but collective and general.

7. Practically, wherever the question has been the feeding of a large number of individuals living as in work-houses, prisons, &c., under similar controllable conditions, it has always been found advisable, despite the existence of particular cases of the very classes Dr. Cornish cites, to establish uniform diet scales. Any uniform diet scale which has in practice proved sufficient to maintain the health and strength of bodies of individuals fed in accordance with it, has *de facto* practically provided for all Dr. Cornish's particular cases existent among the individuals who have been successfully fed on that diet scale. Now it is evident from the very nature of the particular cases Dr. Cornish cites, he (Dr. Cornish) does not and cannot contend that such particular cases exist in larger number among the individuals to whom my three scales were intended to apply. "Adults fairly nourished, not individuals whose weight has been reduced by disease or famine below the normal" than among persons who have been successfully fed on diets of the values (for their weight) of my scales. All Dr. Cornish's argument against graduation by weight, founded as it is on the existence of these exceptional cases, falls therefore to the ground.

8. Stated in another way, my argument stands as follows: I can prove to demonstration that large bodies of individuals have been successfully fed on diets of the value standing opposite their average weight on my scales. Such diets have, therefore, practically met three requirements: (1.) Average weight. (2.) Work. (3.) A certain proportionate number of Dr. Cornish's particular cases. It is proposed to reduce one, say, of these diets in accordance with a reduction in the value of requirements 1 and 2, the proportionate number of particular cases (3) remaining as before. Is it not begging the question to bring forward the existence of factor 3 as an argument against reducing the value of the diet in accordance with the reduction in value of factors 1 and 2?* If Dr. Cornish's argument from particular cases has any force at all, it is an argument not against graduation by weight, but against the possibility of, in any given case, establishing a minimum diet scale, *i. e.*, a uniform diet scale which shall just suffice, and no more, to maintain the health and strength of a body of individuals fed in accordance with it. If Dr. Cornish, therefore, follows his argument to its legitimate conclusion, he must assert that, despite practical experience to the contrary, it is not possible to establish minimum diet scales in work-houses, prisons, and the like.

9. Having thus disposed of the sole argument brought forward by Dr. Cornish against the proposition "that the quantity of food required by adults is proportionate to their weight, provided always that the quantity of

* It must also be pointed out that there is no reason to suppose that individually Dr. Cornish's particular cases would present a greater proportional departure from the average among the individuals to whom my scales were intended to apply, than among bodies of individuals who have been successfully fed on diets of the values standing opposite their average weights on my scales.

work expected from them is likewise proportioned to their weight," I will now proceed to show that Dr. Cornish himself indirectly supports the very proposition he contends against. In paragraph 10 of his letter, Dr. Cornish writes in reference to the construction of dietaries, "but after all the facts of most importance are (1) the habits of the people themselves in the choice of food, its nature and amount; and (2) the daily waste which the body suffers from vital changes." With (1) I will deal presently; in regard to (2) I take the following from Letheby's lectures on food, pp. 120 and 121. Quoting Dr. Edward Smith, Letheby says: "He considers that a healthy man of average weight, 150 lbs., emits 8·57 oz. of carbon from his lungs daily. This, added to the quantity discharged from the skin and bowels, is not less than 9·6 oz. daily =4,200 grains, or just 28 grains per lb. of the man's weight." Again, in reference to the excretion of nitrogen "Dr. Parkes found" * * * "that with an ordinary diet and no exercise it amounted to 2·03 grains per lb. weight of the body (= 304 grains per 150 lbs.), and that with a non-nitrogenous diet and no exercise it was 0·95 grains per lb. weight (= 142 grains per 150 lbs.), and with the same diet and active exercise it was 2·42 grains per lb. weight (=364 grains per 150 lbs.)" Again "Professors Fick and Wislicenus observed," also as regards quantity of nitrogen excreted, that "it was at the rate of 1·53 grains per lb. weight (= 203 grains per 150 lbs.), and that it fell to a little less than one grain per lb. weight with a non-nitrogenous diet during the labour of ascending the Faulhorn." Yet again "the researches of the Rev. Dr. Haughton of Dublin have led him to conclude that an average-size man performing routine work secrets 187 grains of nitrogen as urea daily (=1·25 grains per lb. weight), and Dr. Edward Smith has estimated it at from 0·93 to 1·4 grains per lb. weight—a fair average being 1·15 (=173 grains per 150 lbs.)" Now I contend that these references to body weight and work clearly indicate that the opinion of Dr. Letheby, if not of all the authorities he quotes, is that in healthy adults "the daily waste which the body suffers from vital changes," is—as indicated by the quantities of carbon and nitrogen excreted—proportionate to the weight of the body and to the work effected. If, then, we agree with Dr. Cornish, and regulate the quantity of food given according to "daily waste," we at the same time of necessity regulate it according to body weight and work.

10. I have next to point out that in all Dr. Cornish in his letter urges against my statement "that there certainly appears to be no theoretical objection to the proposition that the quantity of food required by adults is proportionate to their weight, &c.," I fail to find one single theoretical objection. I think I am justified, therefore, in concluding—almost from this alone—that no theoretical objection to the proposition in question really exists. If such an objection had existed, a controversialist of Dr. Cornish's ability would not have failed to bring it forward. As Dr. Cornish has not cited any theoretical objections to the proposition under discussion, I refrain, for the sake of brevity only, from entering into the many theoretical arguments in its favour. This much, however, I may say that the proposition "that the quantity of food required by adults is proportionate to their weight, provided that the quantity of work required from them is also proportioned to their weight," although not laid down in so many words in the works of European authorities on the subject—possibly because the requirements of Europeans have not necessitated its practical application—is in such works most decidedly indicated. Certainly, also, no such work that I have consulted contains anything contradictory of its general truth. Dr. Cornish has, in fact, laid himself open to the retort that "weight of body" is so important a factor "that it is surprising to find a Sanitary Commissioner in these days laying so much stress" on the desirability of disregarding weight "in determining the quantities of food necessary for maintaining health and strength" under different conditions of work.

11. Paragraphs 9, 11, 12 and 13 of Dr. Cornish's letter are devoted apparently to an attempt to prove "that, as regards the classes of persons suffering from famine in this part of India, there is not that great difference in weight and bulk, of the people as a whole, which would justify a very marked reduction of food in comparison with European diets." In support of this Dr. Cornish cites,—(1) Sir R. Christison as stating the average weight of Scotchmen at 140 lbs.; (2) Dr. Shortt of Madras, who found the average weight of the

male adults of certain castes in Madras to be "about 120 lb.," and of certain other castes to be from "114 to 118 lbs."; and (3) the amount of work done by Madras coolies. All this being in answer to a supposed statement of mine that the average weight of natives of India is 105 lbs. It certainly does not seem from this as if Dr. Cornish himself was very confident of the validity of his objections to the proposition he in his previous paragraphs disputes. Letting this pass, however, I must remark,—(1) that my memorandum contains no statement to the effect that the average weight of the natives of India is 105 lbs. So far, in fact, was this from my opinion that I graduated my scales from 80 to 150 lbs., so that they might provide data for the construction of dietaries for castes or the inhabitants of districts, averaging in weight anything between these two extremes. (2.)—That as my diet scales are *graduated* on the principle that food should be in proportion to weight and work, the heavier the average weight of a class and the greater the amount of work they do the more food do, I consider, they ought to have. Here, therefore, I agree with Dr. Cornish, in so far that I consider that the nearer a class approaches European standards in these respects, the more nearly ought the quantity of food provided approach to European standards of diet.

12. The 14th and 15th paragraphs of Dr. Cornish's letter deal more directly with the basis on which my scales rest. This basis, I contend, is, as stated in the 3rd paragraph of this letter, practically independent of the proposition just discussed. Taking first my No. 1 or labour scale, this rests on two practical experiences perfectly independent of any theory whatever. (1.)—That in the Bombay House of Correction, in 1876, the prisoners (averaging 105 lbs. each in weight) did well at jail labour on a diet of the value placed opposite 105 lbs. on my No. 1 scale. (2.)—That English convict hard labour diet is of slightly less value than that standing opposite weight 150 lbs. on my No. 1 scale, and that a diet of the value standing opposite 150 lbs. on my No. 1 scale is generally agreed to by European authorities as sufficient for adults of that weight at ordinary labour. Dr. Cornish does not dispute the validity of experience 2. In regard to experience 1, however, he objects: "Surgeon-Major Lyon says nothing about the sickness or mortality of the prisoners in the Bombay House of Correction. It would be essential to know to what extent they suffered from bowel disorders, anæmia, scurvy, and other diseases of innutrition." As regards this I should not have made the statement that the prisoners in the Bombay House of Correction "did well" at jail labour on the diet in question if there had been any unusual sickness or mortality among them. That no such unusual sickness or mortality prevailed is proved by the facts,—(1) that the total deaths for the year numbered 5, equal to a mortality of 1·95 per cent. of the average daily number of prisoners; (2) that the total admissions into hospital during the year for dysentery, diarrhœa and anæmia was 18; and (3) that the "daily average sick," from all diseases was 4·6 per cent. These two experiences show, therefore, that my No. 1 scale rests at two tolerably widely separated points on the foundation of experience. If the weight theory, as yet unshaken by Dr Cornish, plays any part at all in the construction of this scale, it is only the minor part of confirming the filling up by interpolation of the interval between these two experience-established points. Here I must call attention to a matter which Dr. Cornish has in his letter distinctly avoided. The proposition "that the quantity of food required by adults is in proportion to their weight, &c.," was put forward in my memorandum, not, as Dr. Cornish implies, as a basis upon which to found my proposed diet scales, but as an explanation of the difference between the experience of the Bombay House of Correction and that of English Convict Establishments, a difference—in India—not singular to the Bombay House of Correction experience. I contend that the proposition in question is about the most reasonable theoretical explanation of this difference that can be put forward. The position is this. I use a theory to explain my facts. Dr. Cornish leaves my facts untouched, but contends against my theory, and having utterly failed to shake my theory, asserts that he has proved it to be fallacious, and that therefore ? my facts are fallacious also.

13. Turning now to my scales Nos. 2 and 3, I propose to consider the value of the objections raised by Dr. Cornish to these scales, inverting for con-

venience sake their order. I take first his remark that my scale No. 3 "would never commend itself to those practically acquainted with the connection of food with vital force, &c." As a matter of fact very little is known practically about the "connection of food with vital force." Writers on the subject generally agree in accepting Helmholtz's calculation that when labour is well applied, "the animal system is capable of turning one-fifth of the actual energy developed by the oxidation of the food to account as external work" (Pavy,* page 446). Now, as shown by the table attached, the dynamic value of scale No. 3 is almost exactly 4-5ths of that of scale No. 1. If, therefore, scale No. 1 is of sufficient value,—and I think from what I have stated in paragraph 12 I have demonstrated that it is,—scale No. 3 is, so far as we are acquainted with "the connection of food with vital force," of sufficient value also. If, therefore, Dr. Cornish, by the sentence quoted above, means anything beyond a mere unsupported expression of opinion that No. 3 scale does not provide food enough for people to live on, he is wrong; and if this, on the other hand, is the sense in which the remark in question is to be taken, it must be accepted for what in scientific discussions unsupported expressions of opinion are usually considered to be worth. Next, Dr. Cornish accuses me of inconsistency, asserting that in my table of food equivalents published a few years ago, I "was more liberal in my views, as I there spoke of 200 grains of nitrogen and 3,070 grains of carbon as almost a starvation diet," below.† I give the whole of the paragraph, a portion of which Dr. Cornish quotes, from which it will be seen that this statement applies to "healthy male European adults of average height and weight." In the scales at present under discussion these quantities are replaced by nitrogen 195·3 grains, carbon 4,564 grains, so that, instead of being less, I am more liberal now than then. Here, therefore, Dr. Cornish is wrong again. Dr. Cornish's next objection also refers to my scale No. 3. Dr. Cornish writes: "As a matter of fact, and excluding all theory whatever, we have ascertained in certain Madras Jails that where punishment by restrictions in food, so as to reduce the daily amount of nitrogen to much less than 200 grains, has been persevered in for any length of time, there has been loss of strength, loss of health, and sacrifice of life, and this knowledge would make me very sceptical as to the sufficiency of a bare subsistence diet containing only 136·7 grains of nitrogen, such as Mr. Lyon now proposes." This statement in the form it stands it is, I confess, impossible for me to dispute. The absence of all information, as to (1) how much below 200 grains the nitrogen was reduced to; (2) how much carbon the reduced diet contained; (3) how much work was exacted from the prisoners on the reduced diet; (4) what was the weight of the prisoners on the reduced diet, renders it impossible for me even to discuss this statement of Dr. Cornish's. I think, however, that I may very fitly here point out that when I, in my memorandum, gave information on all these points in regard to the Bombay House of Correction experience, coupled with a general statement that the prisoners on the diet, particulars of which I gave, "did well," I failed to satisfy Dr. Cornish. Despite the information I gave, Dr. Cornish asked for the ratio of sickness and mortality (since supplied, see paragraph 12), and writes: "It would be essential to know to what extent they suffered from bowel disorders, anæmia, scurvy, and other diseases of innutrition before coming to the conclusion that the hard labour scale of diet was actually sufficient to keep the people in ordinary health." In face of all this, does Dr. Cornish, having failed to supply any definite particulars at all in regard to the Madras Jail experience he quotes, expect me, or any one else, to accept his statement in its present form as of any weight whatever in the present discussion?

14. Dr. Cornish's next objection deals with both scale 2 and scale 3. As regards these scales, Dr. Cornish writes: "All that can be said of such scales is that they are based on a theory which, in some respects, has been shown to be

* Treatise on food and dietetics.

† "A healthy male European of average height and weight in moderate work requires per day about 300 grains of nitrogen and 4,600 grains of carbon. In hard work about one-sixth more than these quantities is required, and about two-thirds of these quantities, *viz.*, 200 grains of nitrogen and 3,070 grains of carbon would be almost a starvation diet."

fallacious." Meeting Dr. Cornish's assertion with the counter-assertion, that the theory to which he refers has not been in any respect shown to be fallacious, let me point out what is, as stated in my memorandum, the real theoretical proposition involved in the construction of scales 2 and 3; it may in general terms be stated thus: If a body of individuals doing a certain amount of work are found to maintain health and strength on a certain quantity of food, a similar body of individuals will also maintain health and strength while doing less work on a less quantity of food. The general truth of this proposition is both theoretically and practically indisputable, and has been over and over again proved by experience. Dr. Cornish himself, accidentally touching upon it in a reference to the work done by the Madras beach coolies, appears to admit its force. "Such labour" as that of these coolies, says Dr. Cornish, "could not be accomplished without a liberal diet," and again "work of this nature, I need not observe, is not performed on famine wages even of the highest scale." I take it, therefore, that if I can show that the only theoretical consideration involved in the construction of my scales 2 and 3 is the one just stated, Dr. Cornish must either include it in the theory which he asserts he has "in some respects shown to be fallacious," which is absurd, or admit that he is wrong in stating that the scales in question are "based on a theory" which "in some respects has been shown to be fallacious." I now have to point out that a reference to my memorandum will clearly show that scales 2 and 3 were derived from scale 1, by the application of the proposition just stated. In my memorandum the position I took up was this: I considered scale No. 1 to be firmly established by experience, so firmly, in fact, that I put forward the proposition discussed in the first part of this letter to explain it. From scale No. 1, I proceeded to derive scales 2 and 3 as follows. I here quote from my memorandum (heading to Table V): "Scale 2, a light labour scale; scale No. 1, reduced in the same proportion that English convict light labour diet bears to English convict hard labour diet." Scale 3, a bare sustenance scale; scale No. 1, reduced in same proportion that a mean bare sustenance estimate for Europeans bears to English convict hard labour diet."

The basis, therefore, on which scales 2 and 3 rest is,—(1) the sufficiency of scale No. 1 (proved by experience); (2) the truth of an indisputable proposition; and (3) the validity of the proportion calculations employed. Now, as to the validity of these proportion calculations I take it,—(1) that if we take, on the one hand, (a') a high bare sustenance estimate for Europeans, and, on the other hand, (b') a minimum labour scale for the same class, the proportion in which (a') is less than (b') may safely be taken to represent the proportion which should exist between a labour diet proved by experience to have been sufficient, and a proposed bare sustenance diet. Here I have to remark that in constructing a bare sustenance scale on this proportion, the margin of safety is obviously much increased by taking a *high* bare sustenance estimate on the one side, and a *minimum* labour scale on the other. That in this calculation the bare sustenance estimate I have taken is a high one, is shown by the fact that a diet of not very different value from it has, in practice, proved sufficient to maintain adults in a good state of health while doing tolerably severe work.* That, similarly, the labour diet I have taken is a low one is shown by the fact that it is the English convict hard labour diet. In constructing, therefore, on

* As evidence that the bare sustenance estimate I took (nitrogen 190·5, carbon 4,094 grains) was a high one, I quote from Dr. Dymock's letter reprinted in the *Gazette of India* of July 7th: "The following particulars are gathered from Armand Gautres's valuable work * * * After mentioning that for people leading a sedentary life 0·2 grammes of nitrogen and 4·202 of carbon per kilogram of body weight have generally been accepted as a sufficient allowance for the maintenance of a perfect state of health, he says that the average weight of the Mobiles was 63 kilos (138 lbs. 12¾ oz.), and that these men being employed on severe duties in the trenches during the winter months, and receiving only 12·5 grammes (=193 grains) of nitrogen and 263 (=4,060 grains) of carbon per diem, preserve generally a good state of health. Upon this he remarks that the generally accepted bare subsistence ration would appear to be a little too liberal." Independently of the confirmation which the first portion of the above affords to the "weight theory" disputed by Dr. Cornish, I have to remark that, besides showing that the bare sustenance estimate I took was a high one, it goes a long way towards confirming the sufficiency of my No. 3 scale, (a') because the value of the diet on which the Mobiles worked (nitrogen 193, carbon 4,060 grains) closely corresponds to that for weight 140 lbs. on my No. 3 scale, *viz.*, nitrogen 182·3, carbon 4,260 grains; and (b') because 0·2 grammes nitrogen and 4·2 grammes carbon per kilogram of body weight, a "too liberal" bare sustenance estimate would give diets not greatly differing in value from my No. 3 scale, *e. g.*, at 105 lbs. it would give nitrogen 147 grains, carbon 3,087 grains, instead of nitrogen 136·7 grains, carbon 3,195 grains, the figures opposite weight 105 lbs. on my No. 3 scale.

this proportion scale No. 3 from scale No. 1, I have left a margin of safety as a provision against the objection that in the experience I quote of No. 1 scale at 105 lbs. (in the Bombay House of Correction) the work done on that diet was much less proportionally to difference in body weight than that done by Europeans at ordinary labour. (2.) In constructing scale 2, I have assumed (*a'*) that the work exacted from famine labourers on relief works under Public Works superintendence (115 foot tons, see my memorandum on this subject) is certainly not greater than that performed by labouring prisoners in the Bombay House of Correction, and that, therefore, a diet (scale 1) which sufficed to maintain the health and strength of these prisoners will also suffice to maintain famine labourers at these works,—the class to whom my No. 1 scale may be supposed to be intended to apply. (*b'*) That as ⅔rds only of this quantity of work (76⅔ foot tons) is required from labourers on relief works under Civil agency,—the class to whom my No. 2 scale may be taken as intended to apply; such labourers would be sufficiently provided for by a diet intermediate in value between scales 1 and 3, and that the proportion existing between English convict hard labour and English convict light labour diet may fairly be taken to represent the proportion which should exist between a diet upon which a certain amount of work is to be done, and a diet upon which one-third less work is to be effected. Upon these considerations—considerations fair and reasonable enough, and which Dr. Cornish does not dispute—I based the proportion calculations by which scales 2 and 3 were reduced from scale 1.

15. Dr. Cornish's final objection is, that as regards scales 2 and 3 "there appears to be no practical evidence whatever to prove their sufficiency or insufficiency." To this sweeping assertion I reply that I have just, in the three last paragraphs, shown that there is a very great deal of practical evidence indeed to prove their sufficiency. To summarise, there is abundant evidence to show, (1) that diets of the values opposite body weight, 150 lbs., have practically proved sufficient for Europeans of average weight (150 lbs., Moleschott, Letheby, Church, and others) under the respective conditions of labour, light labour, and rest; (2) that a diet of the value standing opposite 105 lbs. on my No. 1 scale has practically proved sufficient for the requirements of prisoners of that weight at jail labour; (3) that the proportion scales 2 and 3 bear to scale 1 is a proportion proved by practical experience to be the proportion which respectively a light labour and a sustenance diet should bear to a labour diet (see also foot-note to paragraph 14). In addition to this mass of evidence in favour of the sufficiency of all three scales, we have the experience of the relief kitchens of the Bombay Presidency during the present famine,—experience which goes a very long way towards directly proving the sufficiency, at the lower body weights, of scale No. 3. Opposite body weight, 105 lbs. on my No. 3 scale stands nitrogen 136·7, carbon 3,195 grains. In the Bombay Presidency relief kitchens adult males are allowed a daily ration valuing nitrogen 113·6, carbon 3,004 grains (for details see attached statement). If this relief kitchen allowance is sufficient,—and I am assured that all experience of it shows that it is so,—scale No. 3 must therefore, also be sufficient. Here I may point out that, if this relief kitchen experience is admitted, the three scales as it were become enclosed in a quadrangle of four experience-determined points between which numerical interpolation alone would suffice for the construction of the scales. Each of these four points has its own independent direct proof, thus:—

(*a'*) Scale 1, at 105 lbs., is proved by the experience of the Bombay House of Correction;

(*b'*) Scale 1, at 150 lbs., by English convict hard labour diet;

(*c'*) Scale 3, at 150 lbs., by experience during the siege of Paris (see note to paragraph 14); and

(*d'*) Scale 3, at 105 lbs., by the relief kitchen experience just quoted.

So far, therefore, from there being "no practical evidence whatever to prove the sufficiency or insufficiency" of the scales, there is a very great deal of practical evidence in favour of their sufficiency.

16. Dr. Cornish's 16th paragraph is the only one which deals with any question connected with the data given in my memorandum for the conversion of the nitrogen and carbon of my three scales into terms of grain and pulse. It contains what he himself calls a "cursory notice" on this matter. He confines himself here to putting the hypothetical case of an "obese native merchant" accustomed to feed on rice, and sentenced to "hard labour," and asserts that (I presume on my scales) "his daily diet would be made up of 21 ounces of rice and 9·55 ounces of gram or dhall." Having made this assertion, Dr. Cornish proceeds to enlarge on the inability of the native merchant to digest the 9·55 oz. of gram or dhall. Now here Dr. Cornish must have overlooked that in my remarks on the three scales I inserted a caution in regard to this very point, stating that the total quantity of pulse given "should be kept within reasonable limits, say, under 4 to 5 ounces," and that my scales offer for the case of his native merchant several alternative dietaries complying with this caution. Thus the dietary might consist of 27·3 oz. of bajri and 5·4 oz. of pulse, or by substituting wheat for a portion of the rice or bajri the amount of pulse to be given might be reduced to any required minimum. In passing I may mention that this also disposes of Dr. Cornish's remark that I have in my memorandum omitted a caution which I enjoined in my "former paper on Food Equivalents" in reference to limiting the quantity of pulse in compliance with the limit of digestibility indicated by the custom of a population. If Dr. Cornish has not overlooked the fact that my scales offer these alternative dietaries, I can only presume that he considers that so much regard should be paid "to the habits of the people themselves in the choice of food, its nature and amount," that in cases where people are "accustomed to feed on rice" no other cereal grain can possibly be substituted. This, I think, it must be obvious, is carrying the doctrine that "the habits of the people themselves" should regulate the nature of the food supplied a very great deal too far. Surely, Dr. Cornish does not mean to assert that in the case of the "native merchant accustomed to feed on rice" that, despite the fact that, say, 28·7 oz. of mixed wheat and bajri, or mixed rice and wheat, and 4 oz. of dhall would provide a sufficient diet, he would pay so much regard to the native merchant's habit of feeding on rice as to insist that his diet should be composed—in order to supply the requisite nitrogen—of 43 oz. of rice and 4 oz. of pulse, or 57 ounces of rice and no pulse at all. While agreeing with Dr. Cornish that in the construction of dietaries due weight should be attached "to the habits of the people themselves in the choice of" the *nature* of their food, I certainly consider that it would be stretching this doctrine beyond all reasonable limits to insist that, therefore, for one cereal grain no other should be even partially substituted. In regard to the influence which the habits of the people themselves in regard to choice of *amount* of food should exercise in the construction of dietaries, I cannot resist the temptation of answering Dr. Cornish after his own fashion. Dr. Cornish, as an argument against a proposition of mine, quotes the exceptional case of the "Claimant." Let me in reply to his proposition quote the exceptional case of the Yakuti. Pavy (Treatise on Food and Dietetics, page 454), quoting Sir George Simpson, says: "In one highly important particular the Yakuti may safely challenge the rest of the world; they are the best eaters on the face of the earth. Having heard more on this subject than he could bring himself to believe, he resolved to test the matter by the evidence of his own senses. He procured a couple of men who had, he states, a tolerable reputation in that way, and prepared a dinner for them consisting of 36 lbs. avoirdupois of beef and 18 lbs. of butter for each of them;" in two hours all was consumed.

17. In conclusion, I have only to remark, with reference to the 17th paragraph of Dr. Cornish's letter, that I perfectly agree with him, in so far that I also think that the more the subject is considered "the more important does it become that we should only follow sound and true principles in dealing with questions connected with the food of a community," but what those sound and true principles are, and whether they are to be found embodied in Dr. Cornish's writings or in mine, is another question altogether.

Details of the Bombay Presidency relief kitchen ration referred to in paragraph 15.

Excluding special cases, such as sick children and suckling mothers, which receive special treatment, the daily ration is:—

A.—For a man—

1. Three "breads," each containing 5 ounces of jowari flour.
2. A pint of ragi gruel, containing $1\frac{1}{2}$ ounces of ragi and salt.
3. Nine fluid ounces of dhal soup.

B.—For a woman—

The same as for a man, less one "bread."

The dhall soup contains in 40 gallons 28 lbs. of dhall, 24 lbs. of jowari flour, and salt and condiments, *viz.*, massala $4\frac{1}{4}$ lbs., tamarind 1 lb., turmeric 6 oz., and salt 3 lbs.=in 9 fluid ounces to dhall ·63 oz., jowari flour ·54 oz.

The ration "for a man" equals, therefore, nitrogen 113·6 grains, carbon 3,004 grains, per diem.

Table showing the dynamic value in foot tons, as calculated by Frankland's factors, of the three proposed scales.

Body weight in lbs.	Scale 1.	Scale 2.	Scale 3.
80	2389	2107	1916
85	2536	2237	2033
90	2683	2367	2150
95	2830	2496	2268
100	2977	2625	2385
105	3124	2754	2502
110	3270	2883	2619
115	3417	3012	2737
120	3564	3141	2854
125	3711	3270	2971
130	3858	3399	3088
135	4004	3528	3206
140	4151	3657	3233
145	4298	3786	3440
150	4445	3915	3557

The foregoing table shows the dynamic value, in foot tons, of the three proposed scales as calculated by Frankland's factors, *i. e.*, the actual energy which the food is capable by its oxidation of developing within the body.

Helmholtz estimates "that the animal system is capable of turning one-fifth of the energy developed by the oxidation of the food to account as external work." Letheby, in quoting this, remarks: "But the labour must be well applied to develop" this proportion of the energy of the digested food. (Lectures on Food, page 109.)

Parkes (Manual of Hygiene, page 389) states that 500 foot tons is an extremely hard, 400 foot tons a hard, and 300 foot tons an average day's work of a strong healthy adult (European).

Curiously enough, the dynamic values of scale No. 3 are almost exactly four-fifths of those of scale No. 1. If Helmholtz's views are correct, scale No. 3 is justly proportioned to scale No. 1, and inasmuch as the internal work of the body is greater during labour than during rest, scale No. 3 possesses a margin of safety.

I. B. LYON, F. C. S., *Surgeon-Major.*

Report on experiments made with prickly-pear as a fodder for cattle.

No. 2444A., dated Fort St. George, 4th August 1877.

From—J. H. GARSTIN, Esq., Additional Secretary to Government of Madras,

To—The Additional Secy. to the Govt. of India, Dept. of Revenue, Agriculture and Commerce.

With reference to your letter No. 426, dated 9th May 1877, I am directed to submit, for the information of His Excellency the Governor General in Council, the following report on the experiments made with prickly-pear as a fodder for cattle.

2. On the 2nd November last Messrs. Harvey and Sabapathy, an enterprising firm of Bellary, addressed Mr. Thornhill, the First Member of the Board of Revenue, stating that they had adopted with success the prickly-pear as fodder for their own cattle, and suggesting that the ryots of not only that but all famine-stricken districts should be induced, if possible, to adopt it with a view to preserving alive their cattle, there dying for want of fodder. They also forwarded a copy of their letter to the Board of Revenue, with a set of instruments used by them in the preparation of the plant, who, being of opinion that the experiment deserved trial, communicated the letter of Messrs. Harvey and Sabapathy to the Collectors of all distressed districts, and sent the instruments to the Collector of Cuddapah, in order that he might test the proposal. This Government, in noticing the Board's Proceedings, called for a report of the results after a short trial. On the 18th of January the Collector of Cuddapah informed the Board of Revenue that he saw no way of keeping the cattle alive, except by making the feeding of them with prickly-pear a famine-work; and he asked that he should be allowed to form depôts for feeding the cattle, and to supply the labour and instruments, which cost only a couple of annas, gratis. In their Proceedings of the 24th January the Board approved of the experiment to the extent of an outlay of Rs. 500, the result to be reported after a month. This Government being disposed to give the experiment a more extended trial, authorised the Board to instruct all Collectors of districts, where fodder for cattle was not procurable, to try the experiment within the limit laid down by the Board for Cuddapah. In the case of Madura only was the purchase of animals on which to try the experiment* sanctioned. Some, however, were also purchased in Coimbatore.

* G. O., 1st February, No. 476.

3. With their Proceedings of the 24th May, the Board submit the reports called for from the Collectors. Reports have been received from the districts as shown in the margin. Of these 14 districts the Collectors of Trichinopoly, Tanjore, and Kistna report that, as other fodder was available and was not likely to fail, the experiment was not made by them. From North Arcot the Collector reports that the experiment could not be tried owing to press of other work. In Tinnevelly and Malabar there is no prickly-pear. No particulars of the experiments as to cost, numbers fed, &c., are given for the districts of Nellore, Bellary, Salem, Chingleput, and Coimbatore. In all these districts, however, sufficient data on which to form a general conclusion have been obtained.

1. Kistna.	8. Madura.
2. Nellore.	9. Tinnevelly.
3. Cuddapah.	10. Salem.
4. Kurnool.	11. Malabar.
5. North Arcot.	12. Bellary.
6. Tanjore.	13. Chingleput.
7. Trichinopoly.	14. Coimbatore.

4. The unanimous opinion of the Collectors may be stated to be that, if gradually accustomed to this food, cattle will eat the cactus with relish, and will thrive on it after a little time. Owing, however, to the great labour and consequent cost involved in its preparation, together with the extremely disagreeable nature of the labour itself, it is never likely to be largely or, indeed, at all, resorted to except in times of great pressure and want of forage. The cultivators generally are much averse to its use on the ground that it causes diarrhœa and dysentery, but without sufficient ground apparently, according to the reports. In many instances, however, some impression has been made on their prejudices, though it is expected to pass away quickly.

5. The experiments have been carefully and systematically carried out and reported only in three districts, and the results are tabulated below:—

Districts.	No. of feeding depôts.	Average No. of cattle fed daily.	Average No. of days for which fed.	Entire cost of experiment including feeding instruments.	Daily cost per head fed.	Remarks.
				Rs. A. P.	As.	
Cuddapah ...	5	114	32	248 11 2	1·10	* Cost high as hill grass was expensive. The cactus had to be brought a long way.
Kurnool ...	1	37	98	460 14 11	* 2·00	
Madura ...	2	13	42	†212 11 9	1·20	†Of this sum Rs. 171-12-0 was paid for the cattle.

From these figures it will be seen that the cost per head daily, which represents almost entirely the cost of the labour necessary for the preparation of the plant, is so great as to preclude its introduction as fodder generally. The following extract from Mr. Robertson's Farm Report for 1876 (pages 57 to 60) similarly shows that the fodder is costly, and its use suited to times of extraordinary pressure only.

6. The ration given in Cuddapah was at first 20 to 25 lbs. of the cactus per head. This it was subsequently found necessary to increase to 40 lbs. per head. In Kurnool the ration seems throughout to have been from 20 to 22 lbs. of the cactus and 4 lbs. of hill grass. In Madura the ration is not distinctly stated, but two men are said to be able to prepare enough cactus for eight beasts. It does not, however, seem to have been the only fodder used. Where cattle are fed on the cactus alone a ration amounting to 40 lbs. per head must be given. The quantity which a man can prepare daily is stated at 60 lbs.

7. Two methods of preparing the plant were tried. Under the first the thorns were removed by roasting, but this mode of preparation proved a failure in the Chingleput and Coimbatore districts, where alone it was tried. The second method is removing the thorns with pincers and cutting the leaves into pieces, about an inch square, with a knife made for the purpose. The leaf should be given half sun-dried, or else should be carefully wiped. It should not be much handled as, if it is so, a glutinous substance exudes which is distasteful to the cattle, and to it is ascribed slight dysentery or diarrhœa which prevailed in one camp. The leaf has, at first, in many instances, to be forcibly introduced into the animal's mouth, and has in all cases to be mixed with salt and bran or oil-cake or some such other bait before it will eat it voluntarily.

No. 721, dated Guneshkhind, 22nd August 1877.

From—C. E. Bernard, Esq., C.S.I., Addl. Secy. to the Govt. of India, Dept. of Revenue, Agriculture and Commerce,

To—The Additional Secy. to the Govt. of Madras, Revenue Dept.

I am directed to acknowledge the receipt of your letter No. 2444A, dated 4th August, reporting on the attempts made in certain of the famine districts to feed starving cattle on the prickly-pear plant.

2. It seems clear that cattle can, after they are accustomed to this new fodder, subsist upon prickly-pear. At the same time the business of preparing the leaf for the cattle is costly and tedious. In some parts of the country the preparation of fodder from the prickly-pear plant might be suitable employment for paupers who are receiving Government relief but who cannot labour on public works.

3. As the results of the many experiments made by Madras Collectors with prickly-pear fodder may prove useful to officers in other parts of India, your letter with this reply will be published in the Supplement to the *Gazette of India*.

Weekly Relief Report of the distressed districts of the Madras Presidency.

Proceedings of the Board of Revenue, Madras, No. 3716, *dated* 10*th August* 1877.

Maps for—

Nellore.	South Arcot.
Bellary.	Coimbatore.
Cuddapah.	North Arcot.
Chingleput.	Madura.

The relief reports for the week ending 4th August will be submitted to Government with the usual statements and maps as marginally noted.

2. *Prices.*—The effect of the recent improvement in the prospects of the season may be traced in the price returns for the week; there is a general tendency towards a decline in prices of all food-grains, the only exception being *Nellore*, where the district average shows a slight rise in prices. In *Chingleput*, *North Arcot*, and *Madura* the fall in the price of rice is about half a seer. As regards dry grains the advance still continues in *Nellore*; in *Kurnool* cholum and cumboo are slightly dearer; in Trichinopoly ragi and in Tinnevelly cumboo; elsewhere prices are stationary or have fallen slightly. Turning to details for districts, there is a general rise of prices at Kavali in *Nellore*. The quotations for rice have advanced at Nellore, Podili, Udayagiri, and Ongole; the fluctuations in dry grains do not appear to call for remark. In *Cuddapah* the downward tendency is general except as regards dry grains in Royachoti; there is a marked fall in the price of rice at Madanapalli. In *Bellary* the price of rice has risen at Hudgalli and Madaksira, and the very high quotation for Pennacondah, noticed last week, is repeated; elsewhere rice has fallen. In *Chingleput* the decline is general. In *North Arcot* the market is apparently subject to violent disturbances, the fluctuations from week to week being very marked. At Vellore two additional seers of rice are procurable for a rupee, at Wallajah one and a half, at Arcot and Tripathy one; and elsewhere prices have fallen in a lesser degree owing probably to the removal of checks to importations. Dry grains are stationary; the absence of quotations for Wandewash still continues; the matter should be explained. In *South Arcot* there is no change calling for particular comment; in *Trichinopoly* dry grains are not quoted at all for Kulitalai and Udayarpolem; this should be explained: the same remark applies to Dindigul in *Madura* and to Ottapidaram and Nunguneri in *Tinnevelly*. In *Coimbatore* there is a slight improvement at Collegal; rice has fallen everywhere except at Sattiamangalam and Udamalapettah. The quotation for cholum at Dharapuram is excessively high, and dry grains are not entered at all against Erode; this should be explained. In *Salem* there is a general change for the better. The highest and lowest prices for rice and the dry grain most commonly in use are given in the margin.

Districts.	Rice, second sort.		Dry grains.	
	Highest.	Lowest.	Highest.	Lowest.
Nellore	5·12	6·50	* 7·00	13·00
Cuddapah	4·98	6·64	* 5·52	7·50
Bellary	4·32	5·94	† 5·22	6·44
Chingleput	6·58	7·43	* 6·84	8·34
North Arcot	5·40	8·00	* 5·80	10·90
South Arcot	5·25	7·00	* 5·96	9·54
Trichinopoly	5·07	6·16	* 6·55	7·86
Madura	6·34	7·18	* 7·75	9·30
Tinnevelly	6·40	7·10	† 7·50	7·90
Coimbatore	4·48	7·24	* 5·88	9·84
Salem	5·14	6·15	* 5·62	7·69
Malabar	5·62	8·50	* 7·88	11·38

* Ragi. † Cholum.

3. *Rainfall.*— Rain was registered in all the distressed districts, but the fall was not so heavy as in the previous week, the average nowhere exceeding three-quarters of an inch except in Malabar. In *Nellore* there was a heavy fall in Darsi and showers in four other taluks; in *Cuddapah* the rain was general and exceeded an inch in three taluks; in *Bellary* seven taluks derived the benefit of light showers; in *Chingleput* rain fell throughout the district; and in *North Arcot* the fall was heavy at Arcot and Trithany, whilst only 5 out of 18 stations registers are blank. The influence of the monsoon has been much less felt in the more southern districts; in *South Arcot, Trichinopoly, Madura, Tinnevelly*, and *Coimbatore* the showers were very partial and light; in *Salem* a good fall was registered at Tripatore and Trichengode. In *Malabar* the average was 4·23 inches against 3·44 in the preceding week. In Kistna, Cuddapah, Bellary, and Kurnool the rain is reported to have revived the drooping dry crops, though more rain is wanted; in South Arcot and Tinnevelly also the standing crops appear to be doing well though requiring more rain, but in Nellore those dependent on the rainfall only are reported to be withering; their condition in Trichinopoly is stated to be critical, and in North Arcot and Coimbatore the prospects of the harvest are described as bad. In South Canara the standing first crop is in fair condition and in Malabar reaping has commenced, and the outturn promises to be equal to the average. The pasturage has been everywhere much benefited by the change in the weather.

4. *Grants and Outlay.*—The grants up to the 4th August aggregate Rs. 2,34,11283, and the outlay as reported was as follows:—

	In the week.	Up to the end of the week.
	Rs.	Rs.
Relief works	6,90,960	1,92,84,382
Gratuitous relief	4,39,974	35,04,408
Total ...	11,30,934	2,27,88,790

5. The number and description of works completed and in progress during the week were as shown below:—

	In progress.		Completed.	
	Number.	Length in miles.	Number.	Length in miles.
Roads—				
New works	516	3,378	162	703
Repairs	487	4,165	146	750
Total ...	1,003	7,543	308	1,453
Irrigation—				
New Works	94	...	26	...
Repairs	1,252	...	347	...
Miscellaneous	3,993	...	3,378	...
Total ...	6,342	...	4,059	...

6. *Numbers on relief works.*—The following figures show the numbers in each district on relief works as compared with the totals for the preceding week:—

Districts.	28th July.	4th August.	
Kistna	5,294	15,000	+ 9,706
Nellore	23,726	19,697	— 4,029
Cuddapah	146,682	139,709	— 6,973
Bellary	324,867	339,086	+14,219
Kurnool	214,371	213,477	— 894
Chingleput	28,340	28,120	— 220
North Arcot	58,411	54,888	— 3,523
South Arcot	68	520	+ 452
Trichinopoly	581	395	— 186
Madura	22,559	18,927	— 3,632
Coimbatore	28,395	27,355	— 1,040
Salem	45,755	49,869	+ 4,114
Total ...	899,049	907,043	+ 7,994
Buckingham Canal...	50,096	46,795	— 3,301
Junction Canal ... { Under the Executive Engineer	4,373	4,648	+ 275
Junction Canal ... { „ Commissioner of Police ...	1,648	1,637	— 11
Grand Total ...	955,166	960,123	+ 4,957

The net increase is small as compared with the previous week. In Kistna, Bellary, and Salem, however, there was a large accession of numbers. Particulars are not yet available for the first-named district, but the cause is doubtless pressure of distress, which is beginning to be more severely felt. In *Nellore* the decrease is nominal, the returns being incomplete; if numbers for Darsi, which are not given, be included, there will probably not be much difference in the totals. The Collector estimates the true total as about 23,500. The numbers at work on the Buckingham canal with the districts to which the coolies belong are marginally noted. The falling off is in the labourers belonging to Nellore. Those employed under the supervision of the professional department throughout the rest of the district numbered 3,575 as follows :—

Districts.	Forwarded by the Revenue Department.	By P. W. D. Recruiters and Contractors.	Total.
Nellore	6,129	30,966	37,095
Cuddapah	3,968	1,126	5,094
Kurnool	2,173	...	2,173
Bellary	1,945	388	2,333
Kistna	100	...	100
Total ..	14,315	32,480	46,795

Nellore	2,610
Kandukur	106
Ongole	760
Kanigiri	99

7. In *Cuddapah* there is a considerable decrease; it occurs chiefly in the taluks of Prodatur, Pullampett, Royachoti, and Madanapalli. In the first-named it is explained to be due to the transfer of weakly persons to camps and to the elimination of those able to maintain themselves by cultivation. No explanation of the increase in the sub-division taluks is afforded. The figures for Kadiri are those for the preceding week apparently, and those for Voilpaud have been repeated three weeks running; this should be explained. In *Bellary* there is again a very formidable increase, chiefly contributed by Bellary itself, owing to pressure of famine and an influx of distressed paupers from Hyderabad and Mysore; the remainder of the increase is shown against all other taluks except three; in Raidrug it is attributed to the opening of fresh works, and in Adoni to the arrival of wanderers from Hyderabad and Kurnool. Mr. Puckle has visited the taluk and a reduction of numbers may be looked for as the result of the measures which have been taken under his directions for checking the accumulation of vast crowds on the works; the cause of the excess has not, however, been clearly explained as yet. In Kudlighi the decrease is due to stoppage of works, and the accounts for Hospett are not complete. Numbers on the Bellary-Hubli Railway were 8,670.*

Taluks.	28th July.	4th August.	
Jamalamadugu	27,484	27,483	— 1
Pulivendla	17,092	17,876	+ 784

8. In *Chingleput* the decrease calls for no remark; the discrepancy between the figures given in the comparative statement and those entered in the returns is again very considerable; the reasons should be explained. The numbers on the Conjeveram-Chingleput line were 25,496, and elsewhere 694 coolies were supervised by the professional department. In *North Arcot* there is a large decrease in the numbers employed in Arcot and Wallajah due to the completion of works; in Wandewash and Tritany there is an increase due to the commencement of new works and to increased pressure of distress respectively. The decrease in *Madura* occurs principally in Tirumangalam, and is due to the resumption of agricultural operations owing to the late rains; in *Coimbatore* the stoppage of works in Pollachy is the cause of the decrease and in *Salem* the commencement of fresh works in Salem and Oossoor accounts for the increase.

9. The total number of famine coolies working under the supervision of the professional department was 248,601 against 226,220 in the preceding week. The figures for Kurnool are those for the week ending 28th July; details are still wanting for North Arcot; the attention of the Collector is again called to the subject.

10. The enhanced rate of wages appears to be in force everywhere, except in parts of Jammalamadugu in *Cuddapah*, at Arconum in *North Arcot*, Gudur and Venkatagiri in *Nellore*, and Trinomalai in *South Arcot*.

11. *Gratuitous Relief.*—The following are the district totals:—

Districts.	28th July.	4th August.	
Kistna	2,975	6,067	+ 3,092
Nellore	42,441	47,410	+ 4,969

* Kistna	2,975	6,067	+ 3,092

* Particulars not given.

There is again a terrible increase in the number of those dependent upon Government aid for their subsistence; the four districts of Bellary, South Arcot, Salem, and Coimbatore contribute more than half the excess; in fact in all districts except Kurnool and Malabar, the increase is very considerable. The distribution of those relieved between camps and villages in the preceding statement shows that there has been a wide extension of village relief. In Bellary and South Arcot the increase of numbers occurs chiefly under this head; in Chingleput it is distributed nearly equally between camps and villages; in Salem about one-third of the increase comes under the former head; whilst in Coimbatore gratuitous relief is almost entirely confined to the distribution of cooked food at relief-houses, the numbers relieved by money-doles in their own villages being insufficient.

12. The falling off in the number of three-pie children occurs in Kurnool, North Arcot, and Madura; owing to stoppage of works in Wallajah taluk of North Arcot over 4,000 children ceased to receive the allowance. In Nellore and Bellary there was an increase under this head. The marginal figures show the progress of measures taken for gratuitous relief, the figures for the past week being adopted for the Kistna and partially for Kurnool. The increase in the number of relief centres occurs chiefly in Salem and Coimbatore; under village relief the returns show that the system was considerably extended in Chingleput and in North Arcot, and Salem in a lesser degree. In Bellary relief is apparently afforded in fewer villages, though numbers have risen so considerably; the returns are, however, defective, Alur and Raidrug being omitted. The Nellore returns are also not complete, and the Collector estimates the inmates of camps at about 44,100 instead of 40,709 as entered. In *Cuddapah* the increase occurs chiefly under village relief in Pulivendla, Proddatore, Jamalamadugu and Budwail, where distress is on the increase; in *Bellary* the taluks of Bellary, Anantapore, and Dharmaveram contribute most largely; in *Chingleput* the Madurantakam total is much in excess of that for the preceding week, but the previous returns appear to have been defective; in *North Arcot* the greater intensity of distress has swelled the numbers generally throughout the district; in *South Arcot* about three-fourths of the increase occurs in the Trikalur taluk; in *Madura* the pressure has become more intense in Tirumangalam and Periacolum especially; in *Coimbatore* the sub-division furnishes almost all the additional recipients of gratuitous relief; and in *Salem* the taluks of Salem, Darampuri, and Krishnaghiri are mainly responsible for the very large accession of numbers. In Tripatore

	28th July.	4th August.	
Number of relief centres	450	488	+ 38
Inspection circles formed	786	796	+ 10
Villages in which relief was given ..	8,569	8,826	+257

and Uttengiri extensive transfers from village relief to camps and relief houses have taken place; this is not in accordance with the wishes of Government, who are desirous of seeing the village relief system developed; the matter should be explained.

13. The following statement shows the ratio of reported mortality in camps and villages, calculated on the average strength for the week under review and that preceding. In North Arcot and Cuddapah the death rate is very high:—

Districts.	Camps and relief houses.			Village relief.		
	Approximate strength.	Deaths in the week.	Ratio per mille per annum.	Approximate strength.	Deaths in the week.	Ratio per mille per annum.

* Inclusive of those employed on the Buckingham Canal.

15. Grants sanctioned by the Board up to date aggregate Rs. 2,44,75,493.

16. The following statement shows transactions under the Land Improvement Act:—

	In the week.	To the end of the week.
	Rs.	Rs.
Nellore	7,142	1,01,823
Cuddapah	1,355	1,36,961
Bellary	5,775	2,70,790
Kurnool	...	12,330
Chingleput	12,885	105,360
North Arcot	6,520	33,206
Madura	7,250	75,171
Tinnevelly	...	32,900
Coimbatore	1,890	23,299
Salem	3,660	1,10,467
Total ...	46,477	9,02,307

Advances to weavers are noted below:—

Cuddapah	749	5,139
Bellary	3,802	57,856
Madura	1,416	10,351
Coimbatore	2,750	14,969
Salem	32,702	3,04,196
Total ...	41,419	3,92,511

17. The usual statement of establishments is enclosed; the cost is Rs. 1,33,300 per mensem.

18. The average strength of resident paupers in Madras camps was 12,881 and of non-residents 14,420. Of the 12,256 paupers resident on the 4th August the several districts contributed the numbers marginally noted. The decrease as compared with last week is due to the relegation of paupers to the districts to which they belong. The fresh admissions during the week were 3,560, of which 2,051 came from Chingleput and 1,296 from North Arcot. The numbers employed on various works outside the camps including the junction canal were 11,279. The strength in hospital on the 4th August was 857; deaths numbered 258 (of which 246 took place in hospital) or in the ratio of 962 per mille per annum. The outlay during the week was Rs. 20,667 and up to the end of the week Rs. 7,58,308. The President of the Municipality had 3,810 paupers in the Sattangad relief camp and 2,412 on works on the date above-mentioned. His outlay during the week was Rs. 1,951, and up to the end of the week Rs. 68,980.

Chingleput	6,662
North Arcot	4,636
Nellore	708
Other districts	250
Total ...	12,256

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE, AGRICULTURE AND COMMERCE.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING THE 30TH AUGUST 1877.

GENERAL REMARKS.—No report has this week been received from Madras or Mysore. In Bombay there has been an abundant fall of rain in Khandesh, and good falls also in Násik, Ahmednagar, Tanna, Broach, Surat and Kolaba; more is required in North Guzerat, the Eastern part of Poona, Sholapur, Satara, Dharwar and Kaládgi; in Sind the river is still very low, and the crops are suffering greatly. The numbers on relief works are 279,533, and on charity (including children) 125,960, being 14,739 more and 5,498 less than last week respectively. In the Central Provinces the rain during the week has been general and copious, except in the Upper Godávari district, where the crops are suffering; elsewhere prospects are favourable, except in Saugor and Damoh, where the rice has suffered from the recent want of rain. In Berar there has been a good fall, which has much benefited the crops. From Central India good rain is reported in Malwa, where the crops have revived and prospects (except those of Indian-corn) are good; in Gwalior there has been no rain and distress continues. In Rajputana rain has fallen in Jeypore, and showers are reported from parts of Serohi, Marwar, Meywar, Harowtee, Jhallawar, Bhurtpore and Ulwur; the rain has hitherto been slight and partial, but it has done some good; fodder is reported to be very scarce. In Bengal excessive rain in some of the Eastern and Central districts has somewhat damaged the rice; prospects are however on the whole very favourable, though in parts of Behar insufficient rain still retards the transplantation of the late rice. In Assam there has been little rain, but the break is beneficial and prospects are favourable. In Burma the rainfall continues copious, and floods are reported to be still injuring the crops in places. In the North-Western Provinces there has been good but rather partial rain in the Benares and Allahabad divisions; heavy showers have fallen in the Meerut division and Rohilkhand; prospects are still bad in Agra and Jhansi, where some but trifling showers have fallen. In Oudh beneficial rain is reported from parts of Lucknow and Sitapur, but the general condition of the province is still unfavourable. In the Punjab there has been a beneficial fall at Ráwalpindi, and slight rain in Hissar and Umballa; elsewhere the returns are blank; there is no general improvement in prospects.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Madras—	...	Report not received.
Bombay— (Aug. 30th)		
Sind— („ 29th)		
Kurrachee ...	*Nil*	River on 27th 14 feet 1 inch, last year 18½ feet, normal height 16 to 17 feet; prices rising everywhere; no pasturage; cattle dying in numbers; many immigrants from Kutch.
Shikárpur ...	...	Crops on bheel lands well; river 11 feet 6 inches, 4 feet 2 inches lower than on same date last year; rice and *maká* lands suffer from insufficiency of water; *rabi* prospects bad; price of grain rising owing to disastrous fall of river; small-pox in Shikárpur taluka.
Hyderabad ...	...	River 14 feet on 28th against 18 feet 7 inches on same date last year; average of 10 years ending 1867 16 feet 3 inches; average of past 9 years 16 feet 10 inches nearly; no signs of rain; southern districts greatly in want of water; fever commencing.
Upper Sind Frontier ...	*Nil*	Weather warm during day, cool at night; water-supply low in all Government canals in district; crops suffering.
Guzerat— (Aug. 29th)		
Ahmedabad ...	·03	Total rainfall 8·72; crops suffering.
Kaira ...	Slight showers in 3 talukas.	Rain not sufficient to be of benefit to crops, some portion of them saved by irrigation, the remainder fast withering; weather cloudy; public health good.
Surat ...	3·57 in Surat; moderate in all talukas.	More rain wanted; crops except rice and *bajri* improving; cholera in Surat and Bulsar, 33 deaths.
Broach ...	1·38	Total rainfall 8·04; fall general; prospects somewhat improved.
Khandesh and Násik— (Aug. 29th)		
Khandesh ...	8·99 in Dhulia ...	Rainfall plentiful and general, total 15·60; crops reviving; prospects much improved; cholera abating, 131 deaths.
Násik ...	3·0 in Malegaon; 1·50 in north talukas; ·50 in other talukas.	Rainfall general; prospects of more rain; 81 deaths from cholera.

At page 2323 of the Supplement to the *Gazette of India* of the 25th August, in the rainfall column opposite Vizagapatam for "8·0 in 12 taluks" read "·8 in 12 taluks."
Opposite South Arcot for "on works 7,290" read "on works 729."
At page 2324, in the rainfall column opposite Nilgiris for "1·85" read "2·85."

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bombay—*concluded.*		
Konkan— (Aug. 29th)		
Tanna ...	1·09	Total rainfall 42·91; agricultural prospects on coast bad, but rain has begun to fall and there is a chance of improvement; prices of grain very high; cholera continues in 4 talukas.
Deccan— (Aug. 29th)		
Poona ...	Average ·20	Rainfall from 5th June 11·51; rain wanted everywhere; crops have dried up in east; a few cholera cases in the district.
Ahmednagar ...	1·26	Total rainfall 11·81; fall beneficial to withering crops; cholera in 5 talukas, cases 44, deaths 14.
Sholapur ...	...	Rain required soon for young crops; prices high; 21 deaths from cholera.
Satara ...	*Nil* in Satara; slight in few places.	Weather warm and cloudy; rain urgently required; crops in western talukas generally good, but withering in eastern; 14 deaths from cholera.
Southern Mahratta Country—(Aug. 29th)		
Belgaum ...	·13 in Belgaum; 1·13 in Athni; ·90 in Gokak; ·06 in Parasgad; ·6 in Chikori; *nil* elsewhere.	Total rainfall 29·78; improvement expected in drooping crops except in Parasgad where little rain, and in Bidi where none has fallen.
Dharwar ...	·03 in Hubli; ·82 in Nawalgund; ·10 in Nargund; ·09 in Shiggaon; ·10 in Ranibennur; ·37 in Hirekerur.	Rainfall insufficient in south; crops suffering generally, and here and there withering; sowing of late crops retarded; public health good; high mortality among destitute poor.
Kanara ...	1·2 in Karwar ...	Total rainfall 53·7; cholera continues, deaths 45; rain much wanted, 30 inches less than last year.
Kaládgi ...	...	Rain urgently wanted throughout collectorate; *kharif* generally withering except on banks of Krishna and Don rivers; cholera continues, deaths 31.
Kattywar and Gaekwar's Territory—(Aug. 29th)		
Rájkot ...	·54	Total rainfall 5·34; weather cloudy; crops suffering, more rain wanted; price of grain rising; health good.
Wadhwán ...	·20	Total rainfall 1·77; crops bad; health good.
Baroda ...	·20	Total rainfall 8·52.
		General Remarks.—The low state of the river in Sind causes anxiety there; recent fall of rain in Khandesh, Násik, Ahmednagar, Tanna, Surat, Broach, and Kolaba has improved matters in all those districts; more rain required in North Guzerat, east of Poona, Sholapur, Satara, Dharwar, and throughout Kaládgi; crops improved in Belgaum; heavy rain to-day in Bombay; on works 279,533; on charity 45,572; young children 80,388; prices *jowari* from 7¾ pounds per rupee in Dharwar to 24 pounds in parts of Khandesh.
Bengal— (August 30th)

Chumparun ...	·11	
Patna ...	·54	Health good.
Gya ...	2·05	
Shahabad ...	·13	
Hazáribágh ...	3·45	Health good.
Lohardugga ...	7·88	Fever prevalent.
Manbhoom ...	4·72	
Singhbhoom ...	4·09	District healthy.
Balasore ...	2·48	
Cuttack ...	·56	Health good.
Pooree ...	·94	Ditto.
		General Remarks.—In Bengal Proper excessive rain in some districts has somewhat damaged rice crops; otherwise prospects favourable except in Cooch Behar where rain is wanted; in Behar, *bhadoi* crop on the whole good, but in most districts transplantation of winter rice still retarded for want of sufficient rain; floods in Cuttack and Pooree have done good to late rice and some injury to early rice; good rainfall in Balasore and Chota Nagpore districts, and crops well reported of.
N.-W. P. and Oudh—		
Benares ...	·1 on 25th, ·1 to ·3 on 27th, ·2 to ·5 on 28th, and ·5 on 30th.	
Allahabad ...	·1 to 1·0 on 26th and slight showers in Phúlpur on 27th, on 28th 1·7 fell in Meja, 2·3 in Handia and ·1 in Bara, none since.	Wind variable.
Jhansi ...	Very slight shower on 23rd, and partial showers at Garotha on 26th; ·1 to ·3 on 28th.	Emigration to Malwa chiefly from Gwalior and Datia continues.
Agra ...	Light shower at head-quarters on 26th, and ·5 at Túndla on 27th, none since.	
Meerut ...	Good fall in Mawána and eastern pargana of Hapur and northern parts of Meerut on 27th, none since.	
Bareilly ...	Heavy shower on 25th and nearly 1·0 on 26th and 27th, in eight parganas out of nine, doing much good.	*Bajra* sowing going on actively; prices steady.
Kumaun ...	Heavy and general rain.	Rain most valuable for crops on the ground.
Lucknow ...	Slight rain on 26th and 27th, fair rain on 28th in pargana Lucknow, none elsewhere.	
Sitapur ...	A few drops on 27th and ·1 on 28th, 1·6 at Misrikh.	
Fyzabad ...	*Nil*	General heat and drought; irrigation from jhils going on in some places.
		General Remarks.—Good though somewhat partial rain throughout the Benares and Allahabad divisions; heavy showers have also fallen in Meerut and Rohilkhand; the condition of the Agra and Jhansi divisions and also of Oudh is still unfavourable; prices have not materially advanced during the week.
Punjab— (Aug. 29th)		
Delhi ...	...	Rain urgently needed; prospects gloomy; health good.
Hissar ...	·5 at Sadr ...	Prospects of *kharif* hopeless; cattle suffering from scarcity of fodder; health good.
Umballa ...	Very slight ...	No improvement to crops; health good.
Amritsar ...	*Nil*	Agricultural prospects gloomy; health good.
Lahore ...	*Nil*	Health good.
Mooltan ...	*Nil*	*Kharif* expected to be half an average; health good.
Ráwalpindi ...	1·33	Agricultural prospects improved; health good.
Peshàwar ...	*Nil*	Crops suffering greatly; health good.
Dera Ismail Khan ...	Slight ...	Crops suffering; health good.
		General Remarks.—There is no improvement in the agricultural prospects; slight rain fell during the week in some districts; the health of the province continues good.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Central Provinces—		
Upper Godávari (Aug. 25th)	·17	Cloudy; crops drying up; more rain wanted; cholera broken out; prices rising.
Sambalpur ...	5·1	Weeding and transplanting continue; prospects of crops good; prices steady.
Biláspur ...	5·14	*Kharif* doing well; fever prevalent; prices steady.
Raipur ...	5·66	Prospects of *kharif* crops favourable; weeding progressing; small-pox continues; prices rising.
Bálaghát ...	6·97	Cloudy; prospects of *kharif* crops very favourable; health good; cattle disease prevalent; prices steady.
Chhindwára ...	6·78	Prospects favourable; health good; prices falling.
Chánda (Aug. 26th)	·40	Transplanting rice continues, prospects of *kharif* favourable on the whole, but more rain wanted; prices rising.
Betúl („ 27th)	8·45	Prospects favourable; health good; prices stationary.
Bhandára („ 28th)	5·17	Prospects of crops much improved; weeding progressing; fever continues; prices easy.
Nágpur („ 29th)	2·68	Rain most opportune; prospects of *kharif* very favourable; health good; prices unchanged.
Mandla ...	1·14	Prospects favourable; but more rain wanted; fever decreasing; prices stationary.
Damoh ...	·85	More rain wanted; rice drying up; prices slightly risen.
Saugor ...	·92	Crops reviving; *jowar* and cotton good; rice very bad.
Seoni ...	5·95	Transplanting rice commenced; crops much benefited by recent rain.
Wardha ...	1·69	Prospects good; prices fallen.
Nimár ...	5·33	Prospects favourable; small-pox continues.
Hoshangabad ...	6·30	Prospects good.
Narsinghpur ...	1·50	Prospects fair; prices rising.
Jubbulpore ...	1·18	Prospects and health good.
		General Remarks.—Rain general during past week; the showers in most districts have been timely and copious, greatly improving the general prospects of the *kharif* crops; one exception must be made as regards the small Upper Godávari district where there has been little rain, and it is said the rice is drying up; rice has also suffered in the districts of Saugor and Damoh owing to want of rain.
British Burma— (Aug 30th).		
Arrakan Division— (Aug. 21st)	7·12 in Akyab ...	Public health and agricultural prospects good; cattle disease continues in portions of Akyab district.
(„ 28th)	12·0 in Akyab ...	Public health and agricultural prospects good.
Pegu Division—		
Rangoon ...	2·42	Public health good; a few cases of cholera reported from Hpoungleng; total rainfall 66·81 inches; prices of unhusked rice reported to be higher in district than in Rangoon town; stocks exhausted; clean rice still selling at Rs. 4-8 per basket; no relief to crops yet from floods; in Hlaing and Hmaubee seedlings damaged by excess of rainfall; in parts of Angyee prospects not very favourable, but as yet no cause for alarm; scarcity of rain to the north and east.
Bassein ...	4·0	Health good; total rainfall 103·6 inches; floods in northern parts subsiding; cultivation progressing in other parts.
Henzada ...	5·68 in week ending 25th instant; 3·75 in Yeaghin during week ending 20th.	Total rainfall in Henzada 58·94, in Yeaghin 41·20; 1 death from cholera reported from Kyoughin, otherwise public health good.
Prome ...	·81	Four deaths from cholera in Prome, 5 in Mahathaman, 3 in Shwedoung during a fortnight, 14 in Poungday, 35 in Shwelay; total rainfall 37·35 inches; cultivation steadily progressing.
Thayetmyo ...	3·22	Public health good; seedlings replanted in places destroyed by inundation; total rainfall 45·72 inches; river again rising.
Thonkwa ...	Rainfall steady ...	Health generally good; total destruction of crops by floods in Donabyoo and Yandoon townships; crops in Thonkwa and Shweloung townships have also partially suffered.
Tenasserim Division—		No report received.
		General Remarks.—No further decrease in prices of grain; stocks now very small.
Assam—		
Gauháti (Aug. 30th)	1·40	Weather very variable, becoming cooler; rice cultivation progressing favourably; public health good.
Sylhet („ „)	0·24	Sunny and high wind; prospects favourable.
Mysore and Coorg ...	...	Report not received.
Hyderabad Assigned Districts—		
Amráoti (Aug. 30th)	2·60	Crops much benefited by recent rain and prospects seem better.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Central India— (Aug. 29th)		
Indore ...	3·57	Total 17·28.
Gwalior ...	*Nil*	„ 4·95.
Rutlam ...	4·71	„ 14·73.
Neemuch ...	·52	„ 5·19.
Sutna ...	·90	„ 17·22.
Bhopal ...	...	In Sehore total fall to 23rd 16·40.
		General Remarks.—Prospects in Malwa good, except Indian-corn which has been damaged by long drought; drought in Gwalior where distress continues; emigration decreasing.
Rajputana—		
Jeypore (Aug. 30th)	1·6; showers throughout district.	If rain continues there may be 50 per cent. *kharif* crops; health good; prices lower.
Abu („ „)	·30	Clear and close; rain much wanted.
Sirohi („ 26th)	Moderate showers in Eastern Pargana.	Tanks, wells and health good; prospects in Eastern Pargana slightly improved; rain much wanted elsewhere; cloudy, hot.
Marwar („ 29th)	Slight showers in some districts; none at Jodhpore.	Fodder becoming very scarce.
Bikanir („ 28th)	...	Serious anxiety felt for rain; hot winds daily; fodder exceedingly scarce; cholera in certain villages; deaths reported between 90 and 100; prices rising daily.
Meywar („ 24th)	·13	Health good; prospects better; thundery and showery since 25th.
Harowtee ...	·40 in Deoli; ·10 in Tonk.	Heavier rain fallen in parts; rain has done good; prospects slightly improved; prices falling; close and cloudy.
Jhallawar (Aug. 24th)	Few light showers ...	Still and sultry.
Ajmere („ 30th)	...	Heavy clouds last night with few minutes' drizzle, not enough to alter prospects; unprotected *kharif* crops lost; great anxiety about cattle.
Bhurtpore („ 29th)	·10	Wind easterly.
Ulwur ...	·16; partial showers...	Cloudy; prices steady; health good; scarcity of forage much felt; anxiety general.
Nepal (Aug. 21st)	2·825	Agricultural prospects fair; there has been good rain, and the prospects of the rice crop are much improved.

G. H. M. BATTEN,

Offg. Secy. to the Govt. of India.
